We need to draw lessons.

CMO and CSA are wonderful men but they are both in new territory 4:02 pm

Talked to Sedwill and he is still miles off pace 4:08 pm

Yup. Nothing like it since at least 1918 and maybe much longer.
But the main problem is not them — they and SAGe doing great job on the science/ models, the Warners have interrogated — the problem is CabOff and DHSC haven't listened and absorbed what the models truly mean. And timing wise you have been told a bunch of stuff based on 'time to peak' but not 'time to NHS collapse' which is an extremely critical difference!! 4:10 pm

Afraid so. This is what the Warners have been screaming at me. Patrick has been saying 'the policy machine is off the pace' — he said it again to me just now — but YOU need to tell Sedwill this. The fucker shd be in the office now 4:12 pm
