Jeeez. 7:49 pm

15/10/2020

I must say I have been slightly rocked by some of the data on covid fatalities. The median age is 82 - 81 for men 85 for women. That is above life expectancy. So get COVID and live longer

Hardly anyone under 60 goes into hospital (4 per cent ) and of those virtually all survive.

And I no longer buy all this nhs overwhelmed stuff.

Folks I think we may need to recalibrate.

7:53 pm

There are max 3 m in this country aged over 80 7:57 pm

Cain Lee

All understood - but how does this change the policy? Still not politically viable yet to change course - but maybe once mass testing up and running
