We can't just give up in fighting the virus. We have to stop it regionally now or we will be in full national lockdown in a fortnight.

PM not willing to go further in terms of national mandation. Happy to go further if local leaders want to go further. But PM feels your Cabinet colleagues and party won't support more as national imposition.

It's not national imposition it's local. What's changed overnight? When can I make the case for action - this won't work and we will massively regret it
