Quote for clearance re additional 2 million moderna doses

Health and Social Care Secretary Matt Hancock said:

"Every week, we are getting more positive news about the range of vaccines in development, and thanks to the work of our taskforce the UK has pre-ordered more hundreds of millions of doses from those companies most advanced in their work.

"This includes buying a further two million doses of Moderna's vaccine, on top of the five million we've already secured.

"With a wide range of vaccine candidates in our portfolio, we stand ready to deploy a vaccine should they receive approval from our medicines regulator, starting with those who will benefit most."
