Love how they manage to chuck in Owen Paterson and Randox. Guardian are utterly obsessed with trying to nail him

Just had UQ on: To ask the Secretary of State for Health and Social Care what recommendations Public Health England has made regarding increased risks of black Asian Minority Ethnic (BAME) people catching and dying of covid-19; and what action the Government has taken accordingly

There's another debate on BAME deaths re covid that Jo tried unsuccessfully to get Kemi to take. She should make the argument that if Kemi wants to stand at the dispatch box in a couple of months and say what a great job she's done on her review, then she needs to take these debates now...

Kemi has pushed back and supposedly has No10 on her side. I've been pushing to everyone who will listen that Jo C doing this is a _terrible_ idea not only optically, but substance wise too.

It's a minefield that I don't think she will emerge well from.

We have very few options... I also don't understand why we have a GEO if they aren't leading these things.

Matt - here is a quote to approve for the PN for your pharmacy visit...

"Community pharmacy teams have been at the forefront of this pandemic, and I want to express my gratitude to each and every one of them for supporting this country and local community.

"Traditional face-to-face services, combined with embracing technology and innovation have been central to how pharmacies have continued to serve their communities. In doing so, they have made kept people safe and well."
