OFFICIAL

This was the version agreed by NERVTAG, and JVT.

We took all his points as agreed and corrected to revert to the document agreed by NERVTAG and then published with his agreement.

Susan

Dr. Susan Hopkins
Healthcare-Associated Infection & Antimicrobial Resistance Division
Deputy Director, National Infection Service
Public Health England

susan.hopkins@phe.gov.uk

I&S

HCAI & AMR Division Mission Statement:

To protect people from healthcare-associated and antimicrobial resistant infections, through world-leading public health microbiology, outbreak response, surveillance, research and interventions.

These changes are far too extensive for me to sign off on. Some I plain don't agree with (how the NHS not use agency staff when in peak weeks it may need to manage 500,000 patients?). Others I'm not qualified to comment on like Cat B waste. Is the team aware that as off today ACDP ruled its no longer an HCID.

This will have to go back to Ben and Lisa or I will be signing off on something that is significantly different to the one in use by Scotland and signed off by NERVTAG.
