WHAT ARE THE BARRIERS TO GETTING A COVID TEST FOR A CHILD ?

CHILDREN CAN BE:
ASYMPTOMATIC - HAVE NO SYMPTOMS
ATYPICAL - HAVE UNUSUAL SYMPTOMS

There has never been a
child-focused
awareness campaign
to help identify
COVID-19 in
children.

Swabs are too big to
fit up little noses.

It is difficult to hold
and swab a small child.

The questions on
the Gov website
ask you
to tell the truth.....

but list symptoms that
adults get.....

CHILD COVID CASES MUST BE ACCURATELY RECORDED. DATA INFORMS
DECISIONS IN EDUCATION & HEALTHCARE.
GET A TEST. IT COULD PREVENT MISDIAGNOSES IN THE FUTURE. TEST TO
