Subject: COMMISSION: Impacts of non-pharmaceutical interventions

Dear All,

Thank you so much for your engagement with the ESSIG to date, it is much appreciated!

As part of planning, HMG is considering potential packages for non-pharmaceutical intervention options e.g. school closures and self-isolation. SAGE have developed advice on the efficacy of these, which will be discussed at COBR(M) tomorrow, 04 March.

Building on SAGE's table, attached for reference, Departments are requested **fill in the table attached** outlining impacts, challenges and cross-government interdependencies for their sectors if that intervention option is taken forward. This could include societal impacts, as well as operational. Where possible, if you have quantitative information or predicted numbers impacted, please do include those. We would also appreciate input from the DAs on the impacts of these interventions on their communities.

This is work that you are likely already undertaking in your departments. To note, the SAGE table is draft, with a finalised version being developed this evening. This is not expected to substantially change, but will be shared with the group once it is ready.

We will collate this into a high-level overview through the table attached which alongside a covering note will go to COBR(O) on Friday 6 March and then to Minister's at the PM-chaired COBR(M) on Monday 09 March, to inform decision making.

Please send returns by **1700 on Thursday 5th March** to CCS control - c: Irrelevant & Sensitive

ESSIG will be the vehicle for delivering on this piece of work and there will be time during the ESSIG meeting (11am - 04/03/2020) to discuss this further. However, please do not hesitate to get in contact if you have any further questions.

Kind Regards,

Please do not send personal data, in particular sensitive or special category data, to the CSS Control mailbox as we do not need this information for the purposes of the Covid-19 response. For your information, personal data is any information that relates to an identified or identifiable individual. Sensitive, or special category, data includes personal data concerning or revealing health. Therefore, information such as patients’ details and plane manifests should not be sent to the CSS Control mailbox.
