DoH and PHA are unaware of any modelling taking place in Northern Ireland and have communicated same to DHSC. To quote our PHA colleague "we rely on the PHE modelling subgroup work which is shared through the UK IMT".

Other CMO's are on the call. I think that this request is for modelling rather than standard briefing.

A briefing is being prepared by Health Protection Branch. It will be ready on Sunday. CMO will be supporting Minister Swann at COBR(M).

Ok thank you. If you are clear that this is the case. Thank you.

Do you know how CMO is planning to support our Ministers on Monday?

Will any NI information be available?

In all of their correspondence, CCS have been clear as to what is a Department (Whitehall) and DAs. There has been no request for DAs to contribute, just as there is no request for DAs to contribute to the XHG sitreps.

We have not planned to do anything with this.

But this is a national exercise. NI will need to input as Minister Swann, FM and dFM are attending COBRA on Monday when this is going to be discussed.

No – the request is for information from Departments – not DAs.

Subject: COMMISSION - IMPACTS OF NON-PHARMACEUTICAL INTERVENTIONS - BY 1300 SAT 7 MARCH

Good afternoon,

Please could all Departments provide a return **by 1300 on Saturday 7 March**, with a named contact and number that the Cabinet Secretariat can liaise with on Saturday and on Sunday for any further details.

Please email returns to john.mcmichael@cabinetoffice.gov.uk, NR @cabinetoffice.gov.uk and NR @cabinetoffice.gov.uk, copying in ccs.control@cabinetoffice.gov.uk

Measures:

- 1. Home isolation of symptomatic cases (7 day duration)
- 2. Whole household isolation where there is a symptomatic case (14 day duration)
- 3. Social distancing for vulnerable groups [in line with DHSC description of policy options]

DHSC will circulate a description of each of these measures via CCS Control, including scope, duration and what activity would be limited, by 6pm Friday. Departments should apply the assumption about effect of the measures that are being circulated by CCS this evening.

ALL DEPARTMENTS to set out, for each of the 3 potential interventions (or their variants):

- What are the impacts of these measures? As relevant, please consider these:
- on people and families e.g. on health, income, benefits, education, childcare, wellbeing, medical treatment, food supply, leisure activity?
- On public service delivery (e.g. on welfare, health and social care, education, policing?)

There will clearly be interaction between these e.g. the effect on vulnerable elderly person in receipt of social care at home, would intersect with the wider effect on social care provision, through measures affecting the workforce.

These impacts should be quantified wherever possible in terms of the numbers affected and the level of risk.

- Where relevant, please break these down by impact on particular cohorts, including by age, household type (including care homes) and income;
- Are there specific regional impacts?
- Are there specific implications for devolved policy areas and the Devolved Administrations?

We want to create case studies to illustrate the impacts on individuals and households. To enable this, please consider the impacts for specific cohorts, for example:

- Over 70 years old single household with care needs
- Over 70 in good health and still working or volunteering
- Working age adults cohabiting

- Family (eg two parents two children school age)
- Multi-generational household (over 65, working age, children)
- Low income households (children on free-school meals)

Mitigations

- What actions could be taken to mitigate each of these impacts, including public sector, private sector and voluntary sector options?
- What would the effect of each mitigation measure be?
- How would these actions be delivered? How much would they cost and how quickly could they be delivered?

With thanks,

CCS Control
