That's the only change so far Catherine.
- CC** **Catherine Calderwood** 28 Jan 2020 9:02 AM +00:00  
Thank you Chris. Anything from your media briefing yesterday?
- OW** **Owner of the cell phone** 28 Jan 2020 9:06 AM +00:00  
I laid out the 4/5 scenarios. Some media picked it up. They were mainly obsessed about the details of how to self isolate. Paul Cosford did a good analogy that it is like how you would behave if you had flu and did not want to pass it on.
- CC** **Catherine Calderwood** 28 Jan 2020 9:07 AM +00:00  
Thanks. Not that complex!!
- GS** **Gregor Smith Cmo Scot** 28 Jan 2020 11:05 AM +00:00  
Just been in discussion with Soren Brostrom, the DG of Danish system. Has told me Germany now confirmed first case but appears to be transmission within the country rather than China. Has anyone else received this info?
- OW** **Owner of the cell phone** 28 Jan 2020 11:06 AM +00:00  
Yes but informally. We don't have firm data.
- MC** **Michael McBride Cmo** 28 Jan 2020 11:31 AM +00:00  
Appears to have made the papers in Rol so in public domain.
- MC** **Michael McBride Cmo** 28 Jan 2020 12:12 PM +00:00  
Having considered the EWRS notification as reported appears to be consistent with asymptomatic transmission during the incubation period.
- OW** **Owner of the cell phone** 28 Jan 2020 12:14 PM +00:00  
Agree. Compatible, probable but not conclusive. Nervtag agree that if there is asyptomatic transmission it is likely (not definite) to be lower infectivity than symptomatic

OW

But we should now assume it may be happening
