Subject: RE: PHE Modelling work

We should avoid calling it a STAC – it isn't – and what we need is the same level of urgency as it seems is happening in PHE/DHSC.

Subject: Re: PHE Modelling work

Thanks Andrew, this is very helpful. Please let me know if there is anything that you need from me in the interim. Happy to call if this is easier?

We will continue setting up a STAC and work on better sharing of intel. We will write to SAGE early next week informing them as such, including those involved. Once we have the secure shared drive and mailbox in place we will forward details.

Have not received read-out from Thursday's SAGE yet which concerns me!

Best wishes

Rob

Subject: PHE Modelling work

Dear Rob

We have just come off the PHE IMT.

PHE have reported, through Yvonne Doyle MD, that work on the modelling to inform scenario planning, 'next stage guidance' including on containment strategy, has been accelerated and will commence today.

This follows a Prime Ministerial meeting last evening and planned COBRA meeting on Monday.

I have requested that DAs / PHW be involved from the outset – and this was approved.

We are therefore sending in an email of participants from Wales to PHE.

Dr Chris Williams will lead this for PHW and I have asked Chris to forward your email contact details to PHE, so that you can be involved (as available) also. We will keep you updated and I will discuss / update on this further at the PHW/WG daily call at 3pm.
