Subject: For response by COP 4 September - evidence on intended impacts and harms of future covid-19 interventions

Attachments: [REDACTED]

Dear all

As trailed at the covid-19 birdtable, please find the attached document for your attention and action by 4 Sept. It seeks to pull together an evidence review as preparation for any future national, regional or local interventions recommended to Welsh Ministers. The list of interventions is not exhaustive and is based on the Coronavirus Control Plan, published in August 2020. We have pre-filled the document as far as is possible, using the information the 21 day review team holds in terms of easement assessments and TAC reports.

Rob, Brendan and Craiger, I would be very grateful if TAC could provide up to date evidence around intended health impacts, including providing a steer on which interventions are most effective in reducing transmission, all things being equal;

NR and **NR** and **NR** emailed about this last week. I would be very grateful if you could amend the document to provide any updated evidence around the economic harms associated with the proposed interventions, including information on known sectoral or geographical vulnerabilities, (e.g. closure of accommodation may disproportionately impact on areas of Wales that rely more heavily on tourism);

I have hopefully sent this email to policy leads for HE&FE, childcare, shielding, different economic sectors and health and social care. Please forward this on if there's anyone I have missed out. I would be grateful if you could consider all of this as it relates to your areas, including evidence of the impact of interventions on wellbeing and what integrated impact assessments have found in terms of the impacts on people with protected characteristics.

Any questions, please let me know

NR
