Hi Frank, as discussed I have included recommendations at the top and taken a more enquiring line re: community testing. Let me know if you want to test this with Chris Whitty first, if not I would be happy to send this to SAGE secretariat, Patrick Valance and Chris Whitty and ask them if it could be discussed today. The TAC group are supportive of sending the paper, also note Scotland sometimes take a different line....

Best wishes
Rob

Hi Frank

Please let me know if you are happy for this paper to be shared with SAGE this morning. There are some lines in the sand in the paper so would welcome your steer.

Also if we don't have this in train then we can start working with Comms on what vulnerable means. Important to get this right particularly for children and adults with conditions.

Speak later
Rob

Subject: TAC- Briefing 15-03

Hi Frank, please find attached a draft TAC paper that has been brought together following our earlier group TC. In the spirit of openness and UK working I would like to share this draft advisory paper with SAGE ahead of the meeting tomorrow.

It has a series of recommendations which have been made from an evidenced based perspective. If you don't think this is a sensible idea to share with SAGE we will just use it for internal briefings.

I am hoping to include another epi graph (+/- interventions) before 8:30am as well as take on board any comments from the group. SAGE is at 1pm tomorrow but conscious that you may also be in COBR at 9am.

Happy to discuss, have a good evening
Rob
