Subject: RE: COMMISSION - IMPACTS OF NON-PHARMACEUTICAL INTERVENTIONS - BY 1300 SAT 7 MARCH

Chris,

One additional, unique (albeit extreme) dimension for Northern Ireland in the youth services sector. Isolation of youth services staff in any given locality would result in the cessation of youth services in that area; we have no equivalent of the teacher substitution regime for youth services, such as a “bank” of qualified youth workers who are happy to work on a “locum” basis (akin to the NI Substitute Teachers’ Register). There is limited scope for latitude in staffing levels for youth services as registration requires prescribed ratios of supervisors to young people. There are areas in Northern Ireland where youth services have played and are playing an important role in supporting communities and young people at risk of falling under the influence of criminal/paramilitary activity, operating in the context of the Tackling Paramilitarism Strategy and in conjunction with DOJ colleagues. This work has been particularly important recently in areas such as Creggan. I wouldn’t wish to over-egg the scale of this issue, but it is nevertheless a unique DA dimension.

Derek

Subject: FW: COMMISSION - IMPACTS OF NON-PHARMACEUTICAL INTERVENTIONS - BY 1300 SAT 7 MARCH

Colleagues

To see the latest information from CCS. I don’t think this makes the task of answering the challenging information request any easier.

In the time available I simply don’t see how we can perform the sort of granular modelling that CCS seems to want.

Michael – I can pull something together on the non-health aspects of this, based on input from Derek and Tracy. Do you wish that to go from TEO (with health input) or from DoH?

Tracy – as you say, your COVID 19 plan helpfully builds on your BCP. Is there anything more that we can say in relation to the effect on customer demand of these proposed measures?

Subject: Re: COMMISSION - IMPACTS OF NON-PHARMACEUTICAL INTERVENTIONS - BY 1300 SAT 7 MARCH

Good evening,

Please find attached returns from DHSC and SAGE to aid in the production of the commission requested below. To note, these have also been shared under Sunday's calling notice.

Thanks

Good afternoon,

Please could all Departments provide a return **by 1300 on Saturday 7 March**, with a named contact and number that the Cabinet Secretariat can liaise with on Saturday and on Sunday for any further details.

Please email returns to john.mcmichael@cabinetoffice.gov.uk, NR @cabinetoffice.gov.uk and NR @cabinetoffice.gov.uk, copying in ccs.control@cabinetoffice.gov.uk

Measures:

1. Home isolation of symptomatic cases (7 day duration)
2. Whole household isolation where there is a symptomatic case (14 day duration)
3. Social distancing for vulnerable groups [in line with DHSC description of policy options]

DHSC will circulate a description of each of these measures via CCS Control, including scope, duration and what activity would be limited, by 6pm Friday. Departments should apply the assumption about effect of the measures that are being circulated by CCS this evening.

ALL DEPARTMENTS to set out, for each of the 3 potential interventions (or their variants):

- What are the impacts of these measures? As relevant, please consider these:
 - on people and families - e.g. on health, income, benefits, education, childcare, wellbeing, medical treatment, food supply, leisure activity?
 - On public service delivery (e.g. on welfare, health and social care, education, policing?)

There will clearly be interaction between these e.g. the effect on vulnerable elderly person in receipt of social care at home, would intersect with the wider effect on social care provision, through measures affecting the workforce.

These impacts should be quantified wherever possible in terms of the numbers affected and the level of risk.

- Where relevant, please break these down by impact on particular cohorts, including by age, household type (including care homes) and income;
- Are there specific regional impacts?
- Are there specific implications for devolved policy areas and the Devolved Administrations?

We want to create case studies to illustrate the impacts on individuals and households. To enable this, please consider the impacts for specific cohorts, for example:

- Over 70 years old single household with care needs
- Over 70 in good health and still working or volunteering
- Working age adults cohabiting
- Family (eg two parents two children school age)
- Multi-generational household (over 65, working age, children)
- Low income households (children on free-school meals)

Mitigations

- What actions could be taken to mitigate each of these impacts, including public sector, private sector and voluntary sector options?
- What would the effect of each mitigation measure be?
- How would these actions be delivered? How much would they cost and how quickly could they be delivered?

With thanks,

CCS Control
