PH OPSI 07	Risk to the delivery of the Public Health objectives resulting from a combination of reasons for staff turnover, and some long-term sick leave Potential for a suboptimal response and inadequate response to an outbreak of any serious infection including healthcare associated infection. Potential difficulties in delivering a vaccination programme. (Related to a recommendation in the Hine Report). At 1st April 2019 a significant number of staff had left their posts in PHD leaving a gap in skills mix and expertise. Recruitment to some senior posts was unsuccessful Health Improvement has a high number of staff on temporary contracts.	Review underway looking at staffing levels/service pressures and monitored closely by PHMT. Work being reprioritised and priority tasks being clarified. However priority work has been deferred. Scrutiny committee in place to review staffing and prioritise business critical posts. Proposals for restructuring have been approved and are being implemented. Some Temporary Posts have been extended between 6 and 12 months these-will continue to be reviewed until DoH approval given for the recruitment of permanent positions. Working with HR to implement a number of steps with individuals in relation to long term sick and absenteeism due to work related stress.	Likely	Moderate	Mediu m	Consider piloting of apprentice/deputy model to develop future PH practitioners by September 2021 Business cases are being developed to use programme funds to support appointment of additional non-consultant screening and Health Protection staff (June 2021) Business Case above to include the need for Band 3 support (June 2021) Health Improvement Senior management tier in Health Improvement now has 100% of staff in permanent contracts (as at 27th March) 31% of staff remain in temporary contracts. Senior Officer recruitment process is underway (June 2021) Joint HP and SD&S Consultant interviews are planned for May 2021 and will hopefully also provide a waiting list for future posts within the next 12 months. Risk Ref	Description of	Existing Controls	Likeli-	Impact	Risk	Treatment / Action Plan	Lead	Status	Review
	risk		hood		Rating	& Timescale	Officer	 -	Date
PH SQ 01	Historic funding levels and redeployments due to covid within the screening division mean staffing levels no longer meet requirements to support increasingly complex and expanding commissioning and quality assurance functions of the PHA All adult screening programmes were paused (fully or partially) during the first wave of the pandemic (March – June 2020). Screening for antenatal infections, newborn bloodspot and newborn hearing continued It is estimated that it will take at least 12-18 months to restore all population screening programmes following the 'pause' and in the ongoing context of social distancing and infection control measures.	Additional short term staff secured: - 1 PA of consultant from service development to support DESP - Extension of contract of former clinical lead for AAA screening to undertake public health functions - Temporary increase in hours of part time consultant - 2 Agency staff employed (1 band 4 admin and 1 band 7 programme support officer) - Temporary band 7 bowel screening programme manager post created Band 7 programme manager post created Band 7 programme manager post created Band 7 programme manager post created Plans were developed and implemented to recommence screening programmes in summer 2020, with funding provided in 2020/21 to deliver additional capacity where possible Consultant screening group established to provide regional oversight	Likely	Major	HIGH	Progress recruitment processes to fill vacant posts. (by June Sept 2021) Review programme budgets to assess potential to redirect funding to staffing budget. If available, bring forward business case for approval to secure recurrent funding for band 7 posts (bowel and cervical programmes) and admin support for newborn programmes in first instance. (by June Sept 2021) Explore options to secure additional data analytics input to screening programmes and bring forward business case if required. (by Sept 2021) Engage with Trusts and HSCB in further development of recovery plans to rebuild services; bring forward business cases as appropriate (review June Sept 2021) Input to development work on a regional cancer recovery plan to include screening programmes. (June 2021)	NR	Directorate	June Sept 2021

PH SQ 02		Regular updates provided to HSC Rebuilding Management Board and DoH Sponsorship meetings. Ongoing monitoring of activity and capacity within each programme with escalation of risks and concerns as required.	Likely	Major	HIGH	IPTs to be progressed against 2021/22 screening budget, with slippage prioritised to support covid recovery (by Sept 2021)	NR	Directorate	June Sept 2021

RISK TITLE: Call/Recall Audit Issues

ADDED TO RISK REGISTER: October 2020
DIMENSION: Safety and Quality

Risk Ref	Description of risk	Existing Controls	Likeli- hood	Impact	Risk Rating	Treatment / Action Plan & Timescale	Lead Officer	Status	Review Date
	An internal audit of the call-recall functions, provided by BSO, for the bowel and cervical cancer screening programmes undertaken in Nov 2019 identified issues within the governance, risk management and control framework. These could lead to failures in the administrative functions of these programmes, such as patients being missed or not managed appropriately through the screening pathway.	Quarterly performance management meetings have been established with BSO, with review of progress against the audit action plan. A business case has been brought forward by BSO for £185k additional recurrent funding for staff and an offer of part funding of this in year was made. Funding to cover the gap has been requested within the recent bidding round to DOH (2021–2024). Funding approved against BSO business case to support enhanced governance of call recall functions.	Likely	Major	HIGH	Awaiting outcome of bid to DoH for additional funding (review June 2021) IPT for additional resources to be progressed once funding confirmed. (review June 2021) Additional impact of moving to manual data transfers of cervical screening histories between NI, England and Wales to be scoped.	NR	Directorate	June Sept 2021

RISK TITLE: IT Systems Screening ADDED TO RISK REGISTER: October 2020

ADDED TO RISK REGISTER: October 2020
DIMENSION: Safety and Quality

Risk Ref	Description of risk	Existing Controls	Likeli- hood	Impact	Risk Rating	Treatment / Action Plan & Timescale	Lead Officer	Status	Review Date
PH SQ 04	The IT systems under-pinning individual screening programmes are becoming outdated, with some at risk of losing functionality over the medium term 3-5yrs. This will compromise the safe delivery of these programmes with risk of gaps in functionality, systems not fit for purpose, increasing need for manual processes and potential that system may no longer be supported.	Processes are in place within each programme to manage any identified current risk – use of manual processes/reporting/mon itoring/failsafe systems. A formal technical risk assessment of the Screening individual IT systems has been completed - commissioned by BSO ITS. commenced. This is examining the scope for existing systems to operate safely up until 2025, i.e., when a strategic	Likely	Major	HIGH	Work with BSO ITS to complete the gap analysis work across all screening systems (May 2021) Participate in a workshop hosted by with DSCNI to inform and jointly develop a strategic way forward (May Sept 2021)	NR	Directorate	June Sept 2021

Breast Screening IT System Screening December 2020 **RISK TITLE:**

ADDED TO RISK REGISTER: DIMENSION: Safety and Quality

Risk Ref	Description of risk	Existing Controls	Likeli- hood	Impact	Risk Rating	Treatment / Action Plan & Timescale	Lead Officer	Status	Review Date
PH SQ 13	From April 2021 the safety and delivery of the NI Breast Screening Programme and Surveillance Programme for Women at Very High Risk (VHR) of Breast Cancer will be compromised without the acquisition and implementation of an additional piece of software—Breast Screening Select (BS-Select)—which provides a functional link between NHAIS (the primary care demographics database) and the National Breast Screening System (NBSS). The programme will no longer be able to work to, and be properly monitored against, national standards and guidance as NBSS updates will depend on BS-Select being in place	Technical workarounds were put in place during 2020 so that the NI BSP would not be compromised. (This will not be possible as new updates are introduced beyond April 2021.) Discussions are underway with Public Health England (PHE), who own the NBSS and BSSelect software, and with NHS Digital, in order for them to provide BS-Select software to NI in 2021 at no capital cost. Approval obtained to use programme monies to recruit temporary band 7 project manager.	Likely	Major	HIGH	Prepare business case and secure funding. (June Sept 2021)	NR	Directorate	June Sept 2021

RISK TITLE: Delay in Implementing Valproate Guidance ADDED TO RISK REGISTER: December 2020

ADDED TO RISK REGISTER: December 2020
DIMENSION: December 2020
Safety and Quality

Risk Ref	Description of risk	Existing Controls	Likeli- hood	Impact	Risk Rating	Treatment / Action Plan & Timescale	Lead Officer	Status	Review Date
PH SQ 14	Delay in the implementation of guidance on valproate use in females of childbearing potential – risk of pregnancies exposed to valproate which have the potential to be avoided. Responsibilities rest with GPs and Trusts to implement. PHA has been asked to take a coordination and oversight role on implementation and is working closely with HSCB who commission epilepsy and related services where this drug is prescribed. Delay during 2020 was due to COVID-19.	Previous actions include communications to GP practices as reminders of actions required and establishment of a regional group to support oversight and to explore and scope options to improve implementation.	Likely	Major	HIGH	A plan for patient identification using a GP LES has been developed. Funding for this only available until March 2021 but actions will be required into 21/22. Options as to how annual specialist review will be delivered are still to be developed once number of patients per specialty is clearer from the patient identification exercise. (review June Sept 2021) [NB-Covid pressures mean this risk cannot currently be reviewed]	Dr Brid Farrell	Directorate	June Sept 2021

RISK TITLE: Inability to fully access Child Health System (CHS) data

ADDED TO RISK REGISTER: April 2021

DIMENSION: Operational Performance & Service Improvement

Risk	Description of	Existing Controls	Likeli-	Impact	Risk	Treatment / Action	Lead	Status	Review
							Officer		
Ref PH CC 13	risk Health Protection does not have the ability to fully access Child Health System (CHS) data (at a detailed, individual level) to enable identification of low uptake groups and/or locations that require public health action	Under current arrangements, Health Protection request reports from Trusts as and when required but response will be dependent on their capacity. A recently revised MOU is in place between PHA and the Child Health System to facilitate better access to data.	Likely	Moderate	Rating HIGH	Plan & Timescale Consider appointment of an in-house IT management expert or utilise existing central analytical function to support and develop data system that can be used by the PHA to support the childhood vaccination programmes. By September 2022.	NR NR		Date Sept 2021

Inability to fully access immunisation data from GP systems **RISK TITLE:**

ADDED TO RISK REGISTER:

April 2021
Operational Performance & Service Improvement **DIMENSION:**

PH CC 14	Health Protection does not have the ability to access GP systems to enable identification of low uptake groups and/or locations amongst adult populations in the community that require public health action	Health Protection currently receives aggregate data from HSCB. In the interim we are working with HSCB colleagues to obtain ad hoc data as needed	Likely	Moderate	HIGH	Work with regional IT team to advocate for inclusion of non-COVID vaccine programme data to be incorporate within existing data systems e.g. Vaccine Management System, ESR. By September 2022.	NR	Directorate	Sept 2021

RISK TITLE: In ability to fully analyse the vaccine data

ADDED TO RISK REGISTER:

April 2021

Ref PH CC 15	risk Due to limited capacity and epidemiological expertise within the existing team, Health Protection would not be able to carry out a detailed analysis of immunisation data.	Health Protection has adequate funding to recruit staff to deliver the vaccination programmes. The immunisation team holds regular meetings to discuss work plans and development of staff in line with other surveillance specialties.	hood Likely	Moderate	Rating	Plan & Timescale Work with lead for surveillance to develop epidemiological expertise amongst the team through staff development, consider recruitment of full time epidemiological scientist for immunisations. By September 2021.	Officer	Directorate	Date Sept 2021

RISK TITLE: Diversion of permanent vaccine experts in DH

ADDED TO RISK REGISTER:

April 2021
Operational Performance & Service Improvement **DIMENSION:**

Risk Ref	Description of risk	Existing Controls	Likeli- hood	Impact	Risk Rating	Treatment / Action Plan & Timescale	Lead Officer	Status	Review Date
PH CC 16	Due to the diversion of permanent vaccine experts in DH there is a risk that recently appointed staff do not currently have the skills and ability to deliver vaccination programmes in partnership with PHA.	We are having early discussions around developing an SOP and weekly meetings with DH staff to improve the partnership working with PHA.	Likely	Moderate	HIGH	PHA vaccination staff to provide DOH staff with advice and SOP/Protocols to support them in the transition. By September 2021. Weekly meetings with DOH vaccination staff. By September 2021.	NR	Directorate	Sept 2021

Risks removed from the Public Health Directorate Risk Register as at 31st March 2021
