

Minister re Comm 6/10/20

- Scotland moving away from circuit breaker
- Much less range for a surge plan
- visiting in care homes

Jan - R has gone up
- cases, 7 + 14 day, probably have all exactly doubled
- 7-8 day doubling days
- capacity will be needed in 2-3 weeks unless we slow the transmission

Wane 1 lockdown 28 March

has plan to shut Lymington until 1 to 2 weeks later

Jan:

daily admissions } too big bottlenecks.
in patients

rate in Belfast - minus the students - has slowed considerably.

Jan: Modelling $\Rightarrow$ suggest full lockdown for 4 weeks is needed

Need control over rate for Essex
in surge plans. Key point is there is
a finite capacity that we are on
track to reach.

PIA - asks what
in schools to be
sent weekly to the
Minister.
