

CNO / CSA Min health.

11/10/20

Worse place from Thursday.

hospital nos increasing & ICU admissions.

Trusts - sorry to disturb procedures  
need beds for covid patients. Anaesthetists →  
ICU out of surgery.

Tiers - options are there.

Need to have had interventions v. soon  
to wk intervention v. direct & lockdown  
experience.

Interactions at schools gates.

Nanny Marie Ann learned ~~but~~ not getting  
better. Mid Mover overheard N M D

Bugger concern is beds.

Surgery plus - red level.

Altra gelin 3rd covid

⇒ Breast Surgery supply this wk  
in Southern Trust.

Announcing intervention tomorrow

WHO commentary.

Darling cress 7 days.

Hospital 8 days

290 next day  
600 following day

any intervention takes 10 days to plateau.

Nyfergale - not showing up -  
facility

increase bedding locally <sup>1st</sup>

increase bedding locally <sup>1st</sup>  
indep sector used for red flags - b  
in 1st wave.

Trajectory - trusts trying to upscale stuff  
losing stuff to self isolation.

400 shift in burst Trust - self isolation

If treats be only interactive we pull  
now out

— slow things I do before Christmas  
dawn again.

reduction no where across country

Don't have decisive intervention Health  
service overwhelmed past tipping  
point  $\rightarrow$  health mortality.

probably too late.

Community Inclusion into care homes
