ightingale	Date of Approval	Operational date	Activity during Wave 1	Activity during Wave 2	Costs (Totals £358,457,185)										
INDON	23 March 2020	3 April 2020	57 patients admitted, all with Covid-19.	Not used to admit Covid-19 patients. 71 non-Covid-19 patients were treated. From 11 January 2021, used as a mass Covid-19 vaccination centre until late June 2021.	Set up - £77,651,662										
			Deen for admissions from 3 April to 4 May 2020, then on standby.	From 11 January 2021, used as a mass Covid-19 vaccination centre until late June 2021.	Running - £49,519,000										
					Decommissioning - £5,275,322 Total - £132,445,984										
RMINGHAM	10 April 2020	16 April 2020	16/04/2020 - On standby, not intended to admit patients immediately but had the ability to be stood up at 72 hours notice - in a state of eadiness to receive patients.	November 2020, in preparation for Wave 2, the Nightingale was made ready to accept patients on 48-72 hours notice but no patients admitted.											
			ntended to provide L2 or L3 treatment and intensive rehabilitation, not patients requiring ventilation.		Set up - £38,367,157 Running - £10,076,261										
			No patients admitted during Wave 1 due to reducing level of Covid-19 infection and hospitals in the region not reaching capacity.		Decommissioning - £1,983,234 Total - £50,426,652										
ANCHESTER	10 April 2020	13 April 2020	34 patients admitted , all with Covid-19.	For Wave 2, the site was intended to offer a step-down facility for patients without Covid-19.	1044 - 100,410,001										+
			ntended for step-down L2 treatment (single organ failure patients who were stable but still required oxygen supplementation via face mask, sigh flow pr CPAP) from ICU.	No Covid-19 patients admitted, even though the site was able to admit patients.	Set up - £27,095,374										
			First few patients admitted a few days after opening, then put on standby as acute hospitals in the North West were considered to have enough capacity to admit covid patients.	From October 2020 - March 2021, the site was used to provide a range of NHS services to non-Covid-19 patients. 350 non-Covid patients were reated.	Running - £21,407,000 Decommissioning - £6,704,000 Total - £55 205 374										
HARROGATE	15 April 2020	21 April 2020	Dpened on standby (so not intended to admit patients immediately).	The site had been asked to mobilise to be ready to accept patients if necessary, ultimately no patients admitted during Wave 2.	1001-100,200,374										+
			No patients admitted during Wave 1 as the region managed within its existing intensive care capacity. It was able to be reactivated to admit patients within 7 days.												
			ntended for patients who had deteriorated but were stabilised on ventilation or CPAP in their local hospital and transferred to Nightingale for 2/L3 care once capacity in the local hospitals had been reached. Transfer back to local hospital for ward care or more than 2 organ failure.												
			The site was equipped with clinical imaging equipment. From 4 June 2020, it was used to provide clinical CT scans and diagnostic tests to patients from across the region. By the end of 2020, more than 3000 patients had received a CT scan or diagnostic test. This r eached 5,044 by March 2021.		Set up - £19,347,790 Running - £7,095,232										
					Decommissioning - £6,081,916 Total - £32,524,938
