1	Tuesday, 21 January 2025	1		in biotech companies. And I think you were, at the time
•	0.00 am)	2		of the pandemic, and remain, a managing partner at
	ADY HALLETT: Mr Keith.	3	_	SV Health Investors.
	R KEITH: Good morning, my Lady. My Lady, the first	4		Correct.
5	witness today is Dame Kate Bingham.	5	Q.	
6	Could you be sworn, please.	6		your position as the Chair of the Vaccine Taskforce. It
7	DAME CATHERINE BINGHAM (sworn)	7		is self-evident that, to a very large extent, the
8	Questions from LEAD COUNSEL TO THE INQUIRY for MODULE 4	8		vaccination programme in which the VTF played such an
	R KEITH: Dame Kate, could you commence your evidence,	9		important role was a success. It is also self-evident
10	please, by giving the Inquiry your full name.	10		that there were very considerable individual successes
	. Hello, my name is Kate Bingham, or Catherine Elizabeth	11		achieved in relation to therapeutics, dexamethasone
12	Bingham.	12		being the most obvious one, but a number of repurposed
13 Q	. All right, thank you very much.	13		drugs were authorised for use and a number of new drugs
14	Dame Kate, thank you very much for attending and	14		were developed, discovered, and rolled out.
15	assisting the Inquiry, not least by the provision of	15		The role of the VTF, therefore, requires
16	your witness statement, INQ000474406, of October 2024.	16		considerable examination because it's vital in the
17	I'd like to start, please, your evidence by asking	17		Inquiry's view that what worked well is embedded into
18	you a few questions about your professional background,	18		the system for the future and what didn't go quite so
19	if I may. You graduated from Oxford with a first class	19		well can be focused on and improved.
20	degree in biochemistry, you worked as a management	20		The VTF commenced its life by way of being
21	consultant, you completed an MBA at Harvard, and then	21		officially launched on 17 April 2020, but there were
22	you went into the world of venture capital and private	22		initially two parts to it, were there not: there was an
23	equity with Schroder Ventures, and out of that, you then	23		external advisory board and a programme board. What v
24	pursued SV Health Investors, your venture capital firm,	24		the main feature of the external advisory board, in
25	specialising, in particular, in building and investing	25		terms of its constitution? It appears to have been made 2
1	up with membership of manufacturing experts,	1		group remained on the sides for a bit, and the BEIS
2	bioindustrial specialists, vaccine scientists and	2	_	team, I think, then was rebuilt.
3	a number of external professionals; is that right?	3	Q.	
4 A		4		aware that BEIS had handed over responsibility for one
5	external advisory board in order to bring some specific	5		part of what became the VTF group's functions, to
6	expertise into Whitehall. So I think until that point	6		a management consultancy firm. In the context of, and
7	Whitehall had been taking charge and when I think it	7		I'll ask you more about this in a moment, of the
8	became clear that those skills and capabilities were not	8		importance of bringing in external expertise, why did
9	there, he then brought together his group of, as you	9		you take the view that using external management
10	say, clinicians, industry people, manufacturing experts,	10	_	consultants was the wrong approach?
11	regulatory, and they were there to help advise the team	11	Α.	,
12	within BEIS, the business department, on all aspects of	12		the Civil Service, and to bring in people supposedly
13	securing vaccines.	13		with expertise, although certainly not the level of
14 Q		14		expertise that we brought through the VTF team, and what
15	the Civil Service element, if you like, of the original	15		it means is you've got a Civil Service that never builds
16	form of the VTF. I think it was led by Alex Jones of	16		that level of expertise internally because they are
	BEIS. And in due course the external advisory group was	17		always outsourcing it and relying on external experts.
17		18		And the whole reason that the VTF was created was
17 18	brought to an end and the two parts were amalgamated			because that expertise and those relationships with
17 18 19	into what became the body that you chaired, and you were	19		
17 18 19 20	into what became the body that you chaired, and you were formally appointed on 6 May 2020; is that right?	20		industry and that understanding of how to develop,
17 18 19 20 21 A	into what became the body that you chaired, and you were formally appointed on 6 May 2020; is that right?Yes, they didn't quite amalgamate. We the VTF was	20 21		industry and that understanding of how to develop, manufacture, regulate and launch a vaccine was not ther

(1) Pages 1 - 4

1		that we see in Whitehall, and no focus or even
2		recognition of the need to build up that expertise.
3	Q.	And we'll come back in due course to some of the general
4		overarching comments you make in your book about the
5		Civil Service approach.
6		It's plain from the paperwork that you demanded
7		a number of conditions be met prior to you taking the
8		role as the chair of the VTF. Just to run through them
9		one by one, you demanded a clear mandate with a direct
10		order line to the Prime Minister. Why was that?
11	Α.	Because I felt that if I did not have the authority of
12		the Prime Minister, there was clearly tensions between
13		the business department and the Department of Health,
14		and that there would be interference at a ministerial
15		level, and from officials if I didn't have a very
16		clear reporting to the PM. And that absolutely was the
17		correct decision and was worth its weight in gold.
18	Q.	A second condition you demanded was that the VTF be
19		located in BEIS. Why was that?
20	Α.	Because our job was fundamentally a commercial job,
21		which was to work with manufacturers, industry, to
22		identify the best vaccines, manufacture them and secure
23		contracts. So this is a commercial discussion, not
24		a how do you actually deploy it in the health system.
25	Q.	And is governmental supervision of the life sciences
		5
1	Α.	Essential.
2	Q.	And we'll come to that in due course as well.
3		Of perhaps lesser importance in the general scheme
4		of things, but nevertheless of considerable interest,
5		you also demanded that you be the chair only for
6		six months, you said, "I want a 6-month term of office",
7		and you also asked that you be given the ability to sign
8		off on all communications in advance. Because
9	Α.	I was concerned about leaks
10	Q.	this may reflect on your views on the Civil Service
11		and on the way in which government went about things.
12		Why did you ask for those two conditions?

- 13 Α. So, the six months, we'd just raised a new fund, and 14 so -- I'm a key person in the fund and if I wasn't part 15 of the fund, our investors could actually suspend the
- 16 fund. So that -- it wasn't just for me, I was working
- 17 pro bono, but it's the entire team and the group I work with. 18
- 19 So that -- I wasn't able to do more than that. And 20 the comms was about the worry about leaks coming out of 21 government.
- 22 Q. It's apparent from your statement and from the paperwork
- 23 that you were put through quite a robust conflict of
- 24 interest process. Is this the sum of it: your position
- 25 was examined in fact by the DHSC and by the Cabinet

7

- 1 industry insofar as it impacts upon government --
- 2 Α. Yes.
- Q. -- within BEIS? 3
- 4 Δ. Yes
- You demanded the ability to make rapid decisions. You 5 Q. 6 asked for rapid decision making. Again, why was that?
 - Α. Because -- I hadn't worked with government before, but
- 7 8 the one thing you know about government is it's 9
- incredibly slow.
- 10 Q. You asked for the ability to establish a dedicated
- budget, with timelines. Why was that? 11
- Because, again, my understanding was that everything in 12 Α.
- 13 terms of getting money signed off in government takes 14
- a very long time and you've got to go round endless
- 15 departments and then you go back to Treasury, who say
- 16 no, and then you go round again and you do it again.
- 17 So the idea was not that we had actually -- the VTF
- 18 Steering Group, we did not have spending authority, we
- 19 made recommendations, but to the extent we could 20
- actually have a dedicated budget from which any 21
- contracts could be paid would then again speed up the 22 rate of decision making and execution of what we were

- 23 trying to do.
- 24 Q. And was that absolutely vital, in fact, to the proper
- 25 performance of the VTF's functions?
- 1 Office. You were obliged to declare anything that might 2 conceivably cause a conflict of interest, and in the 3 interests of the government, and of what you were doing, 4 did you in fact step off a number of boards and committees, and in particular, agree that no fund 5 6 managed by SV, your company, could or would invest in 7 any Covid-19 vaccine company? 8 A. Correct. 9 Q. And to the detriment of one of your funds, did that fund in fact have to pause all investment and divestment for 10 11 quite a considerable period in relation to the bio 12 sciences industry? 13 Α. Yes, correct, it was a public fund, so that it was it's 14 -- its performance was gauged against the index and 15 because the index had spiked so massively with the Covid 16 vaccines, not being able to participate in that was 17 a problem for them, yes. You've referred to the degree of independence that you 18 Q. 19 sought. By and large, were you afforded it? 20 Α. Yes. 21 Q. You reported to the Prime Minister ultimately, but VTF 22 remained a formal part of BEIS and presumably the
- 23 ministerial accountability line was to Parliament
- 24 through BEIS?
- 25 A. Correct.

- 1 Q. It's obvious that a very great deal of hard work was
- 2 done and a great deal of time was spent on discharging
- 3 your functions within VTF. Did that include reporting
- 4 daily in the evenings or weekends to a multitude of
- 5 ministers and officials?
- 6 **A.** I set up meetings at 8 o'clock in the morning, three
- 7 times a week, Monday, Wednesday, Friday. And that was
- 8 our ability within the steering group to communicate
- 9 what we were doing, and what progress we'd made. Those
- 10 meetings became a reporting mechanism as time went on
- 11 with more and more officials wanting to join. So,
- 12 I have no idea quite how many joined towards the end of
- 13 my six months, but it was a lot. We had regular
- 14 catch-ups with Alok Sharma who was the minister,
- 15 Secretary of State for BEIS, and not very regular but
- 16 nonetheless catch-ups with Number 10 and the
- 17 Prime Minister.
- 18 **Q.** There were in the VTF a number of external
- 19 professionals, and in order, in part, to give them
- 20 tribute for what they did, given the overarching success
- 21 of the VTF, they included Ian McCubbin, head of the BIA
- 22 bioprocessing group, Steve Bates from the BioIndustry
- 23 Association. Maddy McTernan -- was she a civil servant
- 24 or was she external?
- 25 **A.** Maddy is a civil servant but had come through the

- 1 Q. So ultimately, it wasn't a question of the VTF
- 2 succeeding because it was exclusively staffed by
- 3 external professionals --
- 4 **A.** No.
- 5 Q. -- it was that collaborative approach from industry and
- 6 the external professions --
- 7 A. And I might say --
- 8 Q. -- as well as the Civil Service.
- 9 A. Correct, and plenty of women in the leadership team.
- 10 Q. Quite right.

11

12

- There were three objectives set for the VTF to
- secure -- very broadly, to secure vaccines for the
- 13 United Kingdom to ensure that vaccines were distributed
- 14 equitably around the world and thirdly, to make the UK
- 15 more resilient in dealing with a future pandemic. It is
- 16 obviously somewhat uncomfortable to ask for anybody to
- 17 have to mark their own homework, Dame Kate, but in
- 18 relation to goal 1 to secure vaccines for the
- 19 United Kingdom, do you feel you can say that you20 succeeded?
- 21 A. Yes.
- 22 $\,$ Q. That goal was to secure vaccines, but part of the VTF's $\,$
- 23 functions, it turned out, included the role of
- 24 identifying, developing, and procuring and making
- 25 available monoclonal antibodies.

11

- 1 private sector, a lawyer.
- 2 Q. Ruth Todd, who was I think the head of your
- 3 programmes --
- 4 A. Programme manager, yeah.
- 5 Q. -- process. Civil servant or external?
- 6 A. Again, a civil servant but with a long career in the7 private sector.
- 8 Q. Clive Dix, your deputy?
- 9 A. Phenomenal.
- 10 Q. And from where?
- 11 **A.** Private sector.
- 12 Q. And Nick Elliott, your director general?
- 13 A. Most recently from the private sector, but had a career
- 14 in the army and programme management before that.
- 15 Q. So drawing the threads together, it is obvious that the
 external experience, the industrial expertise, was vital
- 17 to the proper discharge of the VTF job?
- 18 A. Completely.
- 19 Q. That's not to say, though, is it, that there isn't
- 20 a vital role for Civil Service experience? Was that
- 21 particularly in relation to contracting, obviously,
- 22 money flows, expenditure, project management, and
- 23 possibly diplomacy?
- 24 A. Correct, all those three things, I think the Civil
- 25 Service in our team did really well.
 - 10
- A. Prophylactics for those who couldn't receive vaccines.
 So actually, the first goal was around protecting the UK
 population.
- 4 Q. And in relation to monoclonal antibodies, do you think
 5 you succeeded on securing or making available those
 6 monoclonal antibodies?
- 7 **A.** No.

- 8 **Q.** We'll come back to that later.
 - The second goal, to ensure vaccines were distributed
- 10 equitably around the world, why, without appearing in
- 11 any way nationalistic, does it matter, in terms of the
- 12 UK interest, that vaccines are distributed elsewhere in13 the world?
- 14 A. Because, first of all, I think there's an ethical and
- 15 moral case that the UK and any wealthy countries should
- be contributing to low- and middle-income countries'health systems. The clinical argument is that for as
- 18 long as this virus continues to infect people around the
- 19 world, especially those people who are
- 20 immunocompromised, so in Africa with HIV, you will
- 21 continue to get viral mutation and so then you will get
- 22 the emergence of potentially more lethal and more
- 23 infective viruses, which is exactly what we saw. And so
- 24 the more quickly the global community can actually
- 25 vaccinate all those people who are vulnerable, the more 12

1		effective we will be at stemming the impact of the
2		pandemic.
3	Q.	And in that regard, the United Kingdom Government had
4		contributed and contributed during your time as chair,
5		a very large sum of money to the international
6		organisation COVAX. Was it your view that more could
7		have been done nevertheless?
8	Α.	Yes, there was the commitment, but it was very late. So
9		actually, I've got good data to show that we were not
10		even in the top ten of countries donating vaccine, you
11		know, in 2021 when it matters. So yes, maybe by the end
12		of 2022 we had started donating more, but by then it was
13		too late. So it really matters that we play an active
14		role at the time when it matters, rather than
15		afterwards.
16	Q.	It is important, though, to note that AstraZeneca, a UK
17		company, of course, made the Oxford adenoviral vaccine
18		available at cost and was, relatively speaking, guite
19		a cheap vaccine, was it not?
20	Α.	It was cheap and it was the vaccine that will have saved
21		more lives than any other around the world.
22	Q.	And to his credit, did the Prime Minister make plain to
23		you that in addition to securing vaccines for the
24		United Kingdom and obviously directing himself to the
25		direct interest of our population, he wanted the
		13
1		that's quailable for different things with no
2		that's available for different things with no overarching leadership, no plan of actually how can we
2		
		join up what is an incredibly effective bioprocessing
4		industry in particular in the UK. So this is an
5		industry that came together in February 2021, way before
6		the government is even thinking about what to do, and
7	~	they said, "We realise we're the ones"
8	Q.	February 2020?
9	Α.	Sorry, February 2020. "We're the ones who are going to
10		have to do the scale-up and the manufacturing of
11		vaccines so we might as well get going, because there's
12		no time to be lost."
13		Now, that is an astonishing thing, it was not based
14		on contracts, this was not based on money or anyone
15		asking them to do it, this was the industry coming
16		together and saying: this is how we can help. And so we
17		have an astonishingly collaborative, supportive generous
18		industry in this country, and yet we're not supporting
19		it with any government-led leadership which has

19 it with any government-led leadership which has 20 a coherent strategy. So the reason I think we haven't 21 delivered that third goal that the Prime Minister set

- 22
- was not that we haven't tried, but we don't have any 23 ongoing leadership strategy or ability to deliver that
- 24 strategy within government, because it is not business
- 25 as usual.

United Kingdom to be at the forefront of global

- 2 manufacture and supply, in order to be able to spread
- 3 the beneficial impact of vaccines globally?
- 4 A. He was explicit about that and that was really
- important. And the other factor that he was explicit 5
- 6 about was people were dying so he wanted us to act 7 auickly.
- Q. And throughout the six months that you were in charge of 8
- 9 the VTF, did the Prime Minister frequently bang that 10 drum?
- Did he frequently? 11 Α.
- Q. Bang that drum? 12
- 13 Α. Yes.
- Q. Did he constantly make that point? 14
- A. Yes, he did. 15
- 16 Q. The third goal, very broadly, was to make the UK more
- 17 resilient in dealing with the future pandemic. How do
- you feel you did on that? 18
- 19 Α. Very modestly.
- 20 Q. Why?
- 21 A. Because we put lots of great plans, recommendations, and 22 suggestions in place, and there is no coherent
- 23
- leadership to actually follow through with what we had 24 suggested. So we may get into this in more detail, but
- 25 there are, you know, different pots of grant money 14
- 1 Q. And we'll come back to many of these areas in due 2 course, but broadly speaking, are you dealing there with 3 or are you referring to the issue of the management and 4 co-ordination of the funding routes, the management and 5 co-ordination of the clinical trials, from the vantage 6 point of the government, of course, and also the issue 7 of onshore manufacturing of both vaccines, as well as 8 bulk antibodies? 9 A. I'm talking about all of that. So we don't wait, in 10 defence, to have Russia invade Ukraine to then set up 11 a taskforce to say, "Right, what shall we be doing? What weapons should we be using? How should we be 12 13 doing? What should we be doing? What might be coming 14 through in the future?" We have a standing capability 15 of experts who are looking at the future to say what are 16 the new vaccine formats, what are the new potential 17 threats that could be coming and how can we prepare for 18 that? We don't have that level of capability or 19 long-term thinking in government. So there's lots of 20 good well-meaning good strategies which are itsy bitsy, 21 bit of money here, bit of money here, and will be 22 allocated out. But there is nothing that brings 23 together the end-to-end manufacturing -- discovery, 24 development, scale-up, manufacturing, clinical, 25 regulatory, to get to vaccines that can get into people 16

1		to protect people. And that is what is missing.
2	Q.	Remaining for the moment with the issue of the scope of
3		the VTF, there was quite a difficult issue to be
4		circumnavigated concerning whether or not therapeutics,
5		and in particular, as you said, monoclonal antibodies,
6		should be within the remit of the Vaccine Taskforce. We
7		understand in fact that at the first meeting on 11 May,
8		the agenda referred to your body as the Vaccine and
9		Therapeutics Taskforce. How was the issue as to what
10		the remit of the VTF should be resolved?
11	Α.	Therapeutics is obviously my background, so that is the
12		natural area for me to have included in the remit. What
13		I did is what I would always do, which is to go and talk
14		to the people involved, including in industry, and it
15		was quite clear there was open warfare between BEIS and
16		Department of Health, and the RECOVERY trial at that
17		point had been set up. So this is the big master
18		protocol, phase III three trial that demonstrated
19		dexamethasone. So there was no need for me to have any
20		involvement in that, that was being run beautifully and
21		executed well.
22		So then the question is: well, should we have had
23		oversight on the phase I and early phase II clinical
_• 24		trials testing either repurposing medicines or
25		ultimately bringing forward new medicines, and
		17
		17

- ultimately it was quite clear that there was no need to
- 2 do that, because there are already too many people
- 3 probably involved. It wasn't functional, and vaccines
- 4 was ultimately going to be the route out of the
- 5 pandemic. So the focus for us was to actually focus
- 6 solely on vaccines, not take on therapeutics.
- 7 **Q.** The evidence before the Inquiry appears to be that there
- 8 were considerable tensions between the funders, the
- 9 officials, the academics, and the industrialists in the
- 10 sphere of those phase I and II trials, that there
- 11 appears to have been a profusion of trials, many of them
- 12 underpowered, some of them badly recruited, and quite
- 13 a lot of --
- 14 A. Just to be clear, you're talking only about
- 15 therapeutics --
- 16 **Q.** Iam.
- 17 **A.** Yes.
- 18 **Q.** I am only talking about therapeutics there.
- 19 A. Yes, that was the impression I got --
- 20 Q. You mentioned the RECOVERY trial, which was
- 21 a therapeutic trial.
- 22 A. Brilliant.
- 23 Q. And was this ultimately the position: that if you had
- 24 brought the whole caboodle of therapeutics within the
- 25 remit of the VTF, you might have ended up dividing your 18
- 1 So, yes, that was agreed to be part of our mandate, 2 and as part of that, you've got two different types of 3 antibody: you've got the prophylactic antibody, to treat 4 the people who can't mount a vaccine response, but 5 you've also got treatment antibodies. So they --6 they're different only, really, in how long they last. 7 Q. So Evusheld, for example, could be given 8 prophylactically --Yes, Evusheld --9 Α. 10 Q. -- also by way of treatment? A. Yes, so Evusheld was designed to have long-acting half 11 12 life, so that it would -- could dose every six months or 13 longer. The treatment antibodies would have a normal, 14 short half life of a month or so. 15 Q. All right. A. So that was different. But if we're going to do all the 16 17 due diligence on it, we should do the diligence 18 together. But those persons who are, sadly, immunosuppressed, 19 Q. 20 nevertheless would also have benefited from other 21 therapeutics made available, not just monoclonal 22 antibodies, they might have benefited from small 23 molecule drugs, from anti-inflammatory drugs. If you 24 had taken on board the other types of therapeutics, in
- 25 the ultimate -- to the ultimate benefit of those persons 20

1 2		rate due to? Was that a reference to the likelihood, the very high likelihood, of the failure of an	1 2	А.	each Exac
3		individual vaccine pursued?	3	Q.	The s
4	Α.	Yes.	4		had t
5	Q.	Right. So you needed to try to pursue as many vaccines	5		so im
6		of as many different types as you could?	6	Α.	Beca
7	Α.	Not quite. I don't think, because I've seen some of the	7		vacci
8		witness statements that say we had to pursue everything	8		comp
9		we possibly could, that's not right. We had to pursue	9		quan
10		the best and the most likely to succeed. That doesn't	10		their
11		mean every one. So that what we originally thought	11		an ao
12		this, I might just remark is day 2, so I was called on	12		other
13		6 May and this is a presentation on 7 May. So what we	13		and h
14		initially thought, and we were fingers in the air, we	14		in the
15		thought we might need 10 to 12 vaccine candidates in	15		and a
16		order to assume that one would succeed, based on that,	16		whet
17		you know, 10% likelihood of success.	17		E
18		But actually, when we did the work, and the due	18		knew
19		diligence, and we really got under the skin of the	19		So it'
20		candidates that were out there, we realised, actually,	20		manı
21		we did not need as many vaccines as that to really cover	21		quick
22		our bases so that we had access to all the different	22	~	instru
23		formats and the different characteristics that we were	23	Q.	Was
24		seeking.	24		ident
25	Q.	So you sought the most promising vaccines representing	25		nego

1		And had there been a vaccine developed for HIV, for
2		example?
3	Α.	No well, unsuccessfully. And the importance point
4		about coronaviruses, is we first knew about them
5		10 years before, so we had SARS 1, and then we had MERS.
6		So in actual fact, we had had a history of failure of
7		developing vaccines against coronaviruses, but actually
8		that was quite helpful because it had built up
9		a capability and a knowledge of coronaviruses so that it
0		was much quicker to then go and develop a vaccine the
1		next time, and with HIV, it mutates so quickly that it
2		has been proven to be very difficult to develop a
3		vaccine against.
4	Q.	So there had been considerable research and development
5		done on both mRNA vaccines and the adenoviral vector
6		technology and funding, a lot of funding had been pumped
7		into the system for general research and development,
8		had it not?
9	Α.	Yes.
20	Q.	All right. But nothing had actually been produced in
21		terms of being developed to authorisation stage?
22	Α.	Correct.
23	Q.	Right. You refer in the middle of the page to needing
24		multiple different shots on goal because of the very
25		high attrition rate. What was the very high attrition
		26
1		each of the four, by and large, different formats?
2	Α.	Exactly.
3	Q.	The second thing you did was take the decision that you
4		had to purchase at risk. What was that and why was that
5		so important?
6	Α.	Because there was going to be very limited supply of
7		vaccines, and these companies, many of which were small
8		companies, had to scale up to population-scale
9		quantities. Every country needed a vaccine to protect
0		their vulnerable populations, and there was going to be
1		an adequate supply. So what we had to do, the UK, but
2		other countries around the world, was to put money up
3		and help fund those vaccine companies to actually invest
4		in the manufacturing, scale-up and bulk manufacturing,
5		and also to run the clinical trials before we knew
6		whether or not these vaccines would work.
7		Because if we only invest in manufacturing, after we
8		knew the vaccine would work, you then had another year.
9		So it's highly unusual that you'd be investing in
20		manufacturing alongside clinical but in order to get the
21		quickest possible vaccine to people, which was the PM's
22		instruction, we did that parallel track.
23	Q.	Was it important, before you even began to consider
24		identifying a particular manufacturer, let alone
		noneticto o controct with the unit of language of the second of

25 negotiate a contract with them, to know what sort of 28

1		planning assumption you needed to apply in terms of how
2		many doses we're going to need as a country?
3	Α.	Yes. And so we went to the JCVI, the Joint Committee on
4		Vaccination and Immunisation, which is a statutory body
5		which advises the Department of Health, and the
6		Secretary of State in England is obliged to take their
7		advice. We first met them on 25 May, and at that point
8		their advice to us was "You have to vaccinate the
9		vulnerable" and their advice to us was the range of
10		vulnerable people were all adults over the age of 50 and
11		all adults under the age of 50 with severe underlying
12		disease and it corresponded to basically an enhanced flu
13		cohort and was about 30 million people 30-odd. So
14		that is the
15	Q.	That is the broad range
16	Α.	That was the range, because my job was not to decide who
17		should be vaccinated. I need to find out from the
18		experts who they want to vaccinate, and then buy
19		vaccines for those people.
20	Q.	With that planning assumption, and bearing in mind the
21		number of people it entailed, you wouldn't have been
22		the United Kingdom wasn't the largest country on Earth
23		in terms of numbers with whom the manufacturers might
24		care to negotiate. What did you do to make the
25		United Kingdom as attractive a contractual partner as
		29
1		controller. So instead of waiting until you've got all
2		your data ready and you've got your reports and your
3		submissions, with the Is dotted and Ts crossed, she
4		said, "Bring me the data as soon as you've got it. We
5		will look at it, we will review it. So at the endpoint
6		when you finally give us your last piece of clinical
7		efficacy data or manufacturing quality data, we'll be
8		ready to vaccinate."
9		And that, again, was a core offer from the UK. So
10		manufacturing, clinical trials, and regulatory, which is
11		what we then presented to the potential vaccine
12		companies and said, "This is the reason you should work
13		with us, because this is what we can offer you."
14	Q.	And so we're absolutely clear, this entailed the
15		speeding up of the process by which the paperwork: the
16		data and safety information, was given to the MHRA, but
17		there was no diminution in its safety monitoring?
18	Α.	No.
19	Q.	Or the way in which it looked at the data?
20	A.	No. And if I could just give a statistic, the largest
21		ever vaccine trials that had been run anywhere in the
22		world were for the HPV vaccines, and they were
23		20,000 individuals that were vaccinated. The size of
24		the clinical trials that we're running for Covid
25		vaccines were between 40 and 50,000 people. So it
		31

1		possible?
2	Α.	So we wanted to make ourselves basically the best
З		possible customer, because 30 million people in the

2	А.	So we wanted to make ourselves basically the best
3		possible customer, because 30 million people in the UK
4		versus the European Union versus the US, we were tiny.
5		So we took a strategy of basically leveraging the
6		capabilities that we had. So this is a highly
7		collaborative manufacturing scale-up and manufacturing
8		industry, with capabilities, but without a lot of bulk
9		manufacturing capabilities. So that was one task, was
10		how can we turbo-boost what's already there? You can't
11		build stuff <i>de novo</i> in a pandemic but you can increase
12		what's already there.
13		So that was one aspect.
14		The second aspect was to really leverage the fact
15		that we have a phenomenal national health system that is
16		able to run NIHR, to run clinical trials at
17		a population scale with diversity. So that was the
18		second aspect.
19		And the third aspect was that we would work
20		collaboratively with them and with our regulator, which
21		is the MHRA, so that we could actually get vaccines
22		approved and regulated as soon as possible.
23		I might just call out June Raine as being a superb
24		vaccine regulator because she, in her own words, moved
25		the MHRA from being a policeman to an air traffic
1		was these vaccine trials were much, much larger than
2		any vaccine trial had ever been done before. And there
3		was additional requirements put in place, and you can
4		talk to June about this afterwards, is where
5		99.9 per cent of any adverse events from a vaccine would
6		happen within the first few days of dosing. And so then
7		the regulators put on an additional 30-day time period
8		to say: we will not receive or consider any vaccine
9		submission until we've actually had that additional
10		30-day time period, to be doubly sure that there is
11		not only have we got the largest trials ever done but
12		we've also got that additional safety monitoring.
13		So there was no question that safety was taken
14		extremely seriously, and more seriously than any trial
15		has ever been done before.
16	Q.	Can we just come back to the general topic of best
17		possible client, and the assistance that was given to
18		the manufacturing process, and to the course of
19		identifying and developing vaccines, by the involvement
20		in the trial process.
21		Do manufacturers exclusively conduct the trials
22		themselves, or do they extract from trials conducted by
23		the biosciences industry, by government, by the NHS, by
24		a number of these funding bodies, the data that they
25		need for the purposes of verifying their vaccines?
20		32

1 A .		1		their exclusive jurisdiction, all these trials and the
2	clinical trials. They cannot rely on third-party data.	2		research and development, there's a very strong and
3	So they are responsible. They are the sponsor to	3		notable government input
4	develop and generate the data to show the vaccines are	4	Α.	For sure, so the government funding for underlying
5	both safe and effective	5		research was critical. So we would not have had
6 Q .		6		Sarah Gilbert's vaccine without the R&D funding. That
7	rest upon making members of the public making themselves	7		is correct. We couldn't have run the trials without the
8	available by way of, I don't know, vaccine registries,	8		NIHR infrastructure and their capability to do that. We
9	to participate in the trials?	9		provided the volunteers, or, in many cases, provided the
10 A .	3 1 1 2	10		volunteers through the registry. But it's not as if
11 12	was a national vaccine registry on the NHS website. So	11 12		you're taking data from other people. There has to be
	anybody could sign up and say, "I consent to being			a single sponsor of the trial that leverages all those capabilities.
13	contacted about clinical trials". So there's a legal	13	~	
14 15	requirement to give consent to be contacted. That's different from enrolling in the clinical trials, but at	14 15	Q.	Right. And another aspect in which the United Kingdom
16	least they can be contacted.	15		endeavoured to put itself into the position of being the best possible client was to agree a mutually acceptable
17	So that was part of our using the national NHS	10		position on indemnities. Was that something that the
18	infrastructure was so we could actually provide those	17		VTF was directly concerned with, or was that a matter
19	patients sorry, not patients, volunteers to take	10		for the civil servants in government
20	partients solity, not partents, volumeers to take	20	۸	No, it
21 Q.		20	д.	-
22 22	as the UKRI and NIHR, a lot of the research and	21	а. А.	
23	development is funded, of course, by these funding	23		statutory protection to vaccine and therapeutic
<u>2</u> 4	bodies, so it's not just a question of the manufacturers	20		suppliers in a pandemic and it's called the US PREP Act.
25	taking members of the public and conducting, within	25		So every vaccine company we spoke to asked us to put in
	33			34
1	place statutory protection against liability.	1	Q.	Do you consider either that untoward pressure was put on
2	We discussed that internally, and that was not	2		the United Kingdom to agree indemnities or that what was
3	a starter. It was not something the government would	3		agreed was overly generous to manufacturers?
4	consider. The government would consider, however,	4	Α.	I'm not in the detail.
5	negotiating indemnities on a case-by-case basis.	5	Q.	The business case. So from your witness statement and
6	Clearly, when I first raised it, there was disbelief	6		your book, it is obvious, Dame Kate, that in the course
7	that I'd even ask the question, but it was quite clear,	7		of the VTF's activities, the VTF was required, certainly
8	because we made it clear, that if we did not offer	8		initially, to battle with the Treasury over the funding
9	indemnities we would not be receiving or procuring any	9		for the prospective vaccine purchases. Presumably you
10	vaccines. And the ultimate approach to securing the	10		would agree that, as with any expenditure of public
11	government's worry about liabilities is not to give the	11		money, a body intending to spend such vast sums of money
	vaccine, if they were concerned about harm, but they	12		has to attempt to quantify what it's likely to spend and
12				try to measure that against the prospective benefit of
12 13	would have to sign indemnities if they wanted to	13		ay to modoure that against the prospective benefit of
	would have to sign indemnities if they wanted to actually secure any vaccine at all.	13 14		what it's trying to do?

1	Q.	brought together by way of an oversight structure.
2		You must have often reflected as to why that couldn't be
3		put into place across the whole of government?
4	Α.	I think it should be. I mean it is manifestly a better
5		way to make decisions, rather than sequential, and then
6		keep having to go back. What I did find is there are an
7		awful lot of people who want to be engaged, who are
8		unqualified and yet feel qualified to intervene. And
9		the more you enable that to happen, the slower things
10		are going to be, whereas if you basically say, no, it's
11		a single business case, it goes to the ministers, and
12		they have to make a decision, they can't prevaricate,
13		they have to make a decision, yes or no, and that
14		worked.
15	Q.	We don't, I think, need to explore the actual
16		negotiations with each of the manufacturers, but it was
17		obviously a protracted and difficult process. But it
18		worked. And of course, a number of contracts were
19		agreed, I think probably by way of binding terms or
20		heads of agreement being agreed and then the minutiae
21		and the detail of it being negotiated and then final
22		contracts being reached for advance purchase.
23	Α.	Correct. So we Clive would basically shape out the
24		scope of what we were seeking to procure from each
25		vaccine company, and we'd draw up a non-binding heads of 41

1		So it's a very awkward relationship between
2		government and the industry, and there is no there is
3		just deep suspicion. And I was told this time and time
4		again: what are you personally going to get out of this?
5		And people are not doing things I was working for
6		free. People are not doing this in order to for
7		self-gain; they are doing this because they're in an
8		industry where we are trying to develop drugs for
9		patients who have diseases that are poorly treated.
10		And it is not it's not an industry where it's
11		knives out and winner takes all. This is an industry
12		which is a supportive and creative and innovative and
13		highly risky industry. As we talked about, 90% of all
14		drugs that go into clinical trials will fail. So
15		that this is not an easy industry to work in. And
16		yet
17	Q.	And AstraZeneca
18	Α.	AstraZeneca had stepped up. They weren't a vaccine
19		company.
20	Q.	And did it make its vaccine available at cost or did
21		they charge
22	Α.	They made their vaccine available at cost. And also,
23		not only not only being a vaccine company, they
24		managed to secure licence agreements around the world.
25		So they had something like 15 or 20 different CDMOs 43

8		the largest single supplier of vaccines globally, once
9		you'd left the VTF, did you keep an eye on the nature of
10		the relationship between AstraZeneca and government?
11	Α.	Yes, because I'm in the industry, I talk to pharma
12		companies all the time.
13	Q.	And did you gain the impression, or the view, that
14		despite the success of that contract and the delivery of
15		the AstraZeneca vaccine, the relationship between the
16		UK Government and AstraZeneca didn't end in a happy
17		place?
18	Α.	I don't think relationships stop and end, but we had the
19		opportunity to the UK had the opportunity to increase
20		production, both with AZ in Liverpool as well as GSK in
21		Barnard Castle. Neither of those discussions ended up
22		with any funding, collaboration, partnership. Since
23		then there was a later agreement with AZ, which,
24		according to the papers yesterday, has now hit buffers
25		again.
		42

terms, which we then announced in July and August. And

then Maddy and her team would then turn those heads of

AstraZeneca, obviously a UK company, which was prepared

to sell the vaccines at cost, and was probably overall

 ${\bf Q}.~$ Just picking up some of the most notable issues that

arose in the course of the negotiations, with

terms into formal legal contracts.

	manufacturing their licence their vaccine, in all the
	different countries around the world so that all those
	people who are vulnerable could have access to vaccines.
	And they did so very cheaply, at cost.
Q.	In terms of building up resilience and making sure that,
	in the face of the next pandemic, there is a robust and
	healthy onshore manufacturing capability and we'll
	come back to this later is it important that these
	relationships are nurtured and protected?
Α.	Yes.
Q.	All right. Moderna. Moderna is it right that since
	the pandemic, the UK Government has entered into
	a strategic partnership with Moderna, and I think is
	investing in the construction or the construction of
	a manufacturing site, and has a number of agreements
	with it to provide for sleeping contracts for future
	production of vaccines?
Α.	So I'm not involved so I don't know the detail of the
	Moderna contract, but yes, a big Moderna relationship
	has been set up.
Q.	All right. In relation to Pfizer BioNTech, which is in
	part a US company, did the VTF encounter significant
	difficulties on account of the US Government planning to
	invoke the US Defense Production Act to requisition all
	US domestic supplies of that vaccine?
	A. Q.

1	Α.	There was a threat of that, yes, in July, just before we					
2		were about to announce the heads of terms with					
3		Pfizer BioNTech, and we were told by the White House					
4		that they were going to use the US defence act to					
5		requisition that.					
6		We had we then agreed with Pfizer and BioNTech					
7		that if we agreed to binding language on indemnities,					
8		that they would then go back to the White House and say					
9 10		that, no, the UK had already signed up and therefore					
10		they weren't willing to comply, which is what we did. And within 24 hours we came back with binding indemnity					
12		language. And we then announced the contract and we					
13		then secured, as you know, the vaccines, and we were the					
14		first to get them approved and we were the first to					
15		dose.					
16	Q.	And I think 40 million doses was the original					
17	Α.	Yes, which was the all we could get.					
18	Q.	But to make it absolutely plain, notwithstanding the					
19		high stakes contractual poker play, the fact is that the					
20		indemnities that were agreed in relation to					
21		Pfizer BioNTech were not out of kilter with or any					
22		different to the approach on indemnities which had been					
23		applied to the					
24	Α.	No, it was all we had to offer indemnities to all					
25		the vaccine companies, as did every other country.					
		45					
1		was part, right at the beginning. And so we initially					
1 2		was part, right at the beginning. And so we initially signed a heads of terms or a letter of intent, but

Yes. So, again, that the numbers of immunocompromised people were data that had come from					

nquiry		21 January 2025
1	Q.	Right.
2		Coming now to the topic of antibody cocktails. Is
3		this the position: that, as you say in your book,
4		Clive Dix, your deputy, led the due diligence relating
5		to the recommendations that were made by the VTF as to
6		what antibody cocktails should be trialled and pursued.
7		And was it the result of the VTF's work on this that the
8		Ronapreve antibody cocktail, which I think is
9		casirivimab and imdevimab, was pursued.
10	Α.	Correct. That's the Regeneron cocktail.
11	Q.	The Regeneron cocktail. And
12	Α.	And for therapeutic use. So for people who have been
13		infected by SARS-CoV-2 and then it's used to then treat
14		them, to give them an additional immune response.
15	Q.	And what position did the VTF reach in relation to the
16		alternative prophylactic candidate, which was
17		Project Astronaut, Evusheld? When did the VTF first
18		become aware of the potential of that prophylactic
19		candidate?
20	Α.	In May 2020. We knew about it immediately. Because,
21		again, the BIA, the BioIndustry Association, had been
22		working to basically try and set up standardised assays
23		to assess all potential Covid antibodies, no matter
24		where they came from: academia, industry, small, big
25		companies. So we were aware of that work, of which AZ
		46
1		immunocompromised people and you cover them for
2		12 months, so two 6-month doses; or, as we thought at
3		the time, the SARS-CoV-2 might be a winter virus, in
4		which case you would cover them for two winters.
5		We didn't know at that time, but we thought that two
6		doses was at least enough to secure an order until we
7		knew more about how the virus was going to work.
8	Q.	On 26 October your director general, Nick Elliott, wrote
9		to the CMO, Professor Sir Chris Whitty and Clara Swinson
10		of the DHSC and others seeking confirmation on the exact
11		number of immunocompromised patients on whom Evusheld or
12		to whom Evusheld might be deployed?
13	Α.	Yes. And the reason for that was AZ had come back to us
14		after we had said we wanted a million doses to do our
15		to cover our immunocompromised population. They then
16		came back and said the most they could manufacture or
17		have manufactured was 2.5 million doses for the world,
18		and therefore the UK couldn't have a million, and we
19		needed to be scaled back. And so our that letter
20		from Nick was to say: well, we can't get a million
21		because that's not reasonable. What is the minimum
22		amount that we would want for the UK which would be
23		consistent with AZ making their antibody available more
24		broadly globally?
25	Q.	Now, after this was then debated within the Office of
		48

And you've kindly shared witness statements that

statements clearly show that there was zero appetite in

the Department of Health to actually consider how these

patients would be treated. So the evidence is that it

I have read, and I'm afraid to say the witness

was cheaper to let these clinically vulnerable

1		the Chief Medical Officer, on 11 December,
2		Sir Chris Whitty wrote back to Nick Elliott saying, in
3		essence, that he couldn't recommend buying a large
4		amount now because of the changed landscape, but he said
5		that if there was a political appetite to buy, he would
6		suggest around 50,000 doses only. At then in February,
7		as it happens, there was further advice sought from the
8		Office of the Chief Medical Officer, and Professor Sir
9		Jonathan Van-Tam emailed saying that the steer from the
10		CMO remains 50,000 doses, and ultimately the decision
11		was made that there wouldn't be an advance purchase of
12		the prophylactic Evusheld.
13		By the time you left in December 2020, were you
14		aware of the way in which the wind was blowing in terms
15		of whether the government would pursue Evusheld?
16	Α.	Yes, I was. And I felt very strongly that we were
17		conducting a strategy that was not following the
18		Prime Minister's goals. So we were following or we, the
19		government, was following a very clear two-tiered
20		strategy where the clinically vulnerable
21		immunocompromised patients were being deprioritised in
22		favour of those who were able to receive vaccines, and
23		I felt that was manifestly wrong, both ethically and
23		morally, but also, it did not follow the goals that we'd
25		been set, which was to protect the entire population.
20		49
1		are developing a new drug you don't have the data to
2		show an 18-month shelf life because you haven't been
3		developing it long enough to have that stability data.
4		So there was a catalogue of reasons which I don't
5		think, I'm afraid, any are sound in reasons for why the
6		clinically vulnerable immunocompromised patients in the
7		UK were deprioritised versus those who could receive
8	-	vaccine.
9	Q.	I think it's important that I put to you that the letter
10		from Professor Sir Chris Whitty of 11 December, which
11		I know you've been provided a copy of, didn't make any
12		reference to cost and I think Sir Chris Whitty would
13		say, if we were to ask him this question directly, that
14		that was within the reach of the Office of the Chief
15		Medical Officer. Cost wasn't for him. And he makes no
16		reference to cost. What he says is there's a different
17		context now because of the vaccine rollout. By
18		December 2020, there is the prospect of the vaccine

7		individuals, who were already shielding, to stay
8		shielding at home, and then if they were to be infected,
9		then they would be treated with drugs, but there was no
10		appetite, because of cost, to actually buy vaccine
11		buy the therapeutics now.
12		Now, again, that is at odds with the way we did our
13		commercial contracts with vaccines. So in the case of
14		vaccines, we, of course, didn't know which, if any, of
15		these vaccines would work. So we provided some money
16		upfront to help with the manufacturing scale-up, and
17		with the clinical development. Then, if the vaccine
18		actually showed it was effective, then that was another
19		milestone and we made another milestone payment. Then,
20		when, you know, whatever doses had been agreed, was
21		delivered, we made another milestone payment. So you
22		don't have to pay all the money upfront.
23		There was a comment in one of the statements about
24		shelf life, and they couldn't accommodate the shelf
25		life. Well, that is wrong, because of course, when you
		50
1	Α.	····, ································
2		"I consider costs, including cost effectiveness and
3		practicality considerations, to be entirely rational
4		factors when making decisions on neutralising antibody

Q. And whose statement is that? 6

procurement."

7 Α. JVT's.

5

- 8 Q. That's JVT's, right. So that's --
- So cost clearly played a role. 9 Α.
- Right. 10 Q.
- A. No question on that. And the fact that the vaccine 11
- 12 rollout had been effective doesn't stop people without
- an immune system getting infected. And the idea that 13
- 14 you take your most clinically vulnerable and say, well,
- 15 don't worry, you're going in for a bone marrow
- 16 transplant to treat your leukaemia but, you know, coming
- 17 into hospital, if you get infected with Covid, don't
- 18 worry, we'll treat you, rather than saying: you know
- 19 what, you're in a very clinically vulnerable time of
- 20 your life, let's give you all the help we can before you
- 21 go in for this traumatic procedure.

22 Q. The issue of whether or not to pursue monoclonal

- 23 antibodies was, as you've said, a matter for the VTF.
- 24 It was within your reach. Ultimately, the decision on
- 25 not to pursue an advance purchase was therefore one that 52

Officer a costs issue. They were relying upon other

epidemiological and clinical issues.

So it wasn't, from the Office of the Chief Medical

programme succeeding, and therefore the context had

changed, and it remained difficult to assess against

that context what the ultimate benefit of Evusheld

19

O U you happen to see, or was thorught to your attement, the VTF was storegrapher's sake, so I shall return at 11.30. Thank you. O U you happen to see, or was thorught to your attement, the VTF was storegrapher's sake. O Hard hout, in your immittable way, you would have pushed back against those arguments? A se my job was not to tell the Chief Medical Officer how to manage public health in the U.K. My job was to make your adjust the arguments available for use and for deployment. If they chosen is to deploy, that is not for this it, it was the asset of government, about to gravements available for use and for deployment. And I think it is symptomate of business as usual in Whitehall, as opposed to what the agreements available for use and see that I emphase therein the WLK. My job was to make your adjust the arguments? With the government. And I think it is symptomate of business as usual in Whitehall, as opposed to what the weak is the intervent to tell as opposed to what the cores argument and the weak is the intervent to the tax streamely good and rever place backs the streamendation of marken space. However, the fast recommendation of marken space in adjust the argument and the probably is informate training of ministers, seek robust the fear the ord manage information that would be promoted and undeperformers released, stor page to addit from investing in a chicken egg and the arguments and the hink of gravement and they we thank power. With the government, whitehall form investing in a chicken egg and				
 A way and of the VTF was strongly supportive. C Of purchasing Evusheld in advance? A sa tool to manage those individuals that observise we were not managing. D Ed you manage those individuals that observise we were not managing. D Ed you mappe to see, or was it brought to your attention, that Professor SF Chris Whithy had written expressing the views of the Office of the Chief Medical Officer - A Indar't seen the letter but i understood - and i spoke to Chris and i understood the arguments. I ddn't agree with them. And not duit, in your immittable way, you would have pushed back against those arguments. Well, I heard the arguments. I ddn't agree with them. And not duit, in your immittable way, you would have pushed back against those arguments. A mot o duit, in your immittable way, you would have to manage public health in the UK. My job was to make propertunity in your back, this is pushed back against those arguments? A so to for the to lift the Chief Medical Officer how to manage public health in the UK. My job was to make the recommendations, on respect of government, about vaccines and prophylactic treatments available for use and for obplycific treatments available for use and for obplyce. If they with the substrome to instance? (just think it was the word, which is: we can't be criticised if we folgo and very effective. However, the first recommendations, on account of your ad almost unique position as the chain of the Vaccine T is work which has any power to be promoted and underperformers proteoders. That on that lengthsise through you that of course agrees to add which government, does is otherwisely good and very effective. However, the first recommendation has a chick energy and tractist promote and underperformers proteoders. That the issense are suit after free as a prest deal with the subtract in spece to propromoted and underperformers proteoders, that is gorophylene,				
 Q. Opurchasing Evushed in advance? A As a tool to managing. Did you happen to see, or was it brought to your Did you happen to see, or was it brought to your Did you happen to see, or was it brought to your Mathematical that Professors IIC in Whithy had written expressing the views of the Office of the Chief Medical Officer - In hard's seen the latter but i understood - and i spoke to Chris and I understood the arguments. Well, I heard the arguments? And no doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your inmitiable way, you would have pushed back against those arguments? A for doub, in your thork, this is symptomatic of the problem to returners available for use? and for deployment. If they choose not to dopley, that is on tho much, on these five recommendations, on account of your word problematic through you that of course a great deal of what government does is extremely good and very effective. However, the first commendation as the chair of the Vaccine 353 the word, which is: we caribe critical of W follow at the extreme. And they are thore and the letter. a great deal of what government does i	Δ			
 A. As hold to manage those individuals that otherwise we were not managing. Did you happen to see, or was it brought to your attention, that Professor Six Chris Whith had written expressing the views of the Office of the Chief Medical Officer - I hadrit seen the letter but i understood - and I spoke to Chris and I understood the arguments. Well, I heard the arguments. I wild in tagree with them. And no duit, in your immittative way, you would have public health in the UK. My job was to make the arguments? A for double was not to tell the Chief Medical Officer how to have not to the Intel Media Matter and interstood the arguments? A for double way, public health in the UK. My job was to make or too short to file for the Media Officer how to have not to tell the Chief Medical Officer how to hand public health in the UK. My job was to make or too short tool the Chief Medical Officer how to have not to tell the Chief Medical Officer how to have a took at it. So my job was not to tell the Chief Medical Officer how to have not to tell the Chief Medical Officer how to have and for deployment. If they choese not to deploy, that is symptomate of business as usual in Whitehall, as opposed to what the 23 much, on these five recommendations, on account of your and wrong decision. And I think it's probably important that I emphasise through you that of course 33 much, on these five recommendations, on account of your and wrong decision as the chair of the vacche with the world, which is: we cart't be criticised I we follow and wray effective. Herewere, the first recommendation 44 there were than of the world, which is: we cart't be criticised I we follow and wray effective. Herewere, the first recommendation 44 the were and which were and the top world were of the stand the top word were that with the world, which is: we cart be criticised I we follow and wray effective. Herewere, the first recommendation 44 the were and which were an	-			
 were not managing. Did you happen to see, or was it brought to your attention. Hat Professor Si Chris Whithy had witten expressing the views of the Office of the Chief Medical Office - I hacht seen the letter but 1 understood - and 1 spoke to Chris and 1 understood + and 1 spoke to Chris and 1 understood + and 1 spoke to Chris and 1 understood + and 1 spoke to Chris and 1 understood + and 1 spoke to Chris and 1 understood + and 1 spoke to Chris and 1 understood the arguments. Weil, 1 heard the arguments. Viel, 1 heard to early our inimitable way, you would have pushed back against those arguments? A nd nd dubt, in your inimitable way, you would have pushed back against those arguments? So my job was not to tail the Chief Medical Officer how to manage public heathments available for use and prophysicot treatments available for use and for deployment. If they chose not to deploy, that 22 And I want to, please, gend a little time, not commendations you make to influence? Lipt think it was the work, on the origon course, very, very closely 53 with the government. And I think it's probably important that I emphasise through you that of course agreat diel of what government does is extremely good and very effective. However, the first recommendations of the Vaccine 5 agreat diel of what government does is extremely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." A course, seek robust for effective. However, the first recommendation they out the world, which is: we can't be criticised if we follow at all these to seek wey that 90 out a share the world. the world, which is: we can't be criticised if we follow at all these to seek that the they agree and they were hand. the reforease the world and underperformers to reaction of staft, promote 5 agree that the way seek robust effective. How you yet sevacines always used to be made				-
 Q. Did you happen to see, or was it brought to your attention, that Professor Sir Chris Whithy had withen expressing the views of the Office of the Chief Medical Officer - A. Indah't seen the letter but lunderstood - and I spoke to Chris and Lunderstood the arguments. Well, I heard the arguments. Unlift agree with them. A. And no doubt, In your inimitable way, you would have pushed back against those arguments? A. And no doubt, In your inimitable way, you would have pushed back against those arguments? A. So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make vaccines and prophylactic treatments available for use and for ofphylactic treatments available for use you've given the things already. A. So my job was not to tell the Chief Medical officer how to manage public health in the UK. My job was to make you've given the chair of the Yaccine business as usual in Whithenki as opposed to what the 25 with the government. And I think it's symptomatic of business as usual in Whithenki as opposed to what the 25 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government dates is extramely good and very fetcheur. However, the first recommendation for the vacione with the you make is this: Reward outcome not process." A. Completely agree that those are critical for Whitehall for insection of your book and it's in my witness released, stop radio trading for growment in the Vacine shuth with sis word to all stops the word, which sis word and the proteods that we had you tak about the need to ensure that Whitehall for investing in a chicken agg in a ch	А.	-		-
 attention, that Professor Sir Chris Wiltigh and written expressing the views of the Office of the Chief Medical Office - I hardn't seen the latter but Lunderstood and I spoke to Chris and Lunderstood the arguments. Well, I heard to Chris and Lunderstood the arguments. Well, I heard to the Long Shot, and have a look at it. A I hardn't seen the latter but Lunderstood the arguments. Well, I heard the arguments. I dicht agree with them. A I hardn't seen the latter but Lunderstood the arguments. Well, I heard the arguments. I dicht agree with them. A And no doubt, in your inmittable way, you would have the apsoful take against those arguments? A So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make the taments available for use and prophysicit treatments available for use and prophysicit treatments available for use and for deployment. If they choose not to deploy, that the ton finance; I just think it was the ware of the social a few things already. and for deployment. If they choose not to deploy, that is on the react in the Vaccine and prophysicit treatments available for use and to fue position as the chair of the Vaccine to the Vaccine to the Vaccine and the latter. a great ted of that government does is extremely good and very effective. However, the first recommendation of the vaccine shot whole box-checking view of the world, which is: we can't be criticised if we follow that you take to be procedures. that the Whitehall if form investing in a chicken agg is refoured on outcomes not process." Revard outcome not process." And you tak about the need to ensure that Whitehall if form investing in a chicken agg is refoured on outcomes not procedures. that is mythened to fast, promote specific takes the aver the the way that outperformers need to be promoted and undereperformers procedures, that is moter box control fast.	0			
 expressing the views of the Office of the Chief Medical Officer Indriv seen the latter but 1 understood and 1 spoke to Chris and 1 understood the arguments. Well, I heard the arguments. I dicht agree with them. And no doubt, in your i minitable way, you would have pushed back against these arguments? And no doubt, in your i minitable way, you would have pushed back against these arguments? So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make you are not tell the Chief Medical Officer how to manage public health in the UK. My job was to make you choes not to dejuely, that and for depresming the views and prophytacic treatments available for use and for ophytacic treatments available for use and for ophytacic theorem, this it symptomatic of your book (theorem, the long state), and for depresmint. The ky the was the with the set of your book (theorem, and engaging, of course, very, very colosely business as usual in Whithental, as opposed to what the 53 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is extremely good and very effective. However, the first recommendation for the word, which is: we can't be orticised if we follow that you tak is about the need to ensure that Whitehall from investing in a chicken egg is reficue. However, the first recommendation for the word, which is: we can't be orticised if we follow that you tak about the need to ensure that Whitehall for investing in a chicken egg and that how you got you and the index of the state in part deal of way you actually for the state in part deal of training for ministers, seek robust references on past performance, and recultorate, in ease officians. It is any totake argument if you't was deal training for ministers, seek robust references on past performance, and recalibrate, in easence, the thinking of government, and ev	ω.			
 Officer - 1 If hard't seen the letter but I understood and I spoke to Chris and I understood the arguments. Well, I heard the arguments. Well, In your timitable way, you would have guided back against those arguments? And no doubt, In your inimitable way, you would have pushed back against those arguments? And no doubt, In your inimitable way, you would have pushed back against those arguments? So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make to manage public health in the UK. My job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was not to set the intervence in the future. And this section of your book focuses on the recommendations you make in respect of government, about which you've said a few things already. And I vant to, please, spend a little time, not too is not for the of influence: [1] stift hink it was the target of the Vaccine to the optic the influence: [1] stift hink it was the target of the Vaccine to your book and it's in my whitess transmit, and upposed to what the target of the Vaccine to your book and it's in my whitess transmit and the it his: 5 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is axternely good 3 with the government does is axternely good 3 and very effective. However, the first recommendation that you tak is this: 5 "Reward outcome not process." And you tak about the need to ensure that Whitehall is refocused on outcomes not procedures, that outperformers even that by how you get manufacturing plant, because that is the way that outperformers need to be promoted and underperformers group target and the vacing group was exacted and why we hand to the manufacturing plant, because that is the way that so upposed to white the manage		-		
 A I hadn't seen the letter but I understood and I spoke to Chris and I understood the arguments. Well, I heard to Chris and I understood the arguments. Well, I heard the arguments. J didn't agree with them. C And no doubt, in your inimitable way, you would have puble back against those arguments? A So my box son tot tell the Chief Medical Officer how to manage public health in the UK. My job was to make to manage public health in the UK. My job was to make to manage public health in the UK. My job was to make to respect of government, about vaccines and prophylacito treatments available for use and for deploy, that it was the the tot form to influence; I just think it was the tot for use to the funce. I just think it was the tot for use use usual in Whitehall, as opposed to what the 25 mouth on the set fure recommendations, on account of your almost unique position as the chair of the Vaccine 53 with the government. And I think it's probably important that I emphasise through you that of course agreat deal of what government does is extremely good and every flective. However, the first recommendation of the vaccine withich is we can't be criticised if we follow all they our lak about the need to ensure that Whitehall for investign in a chicken egg is refocused on outcomes not procest." Reward outcome not procest." And you tak about the need to ensure that Whitehall for investign in a chicken egg is refocused on outcomes not procedures, that outperformers need to be promotel and underperformers specialist science skills, mandate training for treatements, and everything dise we't a dark to wy oug et ways used to be made: with hids and lots of release. Shore has and the shore has a correliage chicks. How were, the thinking of government and the shore ling vaccines. And he had to say; well, have you actually himsters, seek robust references on past performance, and recabing a presented to the promote dark on yot proces.<th></th><th></th><th></th><th></th>				
 to Chris and I understood the arguments. Well, I heard the arguments. I didn't agree with them. C. And no doubt, in your initiable way, you would have pushed back against those arguments? A. So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make the coportunity in your book, this is precedent available for use and for deployment. If they choose not to deploy, that is in first each metha available for use and for deployment. If they choose not to deploy, that is in first each metha available for use and for deployment. If they choose not to deploy, that is in first each metha available for use and for me to influence: I just think it was the the available for use agreed at the set of the vacarine argument. Advant the grave ment, all there five recommendations you make in respect of government, about wrong decision. And I think it's symptomatic of the vacarine agreed at a divery affective. However, the first probably important that I emphasise through you that of course a great deal of what government, data of course is a great deal of what government data or sis extremely good and very affective. However, the first recommendation for investing in a chicken egg manufacturing plant, because that is the world, which is: we carribe criticael five follow at the vord, which is: we carribe criticael five follow at the vord whithe and is this: "Reward outcome not procest." And you taik about the need to ensure that Whitehall is refocused on outcomes not procedures, that outperformers need to be pronoted and underperformers precises. And he had to say: well, have you actually ministers, seek robust references on past performance, and recealing and the say and the bink is or a state. The moment, is done and they were hand picked and they did a great the vacines. And he had to say: well, have you actually ministers, seek robust references on past performance, and recealing and the shalt to ample subscing				
 the arguments. I didn't agree with them. If's INQ000474735. And no doubt, in your inimitable way, you would have pushed back against those arguments? So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make to and prophytocit treatments available for use and prophytocit treatments available for use and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy, that and for deployment. If they choose not to deploy that and for deployment. If they choose not to deploy that and for deployment. If they choose not to deploy that and for deployment. If they choose not to deploy that and for deployment. If they choose not to deploy that and for deployment. And I think it's probably for and vary affective. However, the first recommendation for and vary affective. However, the first recommendation they are deal of what government does is extremely good and subtrace shis. arefacted outcome not process." and you talk about the need to ensure that Whitehall they outcome not process." and you talk about the need to ensure that Whitehall to stop Whitehall from investing in a chicken egg refeased, stop rapid rotation of staff, promote people injecting chicken eggs and that's how you get yeacheal byter, in essence, the thinking of government. dard owat hapens is you've basically go	А.			
 And no doubt, in your inimitable way, you would have pushed back against those arguments? So my job was not to tell the Chief Medical Officer how to make you have in the future. And this section of your book focuses on the recommendations for improvements in the future. And this section of your book focuses on the recommendations you make in respect of government, about watch is and for deployment. If they choose not to deploy, that is not re to influence; I just think it was the and for deployment. If they choose not to deploy, that is not re to influence; I just think it was the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual in Whitehall, as opposed to what the pushes as usual of what government does is extermely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." Takforce, and engaging, of course, very, very closely so the vaccines and you tak about the need to ensure that Whitehall the world, which is: we can't be criticised if we follow all these toxes. Treeward outcome not process." So If give you an example. Patrick Vallance had to outperformers need to be promoted and underperformers gene to be promoted and underperformers gene to be promoted and underperformers gene to be indecring users. And he had to say: well, have you actually ministers, seek robust references on past performance, the secuent that the secuent be addition and every body and in fact wey out actually ministers, seek robust references on past performance, the hational day of making vaccines. And he had to say: well, have you actually ministers, seek robust references on past performance, the hational of go		-		-
pushed back against those arguments? 18 page 21, to make recommendations for improvements in the future. And this section of your book focuses on the true to manage public health in the UK. My blo was to make to respect of government, about watches and prophylactic treatments available for use and for deployment. If they choose not to deploy, that is not for me to influence; lipst think it was the 21 And I want to, please, spend a little time, not too is not for me to influence; lipst think it was the 23 And I want to, please, spend a little time, not too wrong decision. And I think it's probably 1 A. with the government. And I think it's probably 1 A. in the government. And I think it's probably 1 A. with the government does is extremely good and very effective. However, the first recommendation so the set way that you make is this: 5 "Reward outcome not process." 6 So I'll give you an example. Patrick Vallance had to stop Whitehall from investing in a chicken egg manufacturing plant, because that is the way that outperformers need to be promoted and uderperformers. a Completely agree that those are critical for Whitehall. 15 And so wat happens is you've basically got this group was excellent and they were hand picked and they dive agree. a faced working with, not my - my steering group was excellent and they were hand picked and they did a greet the National Audit Office dong a 5-month audit during misters, seek ve donel. We ton an bacto formaly acclines. A.	~			
 A. So my job was not to tell the Chief Medical Officer how to manage public health in the UK. My job was to make vaccines and prophysicit treatments available for use and prophysicit treatments available for uses as use an WhiteHall, as opposed to what the push as use an WhiteHall, as opposed to what the push as use an WhiteHall, as opposed to what the government. And I think it's probably 53 with the government. And I think it's probably 53 with the government. And I think it's probably 53 with the government does is extremely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." A It's going to – it's in my book and it's in my witness attement, and very by oby abouid read the letter. all these boxes. "Reward outcome not process." And you tak about the need to ensure that Whitehall is refocuse that to the way that outperformers need to be promoted and underperformers people injecting chicken eggs and that's how you get vaccines. And he had to say: well, have you actually ministers, seek robust references on past performance, and recalibrate, in essence, the thinking of government and the letting of maximal techniques? Which is the modern and recalibrate, in essence, the thinking of government and the letter dobut recombinant techniques? Which is the modern day of making vaccines. And he had to say: well, have you actually importanting for t	Q.			
 to manage public health in the UK. My job was to make vaccines and prophylactic treatments available for use and for deployment. If they choose not to deploy, that is not for me to influence; I just think it was the 20 much, on these five recommendations, on account of your wrong decision. And I think it is symptomatic of 24 almost unique position as the chair of the Vaccine 25 business as usual in Whitehall, as opposed to what the 25 Jack and 1 think it's probably 53 with the government. And I think it's probably 15 down and the physical down and the physical down and the letter. a great deal of what government does is extremely good 3 and very effective. However, the first recommendation that you make is this: Teward outcome not process." And you talk about the need to ensure that Whitehall series are for a government, and indicating for 26 and you government and and and ergerformers previded and underperformers are to be promoted and underperformers are to be promoted and underperformers and recalibrate, in essence, the thinking of government and power and power and power and power and the dust of maxing vaccines. And he had to say: well, have you actually heard about recombinant techniques? Which is the modern and recalibrate, in essence, the thinking of government and they did a great 17 evecyfing else were donel. We ignore the act that we power and picked and they did a great 17 evecyfing else were donel. We ignore the act that we prove donel bus they do a great fing promote sevel doing a secile that those are critical for Whitehall. So I faced working with, not my - my steering group was excellent and they were hand picked and they did a great 17 evecyfing else were donel. We ignore the fact that we power acting having to educate officials. It was to baread to fing they were that the were the ada to the rowere, and ingit says that the were had to far opting else were were and to far opting else were were and they were to have evere head to				
 vaccines and prophylactic treatments available for use and for deployment. If they choose not to deploy, that is not for me to influence; I just think it was the wrong decision. And I think it is symptomatic of business as usual in Whitehall, as opposed to what the 23 much, on these five recommendations, on account of your almost unique position as the chair of the Vaccine business as usual in Whitehall, as opposed to what the 25 Taskforce, and engaging, of course, very, very closely 54 54 54 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is extremely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." "Reward outcomes not procedures, that outperformers need to be promoted and underperformers released, stop rapid rotation of staff, promote officials. Completely agree that those are critical for Whitehall. So I faced working with, not my - my steering group was excellent and they were hand picked and they did a great 17 eeverything else we've got a vaccine. And head to say: well, have you actually heard about recombinant techniques? Which is the modern drift was obstructive, in many cases. And I might say that 20 wrow not head bink group has exactle the moment, is going down any 6-month tenure is completely ridiculous, but it is - We can't go there - Ke kow, but it's all the mentality - Ke kow, but it's all the mentality - The was obstructive, in many cases. And I might say that 20 wrow may cannot have a protein-based the Nations that is were doing, they have 21 word was the way that 20 wrown much time basically batting incoming questions, enquires, having to educate officials. It was obstructive, in many cases. And I might say that 20 wrown was exclinent here with sing and they were that they were that a weith a so way they have the wave the educat	Α.			-
and for deployment. If they choose not to deploy, that is not for me to influence; I just think it was the wrong decision. And I think it is symptomatic of business as usual in Whitehall, as opposed to what the 53 22 And I want to, please, spend a little time, not too much, on these five recommendations, on account of your almost unique position as the chair of the Vaccine Taskforce, and engiging, of course, very, very closely 54 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is extremely good and very effective. However, the first recommendation that you make is this: 1 A. It's going to - it's in my book and it's in my witness statement, and everybody should read the letter. But it reinforces this whole box-checking view of that you make is this: 5 But it reinforces this whole box-checking view of the world, which is: we can't be criticised if we follow all these boxes. "Reward outcome not process." 6 So I'li givey ou an example. Patrick Vallance had to stop Whitehall from investing in a chicken egg manufacturing plant, because that is the way that outperformers need to be promoted and underperformers released, stop rapid rotation of staff, promote specialist science skills, mandate training for ministers, seek robust references on past performance, and recalibrate, in essence, the thinking of government officials. 1 And so what happens is you've basically got this groupthink, and we saw it with mRNA, and it's: at last was obstructive, in many cases. And I might say that yaccine because government, and face even the youstions, enquiries, having to educate officials. It was obstructive, in many case. And I might say that the Nati				
 is not for me to influence; Just think it was the wordy decision. And I think it is symptomatic of business as usual in Whitehall, as opposed to what the 53 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is extremely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." And you talk about the need to ensure that Whitehall is refocused on outcomes not procedures, that outperformers need to be promoted and underperformers released, stop rapid rotation of staff, promote specialist science skills, mandate training for ministers, seek robust references on past performance, and recalibrate, in essence, the thinking of government officials. A. Completely agree that those are critical for Whitehall. So I faced working with, not my -my seering group was excellent and they were hand picked and they did a great job, but I spent so much time basically batting incoming questions, enquiries, having to educate officials. It was obstructive, in many cases. And I might say that the wat on the two saw it with mRNA, and it's at last the wat of the word what happens is you've basically gont his grouptink, and we saw it with mRNA, and it's at last the wat of the wat the two mend hadit Office doing a 5-month audit during my 6-month tenure is completely ridiculous, but it is - We want go there - We cant go there - Kow, but it's all the mentality - Kow, but it's all the mentality - Kow, but it's all the mentality - Kow it's all the mentality - Kow it's all the mentality - Kow, but it's all the mentality - Kow, but it's all the mentality - Kow, but it's all the mentality - Kow cant go there - Kow, but it's all the mentality - Kow cant go there -				
wrong decision. And I think it is symptomatic of 24 almost unique position as the chair of the Vaccine business as usual in Whitehall, as opposed to what the 25 Taskforce, and engaging, of course, very, very closely 53 54 with the government. And I think it's probably 1 A. It's going to it's in my book and it's in my witness a great deal of what government does is extremely good 3 But it reinforces this whole box-checking view of and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow all these boxes. 5 So I'll give you an example. Patrick Vallance had to stop Whitshall from investing in a chicken egg and you talk about the need to ensure that Whitehall 7 to stop Whitshall from investing in a chicken egg released, stop rapid rotation of staff, promote 9 vaccines always used to be made: with tot sand lots of specialist cience skills, mandate training for 11 vaccines. And he had to say: well, have you actually ministers, seek robust r				
business as usual in Whitehall, as opposed to what the 25 Taskforce, and engaging, of course, very, very dosely 53 54 with the government. And I think it's probably 1 A. It's going to it's in my book and it's in my witness a great deal of what government does is extremely good 3 But it reinforces this whole box-checking view of a tray out alk about the need to ensure that Whitehall 5 It os top Whitehall from investing in a chicken egg is refocused on outcomes not procedures, that 0 outperformers 9 released, stop rapid rotation of staff, promote 10 people injecting chicken eggs and that's how you get vaccines always used to be avacines, and recalibrate, in essence, the thinking of government 1 And to wait happens is you've basically got this officials. 7 And twis thy were hand picked and they did a great 7 everything else we've done! We ignore the fact that we job, but I spent so much time basically but it is - 2 JCVI now has had to formally uit it in their we sobstructive, in my cases. And I might say that 1 And twis is not much, and it's: at last we call the working with, not my - my steering group was 10 we've got a vaccine, we now can basically ignore excellent and they were ha		-		-
 53 with the government. And I think it's probably important that I emphasise through you that of course a great deal of what government does is extremely good and very effective. However, the first recommendation that you make is this: "Reward outcome not process." And you talk about the need to ensure that Whitehall is refocused on outcomes not procedures, that outperformers need to be promoted and underperformers preleased, stop rapid rotation of staff, promote 10 people injecting chicken eggs and that's how you get specialist science skills, mandate training for 11 vaccines. And he had to say: well, have you actually ministers, seek robust references on past performance, and recalibrate, in essence, the thinking of government of government of day of making vaccines. A. Completely agree that those are critical for Whitehall. So I faced working with, not my my steering group was excellent and they were hand picked and they did a great job, but I spent so much time basically batting incoming questions, enquiries, having to educate officials. A. Completely agree that doed and they did a great job, but I spent so much time basically batting incoming my 6-month tenure is completely ridiculous, but it is - Q. Me can't go there - A. Know, but it's all the mentality Q for reasons of parliamentary privilege 				
with the government. And I think it's probably 1 A. It's going to it's in my book and it's in my witness a great deal of what government does is extremely good 3 But it reinforces this whole box-checking view of and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and very effective. However, the first recommendation 4 the world, which is: we can't be criticised if we follow and you talk about the need to ensure that Whitehall 5 all these boxes. 5 "Reward outcomes not procedures, that 8 manufacturing plant, because that is the way that outperformers need to be promoted and underperformers 9 vaccines always used to be made: with lots and lots of people injecting chicken eggs and that's how you get vaccines always used to be made: with lots and lots of officials. 11 vaccines. (14) Pages 53 - 56

	hostile relationships with industry, they distrust them.
	And again, read my witness statement and the book to see
	how they behaved with Valneva and Novavax
Q.	I don't want to go into any of the detail of any
	individual
Α.	I'm not going to go into the detail, I'm just
	encouraging everybody, if they want to see a good story,
	look at the SEC filings, because that will tell how our
_	government has behaved.
	No, Dame Kate, I'm afraid you're in danger of doing what
	some of your predecessors have done, of a more political
	hue; you have to answer the questions, please, not go
	off in other directions.
	Much of what you say under this heading, "Reward
	outcome not process" appears to focus on performance, because you refer to ridding the system of
	underperformers and promoting outperformers and stop
	rapid rotation and reward the skillful.
	Do you think there is a general problem in terms of
)	there not being any absence of good faith, but because
	many of the politicians and officials you dealt with
	were generalists rather than specialists, in particular
	STEM graduates or STEM trained.
Α.	You are quite right. So this was an observation I made
;	immediately having joined BEIS, and actually, I spoke to
	57
	Service
Q.	Do more and write less?
Α.	Do what Whitehall calls "delivery". So get out into the
	front line, spend some time in industry, do something
	that is not what they regard as the most important part,
	which is policy writing, and do something that is
	achieving something that is for the common good.
	And it's not that they're not good natured and it's
	not that they're not hardworking and well meaning,
)	because I think they are all of those things; they're
	just ill-equipped for the 21st century
2	technologically-driven society in which we operate.
Q.	
•	refer to the need to embed scientific thinking and
i	science in policy making, just like economics, and you
i	refer to the need for scientific thinking to be at the
	forefront of what, in particular, BEIS does. And then
	at the time
A.	Not just BEIS! Across government!
	А. Q. Q. Q.

- 20 **Q.** Then at the bottom of the page, you go as far as
- 21 suggesting a complete overhaul of the recruitment, 22 professional development and incentives for civil
- 23 servants.
- 24 And by that, if we go over the page, did you have in
- 25 mind, or do you express views on turnover, having

1	the head of recruiting or HR at BEIS pretty quickly and
2	said, "You don't have this the business department
3	and industrial strategy. You have nobody with any
4	business skills and you've got nobody with any
5	understanding of the industry in which we're operating.
6	And how does that work?" And they've all got humanities
7	degrees with an economics masters and none of them have
8	any relevant expertise.
9	So and if you look at the stats, 90% of Whitehall
10	have humanities backgrounds so only 10% are STEM, and if
11	you have a PhD in the Civil Service, you hide it under
12	a bushel, because as soon as you're discovered to be
13	a scientist, then you're a wonk and you're put in the
14	corner and never allowed to do anything.
15	And more importantly, no one has ever done anything,
16	so they're all busy writing policy papers and sending
17	each other, you know, stuff to review and all that.
18	None of that actually gets to the heart of what it is
19	they're trying to do. What are they trying to achieve,
20	and are they measured against the delivery of their
21	goals? And the answer is no. In the private sector,
22	you don't deliver your goals, you're out of a job and
23	you have to move on. And in the private sector you get
24	referenced, and if you don't perform people know about

25 that. That is not the way it works in the Civil 58

1		a slower turnover and less rotation. You say something
2		quite pithy, I think, about firing people dealing with
3		communications
4	Α.	All of them!
5	Q.	engagement.
6		Well, I don't think we can go, probably, that far,
7		Dame Kate, but you express some pretty trenchant views
8		on the need to ensure that government officials have
9		a better trained, a better analytical, a better
10		statistical and science-based approach to what they do.
11	Α.	And what it is that they're trying to achieve. So when
12		I'm getting emails from BEIS communications saying,
13		"We've approved you to do a speech to GAVI", which had
14		already been pre-recorded and delivered two days
15		earlier, you're kind of thinking, what world are you on?
16		Because this has already been done. They're just not
17		thinking. They're not engaged in what are you trying to
18		achieve. And
19	Q.	And
20	Α.	Yes.
21	Q.	Sorry, please go on. And at page 24, and at perhaps
22		a more granular level you suggest and this is in fact
23		something which is one of my Lady's recommendations in
24		the Module 1 report, so I think we might have beaten you

25 to it from today's vantage point, "Appoint a senior and 60

1		permanent pandemic security capability", and then on
2		page 25, "Agree a strong international approach to
3		vaccine research and development", we've already
4		discussed.
5	Α.	Can I just make a point on that, please?
6	Q.	Please.
7	Α.	The whole idea of manufacturing and capability in the
8		UK, the government's view, it's all about, you know,
9		have we made investments and are we doing the right
10		thing? And they're the missing the point that factories
11		are basically people who know what they're doing, they
12		are doing it, they're doing it repeatedly at scale.
13		It's not about the building; it's about the people and
14		what it is they are doing and delivering. And we cannot
15 16		be in a position where we can say, well, look we've got
17		all these shiny new buildings but without somebody with
18		a plan and somebody saying, "This is what we want you to do, and this is how we're going to assess you and
19		measure you." And there is no capability in government
20		doing that.
21		And again, I heard the witnesses on from UKHSA,
22		it is business as usual, procurement, government
23		bureaucracy. It is not strategic planning to make sure
24		that we are better set up for the future.
25	Q.	On that topic, there was in December 2020
		61
1		very effective at controlling serious disease and death
2		but they don't block transmission. They're not durable.
3		They're expensive. You've got cold chains. You've got
4		endless they are specific, they're not broad. So
5		there's lots of things that we need to do to improve and
6		there's no coherence in how we are actually going to
7		delivery those improved provides.
8		And yes, you need to have somebody with an external
9		viewpoint, not a bureaucratic mindset, to say what does
10		the contract say and now let's enforce you. This is
11		not, you know, buying generics, it is being innovative,
12		creative and collaborative.
13	LAI	DY HALLETT: Forgive my interrupting, Mr Keith.
14		Supposing you had a government that was reluctant to
15		set up another body, like an independent vaccine agency,
16		what arguments would you put forward to persuade the
17		government that it was absolutely essential?
18	Α.	If you were able to recruit the right people into UKHSA
19 20		it's possible that might work but then you lose all the
20 21		commercial capability. So the problem is you've got
21 22		this conflict between the commercial side and the clinical side, and we've seen it in the testimony. The
22		clinical side is all about: how do we not generate
23 24		precedent, we don't want to spend money and, you know,
24		what's the path of least resistance? It's the sort of
_0		63

1		a recommendations document produced by the VTF , authored
2		by yourself and Clive Dix. I presume, or we presume,
3		that it's dated December 2020 because it was approaching
4		the end of your time at the VTF. You recommend the
5		creation of a new executive agency within BEIS as
6		a central body responsible for co-ordination of
7		industrial and public sector assets and maintaining the
8		relationship between the UK's vaccine industrial base
9		and government.
10		Did you have in mind an agency or a body, it doesn't
11		have to be a statutory body, of course, that would deal
12		with vaccine-related issues on an end-to-end basis, so
13		dealing with clinical development as well as the
14		research and development, and going through to the
15		scale-up and the manufacturing end of the process?
16	A.	Correct.
17	Q.	So not just procurement, but a wider remit?
18	Α.	Absolutely that is what we were recommending. It wasn't
19		published at the time because it was deemed that if they
20		published it, it would be government policy, when it
21		wasn't, it was recommendations from the Vaccine
22		Taskforce. But what we were trying to recommend was how
23		can you ensure that this capability and this drive and
24 25		this partnership relationship continues with industry and with the innovators? Because our vaccines have been
25		62
1		"Yes, Minister" view. And the commercial side wants to
2 3		get on with it.
3 4		So the reason to have a separate agency is they would have the authority, like we did at the VTF, to
4 5		actually make recommendations that deliver an outcome.
6		If you put it into an existing government department,
7		you're going to end up with the same business as usual,
, 8		and you're going to be bogged down in bureaucracy, and
9		actually, in one of these your sessions yesterday
10		with Chris Whitty, where you talked about how many
11		different bodies were assessing Evusheld
12	MR	KEITH: Prophylactics (overspeaking)
13	Α.	Yes, something like six or eight different bodies, all
14		of which had to give their views on things. Now, if
15		you're embedded in government you're going to get lots
16		of that. The real success that we had was we were
17		slightly outside government. So even though we reported
18		into BEIS, we were not part of government. And that was
19		what caused friction; people didn't like it.
20	Q.	
21	-	you were a body within BEIS. However, you had a very
22		strong external input and you that the independence and
23		the authority to be able to report directly to the
24		Prime Minister, which you negotiated successfully in
25		advance, so you were a government body with bells on,
		64

(16) Pages 61 - 64

1		external bells. That was the key.	1
2	Α.	I think that is critical. And again, if you continue	2
3		with the defence analogy, defence isn't being split	3
4		between different departments with lots of people	4
5		putting their oars in. They have a very clear goal:	5
6		protect the UK, support your allies, all of those	6
7		things. It's very similar. We're much more likely to	7
8		have another pandemic than we are to be invaded. We've	8
9	_	had seven pandemics since 2020. That's a lot.	9
10	Q.	I think you must have read my Lady's forward to the	10
11		Module 1 report where precisely that point is made in	11
12		the second paragraph.	12
13	Α.	Excellent. I'm delighted. Thank you.	13
14	Q.	So do we take it I just want to ask you one or two	14
15		questions about a second recommendation that you make.	15
16		You have spoken in the past about the need for a vaccine	16
17		registry. Without going into the detail of it, the	17
18		vaccine registry was the process by which I think around	18
19		about, in total, 500,000 people volunteered by mid-2021	19
20		to participate in vaccine trials, and of course the	20
21		process itself was also used to generate data for other	21
22 23		public health policy decisions.	22
		Would you like to see that vaccine registry put on	23 24
24	•	a permanent and perhaps surer footing?	
25	Α.	Thank you for raising this. This is one of the good 65	25
1		was a legacy of something else. That is not the case.	1
2		This is a completely de novo vaccine registry that we	2
3		stood up in July 2020.	3
4	Q.	And did you and Clive Dix, in particular, also secure	4
5		approval for another type of capability but broadly on	5
6		the same lines, namely the Human Challenge Programme,	6
7		which is a trial in which healthy young adults receive	7
8		a vaccine before then being given the virus to test the	8
9		efficacy of the vaccine?	9
10	Α.	Yes, we did. And so I asked my friend and colleague,	10
11		Garth Rapeport, who used to run respiratory medicine	11 C
12		respiratory at GSK, and I've backed him twice as CEO and	12
13		I've backed him to do human challenge studies in his	13
14		respiratory companies successfully and I called him and	14
15		said, you know, "What do I do?" Because again, I'm not	15
16		a vaccine expert. I work with lots of brilliant people.	16
17		I am a mouthpiece compared with all these fantastic	17
18		people. And Garth then said what you need to do is a	18
19		human challenge because you will be able to understand	19 A
20		how the virus is infecting and therefore you can start	20
21		thinking about development of vaccines and therapeutics	21
22		and diagnostics. And, actually, those papers that have	22
23		been published both in the New England Journal and in	23
24		The Lancet have shown that exactly. And it did alter	24
25		the course of government policy. So it showed that	25
		67	

news responses. So the registry, you're correct, we have 542,000 people that are signed up on the NHS registry. In middle of 2022 -- I'm obviously one of them -- in the middle of 2022, I received an email saying, "We are shutting down the registry, and if you want to re-register into our new registry, please go ahead." So of course I was not very thrilled with that email, and said so, and shook the trees quite hard. And the outcome was that this registry has not been shut down, and has in fact been enlarged and embedded within NIHR's larger registry. It now has over 42% over the age of 60. So exactly the sorts of people who will need to be tested for every kind of drug. It's not just for vaccines; it's for any therapeutic, and it's been linked with a database where you can search for clinical trials. So this is starting to deliver the strategy that we set out, which was "We'll do something very specific for vaccines because we need to and we've got to get bodies into the trials quickly but we need to leave something with a legacy so that we are broader, not just for pandemic preparedness but for the UK." So this is definitely a plus that I am very pleased about. One of your witness statements suggested that that 66 lateral flow tests were able to pick up live virus before PCR and in fact when PCR was still registering positive, a lateral flow showed that you could -- it didn't register dead virus, basically. So it was a more effective test. So there are some clearly useful things that came out of it. But it's a difficult test, because as viruses mutate, you have to then mutate -- you have to remanufacture. So I think it was a useful experience but it hasn't continued. Q. Drawing some of the threads from what you said earlier about the manufacturing base for vaccines and also therapeutics, together, in very short terms, do you call as loudly as you are capable, for the manufacturing of vaccines and antibodies to be nurtured and secured as far as is possible and for the manufacturing and industrial base, the sites, the factories, to be maintained or reconstructed or certainly grown? A. Yeah, I mean, that's a very large question. We need to have a strategy, and that -- and the plan of how we're going to secure, grow and expand our manufacturing base

- has to be led by somebody who comes from the manufacturing industry. We were blessed to have
- 24 Ian McCubbin in our team, and everybody knows lan and
- 25 everybody loves him so when lan would call up and say,

1		"I need you to do me a favour, I need you to help",
2		everybody would. If somebody from UKHSA calls up these
3		manufacturers and says, "I need you to help", they
4		won't, because they don't have that warmth,
5		collaborative relationship.
6		So what we need, it's not just about buildings; it's
7		about a plan and a coordinated plan to bring together
8		the public sector, the private sector, government, all
9		of which we've got all the bits in place, and we've
10		shown we can do it in 2020, but that is not being
11		nurtured, and it is not being coordinated effectively
12		and we don't have the people to do it. And that is
13		what's missing and that is what needs to get put in
14		place.
15	Q.	Because it always fundamentally comes back to people,
16	-	doesn't it?
17	Α.	Completely.
18		KEITH: Thank you very much.
19	Α.	Thank you.
20		DY HALLETT: Thank you, Mr Keith.
21		I think there are some questions from Mr Thomas, who
22		is over there, Dame Kate.
23	тні	E WITNESS: Excellent.
24		Questions from PROFESSOR THOMAS KC
25	PR	DFESSOR THOMAS: Good morning, Dame Kate, can you hear me?
20	гN	69
1		And you go on to say:
2		"I still do not know how or why this happened. This
3		ban further complicated our work, as it meant that the
4		VTF had to try to deliver a national message without the
5		benefit of any targeted advertising support."
6		Question: have you since become aware why the
7		Cabinet Office made this decision to block expenditure?
8	Α.	No, I think it's just goes back to my box-checking
9		process point, which is, in order to recruit advertisers
10		or companies, they had to go through a formal government
11		procurement process, which was too slow and we
12		wouldn't you know, by the time that had happened, the
13		vaccine would have been the registry had been and
14		gone.
15		So it was astonishingly irritating, and it
16		significantly hindered our ability to deliver that
17		vaccine registry.
18	Q.	Right. Let me ask you the next question, which is this:
19		what impact, if any, do you think this had on ethnic
20		minority recruitment to the NHS registry?
21	Α.	(Laughs). I mean, I think the impact was that we had
22		fewer minority and ethnic individuals that signed up.
23		We ended up with about 8% in the registry, and it's
24		there's a public-facing dashboard, so you can actually
25		go in and have a look at it. But we and we did work
		71

A. Q.	Yes, just.
Q.	
	Okay, just bear with me one moment.
	My name is Leslie Thomas, and I'm representing
	FEMHO, the Federation of Ethnic Minority Healthcare
	Organisations. I've only got a small handful of
	questions for you. You state, and note at
	paragraph 41.10 of your statement, that the VTF had
	planned a paid advertisement campaign to support
	a large-scale push to drive people to sign up to the NHS
	registry, and that the costs for this had been approved
	by the VTF business case. And you go on to say and let
	me just quote:
	"We were particularly keen that our targeted
	campaign should reach those most at risk from infection,
	including the elderly, those with severe underlying
	diseases and frontline workers. We also especially
	wanted to attract people from black, Asian and minority
	and ethnic backgrounds who were disproportionately
	affected by [Covid] and who the evidence suggested might
	be among the more vaccine-hesitant to sign up."
	You also note at paragraph 41.12 that:
	" the Cabinet Office then [suddenly] blocked
	expenditure from our budget for advertising the NHS
	Registry, even though these costs had already been
	approved."
	70
	Q.

1		with NIHR to do and we worked with the Behavioural
2		Insights unit. We tried lots of different things to try
3		to figure out how to address vaccine hesitancy.
4		And, Mr Thomas, if I can just touch on it, I have
5		spent over 30 years working in drug discovery and
6		development's. That is my I live, eat, sleep,
7		thinking about it. I have never been part of a clinical
8		trial. And if I've never been part of a clinical trial,
9		how are we going to get members of the public to do it?
10		So the first thing I did, obviously, was to sign up
11		into a clinical trial. But I was very clear that unless
12		you tell people why it's important, what it involves,
13		what the risks are, and what the opportunities are of
14		being involved, people aren't going to sign up. So it
15		was really important to get that information out in
16		order to get people to sign up.
17	Q.	Hence the advertising strategy?
18	Α.	Everything. So because that was blocked, we ended up
19		having to go we went onto local radio. Divya, who
20		was our wonderful person leading clinical trials, went
21		onto Asian radio. We worked with a fantastic physician
22		in Bradford, Dinesh Saralaya, who basically was a sort
23		of community champion who addressed more of the Muslim
24		community. But it wasn't helped because trying to do
25		things piecemeal, you know, I'd have interviews with,
		72

1		you know, breakfast TV doctors to try to say why we
2		should do that. But it was it definitely harmed us.
3	Q.	Let me move on to my last question. I want to be
4		forward thinking and looking. What recommendations
5		would you make to increase the participation of ethnic
6		minority groups in vaccine clinical trials in the
7		future?
8	Α.	I mean, we can start now. We have a registry on the NHS
9		website which anybody can sign up to. Once they're
10		signed up, they can go in and search clinical trials
11		that they may be eligible for.
12		If you think about it, most diseases are not cured.
13		So anybody with a diagnosis of a disease that isn't well
14		managed would be well advised to go and look to see
15		whether or not there's a clinical trial they can take
16		part in. So what I would do is absolutely promote the
17		opportunity for people to have a better potential
18		healthcare outcome by taking part in clinical trials, to
19		then see are there new drugs that would actually suit
20		and treat that particular condition that people might
21		have.
22		And then you'll need to get community champions,
23		you'll need to get local, trusted individuals, whether
24		they're physicians, teachers, religious leaders, to
25		encourage people to do it. Because this is a highly, 73
		13
1		(The witness withdrew)
2	-	STEPHENSON: My Lady, the next witness is Dr Mary Ramsay.
3	LA	DY HALLETT: Thank you.
4		DR MARY RAMSAY (sworn)
5		Questions from COUNSEL TO THE INQUIRY
6	MS	STEPHENSON: Thank you, please sit down.
7		Please can you say your full name.
8	Α.	Yeah, Mary Ramsay.
9	Q.	Thank you for attending today to assist the Inquiry,
10		Dr Ramsay.
11		A few preliminary matters. Could I ask you to keep
12		your voice nice and loud, and speak slowly, please.
13		You have produced a witness statement, that's
14		INQ000496177, dated 26 July 2024. It runs to 70 pages
15		and 102 exhibits. Have you had the opportunity to
16		familiarise yourself with that statement recently?

- A. I have, thank you. 17
- 18 Q. And are you satisfied that its contents are true to the 19 best of your knowledge?
- 20 A. I am, thank you.
- 21 Q. Thank you. I'm just going to touch first on your
- 22 professional background. You're currently Director of
- 23 Public Health Programmes at UKHSA, and prior to that,
- 24 you were Head of Immunisation and Deputy Director of the
- 25 Immunisations and Vaccine Preventable Diseases Division
 - 75

- 1 highly regulated industry. Safety is paramount in
- 2 any -- and it's by law that we have to take -- do a lot
- 3 of work before you even start to put drugs into people.
- 4 And you need to tell people that it's available and what
- 5 the opportunities are and what the risks are.
- 6 Q. Trust is important, isn't it?
- A. Trust is critical. And so by trying to hide information 7
- 8 or not give people access to full and fair information,
- it's just going to -- doesn't address the trust issue. 9
- 10 Q. Bureaucratic blockages don't help, do they?
- 11 A. They certainly don't. You can imagine how thrilled
- I was when I got that response. 12
- 13 PROFESSOR THOMAS: My Lady, those are my questions.
- 14 LADY HALLETT: Thank you very much, Mr Thomas.
- I think that completes the questions for you, 15
- 16 Dame Kate.

25

- 17 THE WITNESS: Excellent.
- LADY HALLETT: I don't know, you said -- you've obviously 18
- 19 been following some of the evidence. Your appointment
- 20 as the chair of the Vaccine Taskforce was described
- 21 yesterday as a stroke of genius, and I think we can see
- 22 why. Thank you so much for everything you and your
- 23 colleagues did, it was an extraordinary achievement.
- 24 THE WITNESS: Excellent. Thank you very much for having me.
 - LADY HALLETT: Thank you. 74

1		within the National Infection Service in PHE, as it then
2		was, from March 2018 until the establishment of UKHSA in
3		October 2021? Is that all correct?
4	Α.	That's correct.
5	Q.	And before that, you held roles as Head of Immunisation,
6		Hepatitis and Blood Safety within PHE, and indeed in its
7		predecessor organisation, the Health Protection Agency,
8		from as far as back as 2009.
9		You have extensive clinical expertise, which I won't
10		attempt to summarise in full here, but is it right that
11		you hold a medical degree, you have extensive research
12		experience in epidemiology of vaccine-preventable and
13		blood-borne diseases, 30 years of that kind of expertise
14		and research?
15	Α.	That's correct.
16	Q.	You have acted as an adviser to the World Health
17		Organisation, including as a member of the Covid-19
18		vaccination subgroup, and finally, and importantly for
19		the evidence you'll give today, you are also the editor
20		of the "Immunisation against disease", known as the
21		"Green Book"?
22	Α.	That's right.
23	Q.	And have been since 2006?
24	Α.	That's correct.
25	Q.	Thank you. Just remind ourselves of that with which we

2

1		may be well familiar, the transition of PHE to UKHSA.
2		That was UKHSA was established on 1 April 2021 but
3		became operational on 1 October 2021. But of course,
4		when we are referring to matters pre that date, we're
5		talking about PHE?
6	Α.	That's correct.
7	Q.	The role of PHE, its key responsibilities in terms of
8		infectious diseases, was one of a duty to protect the
9		public from infectious diseases, and also, was it not,
10		to evaluate the effectiveness of immunisation programmes
11		and procure and supply of vaccines, and improve
12		population health by supporting health and care
13		services. Is that a fair summary of the duties?
14	Α.	Some of the duties, I should say.
15	Q.	Some of.
16		It's worth reiterating, however, that Public Health
17		England wasn't mandated or, indeed, funded to be ready
18		to respond to a pandemic of the scale that was
19		encountered with Covid-19; is that right?
20	Α.	I think that's fair.
21	Q.	Moving, then, to touch on the work undertaken by Public
22		Health England, as it was then, on vaccinations when
23		moving towards the rollout of Covid-19 vaccines.
24		Were there two divisions within PHE: the
25		Immunisation and Vaccine Preventable Diseases Division
		77
1	Q.	So, in England, the decision was made that the NHS and
2		NHSE would take the lead on deployment
3	Α.	That's right.
4	Q.	for vaccinations, as opposed to PHE?
5		In the context of this pandemic, was PHE of the view
6		at the time that that was appropriate, that division of
7		responsibility?
8	Α.	Yes, I think so. I mean, I think the we were
9		a relatively small team within PHE, a much smaller
10		organisation, so it made sense for NHS to take on some
11		of the huge scale. But obviously we wanted to be, and
12		we were, embedded within that work and leading on the
13		areas that we had the expertise on.
14	Q.	Perhaps just before we get into the detail of the
15		matters covered in your statement, by way of overview of
16		what the responsibilities were, as opposed to what they
17		were not, PHE took responsibility, importantly, for
18		storage and distribution, taking on the enormous task of
19		building the national infrastructure to enable the
20		storage and distribution of vaccines across the UK,

3	Α.	Exactly, yes.
4	Q.	And there was another division, the Vaccines and
5		Countermeasures Response Division. Was there also
6		a board, a vaccination a Covid-19 vaccination
7		programme board set up in May 2020?
8	Α.	Yes, so we ran boards at the IVPD ran boards with \ensuremath{VCR}
9		for the introduction of all new vaccines or any changes
10		to the vaccine programme. So in May 2020 we decided to
11		set up one in anticipation that there would be a Covid
12		vaccine at some point to support some of the workstreams
13		that we would need to deliver in preparation for that.
14	Q.	And when preparations started for the commencement of
15		the deployment of vaccines, is it right that that board
16		was dissolved in September 2020, but effectively because
17		NHSE were going to take on the vaccine deployment
18		programme through their Vaccine Deployment Delivery
19		Group?
20	Α.	Yes, I mean, I think they took over a lot of our, sort
21		of, project management stuff, but obviously there was
22		a much greater need to scale up the actual delivery, so
23		it became a DHSC decided it made more sense for them
24		to lead that because there was so much additional
25		delivery capacity needed.
		78
1		deliver to the end user, the doctor and nurse who are
2		giving the vaccines, in this we delivered to, sort of, a
3		series of hubs, and then the NHS commissioned onward
4		delivery at that point. So it was a joint piece of
5		work, but we did substantial amounts of work in getting
6		the infrastructure in terms of freezers, et cetera, set
7		up to receive the vaccines.
		-

(IVPD), which is probably the one you may refer to the

most in your evidence today?

- Q. And the IVPD, the division, mainly dealing with this 8 9 work, did it, in overview, have the following functions:
- 10 that it provided scientific advice and secretariat
- support to the JCVI? 11

12 A. That's correct.

- Q. It provided clinical and technical input for NHS England 13 14 to support the design of that deployment that we have
- 15 just been discussing?

A. (Witness nodded). 16

17	Q.	Of course the Green Book was also a responsibility that
18		we've mentioned. And then responsibility, too, for the
19		clinical documentation, the supporting guidance, the
20		toolkits, as we've sometimes heard them referred to,
21		training materials, Q&A materials that would be used or
22		would be the basis of NHS health professionals'
23		documentation for the immunisation programme?
24	Α.	That's correct.
25	Q.	So focusing, then, on the first main topic that I'd like

80

(20) Pages 77 - 80

which, whereas we deliver for normal vaccines, we 79

A. Yes, although because again it was a very different product from previous products, there was an element

importantly, whilst maintaining the required temperature

regimes; is that correct?

21

22

23

1		to ask you about, which is vaccine safety, and PHE and
2		the UKHSA's involvement on vaccine safety issues, could
3		you first help us to get an idea of where PHE sat
4		alongside the other bodies involved in safety? So
5		first, MHRA. What work did the relevant division do in
6		assisting MHRA in its safety investigations and
7		surveillance?
8	Α.	Well, the MHRA has primary responsibility for safety of
9		all therapeutics and vaccines, but we've had
10		a longstanding relationship with them, in particular in
11		relation to first of all, we because we're the
12		group that monitors how effective the vaccine is, that's
13		part of that risk/benefit, you know, how much benefit
14		you're getting versus any safety concerns. And we've
15		been working with them for many years on developing
16		their methods. We have the PHE had privileged
17		access, I guess, to a lot of clinical data systems that
18		allowed us to do some of the investigations of potential
19		safety concerns, and over many years we had done that
20		for MMR and other vaccines in the past, and we worked,
21		as I said, we worked very closely and actually, during
22		the pandemic we embedded people, we had, you know, joint
23		staff embedded within MHRA to try to support them in
24		their role.
25		I think the other thing we have is we have a much 81

1 does that mean?

- 2 Α. Well, most people are familiar with the concept of the 3 Yellow Card system which is the reporting system that is 4 basically a passive system which means that people have 5 to report it. There is no active -- we don't go and ask 6 people, it is what comes in through this passive system. 7 So that's the backbone of most safety surveillance. I'm 8 sure the MHRA can explain this better and there are some 9 expert reports explaining it, so that's the, sort of, 10 backbone. But it also includes other sources of 11 intelligence, exactly those things I was talking about 12 earlier. Clinical networks may approach us and say, "We're seeing something unusual", so that sort of 13 14 passive reporting, which is where people out in the 15 health service report to us without us going out seeking 16 advice. 17 Q. You talk about active surveillance in specific cohorts. 18 What does that --19 That is something that the MHRA established, which is Α. 20 where they set up a system where a group of people are 21 recruited to report any symptoms they got after 22 vaccination, so that's an active reporting system 23 because they are asked, "How are you after your 24 vaccine?" in an active way, so they were recruited to
- 25 this enhanced surveillance.

- stronger sort of clinical network, intelligence role
- with -- so we have -- we tend to get things reported
- 3 from clinical networks through our clinical colleagues
- 4 that we work with because we work with frontline health
- 5 protection, our frontline teams in health protection
- 6 work with local providers. So we get a lot of soft
- 7 intelligence that we feed in jointly with the MHRA.
- 8 Q. And in terms of NHSE, was it the role of the UKHSA when
 9 it came to safety, to inform the clinical advice and
- 10 information about safety that NHSE would be using?11 A. Well, again, we worked jointly on that but we were the,
- 12 sort of, work stream lead for surveillance which
- 13 included safety and so we were the people representing,
- 14 I guess, some of MHRA interests with the NHS. So we
- 15 worked very closely with them on the development of
- 16 those protocols.
- 17 Q. If we could move on now, then, to that surveillance
- 18 strategy and the specifics on it. You explain in your
- 19 statement that there were four main components to the
- 20 surveillance strategy which PHE, MHRA and NHSE
- 21 collaborated on, as you describe it, to monitor the
- 22 implementation of the programme and the safety of it,
- 23 once vaccines had begun to be deployed. The first of
- 24 those four elements you describe as enhanced passive
- 25 surveillance. Could you translate that, please? What 82
- Q. Also formal epidemiological investigations; really, in
 summary form, what does that mean?
- A. Yes, so where you have a potential signal like, say,
 vaccine X is associated with condition Y, then what we
 would normally do, and that's where PHE has a really big
- 6 role, is do a formal investigation where we may collect
- 7 data especially or we may use an existing dataset and
- 8 formally look at whether there is an increased risk of
- 9 that condition in a certain time period following
- vaccination, for example. So it's an analytical studyto test a hypothesis.
- 12 Q. And the fourth branch, the near realtime monitoring fora set of events of interest. What does that mean?
- 14 A. So in advance of a vaccine being approved, you may have,15 from the basis of the trials or from previous
- 16 experience, a series of conditions that you think may
- 17 well be potential side effects of the vaccine, and so
- 18 what you put in place in advance is some process of
- 19 actively collecting information on those conditions,
- 20 a list of conditions, in realtime as the vaccine
- 21 programme is rolled out, and constantly looking at that
- 22 to see whether you're getting more than you might expect
- 23 based on the background, background rate.
- 24 Q. Could we have on screen, please, document INQ000477132.
- 25 This is the Covid-19 vaccine surveillance strategy 84

1		dated January 2020. If we could go to, please, page 7.	1	
2	Α.	2021, I think it probably was, was it?	2	
3		January 2021, that's all, sorry.	3	
4	Q.	Thank you very much, I apologise. Thank you.	4	
5		If we could go, please, to page 7, at paragraph 4.1	5	
6		there we see the heading "Signal detection". So this is	6	1
7		the policy of the strategy of PHE setting out how signal	7	
8		detection would work:	8	
9		"A signal of potential adverse events may come from	9	
10		a range of sources such as the pre-licensure clinical	10	
11		trials, MHRA assessments of Yellow Cards reports [and]	11	
12		active follow-up"	12	
13		And also:	13	
14		" from other countries or specialist healthcare	14	(
15		professionals seeing increases in consultations for	15	
16		specific conditions."	16	
17		So does this capture what you were referring to	17	
18		earlier about the network of reporting back to PHE being	18	
19		relied upon, not just the Yellow Card system	19	
20	A.	5	20	
21 22	Q.	and waiting for people to report, but this web of routes of feedback?	21 22	
22	Α.		22	
23 24	Q.		23 24	
25	ч.	please, on the same page.	25	
20		85	20	
1		at the time to make sure, one, that they were being	1	
2		managed appropriately and reported to the MHRA, and also	2	
3		that my colleagues who work at local level, as well as	3	
4		ourselves, can provide advice on the implications of	4	
5		that for the programme, particularly where there were	5	
6		potential concerns about, you know, denting confidence	6	
7		in the programme where people hear about a condition	7	
8		that occurs after vaccination.	8	
9	Q.	So this was an operating procedure for any clinical	9	
10		incident that arose in the delivery	10	
11	Α.	Exactly.	11	
12	Q.	of vaccines which might include things like storage	12	
13		being an issue	13	
14	Α.	Yeah.	14	
15	Q.	administration errors	15	
16	Α.		16	
17	Q.	(overspeaking) incidents that may cause worry and	17	
18		may need further investigation?	18	
19	A.	Yeah.	19	
20	Q.		20	
21		see there is the standard operating procedure, and this	21	
22 23		particular version is dated 9 December 2020.	22	
23 24		Could we go to page 9, please, of that document. This is something that's described as the Clinical	23 24	
24 25		Case Escalation Framework. We certainly I do not	24 25	
20		87	20	'

uir	у	21 January 2025
1		"Rapid assessment
2		"To assess any signal coming from these sources,
3		a more detailed investigation is needed before a full
4		epidemiological study is performed."
5		What does that relate to, please?
6	Α.	So that relates to these conditions so, for example,
7		if the trial had suggested there was a case of
8		condition X and that was in our pre-defined list of
9		conditions, then we would actively look at datasets that
0		collect information on how many cases of disease X are
1		occurring, and comparing that to how many people have
2		been vaccinated to work out whether or not there was any
3		signal of a higher rate in people who are vaccinated.
4	Q.	Thank you. We can take that document down now.
5		Was there also in place a standard operating
6		procedure when it came to surveillance and safety issues
7		that had been agreed with NHS England?
8	Α.	Yes, it was a surveillance and response, actually. It
9		was in order to manage so one of the difficulties
20		with the programme, we were starting to roll it out in
21		old, older people, many of whom were frail and had
22		underlying medical conditions, and so it was not
23		surprising that we would expect to see people being
24		taken ill after vaccination, and we wanted to be sure
25		that that was being captured properly and also assessed 86
1		intend to ask you questions explaining every element of
2		this diagram but perhaps just to get an overview of
3		those systems of reporting that you described earlier,
4		we see on the left-hand side there that if an incident
5		is identified, that on the left-hand side a route is
6		to report to the MHRA by the Yellow Card system, but
7		there is also another route, and just pausing there
8		before we get to it, this document is intended for
9		clinicians delivering vaccines in mass vaccination
0		centres, GPs delivering, the range of routes of
1		delivery, it's intended for them to read if there is
2		a clinical incident at the point of the vaccine being
3	_	given; is that correct?
4	Α.	Yes, and also for the wider NHS. At the time the
5		programme in the NHS was being managed as part of the
6		emergency response procedures, because that was what was
7		set up for the whole pandemic, so the NHS, as you

- 3 realise, was under immense pressure and so was managing
- 9 things as an emergency, so they had this regional andnational escalation system.
- 21 Q. Just looking at this diagram, is that what we see here?
- 2 A. In the middle.
- 23 **Q.** There are regional points of contact which then feed
- 4 into the National Incident Co-ordination Centre?
- 25 A. Exactly.

1	Q.	And that eventually that can be escalated right up to	1
2		DHSC once it has gone through that route of escalation,	2
3		if it is a matter of concern, in terms of potential side	3
4		effects?	4
5	Α.	Exactly. And I think this was bringing together that	5
6		incident structure with the technical support from MHRA	6
7		and from PHE at the time.	7
8	Q.	Thank you. We can take that down.	8
9		So again, I don't want to labour the point but this	9
10		is in addition to MHRA's own Yellow Card surveillance	10
11		system, although obviously you're working closely	11
12		together.	12
13	Α.	Absolutely, yes.	13
14	Q.	Is it also right that within that standard operating	14
15		procedure there was available a seven-day-a week,	15
16		I think 12 hours a day phone line, which clinicians	16
17		could contact with any concerns?	17
18	Α.	So, I mean, MHRA already have, I think, a phone line.	18
19		I think what we put in place as well was an expert	19
20		vaccine, kind of, capacity, through my own team, really.	20
21		So that was, as you say, seven days a week, mainly,	21
22		actually, probably email, but it was available on the	22
23		phone using our duty doctor system.	23
24	Q.	I want to move on now from those systems of surveillance	24
25		to ask you about what information was provided to people	25
		89	
1		people?	1
2	Α.	So it's all about I mean, it went up online as soon	2
3		as we produced it and it's obviously cascaded, the NHS	3
4		providers themselves would be aware of it so they could	4
5		use it, but actually, certainly in the stages where we	5
6		were inviting people in through the national programme,	6
7		the leaflet was designed to go out with the letter	7
8		inviting people to make an appointment or, in the	8
9		initial stance would also all the sub-sub-sub-sub-sub-	
10		initial stages perhaps giving them appointments, to come	9
10		forward for vaccination for that first cohort. So we	10
11		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so	10 11
11 12	0	forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters.	10 11 12
11 12 13	Q.	forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What	10 11 12 13
11 12 13 14	Q.	forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of	10 11 12 13 14
11 12 13 14 15	Q.	forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms	10 11 12 13 14 15
11 12 13 14 15 16		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for?	10 11 12 13 14 15 16
11 12 13 14 15 16 17	Q. A.	forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal	10 11 12 13 14 15 16 17
11 12 13 14 15 16 17 18		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal approach, it's called "What to expect after	10 11 12 13 14 15 16 17 18
11 12 13 14 15 16 17 18 19		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal approach, it's called "What to expect after vaccination", and it's something that can be handed out	10 11 12 13 14 15 16 17 18 19
 11 12 13 14 15 16 17 18 19 20 		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal approach, it's called "What to expect after vaccination", and it's something that can be handed out at the time someone gets the vaccine, that perhaps tells	10 11 12 13 14 15 16 17 18 19 20
 11 12 13 14 15 16 17 18 19 20 21 		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal approach, it's called "What to expect after vaccination", and it's something that can be handed out at the time someone gets the vaccine, that perhaps tells them what to do if they get symptoms, to take	10 11 12 13 14 15 16 17 18 19 20 21
 11 12 13 14 15 16 17 18 19 20 		forward for vaccination for that first cohort. So we actually worked with the NHS, printed the leaflet so that it went out with the letters. And what about after the point of vaccination? What input did you have into making people aware of conditions that they may need to look out for, symptoms they may need to look out for? So we also produce a leaflet and, again, it's our normal approach, it's called "What to expect after vaccination", and it's something that can be handed out at the time someone gets the vaccine, that perhaps tells	10 11 12 13 14 15 16 17 18 19 20

- a safety signal, we might put specific things to look
- out for, for example, headache, for example, chest pain,

-	-	-
1		receiving the vaccine, or considering receiving the
2		vaccine, about safety. Please could you explain what
3		input PHE and then UKHSA had into the information about
4		safety which people received.
5	Α.	Okay. Well, I mean, I think again, a bit like the
6		safety monitoring, it's not just one thing, but our
7		responsibility, my own team's responsibility in PHE is
8		on providing the sort of information resources that are
9		used by healthcare professionals to help with consent of
10		individuals for vaccination. That's our kind of normal
11		role outside of the pandemic as well. So when a new
12		vaccine is introduced, we will develop a patient-facing
13		resource, leaflet, which explains why people need the
14		vaccine, what the side effects are, a broad range of
15		things. And we did that, as well, in the pandemic,
16		and in the programme, sorry, I should say, and we
17		produced that in a range of formats, a range of
18		languages. We print it so that it's available for
19		people to actually read as a piece of paper as well as
20		online, and we produce other kind of formats for people,
21		BSL, braille, other ways, videos for people who don't
22		have high literacy, Easy Read, and all those sorts of
23		different approaches.
24	Q.	So that information about what the vaccine is and what
25		the risks and benefits are, how was that delivered to
		90
1		those sorts of things, if there is something that we are
2		particularly concerned as being related to that
3		particular vaccine.
4	Q.	Within the Green Book, there was, throughout the
5		vaccination programme and still is, guidance on the
6		principle of consent, which includes the requirement for
7		people to be informed about the process of vaccination,
8		the benefits, the risks, including extremely rare
9		potential side effects or, indeed, common and not so
10		serious side effects. Are you confident that the

- serious side effects. Are you confident that the
- information provided by PHE and UKHSA to patients, taken
- in conjunction with some of the legally-required
- documentation that the MHRA were responsible for, that
- they satisfied that requirement that people were
- receiving the vaccine having been informed properly and able to consent to what they were receiving?
- A. Well, I would hope so, but that's not the -- I mean, the
- leaflet isn't the only thing. Obviously it's the
- process and everybody was supposed to see a healthcare
- professional so that they could discuss either any
 - specific issues about their individual health that might
 - affect the safety of the vaccine, which is really
 - important, as well as asking any questions about things
- that are there. I mean, the extent of literature that
- there is about safety, there's a lot of it, and some

16

April 2021. It's addressed from you to this -- the

Professor Dame Jenny Harries to be aware, you say: "... I have requested clearance to change NHS

website which is currently out of date for information

on clots -- sort of me against the DHSC comms, CMO in

And you explain that it wasn't updated after the

last MHRA press release because you were waiting for

the current content linked to out of date MHRA story with bad advice about presenting and it implied,

rather than a headache starting more than four days

updated advice, it dragged on, and your concern was that

incorrectly, you had to have had four days of a headache

Thank you, we can take that down and go to the next

particular email we're looking at, is from you to

between -- sub going to [Secretary of State]."

1		people may not be able to manage to read that as well or	
2		take it in as well. So obviously that potential for	
3		a conversation is a really important element, and	
4		I think ensuring that healthcare workers are also able	
5		to answer questions of the public is another element of	
6		that.	
7		So as I think we always say, consent is a process,	
8		not a one-off event, and there's a range of things. But	
9		I think the leaflets are one way that we help to ensure	
10		that they after consist that people are getting	
11		consistent advice and that advice is aligned with the	
12		clinical information as well.	
13	Q.	I want to move on now to ask you about a very particular	
14		issue that arose within the safety of vaccines in	
15		respect of blood clots and updates on information	·
16		available to the public about possible safety signals	
17		and about blood clots.	
18		We looked at this yesterday with Professor Dame	
19		Jenny Harries so I don't want to spend too much time on	
20		it, having already looked at this document, but just to	
21		get your view on it and to understand what it might tell	
22		us about the systems that were in place at the time to	:
23		inform the public about safety issues.	:
24		If we could have up on screen INQ000528432, please.	2
25		This is an email chain between you and others in	
		93	
1		with the parties that you've mentioned there about how	
2		to update the information that was going to go out to	
3 4		the public. Can you remember how your concerns on this occasion were responded to, how this was resolved?	
-		Well, in the end the DHSC, deputy director made	
5	Α.	· · · · · ·	
6 7		a decision to put the question to Secretary of State,	
7 8		and described my concerns and the Secretary of State decided to that it was okay to wait until after the	
9		Bank Holiday weekend and for everything to go out in	
10		a single suite. My proposal had been I mean, I knew	
11		there was going to be a lot of information going out	
12		immediately after the Bank Holiday but I was keen to	
13		change the NHS website in particular because of that	
14		slightly confusing advice about days of headache, so	
15		that people could get appropriate treatment as early as	
16		possible. That was my concern. So that was how it was	
17		resolved.	
18	LAI	DY HALLETT: Dr Ramsay, I'm sorry to interrupt, I don't	
19		follow why a decision of this kind, if there's wrong	
20		advice on the website, why it has to go to the Secretary	:

17 page, please. 18 This is another email in the chain where you say: 19 "FYI -- this sub follows my request to update 20 information on the NHS website ..." 21 And you go on to say: 22 "All against me but I feel obliged to push." 23 We can take that document down entirely now. Thank 24 vou. 25 There was also a meeting on, I think, 2 April 2021 94 1 want this to be changed. LADY HALLETT: So you had to go to the top? 2 3 A. So basically that was the decision, yes. 4 MS STEPHENSON: Was this is an isolated incident or were 5 there any other incidents where you had concerns about 6 public information on safety being accurate? 7 A. I think this was the -- there were others where perhaps 8 it took a while to, you know, but generally they were 9 resolved. I think this was a particularly difficult one 10 because it was just before the Bank Holiday so therefore there was this concern that -- we had four days, it was 11 12 a four-day Bank Holiday, which was quite unusual, so we

after the vaccine.

- had a slightly longer delay but yeah, I mean, obviouslyI was always trying to make sure that everything got out
- 15 as soon as possible and there was always that balance
- 16 with the communications professionals wanting to make
- 17 sure everything was aligned so that we were able to
- 18 a completely clear message, which of course is very
- 19 important. So I appreciate there's a balance, but
- 20 I think this was the only one where I was so
- 21 significantly concerned that we took it upwards, yes.

22 Q. You spoke earlier about the advantages of cooperation

- and co-ordination when it came to safety surveillance.
- 24 But on messaging, does this chain of emails or this
- 25 incident highlight that potentially there were too many 96

everything to go out in a coordinated way and didn't 95

of State? Why did you have to get your concern dealt

A. Well, because I had tried to make an appeal to the DHSC

comms, but they were very clear that they wanted

21

22

23

24

25

with at that level?

(24) Pages 93 - 96

2

		and Maria and an anti-
1		entities, organisations, involved in public messaging on
2		safety and not one with a definitive say, or conversely,
3 4		actually, was it a good thing that there were lots of
	•	eyes on what was happening?
5	Α.	Well, I mean, I think a decision was made that the
6		messaging would be managed, sort of, centrally in the
7		Cabinet Office/DHSC. So that was fine, having one
8		message, because it's very important not to have
9		inconsistent messaging because that confuses people
10 11		more. So I think I have no problem with that, and
12		I think what is good is that there is clinical input into that, and that the clinical expertise is reflected,
12		which it was, even though at the end of the day,
13 14		subsequently, my opinion was, sort of, overruled in
14		terms of the timing, but certainly when the messaging
15		went out, the tone of the messaging was completely
10		you know, I was completely behind making sure that the
18		balance of risks and benefits were going to be reflected
19		hopefully as accurately as possible.
20	Q.	What about from a patient or member of the public
20 21	Q.	perspective? We've heard about these different sources
21		of information about the risks and benefit of vaccines,
22		the process of vaccination. Do you think, on
23 24		reflection, it might have been good to have a central
24 25		source for the public to access information, so they're
20		97
1		yes, our secretariat also, who work in my team, were

2		a letter they might have received in the post? Wight
3		that be something to reflect on for the future?
4	Α.	Yeah, I mean, I feel I actually personally think
5		a single, sort of, website or a single authoritative
6		source of information on immunisation would be helpful.
7		We did used to have one prior to 2010 but now it's
8		devolved into either the NHS website or the DHSC
9		website. But of course, I do want to remind you it's
10		not just about websites, it's about the whole process
11		where people talk to their health professionals. So
12		having a consistent message is the key thing there, and
12		I do think we managed to achieve that, but I do think it
		5
14		would be easier if people could find everything in one
15		place. So I think it would facilitate that people are
16	~	accessing information that is aligned and authoritative.
17	Q.	I want to move on now to a different topic entirely,
18		that of prioritisation, and PHE and UKHSA's role in
19		that. You've already confirmed that there was the
20		provision of secretariat support for JCVI. Did PHE, in
21		the at least in the early stages always sorry,
22		often attend JCVI committee and subcommittee meetings as
23		observers? Was that a role that
24	Α.	Yes. I mean, there was always a number of us. Myself,
25		as the medical adviser, invariably would be there, and
		98
1		IC//I had included within cohort 6 those who were in
1		JCVI had included within cohort 6 those who were in
2		receipt of Carer's Allowance or the main carer of an
2 3		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk
2 3 4		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that
2 3 4 5		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole
2 3 4 5 6		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who
2 3 4 5 6 7		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore
2 3 4 5 6 7 8		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in
2 3 4 5 6 7		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance.
2 3 4 5 6 7 8		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what
2 3 4 5 6 7 8 9		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance.
2 3 4 5 6 7 8 9 10		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from
2 3 4 5 6 7 8 9 10 11		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an
2 3 4 5 6 7 8 9 10 11 12		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from
2 3 4 5 6 7 8 9 10 11 12 13		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and
2 3 4 5 6 7 8 9 10 11 12 13 13		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and then that definition being refined because it's
2 3 4 5 6 7 8 9 10 11 12 13 14 15		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and then that definition being refined because it's a definition which requires reference to the Green Book,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and then that definition being refined because it's a definition which requires reference to the Green Book, and the Green Book definition being ironed out, if you
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and then that definition being refined because it's a definition which requires reference to the Green Book, and the Green Book definition being ironed out, if you like, between a number of bodies.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18		receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. What was the procedure, please, for changing or deciding on definitions in the Green Book which might directly impact who was going to be included in a particular priority cohort, such as unpaid carers? Well, I mean, the Green Book already the Green Book
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A.	receipt of Carer's Allowance or the main carer of an elderly or disabled person whose welfare may be at risk if the carer falls ill, and then in February 2021 that definition was changed to include those who are the sole or primary carer for an elderly or disabled person who is at increased risk of Covid-19 mortality and therefore clinically vulnerable, in addition to those who are in receipt of Carer's Allowance. So we may not need to get into the minutiae of what happened but I provide it for context because it's an example of an interaction between the advice coming from the JCVI about who should be included in a cohort, and then that definition being refined because it's a definition which requires reference to the Green Book, and the Green Book definition being ironed out, if you like, between a number of bodies. What was the procedure, please, for changing or deciding on definitions in the Green Book which might directly impact who was going to be included in a particular priority cohort, such as unpaid carers? Well, I mean, the Green Book already the Green Book really is a sort of clinical document. It's designed

not going between the NHSE website, the PHE website,

a letter they might have received in the post? Might

100

(25) Pages 97 - 100

recommendations. So it's a difficult balance as to how 1 2 much detail is in the Green Book. But, primarily, the 3 Green Book I see as about the principle behind the 4 prioritisation, to explain that without necessarily 5 operationalising every single detail. And obviously, in 6 terms of the number of people eligible and whether 7 there's enough vaccines to vaccinate them and where 8 they, you know -- and those sorts of decisions are 9 really policy decisions, which are made by government or 10 by ministers. 11 So, for example, the definition that we had of 12 carers in that chapter was exactly the same as had been 13 in the flu chapter for the last ten or fifteen years, 14 probably. So I wasn't expecting it to need to be 15 changed. It has to be generic enough to cover the four 16 different devolved administrations, who may have 17 different legislation, different mechanisms for 18 identifying and even understanding who their carers are. 19 And DH took the responsibility of defining what 20 a healthcare worker was for England, including other 21 elements link -- like caring, but I was asked, actually, 22 by the NHS, in particular, to further clarify 23 particularly the clinical aspects of who was being cared 24 for, in order to avoid introducing unnecessary 25 inequalities and also to be so that people could 101 1 to do everyone in one go. So if we had taken -- if we 2 had given more vaccines to more carers, we could 3 potentially have had less vaccine to give to the 4 patients themselves, who were at high risk of mortality. 5 So it was part of the prioritisation, I think, just to 6 clarify and make it more consistent across the four 7 countries. 8 **Q.** I want to deal now with data, with monitoring uptake. 9 So monitoring, by which I don't mean surveillance of 10 safety issues, but how many people are taking up the vaccine offer --11 12 **A**. Yeah 13 Q. -- and who are they. That type of monitoring was the 14 responsibility of PHE and UKHSA, was it not? 15 A. Well, yes, but again, in collaboration, and our main 16 data source was the national immunisation monitoring 17 system, which was established by NHS Digital, 18 subsequently NHS England, but we worked very closely 19 with them and we primarily are the agency that takes the 20 role at a national level for producing these kind of 21 statistics, and publishing them. That's our normal 22 role. 23 Q. If we may just look again at the vaccine surveillance 24 strategy briefly. 25 It's INQ000477132, thank you. Page 6, please. 103

1		self-declare, so that if they came forward to
2		self-declare, that could be tested against the
3		definition of the person they were caring for.
4		So that's why that additional information was added.
5		It wouldn't normally be required in most of our
6		programmes because there is a clinician initiating the
7		activity, but obviously with a centrally managed thing
8		like the Covid programme they wanted more consistency,
9		I think.
10	Q.	Was it the case and it's a concern that is held by
11		some disabled people's organisations was it a concern
12		that operational considerations crept into the
13		definitions within the Green Book, by which I mean there
14		was a desire to make that particular cohort smaller so
15		that it wasn't unmanageable, and that might have been
16		why the definition of unpaid carers in particular was
17		narrowed?
18	Α.	No, I mean, I don't really see it particularly as being
19		narrowed, actually, I see it as being the main
20		concern was about equity equity and consistency so
21		that we could make the offer equal and consistent. And
22		also, really importantly, that we wouldn't be taking
23		vaccine away from individuals who themselves were at
24		very high risk of dying from Covid.
25		So at the early stages we didn't have enough vaccine

and used again.

requirements.

important papers?

Q.

Α.

weren't on the system.

aren't registered.

So that is an ongoing issue, I think, for the whole

health service, really, about how we access people who

Turning, then, to that issue of monitoring and unequal

produce papers, before even vaccines began to be delivered to people, highlighting -- and I'm talking

here in particular about a November 2020 paper on

groups, the importance of recognising that there are

gaps where the most vulnerable groups may not be

registered with a GP, and not have an NHS number.

that this was a foreseeable difficulty, would you agree?

Very longstanding, yes. I mean, I think -- and I think

a trivial thing to correct, obviously, and, yes, we just

felt it was important to flag that, because there were

a lot of people, both JCVI and people working in the

you could go to an outreach clinic with a box of

programme, who maybe hadn't been as embedded in 106

176 doses, and only use 50 of them. And potentially,

therefore, wasting the rest because it couldn't be moved

So there were very real barriers very early on, and

can you explain in overview what UKHSA did and PHE did

therefore it took some time for those outreach models to

start to get implemented, particularly the advent of the

AZ vaccine, which was more flexible in its storage

to try to reach those communities identified in these

A. So most of that work was really led by the NHS, I would

level, but also at that time we had local teams,

say. PHE are obviously very important in pointing out and helping, hopefully, to monitor it at a national

screening and immunisation leads, who were embedded in the NHS. Now, they would be people who would be

Q. Once that ability was there to deliver more flexibly,

the NHS were well aware of it as well, but it's not

It appears from what was recognised in that report

vaccine and health inequalities, considerations for

prioritisation and implementation -- pre rollout identified the need for identification of vulnerable

And was it quite a longstanding problem?

uptake and identifying those gaps in coverage, did PHE

1		a rather clumsy way of the data getting in and we
2		wanted, obviously, people to be able to enter data
3		not for the people who were giving the vaccines to be
4		able to get the data into the system with relatively
5		little overhead in terms of data entry capacity.
6		So point of care apps were produced by the NHS and
7		they've been rolled out since and there are more of
8		them, and I think that has reduced that burden. But
9		that was an initial concern, that there was a need,
10		potentially, for more data entry than would be required.
11	Q.	Was there also emerging from that report the identified
12		issue of individuals who didn't have NHS numbers or
13		didn't have GP registration not being sufficiently
14		monitored?
15	Α.	Yes. I mean, we were aware that they wouldn't that,
16		by definition, if you were making your database from the
17		GP system, you were going to miss out people who weren't
18		in the GP system.
19		But, again, that was flagged, and I believe over the
20		first few months of the programme various interventions
21		were introduced to allow people to get vaccinated
22		without an NHS number or also or to have an NHS
23		number at the point they came for a vaccine rather than
24		having to have it in advance. But obviously they would
25		have missed out on the invitation, for example, if they
		105
1		immunisation as we had, and so that was why we flagged
2		those potential issues, to make sure that that was
3		considered in the implementation and rollout.
4	Q.	And was there also an important paper in January of
5		2021, "Covid vaccination in Inclusion Health
6		Populations", which focused specifically on those groups
7		who, it was emerging, had lower uptake, or certainly had
8		reason to think would have lower uptake: so ethnic

Yes, and I think, again, we were aware of that from our routine programmes. But there were some additional barriers with this particular programme that made that more challenging, one of the issues being the product itself: coming in multi-dose vials, not being able to be

107

normally working on immunisation programmes with other stakeholders at a local level, directors of public health, you know, community groups, et cetera. And they would be working with the local NHS to work out what delivery models might be suitable for people, for example, in homelessness, in the justice system, which 108

(27) Pages 105 - 108

1		would require things like taking the vaccine to those
2		individuals.
3	Q.	Can I just touch on the issue of local collaboration, by
4		which I mean collaborating from the centre with local
5		authorities, who are best placed, potentially, to
6		identify gaps in coverage locally and to reach those
7		communities.
8		Were you aware of concerns set out by the on
9		behalf of the local government associations that data,
10		which would prove important in identifying where gaps in
11		coverage were locally, was not reaching local
12		authorities in the early days of the pandemic as quickly
13		as it should have been or could have been, and that,
14		when it came, it wasn't sufficiently detailed? Were you
15		aware of those concerns at the time?
16	Α.	Well, we were aware of their requests for data. I think
17		the level I mean, I think there's a level of
18		expectation, I guess, as to what was realistic in terms
19		of what could be provided. As I said, the system was
20		being established at the time, and there are very strict
21		governance issues around name data, for example. So
22		I think we made a lot of efforts to provide data to them
23		through our platform, secure platforms we developed for
24		Covid, actually, for sharing data on Covid disease, but
25		I think the NHS was primarily responsible for managing
		109
1		I think we had a much less central role to it because
2		the policy decisions were being made in different
3		groups. We weren't part of that decision-making
4		process. So we were providing evidence to support that
5		decision-making process. And some of that work involved
6		laboratory work, some of it involved that monitoring
7		work I was talking about earlier, looking at different
8		variants and what their implications may be.
9		So I think we did a lot of work on variants, that's
10		very well noted. I think there is some concern in some
11		of the witness statements about a delay in some of our
12		laboratory testing. I would just point out, as my
13		understanding, that work was commissioned by the
14		manufacturer, not by government or any of the committees
15		making those decisions, and I don't think our
16		understanding is that we provided the data relatively
17		rapidly after we were asked for it, noting that it's
18		kind of an evolving situation, there were different
19		variants emerging and we were having to do additional
20		testing over the period of when some of those products
21		were being considered by those expert groups, et cetera.
22	MS	STEPHENSON: Dr Ramsay, thank you very much, those are
23		all the questions I have for you.
_		

24 LADY HALLETT: Thank you, just a few more questions for you,

- 25 Dr Ramsay.
- 111

1		that data, and their I think it would be through
2		their local networks that they would be sharing with the
3		directors of public health, that would be the
4		appropriate mechanism. And I think there's quite a lot
5		of this discussed in the NHS evidence statement.
6	Q.	I just have one final topic to cover with you, and it is
7		a brief one, and that's the issue of therapeutics. Was
8		UKHSA's remit in respect of therapeutics to monitor for
9		evidence of emerging resistance, to produce reports on
10		the effectiveness, in particular effectiveness against
11		new strains of Covid?
12	Α.	So I think we had a role in monitoring variants, and
13		part of that role would be looking at the genetic
14		changes in the virus that might affect therapeutics. So
15		we would be flagging issues that might be of concern in
16		terms of theoretical concerns about whether or not
17		a product would work. So that was one of our roles, and
18		we did produce reports on that, looking at potential
19		resistance to antivirals, for example.
20	Q.	From your perspective in that area of work, were
21		therapeutics, and the work you were doing on them, was
22		it sufficiently prioritised in comparison to work that

- 23 was being done on vaccines, and were there any delays in
- 24 that work which were problematic?
- 25 A. So I think it was prioritised in terms of our role. 110
- 1 Ms Naik usually hides over that way. There she is. 2 Questions from MS NAIK KC MS NAIK: Thank you very much, I hope you can hear me. 3 4 Thank you very much, Dr Ramsay. I represent the 5 Migrant Primary Care Access Group, and there is a Public Health England briefing note that's exhibited to your 6 7 witness statement from the Behavioural Science and Insight Unit, and that's entitled "Barriers and 8 9 facilitators to Covid-19 vaccination uptake." 10 It's INQ000477091, and it's dated September 2021, and you refer to it in your witness statement under the 11 12 section in relation to unequal uptake of vaccine and understanding of disparities to uptake, and also in the 13 14 section relating to vaccine hesitancy and countering 15 misinformation. 16 So at page 17 of that document, specifically referring to barriers to Covid-19 vaccination for adults 17 18 from ethnic minority groups and following a number of 19 other issues there relating to lack of reliable 20 information, misinformation, language and trust, it then 21 goes on specifically and expressly to identify that fear 22 of immigration enforcement and data sharing between 23 healthcare bodies and Home Office deterred migrant 24 uptake of the vaccine, and there's a specific section 25 under a subheading "Fear of persecution", that's how 112

1		it's expressed there, that this has been reported by
2		undocumented migrants and refugees who are either not
3		aware of this information regarding the absence of
4		documentation checks at vaccine sites or who do not know
5		whether to trust this information.
6		And so I just wanted to ask you, what, if any,
7		specific and tailored interventions were made in
8		response to this evidence aimed at migrants?
9	Α.	So that report, as you've said, it has a lot of
10		information, and that's just one element of it. That
11		was produced by our behavioural surveillance insight
12		unit, I think it's called, and that was really mainly to
13		support local collaborations, so through local directors
14		of public health and our local screening and
15		immunisation teams. So I would have expected that
16		I mean, that briefing note went out to those local teams
17		to hopefully support them in understanding what the
18		barriers might be in their area, and how to address
19		that. That is to say however that's not a new
20		phenomenon, I think it's something we had found
21		previously looking at Eastern European migrants of, you
22		know, people's perception of what might happen if they
23		came forward for vaccination and whether or not they
24		could register has always been a potential barrier.
25		So it's something we've been aware of for a while 113

1 He is at the back there.

2 THE WITNESS: I can, yes.

3

Questions from MR JACOBS

· ·		
4	MR	JACOBS: Hello, Dr Ramsay, good afternoon, I act for the
5		Gypsy and Traveller community and my client is the
6		Traveller Movement which represents the three Roma,
7		Gypsy and Traveller communities in the United Kingdom,
8		and I'll call them the GRT for the sake of convenience.
9		Did you hear the evidence of Yvonne MacNamara, who
10		is the CEO of the Traveller Movement, on 16 January,
11		that was last Thursday?
12	Α.	I didn't hear it but I have looked at the document very
13		briefly, yes.
14	Q.	I'm grateful. She highlighted that there's been
15		a historic problem that the GRT Traveller community
16		ethnicity is not recorded by institutions. For example,
17		GRT are not recorded in the NHS Data Dictionary, and you
18		refer to this issue at paragraph 7.3 of your statement,
19		no need to turn it up, and you refer to a November 2020
20		PHE-authorised paper which noted, pre-rollout, that
21		membership of certain groups is often not recorded in
22		routine healthcare record systems. And I think
23		Ms Stephenson took you to this issue at about 12.45, so
24		about a quarter of an hour ago.
25		And you also refer to GRT, at paragraph 7.5 of your

115

1		and been working with migrant groups, I'm not sure if
2		we've worked with the people you're representing
3		yourselves, but I'm sure people within the agency have
4		at some point touched on those areas.
5	Q.	So you say you would have hoped so was it were you
6		able to say whether it was effective and successful?
7	Α.	I mean, I think not because I think we've already
8		touched on some of the issues about data. I mean, if
9		those teams are not I mean, apart from, sort of, soft
10		intelligence on the ground that people were coming
11		forward, which I think there is some of that in the NHS
12		witness statements, I don't think there's any formalised
13		data because, by definition, those groups may not be on
14		our data system.
15		So that's one of the weaknesses and one of the
16		ongoing things, I think we really need to continue to
17		address in the future.
18	Q.	Thank you. Just to confirm, you said in your statement
19		that it was shared with a range of local and national
20		government stakeholders in order to inform efforts to
21		improve its uptake in specific communities.
22	Α.	Exactly.
23		NAIK: Thank you.
24	LAI	DY HALLETT: Thank you, Ms Naik.
25		Mr Jacobs, I don't know can you see Mr Jacobs? 114
1		statement, as being one of the inclusion health groups
2		which is an umbrella term for people who are socially
3		excluded, tend to have very poor health outcomes and who
4		are considered to be at high risk of missing out on
5		vaccination, and I think Ms Stephenson took you to that
6		around about 12.50.
7		So I have three questions for you. Firstly, did you
8		recognise, during the pandemic, how this lack of data
9		capture relating to the GRT communities could
10		potentially impact on their vaccine uptake?
11	Α.	Well, I think we did recognise it because that was
12		partly why that paper was written, prior to the
13		programme, and I believe we held a workshop with the
14		Gypsy, Roma, Traveller community with about 150 people
15		and worked with your organisations to produce some
16		guidance to try to facilitate that.
17		That didn't solve the data problem but hopefully
18		would have helped to improve the actual delivery by
19		making it clear that people were eligible for
20		vaccination and that Travellers could be registered with

- GPs, advice was produced for GPs, advice was produced
- for the community itself and advice was produced for
- 23 various other elements of the health service to try to
- 24 facilitate that.

21

25 I wouldn't -- we still don't, as far as I know, have 116

1		good data to show how effective that might be and that
2		is something long-term we would very much appreciate.
3		As you say, then, we've been aware that that community
4		in particular, misses out on other vaccines in the past.
5	Q.	Really what I wanted to sort of follow up on there, was
6		there was an awareness that the lack of data capture was
7		an issue in relation to vaccine uptake in this group,
8		for example, if a group is statistically invisible, then
9		they can't be looked after and planned for by the
10		medical institutions? Was that something that was at
11		the forefront of your thinking at the time?
12	Α.	I don't know whether it was at the forefront of
13		everyone's thinking, I think it's very much part of our
14		overall view of the inequalities picture and the
15		inclusion groups picture, that this was one group where
16		we know not only were they less likely to access
17		vaccines, they were also potentially at higher risk
18		because of underlying comorbidities, underlying
19		sociodemographic issues, so I think we were very well
20		aware of that as an organisation, and again, it comes
21		back to how we would try and influence that, it would be
22		mainly at a local level because it's obviously at
23 24		a local level that people will be aware of where their Traveller sites are, et cetera, and what facilities and
24 25		services there are for those Traveller sites and how
20		117
1	0	not just Covid. Well, that leads me to my final question. In respect of
2	Q.	
3 4		this data desert, if you like, that was raised by
4 5		Ms MacNamara and others in this Inquiry, what actions to address that will be made that you're aware of in future
6		pandemics?
7	Α.	Well, I don't again, I don't think this is just an
, 8	ς.	issue for the pandemic; I think it's an issue for all
9		time, and I do think we do need sustainable solutions
10		to reaching out to that community in order to ensure
11		that they are getting access to vaccination and to other
12		healthcare interventions and other prevention measures,
13		
		and obviously engagement to improve trust in that
14		•
14 15		and obviously engagement to improve trust in that
		and obviously engagement to improve trust in that community so that they are more able to come forward.
15		and obviously engagement to improve trust in that community so that they are more able to come forward. Vaccines are a medical intervention. I think it's
15 16		and obviously engagement to improve trust in that community so that they are more able to come forward. Vaccines are a medical intervention. I think it's very important that people are engaged with the health
15 16 17		and obviously engagement to improve trust in that community so that they are more able to come forward. Vaccines are a medical intervention. I think it's very important that people are engaged with the health service in order to receive those, that it isn't just
15 16 17 18		and obviously engagement to improve trust in that community so that they are more able to come forward. Vaccines are a medical intervention. I think it's very important that people are engaged with the health service in order to receive those, that it isn't just given as a separate thing. So I do think that, as part
15 16 17 18 19		and obviously engagement to improve trust in that community so that they are more able to come forward. Vaccines are a medical intervention. I think it's very important that people are engaged with the health service in order to receive those, that it isn't just given as a separate thing. So I do think that, as part of the overall reach-out of the whole health service to

1		those have been funded and maintained over a long period
2		of time.
3	Q.	That's helpful. I just have two other questions.
4		We've seen examples, in the evidence, of limited
5		local initiatives to engage the GRT community, for
6		example at Appleby Horse Fair, but we haven't seen in
7		the evidence any concerted effort at a national level to
8		ensure the inclusion of GRT in a systematic manner. And
9		my question for you is, notwithstanding what you've
10		said, but given this lack of data recognition of GRT and
11		the knowledge that GRT faced health inequalities and
12		social exclusion, what specific efforts were made at
13		national level, not locally, but at a national level, to
14		ensure the targeting of GRT communities in the
15		vaccination programmes?
16	Α.	I'm personally not aware of specific but other than
17		holding that national workshop which wasn't about
18		data, that was about trying to make sure the guidance
19		was as facilitative as possible I'm not aware of
20		anything specifically at a national level. And I'm not
21		entirely sure of the technical issues that stopped that
22		data collection, but I'm very happy to take that
23		forward, and I'm very happy that we would look to a more
24		sustainable solution to ensuring that this community in
25		particular is able to access vaccinations of all types,
		118
1		I'm sorry, the stenographer has had the toughest of
2		tough mornings, so we'll have to leave it there.
3	MR	JACOBS: Of course, I understand. Thank you.
4	LAI	DY HALLETT: Thank you very much indeed for your help,

	o
3	MR JACOBS: Of course, I understand. Thank you.
4	LADY HALLETT: Thank you very much indeed for your help,
5	Dr Ramsay, extremely grateful to you.
6	And we will take a break now and I will come back
7	at 2.05 pm.
8	(The witness withdrew)
9	(1.05 pm)
10	(The Short Adjournment)
11	(2.05 pm)
12	LADY HALLETT: Mr Keith.
13	MR KEITH: My Lady, the next witness is Susannah Storey, the
14	Permanent Secretary at the Department for Culture, Media
15	and Sport. Could you be
16	LADY HALLETT: I hope you were warned we wouldn't get to you
17	until this afternoon.
18	THE WITNESS: I was, thank you.
19	MR KEITH: Could you be sworn, please.
20	MS SUSANNAH STOREY (affirmed)
21	Questions from LEAD COUNSEL TO THE INQUIRY for MODULE 4
22	MR KEITH: Could you please commence your evidence by giving
23	us your full name.
24	A. Susannah Jemima Storey.
25	Q. Thank you very much, Ms Storey. Thank you for attending
	120

23 MR JACOBS: Of course.24 Just on one --

course.

22

25 LADY HALLETT: Thank you very much, Mr Jacobs.

1	today and for the provision of your witness statement	1		it, does it matter whether the false information is
2	dated 2 August 2024, some 29 pages, and for the	2		being deliberately disseminated and is therefore
3	44 exhibits that you also supplied.	3		disinformation as opposed to misinformation?
4	You are now the Permanent Secretary at the DCMS, but	4	Α.	I mean, I think it can be context-specific, but in the
5	from August 2019 to February 2023, were you the Director	5		case of this piece of work and this team at the time of
6	General of what is known as the Digital and Media group	6		Covid, we were interested in either, because what we
7	in the DCMS?	7		were trying to do was look at mis- or disinformation
8 A .	l was.	8		that might be causing harm and might cause harm to
9 Q .	And within the many directorates for which you were no	9		public safety or public health or national security.
10	doubt responsible, was there a directorate called the	10	Q.	So the intent behind the dissemination perhaps matters
11	Security and Online Harms Directorate?	11		a little less?
12 A .	-	12	Α.	It might do.
13 Q .		13		You've just referred to it, but if you could just build
14	the Counter Disinformation Unit?	14		on your answer, please. Why, in the context of the
15 A .	There was. Originally Counter Disinformation Cell.	15		extreme public health demands of a pandemic, is mis- and
16 Q .	What are, as far as the government sees it,	16		disinformation a matter for government?
17	disinformation and misinformation?	17	Α.	Well, as I said in my statement, there had been a sort
18 A .	Yes, I put the government's definition in my statement.	18		of growing focus, in policy terms, on mis- and
19	Disinformation is defined as the deliberate creation and	19		disinformation for a number of years before the
20	dissemination of false information which is intended to	20		pandemic, and we'd been asked to set up, been asked to
21	deceive and mislead. And misinformation is the same but	21		set up a formal team on this, actually in 2019.
22	without the deliberate intent.	22		And the reasons I think the government was focused
 23 Q .	In terms of the government understandably seeking to	23		on it is situational awareness. It helps you understand
24	monitor falsities, or what is being said in the public	24		a situation if you know what is going on online in open
25	domain that is untrue and trying to do something about	25		fora. And in particular, in some circumstances, you are
1	worried about mis- or disinformation, because they could	1	Q.	And I suppose, is there a link also to routine
2	contribute to real-world problems.	2		immunisation? So falsity perpetrated in a public domain
3	And as I said in my statement if it's helpful for	3		or propagated in a public domain about vaccines in the
4	me to briefly elaborate actually at the start of the	4		context of Covid can have an indirect effect on routine
5	pandemic there was vandalism and fires on telephone	5		immunisation take-up?
6	aerials and infrastructure, and that was causing us real	6	Α.	Yeah, I think before I was even in post I know that
7	concern at the time.	7		the Health Department had talked to the DCMS team about
8	So I think there's lots of different examples why	8		vaccine hesitancy, so it had been which could be
9	governments might be interested in this at all sorts of	9		caused by lots of different things.
10	different times, but particularly in the context of	10	Q.	Sure.
11	a global pandemic.	11	Α.	But that had been a concern.
12 Q .	Just to try to delineate the particular types of harm or	12		But just the one thing I want to point out at this
13	harmful consequences from not countering, in	13		point, if it's okay, is that whilst mis- or
14	a proportionate and reasonable way, dis- and	14		disinformation could contribute to a lot of those things
15	misinformation, firstly, presumably, if obvious	15		you've just described and many more, real-world harms,
	falsehoods are not countered, are not dealt with, there	16		there was always a very, very acute focus in this team
16				on freedom of expression. So it wasn't that just
16	can be a heightened distrust in government and health	17		on needon of expression. So it wasn't that just
16 17	can be a heightened distrust in government and health services generally, would you agree?	17 18		because something caused a harm, that was a problem.
				because something caused a harm, that was a problem.
16 17 18	services generally, would you agree?	18		because something caused a harm, that was a problem.
16 17 18 19 A .	services generally, would you agree? I would.	18 19	Q.	because something caused a harm, that was a problem. There was a balance between the assessment of that harm
16 17 18 19 A. 20 Q .	services generally, would you agree? I would. There could also be a heightened distrust in medicine, in particular vaccines?	18 19 20	Q.	because something caused a harm, that was a problem. There was a balance between the assessment of that harm and, of course, the need for freedom of expression.
16 17 18 19 A. 20 Q . 21	services generally, would you agree? I would. There could also be a heightened distrust in medicine, in particular vaccines?	18 19 20 21		because something caused a harm, that was a problem. There was a balance between the assessment of that harm and, of course, the need for freedom of expression. We'll come back to that. I was only asking you in very
16 17 18 19 A. 20 Q. 21 22 A.	services generally, would you agree? I would. There could also be a heightened distrust in medicine, in particular vaccines? Potentially.	18 19 20 21 22		because something caused a harm, that was a problem. There was a balance between the assessment of that harm and, of course, the need for freedom of expression. We'll come back to that. I was only asking you in very general terms what conceptually the harms are.

(31) Pages 121 - 124

1	Q.	In very general terms, again, Ms Storey, if the
2		government corporately comes across a piece of mis- and
3		disinformation, or rather, if there is a piece of mis-
4		or disinformation in the public domain, is there
5		a distinct limit in fact on what the government can do
6		about it beyond monitoring, simply acknowledging that it
7		is there, looking at it, reaching a view as to the
8		potential harm, and then bringing it to the attention
9		of, in particular, social media companies and saying,
10		"Well, it's a matter for you"?
11	Α.	Well, broadly I agree with that. So the the, sort
12		of the remit of this team was very clearly defined,
13		and didn't include everything. So there were specific
14		parameters set out, it was only looking at open source
15		online information. If, in the particular searches it
16		was doing, all of which would have been agreed with
17		ministers in terms of those parameters, if, in the
18		course of that, certain mis- or disinformation was
19		captured, then if the team believed that that mis- or
20		disinformation was false, and also potentially breached
21		the terms and conditions of the social media platforms,
22		then they would flag it to them, but then, to your
23		point, it was a matter for the platforms what they did
24		about it. They might decide to do nothing.
25		So this team was analysing those narratives and 125
4	Α.	Yeah
1 2	A. Q.	telling ministers what's out there, and taking a view
2	Q.	
3 4		on reporting individual instances of mis- and disinformation to the social platforms for them to deal
4 5		with?
5 6	Α.	Reporting parratives and trends not always individual
	m .	

- Reporting narratives and trends, not always individual 6 Α. 7 instances.
- 8 Q. All right. Reporting trends as well. And did the unit
- 9 have any function in or any role in relation to, or do 10 anything remotely connected with surveying people? Carrying out surveillance of people? 11
- No, and in fact you can see in the compliance policy 12 Α.
- that I've included as one of the exhibits, it was very 13 14 explicit that it should not be doing that.
- 15 Q. We'll look at that.
- A. So there was monitoring within certain parameters but 16 17 not surveillance under the law.
- 18 Did it, in law, have the ability or in practice did it Q. 19 take to itself the ability to look at private material?
- Α. 20 So it was looking for narratives and trends in open
- 21 source public material, so things that people or
- 22 entities had posted, not private communications. There
- 23 was, from time to time, in the search for information
- 24 against specific parameters, sometimes as a kind of
- 25 byproduct, some personal information might be captured. 127

1		trends and taking action in relation to some of them,
2		but the team itself had no power to require the
3		platforms to do something about it.
4	Q.	We'll look at that in a minute or two in more detail.
5		So just to deal, again at quite a high level with
6		the Counter Disinformation Unit's or cell's role in the
7		general scheme of things, it was not a body that was
8		concerned with putting out into the public domain the
9		government's general public health messages?
10	Α.	Absolutely not.
11	Q.	It wasn't to do in fact, it had nothing to do with
12		the provision of public health information about from
13		the DHSC or the NHS?
14	Α.	No.
15	Q.	It had nothing to do with the Cabinet Office or the
16		DCMS's usual communication systems by which they deal
17		with the public and deal with the press and deal with
18		public health messages?
19	Α.	No. That's right. The cell was inputting some
20		information into some of those teams, but it itself was
21		not an output in those communication terms that you
22		describe.
23	Q.	It was monitoring what was going on in the public
24		domain, and we'll look at in a moment in detail at
25		what's meant by public domain
		126
1		So, for example, a Twitter handle or some other way of
2		identifying the post. But the team then took careful
3		steps to anonymise that data before onward transmission
4		within the government system, and obviously, if they
•		

- within the government system, and obviously, if they
- 5 were flagging this information because it had met the
- 6 parameters to be flagged to the social media companies,
- 7 they would also be making clear, you know, just for
- 8 identification purposes only. So the team were very 9 mindful of their obligations under the Data Protection Act.
- 10
- 11 **Q.** So to summarise that, the unit only looked at material 12 in the public domain. So a social media post, for
- 13 example? 14 A. Yes
- 15 **Q.** When somebody posts a post on social media, there is an 16 element of that post which is personal, namely the user
- 17 name, the person who put it there?
- 18 Yes, it could be an anonymised name or some other name Α.
- 19 but it -- (overspeaking) --
- 20 Q. But a piece of data?
- 21 Yes, that's right. It could be their personal data. Α.
- 22 Q. But that piece of personal data, such as it is, but it's
- 23 probably anonymised is put into the public domain
- 24 alongside the post by the person who posts it?
- 25 A. That's right.

ita here	1		It was the substance of the post, it was not the private
onding	2		individual's information. And as I'm sure you're going
blic	3		to say in a minute, there were some specific carve-outs
	4		to ensure Parliamentarians and journalists were not
	5		captured.
	6	Q.	Yes. Can we just look at the sorts of disinformation
is	7		that the CDU had to deal with, and have up INQ000361167.
n, not	8		So this is a note to ministers, dated 22 July 2020.
said	9		It's a submission, and it comes from the security and
S, that's the	10		online harms directorate. We can see that in the top
	11		right-hand corner, can't we?
're	12	Α.	Yes.
message of	13	Q.	And this isn't actually a it's not actually one of
	14		the weekly reports, it's a general submission, isn't it,
	15		on the work that the unit is doing?
	16	Α.	That's right.
	17	Q.	If you could turn over, please, to pages 6 to 8.
oes it	18		"Since late April 2020, a range of anti-vaccination
, and	19		narratives have been observed by the Counter
hey be	20		Disinformation Cell"
,	21		That's the CDU, isn't it?
ion of	22	Α.	It is.
	23	Q.	"Vaccines as a form of population control
	24		"The UK Government will introduce mandatory vaccines
l trends.	25		"
			130
	1		giving an illustration of the sorts of themes and
rnments or	2		narratives
	3	Q.	That were out there?
being	4	Q. A.	
grounds or	5	Q.	So this wouldn't necessarily trigger any sort of
grounds of	6	α.	reaction on the part of the CDU; this is just
of deaths,	7		identification of the narratives that are in the public
ve is	8		domain?
ificant	o 9	A.	That's right, yeah.
moant	9 10	A.	0, 1,

2		narratives
3	Q.	That were out there?
4	Α.	that were out there.
5	Q.	So this wouldn't necessarily trigger any sort of
6		reaction on the part of the CDU; this is just
7		identification of the narratives that are in the public
8		domain?
9	Α.	That's right, yeah.
10	Q.	So if we then look at INQ000361175, we can see an
11		example of a particular report. Was this a weekly
12		report?
13	Α.	Yes.
14	Q.	"Over the past week the Cell has observed 57 pieces of
15		content and made 16 escalations to platforms."
16		Is that a reference to telling the platforms that
17		these pieces have brought themselves to your attention,
18		and you inviting the platforms to apply their policies
19		as they see fit and do whatever they want to do?
20	Α.	Yes, so the unit had this status called "trusted flagger
21		status" which the government and some NGOs and academics
22		and other bodies had. And it meant that if, in this
23		instance, the unit was seeing mis- or disinformation
24		that it believed was harmful to public health or public
25		safety and it believed was in breach of that particular 132

Q. So when the unit says, well, there is a bit of data he
 that's personal, they're only monitoring or respondi

- 3 to data which has already been put into the pub4 domain by the user?
- 5 **A.** That's right.
- 6 **Q.** Right.
- 7 A. And as I said, the primary objective of the unit is
- 8 actually the narrative or trend in the information, not
- 9 the personal data. So for example, if the post said
- something about Covid being connected to 5G, that's theissue the unit is looking for.
- 12 Q. So you don't really care who posts it; what you're
- 13 concerned about is the impact on the general message of14 the contents of the post?
- 15 A. That's right.
- 16 Q. Right.
- 17 A. The narrative and the trend.
- 18 Q. And if you don't care about who is posting it, does it
- 19 follow from that that the unit had no interest in, and
- 20 no business in, following individuals, whether they be
- 21 members of the public, journalists, academics,
- 22 Parliamentarians -- I'll come back to the question of
- 23 journalists and Parliamentarians specifically in
- 24 a moment, but did you care who was posting?
- 25 A. The primary objective was those narrative and trends 129

1		And:
2		"The vaccine is a means used by governments or
3		the elites to modify/control the population"
4		Microchips will be injected. Vaccines are being
5		deliberately trialled on those from BAME backgrounds or
6		frontline workers.
7		There's a reference there to the number of deaths,
8		I suppose, of the participants. So one narrative is
9		that there were disproportionate or highly significant
10		levels of death.
11		Bill Gates gets a note up there.
12		Vaccines aren't necessary.
13		Covid is harmless. Vaccines are harming health.
14		In relation to the harming health element and
15		vaccines, did the unit proceed on the obvious and
16		self-evident basis that all medicines, including
17		vaccines, may have side effects, some of them quite
18		serious or very serious? What was the concern,
19		however, held here was that there was a general
20		narrative that the vaccine had had significant side
21		effects on those involved in the trials.
22	Α.	Yes, so this is just this is a summary in the advice
23		to ministers, which was for their information.
24	Q.	Right.

25 A. And this was in the summer of 2020 and I think it's 131

1		or multiple platforms' terms of service, then it would
2		flag them to them.
3		So what this is saying is there had been 57 pieces
4		of content that meet those criteria, but only 16 have
5		met the criteria to be escalated to platforms, and then,
6		as we were discussing before, it may well be and this
7		document, I think, goes on to show what happened not
8		all of the 16 would have had necessarily the same
9		treatment by the platform because it was their
10	~	prerogative to decide what to do.
11 12	Q.	Right. And we can see that there wee a number of
12		instances in which the cell had brought to its attention
13		or saw online in public, documents, posts or videos
14		dealing with the extent of the impact of the vaccines and their supposed high levels of side effects, health
15		misinformation about the genetic alteration of cells,
17		that the vaccines are biologically manipulated
18		bio-weapon, if you could scroll back out, over the page,
19		"Hoax material, no pandemic, Covid-19 is a bioweapon."
20		And in some of these instances, not necessarily all
21		of them, the social media platforms responded by taking
22		them down or not taking them down, as they saw fit.
23	Α.	Yeah, each social media platform would have their own
24		policies and it would be their prerogative to decide
25		what to do.
		133

23		described in terms of being mis- or disinformation, and
24		potentially risking public health and public safety, and
25		potentially breaching the terms and conditions of the 134
1		harm, then the officials have to put the material
2		through a kind of escalating process of deciding whether
3		or not it gets referred to the social media platform?
4	Α.	That's right.
5	Q.	Page 9, dos and don'ts. Lots of hedging around the
6		functions and the role of the unit. And in borderline

iournalists?

Yes, there was.

Q. How did that work?

- and don'ts. Lots of hedging around the functions and the role of the unit. And in borderline 7 cases, did in fact officials have to seek sign-off from
 - more senior officials before matters could be referred

Q. Right. Very briefly and just by way of overview, were

There'd be all sorts of the usual parameters in place,

ultimately, we all reported to the ministers and at the

General Data Protection Regulation and Data Protection

Act, Human Rights Act, Civil Service Code, obligations

the officials in the unit subject to a significant degree of oversight and legal obligation?

A. Yes, yes. So I was responsible for those teams.

time it was Oliver Dowden.

and they would be aware of their obligation and

Q. Ministerial oversight, subject to the GTPA, that's the

of integrity, and so on, and political neutrality?

Well, if the content that met the criteria that I've

lawful, necessary, and proportionate.

Q. And, of course, subject to the common law obligation to ensure that all data, monitoring and analysis was

Was there also an express ban on the reference or the referral of content posted by Parliamentarians and

- to the social media platform? 9
- 10 A. They did.
- Q. All right. By comparison to the number of documents, 11 12 posts, videos, whatever, referred to social media
- platforms by the CDU during the course of the pandemic, 13
- 14 how many documents are you aware, posts or videos, did
- 15 the social media platforms themselves remove without any
- 16 kind of prodding from the CDU?
- 17 A. So I don't have --
- 18 Q. Roughly.

19 Α. Yeah, I don't have a scientific assessment. In my

- 20 statement I've included, you know, thousands and
- 21 sometimes millions of documents that the social media
- 22 platforms themselves dealt with, and I think I'd say
- 23 that we looked at something like 3,500 pieces of
- 24 information flagged, of which around 55% related to
- 25 vaccine issues. So it was a tiny, tiny proportion.

1		But, as I say, this was really about an input into
2		a wider process.
3		But the platforms themselves I think over the course
4		of the pandemic also evolved their own processes, and
5		you would want to talk to them about those specifics.
6	Q.	Of course. I think in your statement you say that
7		you've obviously done some research on this:
8		"Meta displayed warnings on Facebook on more
9		than 190 million [pages] [as being, at least in
10		part] false, partly false, altered or missing context.
11		In September 2021, Meta reported that it had removed
12		more than 20 million pieces of false Covid-19 and
13		vaccine [related] content."
14		I'm very sorry to observe that, but that rather puts
15		the unit and your department's work in the shade.
16	Α.	Absolutely. And I think that's important to be clear
17		about, which is the scale of the responsibility of the
18		platforms in these situations and also, as I said there,
19		it wasn't just that they would remove information. You
20		know, a really important thing during Covid was to be
21		the signpost and the flag to trusted health information,
22		and that was something that the team worked closely with
23		them on.
24	Q.	Just for a moment on that, so I didn't ask you
25		deliberately at the beginning, but one of the major ways 137
		137
1	Α.	That is not my view.
2	Q.	Do you believe that the genuine experiences of the
3		vaccine injured and bereaved were wrongly swept up in
4		this monitoring process and wrongly brought to the
5	•	attention of social media platforms? No, I mean, as I say, the purpose of the unit was very
6 7	А.	specifically trying to minimise the public health or
8		public safety impact of this mis- or disinformation.
9		Obviously you're doing general searches, so it is
10		possible that some information could be captured and
11		ultimately flagged, if it hit those criteria I said,
12		that might not be mis- or disinformation, and then it's
13		for the platforms to assess whether it meets their terms
14		of service or not and then for them to decide what do.
15	Q.	Did the flagging system that you've described, and the
16	- - -	trusted status which the CDU have, in any way lead to
17		pressure being applied to social media companies to

- pressure being applied to social media companies toremove content wrongly?
- A. No, I don't think so. I mean, I think at the beginningof the pandemic, the Secretary of State and I think the
- 21 Health Secretary were very keen to work with the
- 22 platforms, and there was a number of roundtables later
- 23 in the pandemic, after the vaccine we had this Counter
- 24 Disinformation Policy Forum, so there was lots of
- 25 proactive work with them, but that was more about this 139

- in which a government may respond to dis- or
- 2 misinformation is to keep on repeating its own message?
- 3 **A.** Yes.

1

- 4 Q. And obviously it was important that social media
- 5 platforms, along with all other organisations which
- 6 disseminate material into the public domain, they were
- 7 encouraged to keep on printing, repeating,
- 8 disseminating --
- 9 **A.** Yeah.
- 10 **Q.** -- the public health lines?
- 11 A. Absolutely. Absolutely.
- 12 **Q.** All right.

X, you say, had removed over 65,000 pieces of
content and suspended over 3,000 accounts for violations
of its Covid-19 guidance.

- 16 YouTube removed over 130,000 videos, and TikTok
- 17 introduced a Covid-19 information hub providing answers
- 18 to questions, no doubt with the help of the government,
- 19 on public health issues, which was viewed 921 million
- 20 times. So that gives you an idea of the scale.
- 21 A. Yes.
- Q. Was the work of the Counter Disinformation Unit, quote,
 "secret extra judicial censorship with no oversight akin
 to how illegal terror content is dealt with by the
- to how illegal terror content is dealt with by thegovernment"?
 - 138

1		point of getting them to flag trusted health
2		information, getting them to make sure their terms of
3		service were clear and transparent about what they were
4		actually doing in terms of content moderation.
5	Q.	And finally, just so we can put the work of the unit
6		into a wider context it would be very helpful if you
7		could just describe what you see as the main impacts of
8		the Online Safety Act in the sphere of public health
9		disinformation.
10		The Inquiry is aware that the Act obliges companies
11		to take action over illegal or harmful content online,
12		and I think there is in fact, I think, a new offence
13		created, called a false communications offence, concerns
14		spreading information that is known to be false, but do
15		the provisions in the Act cover the same territory as
16		public health disinformation and misinformation?
17	Α.	You're asking me to go outside the remit of my current
18		role but I'm happy to give you a personal view.
19		So, during the course of the years before and during
20		the pandemic, we were working on the Online Safety Bill,
21		which became the Act, and as you rightly point out,
22		I understand it does contain some measures in relation
23		to false communication and foreign interference.
24		As to its effectiveness, I think we need to wait to
25		see when the Act is fully in force and then see what 140

	happens.	1	MR KEITH: Thank you very much, Ms Storey. Those are all
Q.	It wasn't a trick question. It seems to be apparent	2	the questions I have for you. There may be some further
	from the very features of the Act that you describe,	3	questions.
	that it wasn't directed at public health disinformation	4	LADY HALLETT: There are. Thank you very much, Mr Keith.
	and misinformation?	5	Ms Morris, who is sitting at the back there, if you
Α.	No.	6	could make sure your answers get into the microphone,
Q.	It deals with illegal and harmful content?	7	I'd be very grateful.
Α.	That's right.	8	Questions from MS MORRIS KC
Q.	Which may or may not be the same thing.	9	MS MORRIS: Thank you very much, my Lady.
Α.	That's right, it could overlap but that isn't the	10	Ms Storey, I ask questions on behalf of the Covid
	primary purpose of it. And it did, in effect, become	11	Vaccine Adverse Reaction and Bereaved groups, and these
	the regulatory regime for dis- and misinformation. But	12	groups represent those who have suffered injury or
	at the time of the pandemic we didn't have such	13	bereavement following their voluntary acceptance of the

So the example I was giving in my
A. Q.	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right.	5 6 7 8 9 10 11 12	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised.
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact.	5 6 7 8 9 10 11 12 13 13	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of	5 6 7 8 9 10 11 12 13 14 15 16	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of the stage of the vaccine rollout, would you accept that	5 6 7 8 9 10 11 12 13 14 15 16	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm afraid.
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of the stage of the vaccine rollout, would you accept that given the speed and the novelty of the vaccine rollout,	5 6 7 8 9 10 11 12 13 14 15 16 17	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm afraid. Q. Understood. But in the document that Mr Keith showed
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of the stage of the vaccine rollout, would you accept that given the speed and the novelty of the vaccine rollout, there could be instances where individuals reported	5 6 7 8 9 10 11 12 13 14 15 16 17 18	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm afraid. Q. Understood. But in the document that Mr Keith showed you in your evidence earlier on, the list of what you
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of the stage of the vaccine rollout, would you accept that given the speed and the novelty of the vaccine rollout, there could be instances where individuals reported injuries on social media that they attributed to the	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm afraid. Q. Understood. But in the document that Mr Keith showed you in your evidence earlier on, the list of what you described as being an anti-vaccination narrative,
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. I think you gave the example of Full Fact. That's right. Thank you. So given the context that I've set out of the stage of the vaccine rollout, would you accept that given the speed and the novelty of the vaccine rollout, there could be instances where individuals reported injuries on social media that they attributed to the vaccine, but, due to the early stage of the rollout,	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 was flagged to social media, or whether social media companies, under their own terms and conditions, might have taken action in relation to this content. Q. Okay. But it may well have been flagged by you if someone is reporting an injury that you can't find any third-party verification for? A. I think it's conceivably possible, but my understanding of what the unit was doing was more about really significant trends and narratives of dis- and misinformation. So the example I was giving in my statement was when the 5G masts were being vandalised. So it's hard for me to give you a definitive answer I'm afraid. Q. Understood. But in the document that Mr Keith showed you in your evidence earlier on, the list of what you described as being an anti-vaccination narrative, vaccinations being harmful to health was part of that
	across a new narrative, and needed to determine the veracity of the content, it would use third-party sources to establish whether the content could constitute mis- or disinformation, and you say that that involved looking at trusted, publicly available sources, including the NHS guidance for Covid, credible journalistic sites, such as the BBC, or using independent fact-checking sources. 1	from that, would you accept that if it did happen, the					
2	labelling of unverified claims as mis- or disinformation					
3	prematurely could discourage a discourse of legitimate					
4	concerns, and thereby potentially delaying the					
5	identification of new signals around safety of the					
6	vaccines?					
7	A. I mean, I think it was unlikely, given the scale we					
8	discussed, of the amount of information this unit was					
9	flagging, and then what happened to it, that that would					
10	be the case, just because of it's much more likely,					
11	I think, that under social media companies' ordinary					
12	terms and conditions, theoretically, they could be					
13	making a decision in a general sense without					
14	understanding the specifics.					
15	LADY HALLETT: Sorry, could you make sure					
16	THE WITNESS: Sorry.					
17	LADY HALLETT: Don't worry, Ms Morris will understand the					
18	need for					
19	THE WITNESS: Sorry if I'm not looking at you.					
20	MS MORRIS: That's okay.					
21	You mentioned scale finally, you mentioned scale,					
22	but can you help with whether the social media companies					
23	adopted a similar definition of mis- and disinformation.					
24	Would there have been consistency outside of those					
25	organisations? 145					
	140					
1	think that would be a helpful way to deal with it, not

DR MITCHELL: I'm obliged, my Lady. PROFESSOR THOMAS: Thank you very much, Ms Mitchell. I think that completes the questions for you, Ms Storey. I am extremely grateful to you for your help. Thank you. 					
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 A. Well, I said in my statement that because it was a devolved policy area we were primarily not focused on those areas, but there were <i>ad hoc</i> connections between ministers and their devolved counterparts and also some of the work of this unit was inputting into wider DHSC boards which did include the devolved administrations. So there was some connection in some of these areas, and obviously if we thought it was helpful, we would have absolutely done that. Q. But do you think it would be helpful? A. It's very hard to say, not knowing what the specifics are of the situation. Potentially. But obviously we'd have to work out how that would work in a devolved policy area. DR MITCHELL: I'm obliged, my Lady. PROFESSOR THOMAS: Thank you very much, Ms Mitchell. I think that completes the questions for you, Ms Storey. I am extremely grateful to you for your help. Thank you. THE WITNESS: Thank you very much.

1	Α.	I think you'd have to ask them that. I don't have that					
2	detail of information at the moment.						
3	MS MORRIS: That's helpful. Thank you.						
4		Thank you, my Lady.					
5	LAI	DY HALLETT: Thank you very much, Ms Morris.					
6		Ms Mitchell, who is opposite you.					
7		Questions from DR MITCHELL KC					
8	DR	MITCHELL: I appear as instructed by Aamer Anwar on					
9		behalf of the Scottish Covid Bereaved. It's been said					
10		in this Inquiry many times that Covid does not respect					
11		borders, and the same, I think could be said of social					
12		media. In that regard, do you think that an approach					
13		which was cross-border in relation to how you deal with					
14		misinformation and disinformation, the social media					
15		policy, would be good for all four nations in a future					
16		pandemic?					
17	Α.	Mis- and disinformation is a devolved policy area, as					
18		I think you're alluding to, but yes, obviously it is the					
19		case that everything to do with tech policy, in my					
20		experience, goes cross-border and it isn't that a post					
21		can't be read by somebody across the border. So					
22		I appreciate what you're saying but it is really not my					
23		decision as to how that kind of issue would be addressed					
24	_	in a future pandemic.					
25	Q.	No indeed, but what I'm asking you is whether or not you 146					
4							
1 2	LAL	DY HALLETT: No, I think just carry straight on. Unless					
2	мр	the witness wanted KEITH: No, I think we can do that. Thank you.					
4	WIIX	So the next witness is Charlet Crichton of UK CV					
5		Family.					
6		MS CHARLET CRICHTON (affirmed)					
7		Questions from LEAD COUNSEL TO THE INQUIRY for MODULE 4					
8		DY HALLETT: Ms Crichton, I know you were lined up to give					
9	-/1	evidence last week but sadly you couldn't because of the					
10		death of your mother. I'm really sorry.					
11	тне	E WITNESS: Thank you.					
12		DY HALLETT: And it's really kind of you to come and					
13		assist us when you must be still right in the middle of					
14		your grieving process. So thank you very much indeed.					
15	MR	KEITH: Ms Crichton, could you commence, please, your					
16		evidence by giving us your full name.					
17	Α.	My name is Charlet Elizabeth Crichton.					
18	Q.	Thank you very much. Thank you for attending today, as					
19	-	the Chair said, and for providing the Inquiry with the					
20		material you have.					
21		You're the founder of a group known as UK CV Family.					
22		We'll talk a little bit more in a moment about what they					
23		do. But as the founder, you've produced two statements,					
24		one dated 17 October 2024, and I'm going to mention					
25		this, running to a whopping 344 pages, and a second					
		148					

(37) Pages 145 - 148

1		supplementary witness statement, a further
2		176 paragraphs of text with another 117 exhibits to go
3		with the 500 or so more exhibits 500 or more so
4		exhibits that you produced with your first witness
5		statement.
6		I want to assure you, the Chair and the Inquiry
7		legal team, and myself, have read all that material on
8		a repeated basis so we've gone back through your
9		statements again and again.
10		UK CV Family is a group which is concerned with
11		injury and bereavement following vaccination; is that
12		right?
13	Α.	That's right.
14	Q.	Now, obviously the phrase "following vaccination" says
15		nothing other than making a temporal reference that it
16		followed in time after vaccination, about the cause of
17		the injury or the bereavement. Presumably in relation
18		to all your members, they all stepped up and took
19		a vaccine?
20	Α.	All of us did, yeah, including myself. And I actually
21		volunteered at a vaccination centre in Kent, which was
22	^	the first mass vaccination centre in Kent.
23 24	Q.	And sadly, your members suffered injury or bereavement thereafter, but don't know and it's very difficult to
24 25		find out of course whether that injury or bereavement
20		149

/id-19 Inquiry		21 January 2025			
1		was causatively connected to a vaccine, was the result			
2		of a vaccine, or was coincidental, it just happened; or			
3		was connected to the Covid virus, because of course you			
4		could be infected with the vaccine with the virus and			
5		then have vaccination. But in some cases your members			
6		have been able to demonstrate satisfactorily that there			
7		was a link.			
8	Α.	Yes, yeah.			
9	Q.	Is that a fair summary?			
10	Α.	In around 50% of cases, yes.			
11	Q.	And the remainder, of course, are struggling to try to			
12		demonstrate the link, I presume?			
13	Α.	Yes, yeah, for the many reasons that we've outlined in			
14		our witness statement.			
15	Q.				
16		And do many of your members now suffer from chronic			
17		health conditions?			
18	Α.	Yes. Yeah, they do, or they're bereaved, so some of our			
19	_	members lost loved ones after a Covid vaccination.			
20	Q.	We were particularly struck by the fact in your			
21		statement of which you speak, that some 52% of your			
22		members had between 10 and 25 symptoms. So the			
23		conditions, the chronic conditions which those who			
24		weren't bereaved suffer from, appears to be it			
25		appears to be a multiple problem. It's a concatenation, 150			
1		another group dealing specifically with the bereaved?			
2	Α.	Yeah. We realised fairly early on that we needed to			
3		separate the three groups out, because some of the			
4		people in the injured support group would like to talk			
5		about things that they might not want to divulge			
6		elsewhere. 76% of our group members surveyed said that			
7		they'd considered suicide, and it is a topic within the			
8		group. A lot of people are affected, their emotional			
9		health is affected by being vaccine injured.			
10	Q.	And it's you say vaccine injured, of course, they may			
11		believe they may believe very strongly, but it is yet			
12		to be demonstrated in every individual case that the			
13		condition is vaccine caused?			
14	Α.	Yeah, but there is normally a very heavy temporal link			
15		and at least one person has suggested that it's			
16		vaccination, at least one medical professional has			
17		suggested it's vaccination.			
18	Q.	And, of course, you're aware that my Lady, the Chair,			
19		has granted your group Core Participant status and you			
20		have contributed your experiences and your stories			
21		through the ESM process and you are here today because			
22		of the obvious association with the vaccines.			
23		Does your group hold a corporate view, if I may put			
24		it that way, on whether vaccines or good or bad, or is			
25		it concerned with the individual predicement of your			

it concerned with the individual predicament of your

1		members?	1
2	Α.	We try to remain neutral on the subject of whether	2
3		vaccines are good or bad because our members have very	3
4		differing views and if we are to support them all, we	4
5		have to remain neutral on the wider subject of whether vaccines are generally a good or bad thing.	5 6
6 7	•	And that's a very fair position to take.	7
8	Q.	So in your voluminous statements, you have raised	8
9		a huge number of points, topics and issues of concern,	o 9
9 10		Ms Crichton, and I simply cannot go through them all.	9 10
11		A lot of them are, I'm afraid, out of scope, that's to	11
12		say they're just not within the remit of my Lady's	12
13		Inquiry. But we're going to identify those areas that	13
14		are within scope and on which you're inviting the	14
15		Inquiry to pay particular attention to.	15
16		And as I read each one out, I'm going to give you an	16
17		opportunity of trying to summarise what the main concern	17
18		is that's held by your members where a significant body	18
19		of them, a significant number of them, appear to you to	19
20		be concerned about this issue.	20
21	A.	Yeah.	21
22	Q.	A very significant thread running through all 600 pages	22
23		is the concern of your members about the effectiveness	23
24		and safety of the vaccines. Is that general concern	24
25		also tied in many places to the nature of the	25
		153	
1		concerned to know from you, you're concerned with the	1
2		clinical trial process. Is it connected to worries	2
3		about whether or not it was effective, whether it picked	3
4		up side effects?	4
5	Α.	Yes, I think we'd like to know what is an acceptable	5
6		risk/benefit profile.	6
7	Q.	All right. Do you have concerns about diversity and	7
8		the whether or not population groups were	8
9		sufficiently represented in the trials?	9
10	Α.	Yeah, for example pregnant women weren't represented in	10
11		the trials.	11
12	Q.	Yes.	12
13	Α.	Yet the vaccines were recommended for pregnant women.	13
14		Children, to start with, weren't in the trials. And	14
15		obviously ethnic minorities, there wasn't many people in	15
16		the trials from that group either.	16
17	Q.	Are you aware so that you're aware of why we're	17
18		focusing on this that many of the trials were abroad,	18
19		where racial and ethnic make-up proportion ran, in fact,	19
20		in the case of Pfizer 80%?	20
21	Α.	Mm.	21
22	Q.	So you're concerned, in fact, with diversity in the UK	22
23		trials, I suspect?	23
24	Α.	Yes.	24
25	Q.	All right. Your members express concern about the size	25

quir	у	21 January 2025
1		development and authorisation processes that were in
2		place? So you're concerned about how it worked in
2 3		practice and whether or not the system was effective?
4	A.	I think so, yes. I think the obviously the Covid-19
5		pandemic, there were certain rules that were changed to
6		accommodate the speed of the rollout of the vaccines and
7		the manufacturing processes, and in the witness
, 8		statement we've gone into quite some detail about those
9		different processes and how they may have been affected.
9 10	Q.	The clinical trial process. Obviously there is a very
11	α.	significant process by which any medicine has to be
12		tried, clinically tried, pre-clinically tried, monitored
13		and authorised. Do your members have concerns about the
14		integrity and the efficacy of the overarching clinical
15		trial process?
16	A.	We do. We know of cases where clinical trial
17	Λ.	participants' data has been dropped when they've
18		suffered an adverse reaction and not been included in
19		the data.
20	Q.	All right, I'm going to pause stop you there. The
21	ч.	same applies to you as to every other witness, including
22		state or government witnesses. We can't be looking at
23		individual cases and it would be wrong to allow anybody
24		to say, "We know of cases where X and Y has happened",
25		we don't know whether X and Y has happened, so I'm
		154
1		and scope of the phase IV trials. Do you mean the
2		trials that took place by way of the clinical provision
3		of vaccines after authorisation in the community?
4		That's what the phase IV trials are.
5	Α.	I would have to refer back to the witness statement to
6		know exactly what we as I said at the start of the
7		witness statement, we actually had six of us write it,
8		so that might not be a part that I paid a lot of detail
9		to myself.
10	Q.	All right. You've mentioned acceptably safe.
11	Α.	Mm.
12	Q.	Understandably, your members would like to know more
13		about how the vaccines were determined to be acceptably
14		safe, and what the MHRA in particular assessed was the
15		correct risk/benefit balance.
16	Α.	Yes.
17	Q.	There are many references to that in your statement.
18		You're concerned about the batch testing process, the
19		way in which batches produced by manufacturers were
20		tested. And you're concerned or many of your members
21		are concerned about the whole operation of the MHRA
22		safety surveillance processes?
23	A.	Yes, in particular the Yellow Card.
24 25	Q.	And on the Yellow Card Scheme, Ms Crichton, does your
25		statement set out actually a lot of areas in which your 156

5

8

1		members have expressed concerns about the scheme from a
2		lack of a mandatory obligation on doctors and public
3		health clinicians to report side effects, the lack of
4		public awareness of the scheme, how the data is
5		accumulated, what the Yellow Card Scheme says about
6		causative links, whether the MHRA responded to Yellow
7		Card reports by looking for clusters of symptoms
8		that's another big issue how difficult it is for the
9		scheme to be used, whether or not, after reports are
10		made in a Yellow Card and the MHRA has determined that
11		they are of significance, the population should be told,
12		or at least those persons who have reported side
13		effects, of the MHRA's position is that a big issue?
14		So feedback back to members of the public about side
15		effects?
16	Α.	Yes. Our members have found that their Yellow Card
17		reports were suddenly missing when they tried to follow
18		them up. There were no actual follow-ups by the Yellow
19		Card system to check on the people that had suffered an
20		adverse reaction to see if they were recovering or not.
21		Only 6% of people that are people in our group that
22		actually reported, only 6% of those reports were made by
23		medical professionals. So this shows that the public
24		are reporting, and not the medical professionals. But
25		actually, as you know, the larger studies show that only 157

a letter sent by the Public Health England and the Royal
 Society of Haematology to hospitals two weeks prior. So

- 3 the condition was known about but the public weren't4 told.
- 5 Q. Do you mean the information that was put into the public6 domain around about the Easter Bank Holiday weekend?
- 7 A. So this would be Easter but there was a letter sent to
 8 hospitals --
- 9 Q. Before the weekend.
- 10 A. -- from Public Health England on 22 March --
- 11 Q. That's right.
- 12 **A.** -- detailing how to manage VITT.
- 13 Q. And you're concerned that -- either that the MHRA knew
- 14 about the condition a long time before that letter went
- 15 out or that when the letter went out, it wasn't enough,
- 16 there should have been more data given and more
- 17 information given at that same time?
- 18 A. Our concern is that we have members whose loved ones
- 19 died in that period, and they feel that their loved
- 20 one's death may have been prevented if the MHRA had been21 more public sooner.
- 22 Q. Right. An important part of your statement deals with
- 23 the Vaccine Damage Payment Scheme, which is the
- 24 non-compensatory flat-rate scheme. Many of your
- 25 members, I expect, have made applications or tried to 159

- around 10% of people know about the Yellow Card Scheme and report. So this is massively underrepresented.Q. So there is a real issue about public awareness of the
- 4 scheme and the ability to report, but also, the degree
 - to which people who report are followed up?
- 6 A. Yes.
- 7 Q. So the MHRA may well look at NHS data, GP data, health
 - data, but that doesn't necessarily mean to say that
- 9 they're picking up the phone and speaking to you or
- 10 getting in touch with the person who made the report?
- 11 A. That's correct, yes.
- 12 Q. Right. Your members are concerned about the process by
- 13 which vaccines were authorised for younger people.
- 14 You're concerned about the state of public messaging,
- 15 about the risks of adverse reactions, and as with a
- 16 number of other similarly bereaved and injured groups,
- 17 you want to know much more about how the MHRA responded
- 18 to the emerging reports of the most serious conditions,
- 19 like TTS, myocarditis, pericarditis, you've mentioned
- 20 Guillain-Barré syndrome, and ME, myalgic
- 21 encephalomyelitis -- (overspeaking) --
- A. Yes, and in particular why the MHRA took such a longtime in actually announcing the vaccine induced
- 24 thrombocytopenia, thrombosis and thrombocytopenia
- 25 situation to the public, especially as there was 158
- 1 make applications under the scheme; is that right?
- 2 A. That's correct.
- 3 Q. And their concerns traverse almost every aspect of the
 4 scheme, don't they, from what must e established, the
- 5 causative threshold, damage caused by a vaccine,
- 6 prescribed vaccine, as well as the 60% severe
- 7 disablement criteria, the amount of money which may be
- 8 awarded, £120,000, as well as -- well, many other
- 9 aspects, about how the scheme was managed, how long it
- 10 takes, and whether or not, actually, it's fit for
- 11 purpose?
- 12 A. That's correct, yes.
- 13 Q. All right.

- 14 A. Many of our members have tried to claim the vaccine
- 15 damage payment and been rejected. I think you can see
- 16 from the numbers Kate Scott read out last week, but
- 17 there's been 17,500 claims and only 194 claims have been
- 18 processed and awarded, and 416 people were not deemed
- 19 disabled enough to meet the criteria. It isn't
- 20 fulfilling a purpose, and it's very traumatic for
- 21 someone when they're very ill, after they've done
- 22 something that they were told to do, or they've lost
- a loved one, to fill out the form.
 - The form asks "Tell us what happened" and when
- 25 I filled mine out, I was still very, very poorly in bed 160

UK Covid-19 Inquiry

1		and I filled it out laying down in bed on my bedside						
2		cabinet and I literally put three sentences and I just						
3		thought my medical records would speak enough.						
4		I thought I wouldn't have to tell the assessors what had						
5		happened to me because they'd look at my medical records						
6		and go "Yeah, adverse reaction, that's happened, she's						
7		unwell."						
8		That didn't happen. I was rejected, along with many						
9		the people. And as you know, you've heard in the impact						
10		film, it has been extremely traumatic for some people,						
11		and in particular one family whose father died and took						
12		his own life, because						
13	LA	DY HALLETT: And I've heard from the brother of the						
14		contributor, who contacted me separately.						
15	THE	EWITNESS: Yeah.						
16	LA	DY HALLETT: Horrible story.						
17	THE	E WITNESS: It's very, very traumatic for us, you know,						
18		and we we've had suicides within the group and we've						
19		attended funerals to these people.						
20	MR	KEITH: I think in your statement, Ms Crichton,						
21		appallingly well, you referred to a survey that says						
22		that around about 76% of your members had considered						
23		suicide since they began to suffer from their						
24		conditions						
25	Α.	Yes.						
		161						
1	Q.	So we're talking here about your members who weren't, in						
2	-	fact, carers in a residential care home						
3	Α.	We do have, yeah, that as well.						
4	Q.	You have some of those as well?						
5	Α.	Yeah.						
6	Q.	But for those people who weren't in that cohort, because						
7		the English Government, or the UK Government in England,						
8		only introduced VCOD for care home carers						
9	Α.	Nonetheless, there was still pressure on people.						
10	Q.	Right. So they say they felt pressurised through their						
11								

11 occupation --

- 12 Α. Huge pressure, yes.
- 13 Q. -- to take a vaccine?
- 14 Α. Yes.

- Q. Then they suffered, they say, harm or injury, and then 15 16 haven't been able to be awarded payment under the VDPS?
- A. Payment under the VDPS and also no reasonable 17
- 18 adjustments made at work and being medically retired because of it. 19
- 20 So, you know, we think that if you're going to make
- 21 vaccines as a condition of deployment, then you need to
- 22 make it a workplace injury. And also, there needs to be
- 23 better support, emotionally, financially and medically,
- 24 for people that are suffering from adverse reactions
- before you actually mandate vaccines as a condition of 25 163

- Q. -- (overspeaking) --1 2 Α. It's an extremely stigmatised illness. No one wants to hear that you've had an adverse reaction to the Covid 3 4 vaccine 5 Q. Two final areas, please, on which I'd like your help. 6 There are many references in your statement to the 7 systems by which members of the public are informed, in 8 advance of and after taking a vaccine, of 9 contraindications, side effects, benefits, and risks, 10 the patient information leaflet, and there's also, as you know, the summary of product characteristics, and 11 many of your members are concerned about the 12 13 distribution and the use of the PILs, whether they 14 properly knew the position. 15 And VCOD is in there, the vaccine as a condition of 16 deployment. What is your members' take on the merits or 17 otherwise of the vaccine Covid deployment policy? 18 What's the take on that? 19 A. So some of our members were doctors, nurses. 20 consultants, military personnel, in public service, and 21 they were -- they felt heavily pressurised to be 22 vaccinated. When they did, unfortunately, suffer 23 a vaccine injury, their injury wasn't classed as 24 workplace injury, and subsequently they had their 25 employment terminated. 162 1 deployment. 2 Q. And may we be clear about this. Probably the majority 3 of your two statements is -- speaks very eloquently
- 4 about what you regard and your members regard as the
- 5 absence of support, the lack of NHS treatment, the lack
- 6 of financial and societal support in the terrible
- 7 position in which they find themselves?
- 8 A. Yeah. I mean, the very --
- 9 Q. -- (overspeaking) --
- A. -- fact that UK CV Family exists means that there was 10 11 a gap in support.
- MR KEITH: Thank you very much, that's extremely helpful. 12
- LADY HALLETT: Thank you very much indeed, Ms Crichton. 13
- 14 Again, terribly sorry about your loss, and I do hope you
- 15 can now really focus on the grieving process. But thank
- you so much for coming along today. 16
- 17 THE WITNESS: Thank you.
 - (The witness withdrew)
- MR KEITH: My Lady, that concludes the evidence for today. 19
- 20 LADY HALLETT: Thank you all very much, and I shall sit
- 21 again at 10.00 tomorrow.
- 22 (3.06 pm)
- 23 (The hearing adjourned until 10.00 am the following day)
- 24 25
