Subject: RE: Submission on COVID-19 PPE data

Hi [redacted] NR [redacted]

Thanks for this. SofS reviewed and had the following comments:

- On the constrained PPE market and stock position, he notes concern that we will run out. As discussed in the meeting this morning, he is worried about this from a comms/public reaction angle. Can we prepare a comms package to mitigate potential negative public response?
- Happy to share data in Annex A with CCS.
- Happy to share columns in black in Annex A with CCS (happy to be as transparent as possible on sharing these data).
- **Noted the requests from OGDs to access PPE products.**
- He notes we need to make appropriate steps to ensure supply/provisions of body bags, swabs and PPE, and asks if oxygen is a potential risk and we should take steps on this too?

SofS also asked for a dedicated meeting on supply for COVID response early next week. Katie will put this in the diary, please can you confirm attendees with her.

Thanks,

[redacted] NR [redacted]
