Category 5. VIP. Note there's a Labour peer involved who implied he'd go to select committee if we didn't quickly progress the offer from the company he's on the board of.

I should flag that while it's a Cat 5 VIP I don't think it has legs. We should still properly kick the tyres though.

Hi max

Thank you very much for your email below. I am totally on the same page and was expecting further DD request

I have a video of the stock dated April 23rd taken by a trusted business associate so I am pretty sure it's there

Nevertheless - I have asked for a third party inspection and will revert to you with its finding shortly

We can not be careful enough

I am aware of the M3 situation in china and the US

Will be in touch soonest

ShaRon
