

Line Item	Definition
	procurement of new countermeasures.
Contract Management – Consumables and Pharmaceuticals Storage & Distribution	ICC costs of managing the PIPP Consumables and Pharmaceuticals Storage & Distribution solution.

Table 2 – The DAs contribution definitions for PIPP stocks

4. Contribution to CBRN storage and distribution costs

- 4.1 Devolved Administrations have Storage and Distribution contracts which they pay for.
- 4.2 Recharges for CBRN items purchased in agreement with Devolved Administrations will be invoiced quarterly by PHE (via their agents NHS Supply Chain). Recharges to Devolved Administrations will be based on Barnett Formula proportions (rounded to zero decimal places). Currently this is 83% (England); 9% (Scotland); 5% (Wales); 3% (Northern Ireland). This includes a small proportion of S&D cost for CBRN stocks held in England. This will be reviewed following each time that the Barnett formula has been revised by HM Treasury as part of their statement of funding policy for the Scottish Parliament, National Assembly for Wales and Northern Ireland Assembly.

5. Insurance

- 5.1 Insurance provisions are dependent upon storage and distribution arrangements and/or each Devolved Administration's policy. Stocks held in England are insured.
- 5.2 Where losses occur to Wales's Stocks when held in England and before it is received from England to the distribution point in Wales, the losses will not be borne by Wales. Where losses occur to Wales's stocks that are held in Wales, all the losses will be borne by Wales.
