1		Wednesday, 16 July 2025	1		and I may ask you to speak to some of the issues raised
2	(10	.00 am)	2		in those statements today.
3		DY HALLETT: Good morning, Ms Hands.	3	Α.	Yes.
4	MS	HANDS: Good morning, my Lady. If I may call	4	Q.	5 5 , 5
5		Ms Caroline Abrahams this morning.	5		people in England, experienced by Age UK, that you may
6		MS CAROLINE ABRAHAMS (sworn)	6		speak to, were reflected in the devolved administrations
7	LAI	DY HALLETT: Welcome back, Ms Abrahams.	7		too?
8		EWITNESS: Hello.	8	Α.	Yes, absolutely. To a degree, there were some slight
9		DY HALLETT: Thank you for your continuing help.	9		differences in how the governments responded in each
10	THI	E WITNESS: Thank you.	10		administration, but the issues were identical. And we
11		Questions from COUNSEL TO THE INQUIRY	11		met weekly online throughout the pandemic and shared
12	MS	HANDS: Ms Abrahams, good morning. You have, of course,	12		experiences and insights.
13		already provided evidence to this Inquiry on behalf of	13	Q.	And before we start, can you provide a brief summary of
14		Age UK as its charity director in other modules, and	14		the roles of the Age network in the adult social care
15		I echo my Lady, we're very grateful for you attending	15		sector.
16		again today speak to some of the experiences in the	16	Α.	
17		adult social care sector.	17		a huge issue because so many use it, or feel that they
18		For those following, your statement for Module 6 can	18		would like to use it. And so Age UK inevitably has
19		be found at INQ000509808.	19		a big role in supporting that.
20		Dealing briefly, before we start, with the remit of	20		The first thing we do nationally, and in some of
21		Age UK, you have provided a statement for Age UK	21		those other countries too, is we provide information and
22		England, but there are branches in each nation of	22		advice about how to go about getting social care,
23		the UK, known collectively as the "Age network".	23		because, as I'm sure the Inquiry has already heard, it's
24	Α.		24		quite a complicated process. So, understanding what to
25	Q.	And they have also provided statements to this module,	25		do first, who to talk to, we provide a lot of that 2
1		through our helpline and through written advice on our	1	Q.	And just briefly, why is that?
2		website.	2	Α.	Essentially the provision of social care in our country
3		But our local Age UKs and, to a degree, in the other	3		is fiercely rationed, and that's because of the amount
4		nations as well, provide direct support to older people.	4		of money that goes to councils to fund social care.
5		Some of that, a small amount relatively, comes under the	5		There are always more people who want social care than
6		formal definition of social care. So personal care,	6		are able to get it. So over time, as that trend has
7		help with getting in and out of bed, getting meals,	7		continued, the threshold, the amount of need you have to
8		those sorts of things. But also a lot of lower-level	8		have to be eligible for social care from the state, has
9		support, so help with cleaning, making the bed, doing	9		gone up.
10		shopping. Those things that help older people to retain	10		So that's why that has happened.
11		their independence.	11	Q.	And you also say in your statement that one in ten older
12		So they do all of that, and also some local Age UKs	12		people who are aged over 65 years old were in receipt of
13		provide activities like lunch clubs or day centres that	13		formal help or home care prior to the pandemic?
14		an older person, say with dementia, could go to, spend	14	Α.	That's right.
15		a day, gives their carer at home a break. So an awful	15	Q.	
16		lot of activity in the social care world.	16		start of the pandemic impact its ability to respond?
17	Q.	Thank you. And you have set out in your statement in	17	Α.	It made it very fragile and not resilient to cope with
18		quite a lot of detail the state of the adult social care	18		the sort of battering that the onset of a pandemic
19		sector before the pandemic.	19		brought. In particular, there wasn't enough staff in
20	Α.	Mm.	20		many places. Staff, as you will have heard, are on
21	Q.	So, in summary, is it right that there has been	21		fairly poor terms and conditions. There's a lot of
22		a year-on-year increase in older people applying for	22		flux, a lot of change, people coming in and out of care
23		adult social care and care, but a decrease in the number	23		homes and home care, often trying to do too much without
24		of people receiving it?	24		enough time, and not enough money to actually fund the
25	Α.	Correct.	25		social care that everybody needs.

Yes. Age for older people, adult social care is a huge issue because so many use it, or feel that they would like to use it. And so Age UK inevitably has a big role in supporting that. The first thing we do nationally, and in some of those other countries too, is we provide information and advice about how to go about getting social care, because, as I'm sure the Inquiry has already heard, it's quite a complicated process. So, understanding what to do first, who to talk to, we provide a lot of that 2
And just briefly, why is that?
Essentially the provision of social care in our country
is fiercely rationed, and that's because of the amount
of money that goes to councils to fund social care.
There are always more people who want social care than
are able to get it. So over time, as that trend has
continued, the threshold, the amount of need you have to
have to be eligible for social care from the state, has
gone up.
So that's why that has happened.
And you also say in your statement that one in ten older
people who are aged over 65 years old were in receipt of
formal help or home care prior to the pandemic?
That's right.
And in your view, how did the state of the sector at the
start of the pandemic impact its ability to respond?
It made it very fragile and not resilient to cope with
the sort of battering that the onset of a pandemic
brought. In particular, there wasn't enough staff in
many places. Staff, as you will have heard, are on
fairly poor terms and conditions. There's a lot of
flux, a lot of change, people coming in and out of care

- homes and home care, often trying to do too much without enough time, and not enough money to actually fund the
- social care that everybody needs. 25

⁴

1		And very, very fragmented. Not really, in many	1
2		ways, social care is an essential public service, but	2
3		because of who offers it, a combination of the private	3
4		sector and the not-for-profit sector predominantly, it	4
5		doesn't feel like it, and it's not organised like it.	5
6		And that meant there was no infrastructure, not the	6
7		systems and processes in place that would have helped to	7
8		support social care and all the people working in it and	8
9		also using it when the pandemic came along.	9
10	Q.	And you have prefaced your statement by saying that some	10
11		people reported a positive experience during the	11
12		pandemic and that some of the innovations and good	12
13		practice should continue.	13
14		Can you provide a couple of examples of those	14
15		innovations and good practice that you say should	15
16		continue?	16
17	Α.	There was, for some companies, a greater use of	17
18		technology to try to communicate with their staff to	18
19		help with rota-ing. Of course, that's a trend that is	19
20		continuing with the advent of AI, but I think it	20
21		accelerated it for some companies that were progressive	21
22		and also probably weren't as fragile and cottage	22
23		industry-like as some others. So that was helpful.	23
24		There's no doubt that many care workers worked	24
25		incredibly hard, put themselves at risk, were prepared	25
		5

-	
	to do things we shouldn't really have asked them to do, without sufficient protection for themselves and their families. And I have personal experience of that too. It's not in my statement, but throughout the pandemic I was
	also caring for my mum at home, who was dying, with
	a package of care. So, as well as doing my job for
	Age UK and seeing these issues from all our information
	sources, I was experiencing them day by day in real life
	as well.
Q.	And you have also identified in your statement that
	Age UK witnessed systemic failings during the pandemic
	which led to the perception, particularly during the
	early stages, that older people were an afterthought and
	sometimes their lives were considered less because they
	were older. Why do you think that perception developed?
Α.	Because of the facts as they became apparent. I think,
	quite early on, we could see the pandemic hitting other
	countries first, particularly Italy, for example, and America, where there were already stories in the media
	about the care sectors in those countries being impacted
	by the pandemic in a very adverse way, and we weren't
	quick enough in our country to pick up on those, and
	really, the amount of knowledge and information held by
	government about social care generally, and about the
	6
Α.	were Age UK's key concerns?
А.	That we were hearing about many deaths of people in care
	homes. It seemed that in particular, that the virus, once it got into a care home, was causing havoc. And
	yet there was no coordinated response from government.
	We weren't being able we were trying to persuade them
	to do things, but I think because it was a time of
	crisis, they sort of circled the wagons, by which I mean
	they were less open to comments from outside, and it
	made it very difficult for organisations like mine to be
	able to give what we would hope to be good advice. But
	you could see it playing out, and from what we were

- hearing from older people and their families, and fromprofessionals too.
- **5 0** A formulation of the the transmission
- 5 **Q.** A few days after that statement, so 16 April 2020,
- a government strategy for the adult social care sector was issued. You've perhaps answered it in that previous
- answer, but had your organisation been consulted on thatbefore publication?
- 20 A. I don't think we were. I'm trying to remember.
- Subsequently, later on, as the pandemic continued, we
 were much more heavily involved but early on, no. Much
 less so.
- 24 **Q.** I think you've given some examples in your statement of
- 5 the ways in which communication certainly improved

⁸

1		during the second wave, and you provide the examples of	1		are within government. It was unfortunate that the
2		the Capacity Tracker in England	2		leader of social care in the department stepped down
3 A	۹.	Yes.	3		very soon into the pandemic and there was then a gap, I
4 Q	2.	and that Age UK were also part of the UK Government	4		think, before someone else was appointed. That's not
5		Social Care Sector Covid-19 Support Task Force. Both of	5		a criticism of that person at all, but if there had been
6		those occurred in 2020, later in 2020, sorry. So are	6		somebody in post who had the knowledge and
7		those examples of how that two-way relationship	7		understanding, right from the start, who had stayed,
8		improved?	8		perhaps someone like Sir David wouldn't have been so
9 A	۹.	Yes, but it was also to do with people. So when	9		needed although he was always going to have made a big
10		Sir David Pearson was appointed to come into government	10		difference.
11		and support them on social care, that made a huge	11	Q.	And do you think there's also benefit in those groups
12		difference because he knew everybody, and we could talk	12		meeting and that joint endeavour taking place in
13		to him. He understood what it was like in local areas.	13		non-pandemic times, as well?
14		He had been a Director of Adult Social Services himself.	14	Α.	Definitely. Absolutely. And over time, as the pandemic
15		He had a much better, granular understanding of the	15		continued, there was a group that continued to meet very
16		needs of social care and he had the relationships with	16		often, sometimes on more specific issues, such as
17		people like us, and many others, to be able to draw us	17		visiting in care homes, for example, and that also
18		in and gain our help, which I think was really helpful.	18		interacted with the Minister of State at the time, Helen
	ጋ .	Would it have been useful if somebody like Mr Pearson	19		Whately.
20		had been available sooner, or in post sooner?	20	Q.	-
21 A	`	Absolutely it would.	20	Щ. А.	And all those conversations, I think, were very useful.
		And do you think that that role that he held, and the	22		They helped us at Age UK be able to be clearer with
23 4	×.	representative groups that were set up, as well, with	23		older people and their families about what the policy
24		stakeholders would be helpful in a future pandemic?	23		was, which they very much wanted to know, and which was
 25 A	、	Yes, probably, depending on what the existing structures	25		changing quite quickly, but I think we were also able to
		9	20		10
1		bring in intelligence from the world back into the	1		in your evidence but before we do so, the statements
2		department. So it was a win-win.	2		that the Age network have provided provide many example
3 Q	ָם.	Finally this, on the early pandemic period. You have	3		of the ways in which they stepped in to provide support
4		said at paragraph 63 of your statement that promises of	4		to older people.
5		a protective ring around care homes did not materialise	5		I'd like to ask you about just a couple of those, if
6		in terms of policy or practice in early stages.	6		I may. A common theme that arose was the use of
7 A	۹.	Mm.	7		telephone helplines, some of which received government
8 Q	2.	What, in your view, was missing?	8		funding
9 A	۹.	Partly the fact that the nature of social care as it	9	Α.	Yeah.
10		operates in many care homes with staff coming in and	10	Q.	to increase their capacity. Although the service
11		out, coming from home, not living on site some do but	11		they offered differed slightly between each nation, they
12		most don't that meant that there was an immediate	12		all provided a form of practical support and compassion
13		risk in the care home, made worse if care workers became	13		for older people that wasn't just online, but in
14		unwell and were then unable, financially, to stop work	14		a different format as well. Was there high demand for
15		because of the need to put food on their own tables at	15		those services during the pandemic?
16		home. So the lack of sick pay for care workers was, I'm	16	Α.	There was huge demand. It absolutely spiked.
17		sure, a big gap that unfortunately contributed to what	17		Particularly after any particular government
18		happened.	18		announcements or something said in a press conference
19		But there were other problems as well, just	19		that may not have been entirely clear, or when new
20		a general lack of money, really, to go round. The lack	20		guidance came out, which it did very frequently. Then
21		of access to PPE, to infection control, and sometimes	21		we often saw, I think, right across the UK, large
22		some naive assumptions, I think, by government about how	22		numbers of older people, and also their families,
23		well equipped a care home in particular might be to care	23		calling for clarification, for reassurance, just in
		for people with medical needs as well as care needs.	24		despair sometimes, depending on their own situations.
24					
24 25 Q) .	We're going to come on to some of those issues no doubt	25	Q.	And did the people that were managing those services

1		have the information available to them in good time in	1
2		order to be able to provide that advice and support that	2
3		people were asking for perhaps quickly after those	3
4		announcements were made?	4
5	Α.	Generally speaking, it would be fair to say that they	5
6		didn't, because very often it was a matter of trying to	6
7		listen to a press conference or get a new piece of	7
8		guidance, digest it, and then put it into the sort of	8
9		language that ordinary people could readily understand.	9
10		And I think that is another thing to learn from the	10
11		pandemic: that the officials who in good faith had to	11
12		keep changing the guidance were not at heart	12
13		professional communicators. And the Civil Service skill	13
14		at writing guidance is not generally done at that pace	14
15		and for a public audience, it's often for professionals.	15
16		And I think they could have done a better job, with	16
17		better communications expertise, in explaining quite	17
18		complicated things in a simple way for people. As it	18
19		was, that turned out to have to be the job of	19
20		organisations like Age UK.	20
21	Q.	I think you have referred to that in your statement,	21
22		that there were various times when you made offers to	22
23		support with communication but there was a mixed	23
24		response as to whether they were taken up or not. So is	24
25		that something that you think could be improved, perhaps	25
		13	
1		lonely and isolated, often, in their positions, were	1
2		able to come together and support each other. And	2
3		I know that Age UK took part in some of those	3
4		conversations in England as well.	4
5		True too of people like nurses in care homes. Quite	5
6		a niche group of people. And, you know, they were	6
7		absolutely at the forefront of dealing with lots of	7
8		these issues through the pandemic.	8
9	Q.	Do you think that there is a role for more support or	9
10		perhaps even a service for care home managers in	10
11		a future pandemic, or that support?	11
12	Α.	I think there's room for more support for care home	12
13		managers, full stop, all the time. And the more that	13
14		can be put in place to help them to support each other,	14
15		to learn from each other, to identify problems, even	15
16		when there isn't a pandemic, I think would be very	16
17		useful.	17
18	Q.	The Inquiry has heard about changes to the Care Act	18
19		which meant that duties on local authorities in relation	19
20		to care assessments and reviews could be suspended or	20
21		known as easements.	21
22	Α.	Yeah.	22
23	Q.	They were not widely used, which you've acknowledged in	23
24		your statement. But what you do say is that there was	24
25		a widespread perception that some local authorities took	25
		15	

15

A. Yes, I think so. One police force told us they were using Age UK's guidance and advice rather than the government's because they found it much easier to communicate to the public. So I think that's just a good example of, just the lack of a skill at that particular time in government. Of course, they have many communications people in government, and I'm sure they will do a great job, but they weren't deployed, I don't think, in helping to write guidance, which was viewed as a policy job. Q. You have also described how Age Cymru partnered with Care Home Cymru and others to develop a platform that offered peer-to-peer support for care home managers. Was there widespread uptake of that support and any feedback as to whether it was useful or not? **A.** I can't comment in detail on what happened in Wales but I think it would be fair to say that similar sorts of things happened in England too, where people were learning to use technology to talk to each other online in a way that was quite new. It accelerated the use of those techniques. And it did mean that people like care home managers, who were very exposed, and also very 14 action along similar lines, but informally. What did you mean by that and what led to that perception? A. We heard anecdotal stories from a few places of areas that were taking decisions to, for example, reduce care packages for people living in their own homes, and using the pandemic as a reason for that, but where those councils had not actually gone down the legal route to do that. Not a lot, but some. And we were expecting rather more to take advantage of the new legislative opportunities they were given than actually did. But it looks -- it felt to us and seemed to us that some had chosen to forego that route and to do something rather similar instead, but unofficially. **Q.** You may not be able to answer this but did you hear in those stories as to why they took those more informal routes? A. We didn't. We might surmise as to why they did, but we can't say for sure. Q. Thank you. And did Age UK have any concerns about the easements if they had in fact been implemented? A. Yes, it was something that we and other organisations working in social care looked at with, you know, some concern when the changes were made, and wondered just

in advance of a future pandemic, but then also during as well, if there is the need to communicate difficult

information?

25 how big an impact this would have. But of course, this

¹⁶

1

3

4

5

7

9

23

25

1		was also at a time when we weren't aware how long this
2		pandemic would go on for and how grave its impact would
3		actually be.
4	Q.	Did you raise those concerns?
5	Α.	Yes, we did, in discussion with officials at the time.
6		I remember us doing that.
7	Q.	In your statement you have also described the impact on
8		many older people in receipt of care as safeguarding
9		failures and specifically physical deconditioning and
10		loss of cognition as a risk for many older people and
11		that one of the reports that you conducted during the
12		pandemic found that one in four are less able to walk as
13		far as they could by the end of the pandemic compared to
14		before.
15		So what were Age UK's concerns around access to
16 17		health and to care services in the community for older people and what do you think were some of the reasons
18		for those concerns arising?
19		5
20		health often declines and they will need access to
21		healthcare, and of course, one of the things that
22		happened during the pandemic was that access to routine
23		healthcare became much more difficult, or even
24		impossible or stopped. So people with health
25		conditions, quite serious ones, went for quite long
		17
1	Q.	And in your experience were some of those issues
2		considered adequately, or at all, either in the early
3		stages of the pandemic or as it went on in the drafting
4		of guidance and information?
5	Α.	I think it would be fair to say that as the pandemic
6		went on, the unintended consequences of lockdowns on
7		older people became and on everybody really became
8 9		better appreciated and more consideration was made of
9 10		those sorts of concerns. But certainly not very much about older people per se, and certainly not nearer the
11		beginning of the pandemic.
12		And in November of 2020, Age UK produced a consultation
13		response setting out lessons learned from wave 1 in
14		regard to access to healthcare and what needed to be
15		improved for older people in wave 2 by the Department of
16		Health and Social Care. What were some of those key
17		lessons and what were you asking for, and did that
18		improve the situation for future waves?
19	Α.	I think it continued to be patchy afterwards, and that,

- 20 of course, is characteristic of the pandemic more
- 21 generally. Some places managed things better than
- 22 others. But certainly visiting services often had
- 23 stopped, professionals had stopped coming to older
- 24 people's homes, there was more reliance on virtual
- 25 consultations, for example in care homes. In some

periods of time, often, without seeing their consultant, 2 without having their regular check-ups. And inevitably, in some cases that caused those conditions to get worse more quickly than they otherwise would have done. The sheer absence of social care will also have 6 contributed to that. It may have made it more likely that some people stopped taking their medication, for example. That would have been definitely another problem. Or that people became very depressed and 10 anxious. Mental health conditions definitely got worse during the pandemic, made worse by the isolation and the 11 loneliness and the fear of watching the news and 12 13 realising that, for older people, this was a pandemic 14 that was taking many people's lives. So not a good 15 combination of things all coming together. 16 And, of course, many people living at home were told 17 to stay put largely, and people were frightened to go 18 out very often for fear of contracting the virus. And 19 in later life, if you don't move around, you stiffen up, 20 you lose your muscle mass. That's what deconditioning 21 really means. And so it was just a very unfortunate set 22 of combination of issues that together meant that many

- older people came out of the pandemic, if they survived
- 24 it, considerably less well, less fit than probably would
 - have been the case without it. 18
- 1 places, those worked really well but by no means 2 everywhere. 3 There were problems, of course, with access to 4 drugs, medication. There were no medication reviews. 5 So all the normal things that happened weren't there. 6 And of course, the more those could be put in place or 7 put back or, alternatively, replaced by online or 8 telephone methods, the better. But I think the way that 9 actually panned out in practice was very variable. 10 Q. Moving on to consider in-person visits of professionals 11 in care homes. In your experience, to what extent was 12 the provision of in-person healthcare in care homes 13 considered and planned for in advance of the pandemic or 14 again in those early stages? 15 There's no evidence that we saw to suggest they were --Α. that was thought about or planned for at all. 16 **Q.** And are you able to help us as to whether there are any 17 reasons why older people in particular might benefit 18 from an in-person visit from a healthcare professional 19 20 that perhaps they are already familiar with, instead of, 21 for example, a remote or telephone consultation? 22 Α. Well, the first thing to say is that most older people 23 with care needs also have significant health needs. And 24 particularly for frail older people, those approaching 25 the ends of their lives, they may well have conditions
 - 20

1		like pressure sores, skin integrity problems, that do
2		require a district nurse in particular, or maybe
3		a physio or somebody like that, to come in and help.
4		And that sort of service pretty much dried up for large
5		parts of the pandemic, particularly nearer the start.
6		So, in the absence of those things, of course, those
7		conditions, which can prove to be very serious for
8		people, often got worse.
9	Q.	And what was the impact on the staff working in those
10		care homes?
11	Α.	We heard awful stories about staff who felt overwhelmed
12		by having to essentially try to plug the gap that health
13		professionals not visiting was unintentionally leaving.
14		People who didn't have the skills or qualifications to
15		have to take a lot of responsibility for very unwell
16		older people, sometimes older people who were dying, not
17		just one, as is not unusual in a care home, but many
18		people all at once. And I think that must have been an
19		absolutely shattering experience for some. And it
20		caused some, we know, to leave the care sector
21		afterwards. Great professionals, but who just really
22		needed to get away.
23	Q.	I would like to ask you, if I may, about a letter that
24		was sent by a GP practice to a care home resident in
25		Scotland, in which the recipient was informed that the
		21
1		to an extent, I think this practice deserves some credit
2		for it being upfront with people about what it was
3		intending to do, even though we wouldn't necessarily
4		agree with it.
5		Certainly the issue of whether an older person in
6		a care home would be taken to hospital if they became
7		unwell was something we heard quite a lot about right
8		across the UK, and I think I put in our written evidence
9		about talking to a very senior clinician who had had to
10		intervene personally with the hospital to enable an
11		older person with a very routine respiratory problem to
12		be admitted. It was absolutely something the hospital
13		could help with, but had he not intervened, there would
14		have been no possibility of that person attending.
15	Q.	Yes, I think you've described concerns about
16		non-conveyancing practices during the pandemic.
17	Α.	Yes.
18	Q.	So, again, were they quite widespread, from the evidence
19		that you've received?
20	Α.	Very much so, yeah.
21	Q.	And did you try to bring such issues to the attention of
22		national decision makers or even local governments or
23		practices?
04		
24	Α.	Yes, we very much did try to raise this as a real
24 25	Α.	Yes, we very much did try to raise this as a real concern, as a concern about the way older people were 23

1		practice would be ceasing visits.
2		So if we may have on screen, please, INQ000591762.
3		And starting with the second paragraph.
4		Now, the quality isn't particularly good on this
5		version, but I will read out the part that I would like
6		to draw your attention to. So the second paragraph, it
7		states:
, 8		" we need to minimise patient contact to all
9		unless absolutely essential."
10		And then in the fifth paragraph, in regard to
11		patients that get Covid-19, it states:
12		"We would plan to continue to nurse our patients
13		and not to transfer them to hospital. Sadly if they are
14		so unwell as to require breathing support from
15		a ventilator it is unlikely that given their frailty
16		they would survive."
17		Firstly, is this the type of letter or the approach.
18		one, that Age UK heard people experienced during the
19		pandemic in Scotland or elsewhere in the UK?
20	Α.	We heard these kinds of things right across the UK.
20		What is unusual about this is that the practice actually
22		wrote it down and took the trouble to communicate with
22		patients and care homes formally about it. More often,
23		I think, these things happen informally, or they were
24		conversations. They weren't actually documented. And
20		
		22
		22

I'd like to ask you now just briefly about end-of-life care and medications. What concerns did Age UK have about the changes to medications and prescriptions generally, in care homes, and in the community during the pandemic? Well, especially at the beginning and the early stage of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20		 being viewed and treated, and the lack of respect for their human rights and their ability to access healthcare, alongside everybody else of all ages. Regardless of whether you're in a care home or living at home or in hospital, we all have the same right, and that right was not being observed. And we shared those concerns across our Age UK family and with the commissioners in Northern Ireland and Wales, and we published a statement actually saying that. And there was some response to it, but I think, from what we heard, there was patchy implementation thereafter on this issue, as indeed many others throughout the pandemic. I'd like to ask you now just briefly about end-of-life care and medications. What concerns did Age UK have about the changes to medications and prescriptions generally, in care homes, and in the community during the pandemic? Well, especially at the beginning and the early stage of the pandemic, it was a degree of disorganisation, a lack
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21		 being viewed and treated, and the lack of respect for their human rights and their ability to access healthcare, alongside everybody else of all ages. Well, especially at the beginning and the early stage of the pandemic, it was a degree of disorganisation, a lack of process and system which meant that it became very

25 but they turned out to be very unhelpful during 24

younger.

communication at all times about this issue is often not very good. That's the broader context. But during the pandemic, it was arguably even worse, with people receiving phone calls out of the blue, telling them that this had been put on their file, which is completely improper, and against practice, because the whole point of these decisions is they are personal decisions for all of us to take for ourselves, and they should be decisions we take well in advance of actually needing to implement them. Ideally when we're fit and well and

Of course, that wasn't the situation in the

and the result was sometimes a knee-jerk reaction,

a desire to get all the paperwork in place in case the

worst happened. But that was, again, in denial, really,

of older people's rights and caused a lot of upset and

fear amongst older people and of course their families.

how trust can be rebuilt between healthcare, government

pandemic, and in response to that, you said that advance

care planning needs to be taken more seriously across 26

services were getting quite close to being overwhelmed by surging demand as a result of the pandemic.
Q. And just on the topic of visiting of loved ones in care homes, again, an area the Inquiry has received a lot of evidence about, but you describe in your statement how it was the most common concern that was heard through your helplines. And so can you provide some examples of the impact on older people and their loved ones that your organisation observed, perhaps in particular those

receiving palliative or end-of-life care or suffering

A. Well, those were exactly the groups who were hit the

hardest, arguably, if they were living in a care home

understanding of who they are, where they are, but

course, for people like that, visiting is often not just

coming and saying hello, it's also helping with eating and drinking, and very important things like that. So

the absence of that support for that group was terrible,

and I think, in some cases, led to people deteriorating

very quickly, dying faster than would otherwise have

been the case. As well, of course, as being very

28

retain a strong affectionate bond with the people closest to them, that provides reassurance. And of

and were unable to have face-to-face contact with their

loved ones. For people with dementia, may have not much

from dementia.

and older people to ensure they have the confidence to

Q. I think during your evidence to Module 3 you were asked

ask that their healthcare needs are met in a future

pandemic. I think there was a widespread fear amongst clinical professionals of services becoming overwhelmed,

1		a pandemic when much more urgency was required, and it	1
2		took the government time to change those. And sadly,	2
3		during the months that happened, that led to people	3
4		dying in care homes not in a dignified way, not in	4
5		a pain-free way, and it put the professionals working	5
6		there, sometimes nurses, very often not medically	6
7		qualified people at all, in a horrible, horrible	7
8		position when they had a lot of people there who needed	8
9		those drugs, they weren't able to share them from one	9
10		person to another, either, for fear of breaking the	10
11		rules.	11
12		Over time, those rules were changed, but those	12
13		things were not in place and perhaps they could have	13
14		been planned for.	14
15	Q.	And can you recall, and don't worry if you can't, but	15
16		when those rules changed or when the situation improved?	16
17	Α.	I can't recall for sure but it was during that year,	17
18		I think, quite quickly, but the damage had already been	18
19		done for so many people.	19
20	Q.	The Inquiry has heard a substantial body of evidence	20
21		regarding DNACPR notices, but if I may ask you this:	21
22		what were some of the issues that Age UK heard or	22
23		observed around communication about DNACPR decisions	23
24		with the patient, but also with family members too?	24
25	Α.	I think it's important to say from the outset that	25
		25	
1		society not just as something to be used in extremis.	1
2		So how do you think we can achieve that in normal	2
3		times and then how do you think that can also we can	3
4		ensure that that continues to apply during a pandemic as	4
5		well?	5
6	Α.	I think it's a very difficult thing to do from where we	6
7		are now, rebuilding that trust, and I think I should	7
8		also say that now that our country has voted to legalise	8
9		assisted dying, that changes the context as well, and we	9
10		know at Age UK that some older people right now are	10
11		reluctant to engage in advanced care planning for fear	11
12		that it's something to do with assisted dying, which,	12
13		actually, it isn't. But I think this whole area has	13
14		become more complicated for people, and we will need to	14
15		do a lot as a society to support people in understanding	15
16		the benefits of advance care planning, what it is, what	16
17		it isn't, and enabling them to take part as early as	17
18		possible.	18
19	Q.	And how do you think that will help in a future	19
20		pandemic, if we'd had those conversations beforehand?	20
21	Α.	It would mean that there wasn't a perceived need by	21
22		professionals to rush people into having these	22
23		conversations, which perhaps was an understandable	23
24		reaction, given the stress that they felt under, and as	24
25		they looked, early on particularly, at how their medical	25
		27	

27

(7) Pages 25 - 28

1	painful for their relatives.	1
2	And then, for people at the end of life, the time at	2
3	which, for most of us, we would want to have our loved	3
4	ones close to us, and definitely, for loved ones, the	4
5	time when they would often think it most important to be	5
6	present, the inability to be there. Something that will	6
7	probably scar the people who lived through that for the	7
8	rest of their lives, a continuing source of deep regret	8
9	and sadness, experienced by very many people,	9
10	unfortunately.	1(
11	Q. And picking up on something you said there around	11
12	visitors perhaps not just being there in person but also	12
13	undertaking tasks whilst they're there, and I think	13
14	you've said in your statement how the term "visiting"	14
15	fails to capture that role of family and carers not only	15
16	supporting the care recipient but also supporting staff	16
17	as well. So was that understood in the guidance, do you	17
18	think, and if not, how could it be in future?	18
19	A. I think it wasn't really appreciated. More generally,	19
20	I think the people writing the guidance often had very	20
21	little practical experience of what it's like in a care	21
22	home. They weren't usually former professionals. I'm	22
23	sure they took advice and insight from people who were,	23
24	but the officials themselves were servants, policy	24
25	officials, good at doing policy, not necessarily with	25
	29	
1	meant that that evidence weighed as heavily as the	1
2	medical evidence about the transmissibility of the	2
3	virus. And it felt like banging your head against	3
4	a brick wall.	4
5	And I think it put officials and ministers in	5
6	a really difficult position, because the public health	6
7	advice for a long time was so anti anything that might	7
8	be perceived to enhance the transmission of the virus.	8
9	Of course I completely understand the importance of	9
10	that, but what wasn't seemingly weighed alongside it was	10
11	the damage to older people of not having visitors, and	11
12	less emphasis was being placed on what we know now to	12
13	have been a big cause of transmission, which was care	13
14	workers going home at night to their families, where	14
15	their children had gone to school. That so much	15
16	emphasis was placed on keeping loved ones out in a way	16
17	that was disproportionate and, I think ultimately, as we	17
18	look back on now, a big mistake.	18
19	LADY HALLETT: Can I just interrupt sorry, Ms Hands.	19
20	Ms Abrahams, I totally understand the point you're	20
21	making about the impact of visiting restrictions on	21
22	recipients of care and on their loved ones. On the	22
23	other side of the coin, I have heard from some loved	23
24	ones that they didn't want anybody visiting the home for	24
25	fear of the virus being introduced by them, whoever they	25
	31	

1		the understanding of the context.
2		So the more hands-on professional experience/advice
3		that the government can benefit from by having either
4		people on its staff in that position or excellent links
5		to groups of professionals outside, the better the
6		policy will ultimately always be.
7	Q.	And in 2021, Age UK were invited to join the Care Home
8		Visiting Stakeholder Group in England. I think that was
9		around February to March 2021, and Age Scotland were
10		invited to join the Scottish Government subgroup on care
11		home visiting in December 2020.
12		Age Scotland in their statement have described this
13		as very useful and that their input shaped the care home
14		visiting guidance.
15		So does Age UK consider that its input into the
16		group in England also had the same positive impact?
17	Α.	I hope so. I have to say, my recollection of it is it
18		was a hugely frustrating experience, because what
19		happened over the months was that we at Age UK and all
20		charities working externally got lots and lots of
21		evidence of the pain and suffering being caused to
22		people living in care homes by the lack of face-to-face
23		contact with their loved ones. And at the same time, we
24		were constantly told that there was no empirical
25		evidence, there was no randomised control trial, which
		30
1		may be. So they didn't want visits to take place from
2		family members. But could you help me on that point,
3		please.
4	A.	We heard that too, and there's no doubt that different
5	Λ.	families took different views, often within a single
6		care home, which would have made life very difficult for
7		care home managers and their staff trying to come to the
8		right decision about what was best. I think, on the
9		whole, those people were in the minority, but there
10		undoubtedly were those voices.
11		But I suppose one thing we have to take into account
12		is that as the months went on, there was greater use of
13		PPE, there was more access to PPE, there was more
14		understanding about this being predominantly an airborne
14		virus. Some care homes much better able than others to
16		
17		provide pods in gardens, and things like that, for safe
		visiting that would still allow some kind of contact.
18 10		But I think it would be fair to say we were quite
19 20		slow, generally, to get on that bandwagon, and it felt
20		like for a long time there could be no discussion of it
21		at all. And therein lies my frustration, I think.
22		DY HALLETT: Thank you.
23	IVIS	HANDS: Thank you, my Lady.
24 25		I was going to ask you whether you think that the type of groups that were set up later in the pandemic
∠0		IVDE OF UTOUDS THAT WELE SET UD BLEFT IN THE DANGEMIC

type of groups that were set up later in the pandemic 32

1		would have been helpful earlier in the pandemic, and if
2		you had been invited to join them earlier on it may have
3		been helpful. Would you agree with that?
4	Α.	Definitely.
5	Q.	You may not be able to answer this but, to your
6		knowledge, were there any groups or representation for
7		the Age groups in Wales or Northern Ireland?
8	Α.	I can't answer that directly.
9	Q.	That's not a problem. Thank you.
10		A final topic before coming to your recommendations.
11		Age UK produced a report in November 2020, Time to Bring
12		Our Care Workers in from the Cold. What were some of
13		the key themes that were identified in that report and
14		recommendations?
15	Α.	I think our view then, and continues to be at Age UK,
16		that the business of providing social care is a highly
17		skilled task undertaken by people who are hugely
18		committed. It's a much more difficult, demanding task
19		than our usual systems for accreditation tend to
20		recognise, and that care work deserves to be
21		professionalised, and people who do it deserve the terms
22		and conditions that go with it.
23		Part of professionalising the social care workforce
24		probably means putting more structures and systems
25		around it, more expectations of training that you are 33
1	Q.	And do you have any views on who should be responsible
2		for collecting or holding that data and information?
3	Α.	I think it would need to be someone or an organisation
4		that was reliable. It could be a bespoke organisation,
5		a new organisation. As the current government starts to
6		think over the next few years about what a National Care
7		Service might look like, you can imagine some body being
8		set up I mean a body being set up to do a number of
9		tasks to do with social care, including that one.
10	Q.	Ms Abrahams, are there any further recommendations that
11		we haven't already discussed today that you would like
12		to draw our attention to, either on behalf of Age UK or
13		the network more generally to improve the situation for
14		older people in a future pandemic?
15	Α.	Well, I suppose, on reflection, being in a care home
16		turned out to be almost the worst place you could be

16 turned out to be almost the worst place you could be 17 during the pandemic, simply as a result of unintended 18 consequences and the nature and behaviour of the virus. 19 Part of the problem, I think, was that thought was 20 given to the needs of people in their own homes and to 21 people in hospital, and people in care homes and using 22 social care more generally fell down the gap in between. 23 And a lot of what didn't happen, I think, is because of 24 that. 25

So what that tells me is that, in future, we do need 35

1		then accredited for having taken, which might help you
2		to earn more money, which is important in attracting
3		more people to do this very important work.
4		And if we're going to do that, we probably need
5		a register or something that writes down in one place
6		who a care worker actually is, so we can the public
7		can monitor what training has that care worker got?
8		Have they got the skills to help my mum? Are they the
9		right person? It would probably, we think, improve
10		it would certainly be more transparent. It would help
11		to identify, perhaps, people who shouldn't be doing care
12		work, and we think would increase public confidence in
13		social care as part of professionalising this career.
14	Q.	And how do you think such a register would help in
15		a future pandemic?
16	Α.	One of the things that was noticed at the start of the
17		pandemic was how little access directly to people
18		providing social care the government had. As I'm sure
19		you've heard, they didn't even have a list of what all
20		the care settings were, let alone any way of
21		communicating directly to care workers, for example
22		about the importance of getting the jab at the right
23		time and things like that. Or of access to PPE. Had
24		a register been in place, that would have been much
25		easier.

34

1 something much more like a genuine national care 2 service. We need more national infrastructure to 3 support it. We need quality standards. We need 4 transparency. That would have supported a stronger 5 social care system when the pandemic hit. 6 The second point I would particularly draw attention 7 to is the need for much more recognition of the rights 8 of older people, particularly, for example, in care 9 homes, where they have no rights, really, at all. 10 It was a source, I think, of great sadness and 11 surprise to families who had always thought they were 12 partners in their loved ones' care with the care home, 13 that once the pandemic struck, it didn't feel like that 14 at all. And that their loved one didn't have any 15 rights, really, either. So that definitely needs to be 16 addressed. And then thirdly, and finally, you'll be pleased to 17 18 hear, important that we put some more structures in 19 place to hear the voices of older people and those who 20 represent them in government. As I have said, when the 21 crisis hit, there's an absolute understandable tendency 22 in government to circle the wagons, to look inwards. 23 You're much more inclined not to listen to people 24 outside. There's a lot of tension and anxiety, and 25 there's some confidentiality too. And that didn't help

4		4
1	older people during the pandemic because there was no	1
2 3	one inside government thinking particularly about older people, and not enough people thinking about social	2
4	care.	4
5	So, addressing that through appointing	5
6	a commissioner for older people, probably a minister	6
7	with more responsibility setting up a cross-cutting unit	7
8	of officials, these are all the types of things that	8
9	could easily be done, and they would have made it less	9
10	likely, I'm sure, that older people would have been	10
11	forgotten too often during the pandemic.	11
12	MS HANDS: Thank you, Ms Abrahams.	12
13	My Lady, that's all of my questions. I believe	13
14	there are some further questions.	14
15	LADY HALLETT: There are, and I think its Ms Morris who is	15
16	first to go, who just to your right, Ms Abrahams.	16
17	Questions from MS MORRIS KC	17
18	MS MORRIS: Thank you.	18
19	Good morning, Ms Abrahams. I ask questions on	19
20	behalf of the Covid Bereaved Families for Justice UK.	20
21	Just two topics for you to expand on, please.	21
22	The first is around structural inequalities and the	22
23	impact of the pandemic on ethnic minorities. You	23
24	describe in your statement how older people from	24
25	minoritised ethnic communities have experienced higher	25
	37	
1	All these things are obvious when you look at them	1
2	now. I don't think they were thought about before the	2
3	pandemic.	3
4	Q. Thank you. So looking forward, what is needed to ensure	4
5	that structural health inequalities are addressed in	5
6	advance of a future pandemic?	6
7	A. I think there just needs to be a more strategic look,	7
8	really applying a safeguarding lens, for example, to	8
9	older people who where is the threat? And who is it	9
10	most likely to hit? And if you apply those two prisms	10
11	to thinking about your planning, that would have taken	11
12	you inevitably to thinking much more about people in	12
13	difficult circumstances of all kinds.	13
14	Q. Thank you.	14
15	My second topic is around discharging patients from	15
16	hospital into care homes, although you deal with	16
17	discharging into domiciliary care, as well.	17
18	You said that:	18
19	"The first wave of the pandemic was witness to	19
20	particularly devastating outcomes in care homes and	20
21	places where people were receiving domiciliary or	21
22	home-based care."	22
23	You said:	23
24	"The policies and guidance at the time"	24
25	And you're referencing there the discharge of 39	25
	55	

1		mortality from Covid-19 for the majority of the pandemic
2		than white older people. So I wanted to ask you whether
3		you believe the government did enough to recognise that
4 5		disproportionate impact of the pandemic at an early stage?
6	Α.	I do not think the government did enough to recognise
7	Π.	the importance of structural inequalities on the impact
8		of older people's experiences.
9		You have quoted particularly the issues around
10		people from minoritised communities, but more generally
11		there was, I think, no evidence of people thinking
12		strategically about: who are the older people going to
13		be at greatest risk? How do we identify them? What can
14		we do to better protect them?
15		And of course, anyone subject to a structural
16		inequality is going to inevitably have been hit harder.
17		For example, people from minoritised communities
18		tend to be on lower incomes, more likely to have had
19		problems accessing, buying PPE if they were at home,
20		being able to afford those things, probably less able to
20		advocate for themselves, having less access to external
22		support during the pandemic. And if in a care home,
23		more likely to be in a care home in a deprived area,
23		a state-funded care home, less well staffed, more
25		subject to churn.
20		38
1		untested patients into care homes:
2		" failed to consider the highly relevant risk to
3		care home residents or staff from asymptomatic
4		transmission until mid April 2020."
5		You go on to identify that between 2 March and
6		12 June 2020, there were more than 19,000 deaths of care
7		home residents attributable to Covid-19.
8		And you say in your statement that, in your view,
9		older people's rights were breached through unsafe
10		discharge of infected Covid-19 patients into care home
11		facilities. You say:
12		"In future, discharge to vulnerable settings should
13		only happen where measures are in place to ensure the
14		safety of the patient leaving hospital and the safety of
15		the people at the discharge address."
16		So I wanted to ask you, do you agree that it was
17		a fundamental failure of government at the outset of the
18		pandemic to allow discharge of patients from hospital
19		into care settings without confirmation by way of
20	_	a negative test?
21	Α.	l do.
22	Q.	Was Age UK consulted about this policy before its

- 23 implementation in March 2020?
- 24 A. Not as I recall.
- $\,$ Q. Are you aware of government considering the obvious and $\,40$

1	inherent risks of that policy?
2	A. That wasn't obvious to anyone outside government, I
3	believe, at that time.
4	Q. Right. In your view, were care homes equipped to deal
5	with those new admissions who had not been tested? For
6	example, did they have sufficient facilities to isolate
7	or quarantine returning residents? Did they have
8	sufficient bed, staff or resources, PPE, and was there
9	necessary training in place to make that safe?
10	A. I think it would be fair to say that some care homes
11	were better placed to do that than others. If they were
12	new buildings with separate rooms, with lots of space,
13	that would have given them an advantage. But even for
14	them it would have been very, very difficult without
15	enough access to enough PPE, without having the trained
16	staff always in place.
17	So for almost every care home it was a very bad
18	idea.
19	MS MORRIS: Thank you, Ms Abrahams. Those are my questions.
20	Thank you, my Lady.
21	LADY HALLETT: Thank you, Ms Morris. And I think its
22	Mr Foley, who is probably across the hearing room.
23	Questions from MR FOLEY
• 24	MR FOLEY: I am, my Lady. Thank you.
25	Good morning, Ms Abrahams, I ask questions on behalf
20	41
1	to us. So thank you very much.
2	THE WITNESS: Thank you.
3	LADY HALLETT: I was going to suggest we break before the
4	next witness, but we are ahead of time. Shall we go to
5	the next witness? Sorry, having told the team that
6	MS HANDS: I will just check, my Lady.
7	Yes, we can move straight to the next witness.
8	LADY HALLETT: Sorry for the confusion. Thank you.
9	Ms Jung.
10	MS JUNG: Good morning, my Lady.
11	LADY HALLETT: Sorry, it is probably my fault there's
12	a delay in bringing the next witness in. I suggested we
13	would have had a break before the next witness.
14	MS JUNG: My Lady, the next witness is Ms Emily Holzhausen.
15	MS EMILY HOLZHAUSEN (sworn)
16	LADY HALLETT: Good morning, Ms Holzhausen.
17	I'm sorry if there was a confusion about whether you
18	were going to give evidence after the break or not. My
19	fault entirely.
20	THE WITNESS: Not at all. That's absolutely fine. Thank
21	you.
22	Questions from COUNSEL TO THE INQUIRY
23	MS JUNG: Good morning. Could I ask you to confirm your
23 24	
47	full name please
25	full name, please. A Yes my name is Ms Emily Holzhausen
25	tull name, please. A. Yes, my name is Ms Emily Holzhausen. 43

1		of the Covid-19 Bereaved Families for Justice Cymru.
2		I'm conscious of your earlier comments about not being
3		able to answer directly in regards to some issues in
4		Wales, but I just have one topic to raise with you
5		regarding measures after the pandemic that if I could
6		see if you can help us with.
7		May I ask, please, to your knowledge, again, since
8		the pandemic, has Age Cymru had any interaction with the
9		Welsh Government, Public Health Wales or any other
10		government or public health organisation in Wales, of
11		course to address the lessons learned from the
12		pandemic with regard to older people in care homes?
13	Α.	I'm sorry, I can't answer that on behalf of my
14		colleagues at Age Cymru. I don't want to get it wrong.
15	MR	FOLEY: Okay. In that case, I'll leave it and I thank
16		you.
17		Thank you, my Lady.
18	LAI	DY HALLETT: Thank you very much, Mr Foley.
19		Ms Abrahams, that completes the questions we have
20		for you. I think you're, in my book, one of the most
21		perfect witnesses you can have. You're not only
22		extremely informative and very, very helpful, but you
23		are also a stenographer's dream. Thank you very much
24		for your clarity and the content of what you provided to
25		the Inquiry, and much of it was really, really important
		42
1	Q.	Thank you. And could I ask you just to keep your
2		voice up a little bit, please. Thank you.
3		Is it right that you have come to give evidence as
4		the Director of Policy and Public Affairs at Carers UK?
5	A.	I have.
6 7	Q.	And that is a UK-wide charitable organisation that represents nearly 50,000 unpaid carers across the UK.
, 8		Carers UK has an affiliate network of local carer
8 9		organisations which covers many millions of unpaid
9 10		carers across the UK; is that right?
11	Α.	That's correct, and we have the 50,000 refers to our
12		individual membership, so we really are here to
13		represent all of the millions of carers in the UK today.
14	Q.	Thank you. And is it right that you have offices in
15	પ્ય.	each of the devolved nations?
16	Α.	That's correct, and they work very directly with the
17	7.4	administrations and elected parliaments and assemblies
18		in those nations, as well.
19	Q.	Thank you. So although the work of Carers UK is
20	-	UK wide, in terms of the evidence that you can provide
21		and the assistance that you can provide, is it right
22		that aside from the matters relating to devolved nations
23		in your statement and documents, you otherwise aren't
24		able to assist with specific issues that arose in the
25		devolved nations?
		44

(11) Pages 41 - 44

people don't consider themselves to be called carers or unpaid carers. They are primarily, you know, fathers, mothers, brothers, sisters, partners, sons, nieces, nephews, good neighbours, good friends, and that's a term that people don't always associate with, but it's very important in law, and in policy guidance, as I'm

Q. Thank you, and is it right that research carried out in 2022 showed that over the period of 2010 to, I think,

4 million people also left their caring role, leave

out of caring roles all the time? Is that right?

A. That is correct. So you can think of it, quite simply,

and one-third of the people stop caring. And that's

quite important, because it affects how we identify

carers, it affects the support they need. So some

people's caring can be relatively brief and other people

are caring throughout most of their lives, and for some

children it can be a very long time indeed, or parents

expanded question, so we were able to explain a little bit more about what we meant by unpaid caring and that's

A. But the polling was very important because we needed to measure exactly what was happening to this very dynamic population in a very unprecedented situation, and it

Q. Thank you. And can I just ask you, the figures that

I've just quoted, do they apply to children as well as

adults? And if so, are you able to help us as to the

A. That's right, they do also apply to parents of disabled

children and children with long-term conditions, but

other studies suggest that 92% of people caring are

statistics, we can take a large degree of confidence that they -- the majority of people they will refer to

caring for an adult. So where I'm looking at these

Q. But the carers themselves are all adults, are they, in

A. There is a smaller count of young carers within the

48

46

2020, 4.3 million people across the UK became carers

every year, I think that equates to about 12,000 people

a day becoming carers? And is it right that more than

their caring role every year, and does that show how

dynamic the group is, really, with people moving in and

as one-third of the population become carers every year,

sure we'll come to later.

of disabled children.

Q. Thank you.

told us a lot.

why we get a different figure.

proportion of adult carers or not?

are caring for adults.

those figures?

Q. Thank you very much.

figures, of about 175,000.

1	Α.	That's correct. I'll be concentrating largely on	1		peopl
2		England, but there are important divergences in some of	2		unpai
3		the nations which we need to learn from.	3		moth
4	Q.	Thank you, and we will go on to deal with some of those	4		neph
5		matters in due course. Thank you.	5		a terr
6		Can I start, please, by asking you: who are unpaid	6		very i
7		carers?	7		sure
8	Α.	So unpaid carers are people like you and I. They are	8	Q.	Than
9		family, friends and neighbours. And there's around	9		2022
10		it depends which study you look at, but about	10		2020
11		5.8 million people who are unpaid carers in the country	11		every
12		today. They're not people who are paid to do it as	12		a day
13		a contract, neither are they volunteers. And the types	13		4 mill
14		of support that they provide can range from more intense	14		their
15		emotional support, prompting, it might be somebody with	15		dynar
16		mental illness, and they're caring for somebody who has	16		out of
17		a disability or a long-term condition or need support	17	Α.	That
18		because they're older. But it can go right up to caring	18		as on
19		for somebody 24 hours a day, seven days a week. It can	19		and c
20		include some quite complex care including health tasks,	20		quite
21		as well, that you might expect a trained nurse to do.	21		carer
22		So we have a very broad spectrum of people who are	22		peopl
23		unpaid carers today.	23		are ca
24		Thank you. Sorry, did you	24		childr
25	Α.	Well, one of the points I wanted to say is that most 45	25		of dis
1	Q.	Thank you very much.	1		expar
2		Is it right, I think you said earlier in your	2		bit mo
3		evidence that there are about 5.8 million unpaid carers	3		why v
4		in the UK. In your statement you say that it's	4	Q.	Than
5		estimated to be between that and about 13 million. Why	5	Α.	But th
6		is there so much uncertainty as to how many unpaid	6		meas
7		carers there are?	7		popul
8	Α.	There's it really depends on how you construct the	8		told u
9		research. So you will see, for example, the census	9	Q.	Than
10		is we quote those figures quite a lot. That's where	10		l've ju
11		we now get a slightly updated figure of 5.8 million, now	11		adults
12		that Scotland completed its census one year later.	12		propo
13	Q.	Sorry, just pausing there. The figures that you are	13	Α.	That's
14		discussing, are they so there's 4.7 million in	14		childr
15		England?	15		other
16	Α.	In England.	16		caring
17	Q.	311,000 in Wales, 222,000 in Northern Ireland and	17		statis
18		627,700 in Scotland, according to the most comprehensive	18		that t
19		censuses in each of those countries?	19		are ca
20	Α.	That's right. The census in Scotland has been was	20	Q.	But th
21		a year later, so those figures have shifted slightly,	21		those
22		and they're higher. But the reason, if I come back to	22	Α.	Yes.
23		the figures, about why over 13 million and that is	23	Q.	Than
24		down to polling.	24	Α.	There
25		So we polled the general public with a slightly 47	25		figure

(12) Pages 45 - 48

Q.	Thank you.	1		differently. As you said, they don't have employment
2	Can we look at terminology, please. This is	2		rights, they aren't covered by health and safety
3	a matter you discuss in your statement, and you say that	3		legislation in the same way, and their benefits if
Ļ	unpaid carers are at times referred to as a "workforce"	4		they are unable to work, for example, their benefits are
5	or a "sector". You say that that can be misleading.	5		the lowest of their kind.
6	They are individuals who are not formalised, not paid by	6	Q.	And in terms of the protections that would otherwise be
7	the state, and are not protected like paid workers by	7		available under employment (unclear), do they cover
3	employment legislation in relation to their unpaid	8		matters such as Statutory Sick Pay, working hours
)	caring responsibilities.	9	Α.	No, there's nothing.
0	You also say that, very often, families do not have	10	Q.	So those are things that they don't have
1	a choice about caring.	11		access (overspeaking)
2	Is the point that you're making that they are not	12	Α.	They don't have access to those, there's nothing to
3	a formal a group with formalised peer support or	13		cover them in that way. So that's why we see people
4	protections under employment law, and therefore it's	14		caring for 24 hours a day, seven days a week, and goir
5	important to distinguish them from the paid workforce	15		without vital breaks as well.
6	who do have certain protections under the law?	16	Q.	And in terms of the support that they do have, is it
7 A .	It's hugely important. And if you think when people are	17		right that they are eligible to have a carers
8	talking about organising workforces, it's a very	18		assessment, and then, depending on the outcome of the
9	different matter when we're talking about relatives and	19		they may receive support through the local authority?
0	friends who are untrained, who don't necessarily who	20		And what kinds of practical support would a carer be
1	quite often become experts in conditions, but certainly	21		eligible for?
2	don't start out that way, who are thrown into situations	22	Α.	Well, the care the carer's assessment looks at
3	when they're caring for people with some very complex	23		a whole range of different areas, for example people's
4	conditions when care is withdrawn.	24		ability to work if they wish to, health and wellbeing.
5	So it's very important to see this group as very	25		They're supposed to look at breaks.
	You can provide additional care to the disabled	1		"carers", you decided to change the name, so you now
2	person, the person needing care, if that then helps	2		refer to them as "unpaid carers".
3	achieve the carer to achieve the outcomes they wish	3		Why is it important to distinguish, aside from the
l -	to achieve. But the sorts of other support there's	4		reasons you've already given, is there anything
5	very flexible direct payments or grants. So the carer	5		additional you want to say as to why it's important to
6	is effectively able to pay these to buy anything that	6		be clear with terminology?
7	supports their outcome, so it's anything from a laptop,	7	Α.	o y
3	it might be taking up a hobby, that kind of thing.	8		has been hard won over the years, and it's a term that
)	They tend to be quite small grants, sometimes it's	9		although people don't initially associate with it,
0	referrals to different advice and information or	10		people take great value in that, as carers. But when,
1	different support groups. There's a whole range of	11		in a pandemic situation, you are talking about
2	different support but for carers it tends to be more	12		communications, you need to be utterly clear when it's
3	modest than it is for disabled or older people.	13		very it makes those messages very confusing to kno
4 Q. -		14		are you talking about paid carers or are you talking
5	including this morning, about the effect of easements on	15		about family members, you know, as defined by the law
6	assessments and the impact of that on people receiving	16		Unpaid carers felt very strongly that this was
7	support, including carers.	17		their the term was being appropriated. So when we
8	Could I ask you this, please: is it right that in	18		heard about "Clap for Carers", they were very clear that
9	each of the UK nations there's a slightly different	19		it was not for them, that it was for health workers and
0	definition of carers under the applicable legislation?	20		then a bit later on for care workers, and some of them
1	In England, is it right that unpaid carers at the	21		sort of wanted to do a move to sort of recognise
2	beginning of the pandemic and prior to the pandemic were	22		themselves under that heading, as well.
<u>^</u>	just referred to as "carers", but during the course of	23		Now we tend to refer to carers as "unpaid carers"
3	the pandemic, because there was some confusion arising	24		be very clear, but I just want to be clear about the
3 4 5	with the paid workforce also being referred to as	25		legislation, still remains the same. "Carer" is still

1		defined, as I just said, not by contract of employment	1
2		and not as a volunteer, and we would like to keep that	2
3		in the future but we feel the need to define carers as	3
4		unpaid carers, to be absolutely clear that it's not	4
5		about workers.	5
6		And some of this sort of confusion around	6
7		terminology we see in some of the PPE guidance and in	7
8		some other areas where we're not entirely clear exactly	8
9		who it is that we're talking about.	9
10	Q.	<i>y, y</i>	10
11		during the pandemic about which group of people were	11
12		being discussed or the guidance applied to, do you say	12
13		that there was confusion amongst decision makers and	13
14		people drafting the guidance as well as the public?	14
15	Α.	5	15
16		distinction, used it for the paid workforce. And then	16
17		certainly when the communications was going out	17
18		nationally, that was also confusing for people locally	18
19		and a lot of local services use the term "Carers", as	19
20		well, to mean unpaid care. So you can see that in	20
21		a pandemic it's critically important to make sure you	21
22		have clear communications, and even more so when you're	22
23		talking about unpaid carers and the general public,	23
24 25	0	as well.	24 25
25	Q.	Thank you. You said that you're not suggesting that 53	25
1		If I may, I'll just read you an extract from	1
2		a Department of Health and Social Care document from	2
3		November 2020, and it described unpaid carers being	3
4		fundamental to the sustainability of the health and	4
5		social care system:	5
6		[As read] "During the pandemic, unpaid carers have	6
7		been invaluable to the health and social care sector,	7
8		preventing people from entering formal care for	8
9		preventable conditions, absorbing or reducing strain and	9
10		burden on the NHS, and providing care and support for	10
11		those they care for in their own homes."	11
12		Would you agree with that description?	12
13	Α.		13
14		felt invisible, quite often, because of the national	14
15		messaging. And I'm sure we will come on to the impact	15
16		and the cost of providing that care, to them.	16
17	Q.	Yes. You say in your statement that it was a common	17
18		pre-pandemic scene for unpaid carers to feel invisible	18
19		and undervalued but is that something that continued	19
20		through the pandemic?	20
21	Α.	Yes. And I think that comes down to national messaging,	21
22		clarity about who we're talking about, carers, you know,	22
23		they felt that their word had been appropriated.	23
24	Q.	Thank you.	24
25	Α.	And about the support that they were given as well, very	25
		EE	
		55	

1		that should be done by legislation. How do you say that
2		that clarity should be achieved during the next
3		pandemic?
4	Α.	We would say by using a slightly different term for paid
5		workers, whether "care workers" or "social care", "paid
6		social care staff". There are other terms that can be
7		used other than "carer".
8	Q.	Thank you.
9		DY HALLETT: Would you like to break now, Ms Jung?
10	MS	JUNG: That would be a convenient moment. Thank you,
11		my Lady.
12		DY HALLETT: Thank you. I shall return at 11.35.
13	(11.	.18 am)
14	(4.4	(A short break)
15 16	•	35 am)
17		JUNG: Thank you, my Lady. DY HALLETT: Ms Jung.
18		JUNG: Thank you.
19	WIG	Ms Holzhausen, we discussed before the break the
20		identification and definition of unpaid carers. Can
21		l just briefly ask you about recognition.
22		In your statement you say that the value of support
23		of unpaid carers is estimated as equivalent to the NHS,
24		and that unpaid carers outnumber health and care workers
25		by 2:1 as a minimum and 4:1 as a maximum.
		54
1		directly.
2	Q.	Thank you. And you also say in your statement that
3		there was a mix of awareness between political and
4		administrative decision makers understanding the role
5		and/or importance of unpaid carers.
6		So, in terms of impact, then, please could you
7		explain what the impact was of decision makers not fully
8		understanding and recognising the role and importance of
9		unpaid carers.
10	Α.	So I just want to if I just start by explaining how
11		people felt at the beginning of the pandemic, in that
12		if I just read some of the words from a carer, if that's
13	_	okay?
14	Q.	Thank you.
15	Α.	"I am terrified to the point of suffering a panic attack
16		that either Mum or I will become infected and I'll
17 18		either have to battle to keep her isolated, or worse, I might get ill and won't be able to keep her safe
19		because I will have to self-isolate."
19 20		l've been speaking to some carers over the last
20 21		week, to go back to remember what the times were like
22		first of all, and the responsibility that families felt
23		towards keeping their loved ones safe was immense, and
24		there was a huge level of fear and anxiety, and that
25		continued throughout the pandemic and took a real toll
-		56

1		on people's mental health and wellbeing.
2		The physical impacts were also visible. So when we
3		looked later at carers, 81% were providing more care.
4		And that was because of the withdrawal of services,
5		because they had refused services out of fear of keeping
6		people safe at home. It you know, some of them had
7		had very poor experiences of care, especially with the
8		lack of PPE in the early days. Services had closed and
9		gone online, particularly day services, and so people
10		were becoming very isolated.
11		We saw we just this year, when we look at the
12		GP Patient Survey, for example, which measures carers'
13		health and wellbeing, we've seen in increase in poorer
14		health and a difference between carers and non-carers.
15	Q.	Thank you. If I may, can I just focus the topic
16		a little bit. So you've just told us that there were
17		rising levels of care need during the pandemic. I think
18		you said 80%. Is it right that that was broadly similar
19		across the devolved nations as well?
20	Α.	Yes, it was, yes.
21	Q.	Is it also the case that the needs of people receiving
22		care increased during the pandemic?
23	Α.	They did. And it was very distressing to see, for
24		example, people talking about a learning disabled son
25		who was extremely distressed, agitated, sometimes
		57
1		was extremely concerned about risk of infection,
1 2		was extremely concerned about risk of infection, transmission.
		-
2		transmission.
2 3		transmission. That's a key reason why people refuse services
2 3 4		transmission. That's a key reason why people refuse services because they were worried about transmission, and when
2 3 4 5		transmission. That's a key reason why people refuse services because they were worried about transmission, and when we come to look at the guidance which suggested that

And just for context, you say in your statement that pre-pandemic, unpaid carers didn't normally have access to PPE. And so I think you've explained that during the pandemic, they were having to purchase it themselves. To what extent did they gain access to PPE through local authorities during the pandemic? There were some local authorities in England who devised systems for triaging carers who really needed it. And

4	,	,
1		challenging behaviour because couldn't understand why he
2		couldn't go to his clubs and activities. Some people
3		who were very active, young people, were not able to go
4		out, and that manifested itself at home with people's
5		cognitive decline, with people's physical decline.
6		People stopped being able to do everyday activities like
7		eating themselves. Speech and language declined across
8		lots of different conditions, dementia, learning
9		disability, mental illness as well, and that fell on
10		carers' shoulders.
11	Q.	And I think in the very helpful reports that you've
12		exhibited to your statement you set out in detail all of
13		the impacts, but is it also right that one of the key
14		themes that arose during the pandemic were concerns
15		about PPE?
16	Α.	(Witness nodded).
17	Q.	Could you tell us specifically what the impact was in
18	ч.	relation to the access issues to PPE?
19	Α.	So first of all, carers, being ordinary members of the
20		public, couldn't access PPE. And we know that there
20		were key issues, first in the NHS and within social care
21		and social care being very late to get PPE, and one
22		carer spoke about this very well, for example. He said
23 24		that, you know, the NHS staff coming into the home had
24 25		full PPE, the care staff just had flimsy aprons, and he
20		58
1		might go out of the home and come back, and we've got
2		families sharing care and travelling distances to care
3		for people. So it's not true that they're, sort of,
4		totally isolated sometimes.
5		So some local authorities provided PPE but really,
6		it wasn't in England, the systems weren't really set
7		up until 2021 whereas in Scotland they had systems set
8		up at the end of April. And it was very targeted and
9		triaged, and those services were not overwhelmed,
10		either, and so this was one of our central calls that
11		continued. It's very it's extremely distressing for
12		carers to be told they should be having PPE when they
13		can't get it.
14	Q.	In Scotland, was the distribution through the local PPE
15		hubs? Do you know?
16	Α.	Yes.
17	Q.	And when you say that they were triaged, do you know if
18		they had different data to the data that was available
19		in England? Is the system that was applied in Scotland
20		something that could have been applied here during the
21		pandemic?
22	Α.	Yes, it could have been applied here. The triage system
23		was really talking to individuals about what they needed
24		and who they were, and working between carers

25 organisations and local authorities, and that system 60

4	~	The selection of the statistic provide the firm of the st
3		a year later.
2		similar system was adopted here but much later. Nearly
1		could have been applied here and indeed, sort of, that

- 4 Thank you, and just sticking with the impact of that, Q.
- 5 I think you said that because people were worried about
- 6 transmission from care workers without PPE, that they 7 were cancelling their services, is that right? But is
- 8
- it also correct, you say in your statement that
- 9 providers themselves were sometimes cancelling services 10 because they didn't have the PPE?
- A. That's right. There's a good example of an older woman 11
- 12 who had a temperature and so care workers were withdrawn
- 13 because they didn't have adequate PPE and they were
- 14 concerned that the temperature was a sign of Covid. It
- 15 might have been a sign of something else, but, you know,
- 16 they didn't know that, so they protected their workers.
- 17 And the carer was left without support.
- 18 Thank you. And before we move on, just in terms of key Q.
- 19 impacts of the pandemic on unpaid carers during the
- 20 pandemic, it's right, isn't it, that because of the
- 21 impact of the easements and the reduction in the support
- 22 provided to carers and also the closure of support
- 23 services like day services and respite services, there
- 24 was an increased burden on carers resulting from the 25 fact that they didn't have breaks and were effectively
 - 61
- 1 another matter.
- 2 Q. Do you consider that the drafters of that guidance with 3 whom you are communicating had adequate understanding of 4 how that guidance would be implemented in practice and 5 how things operated on the ground? 6 A. I don't think so. So it's important -- I think it's an 7 important demonstration that carers were included, 8 because there have been a number of instances where 9 carers have been left out of key policies to do with the 10 pandemic when really they should be included as 11 providing significant amounts of care. So the fact that 12 they were included is a good thing, but the practical 13 application of it, I think, is -- was just a challenge. 14 Q. How do you think that could be improved in a future 15 pandemic? 16 A. I think -- I mean, the bottom line is, with a future 17 pandemic, PPE is absolutely critical to maintain 18 infection control and to give families the confidence 19 that they will be safe when workers are coming into 20 their home or giving them care in whatever care setting, 21 and I think that's the fundamental, the fundamental 22 principle. 23 We still need carers to be supported and included. 24 We would need those distribution mechanisms set up far 25 earlier for carers and for carers to be factored into
 - 63

- exhausted from caring; is that right? 1
- 2 Α. Yes, they talk a lot about being overwhelmed, a large
- 3 proportion of people being overwhelmed, burnt out,
- 4 stressed, exhausted. One was talking about where they
- 5 would normally get 84 nights of respite but were getting
- 6 none, and some of these people, as well, are caring into
- 7 their eighties, and, you know, still having to provide
- 8 all that care themselves.
- 9 Q. We discussed PPE, in terms of the access. Can we just 10 discuss the PPE guidance, please. What involvement did 11 you have in the production of that guidance?
- 12 I saw, I think, a later draft of PPE guidance. Α.
- 13 Q. And did you have sufficient time to meaningfully input 14 into that guidance?
- 15 A. A lot of the guidance was very, very quick turnaround.
- 16 I mean, there are examples when you just have a matter
- 17 of hours to turn something around. And I think part of
- 18 the challenge of commenting on guidance such as that is
- 19 feeling, well, you might be giving instructions to
- 20 carers about how to use PPE, but -- but they can't
- 21 necessarily -- or use it, but they can't source it. So
- 22 this is quite challenging, when you have a direction
- 23 that you think a family should be taking, or government
- 24 thinks a family should be taking, but the ability for
- 25 families to actually follow that or do it is completely 62

1		the delivery of PPE. Not everyone will necessarily need
2		that, but there are some examples where it's absolutely
3		critical.
4	Q.	And do you have any recommendations as to how,
5		practically, distribution should work in a future
6		pandemic to ensure that unpaid carers were able to
7		access PPE in a timely manner?
8	Α.	I think the models that were set up where they were
9		looking at who really needed PPE when supply is tighter
10		is critically important. And those models could work in
11		the same way.
12		The real issue is that there's very poor data on
13		carers and identification of carers across different
14		services doesn't necessarily match up. So in the
15		future, one of the fundamentals that we need is very
16		good data linkages, so that we know who might need this,
17		and for those triage systems to come through local
18		resilience forums, through local authorities, to be able
19		to work well.
20		I mean, carers were sometimes advised to get them
21		through their local domiciliary care provider, and they
22		didn't have enough for their staff let alone the
23		families that they were going into.
24	Q.	Yes, and we'll go on to deal with data next, but before
25		we leave this topic, in one of the documents that you've 64

1		exhibited you suggest that the local authorities could	1	
2		hold a stockpile of PPE. Is that something you would	2	A.
3		recommend in the case of a future pandemic?	3	Q.
4	Α.	Yes, I think so. Unless somebody comes up with a better	4	
5		solution, we need to have resources that can be	5	
6		distributed quickly.	6	Α.
7	Q.	We know that guidance was issued, I think, on 13 March	7	Q.
8		to residential care settings, to supported living, and	8	
9		homecare settings but not to unpaid carers. That	9	Α.
10		guidance came the next month, I think, on 8 April.	10	
11		What impact did the delay in guidance being issued,	11	
12		specifically for unpaid carers, have on them and the	12	
13		response?	13	
14	Α.	There's a lot of confusion about what should be	14	
15		happening, and that's very hard when you're talking to	15	
16		the general public. The guidance in particular when not	16	
17		just about PPE but around some other really critical	17	
18		factors like the ability to still travel to provide	18	
19		essential care. The definition of essential care, that	19	Q.
20		was very important. I would like to come back and talk	20	
21		about that as being a key factor at some point, if	21	
22		that's possible.	22	
23	Q.	Sorry, about?	23	
24	Α.	The definition of essential care.	24	
25	Q.	Essential care I think that's going to be dealt with	25	
		65		
1		what the real practical challenges were for unpaid	1	
2		carers?	2	
3	Α.	I think, I mean, the social care sector was under such	3	
4		pressure, that understandably took quite a lot of the	4	
5		time and the energy and the effort. So I feel that	5	
6		sometimes comments made were not really then followed up	6	
7		and perhaps PPE is a good example; testing, for example,	7	
8		when people coming out of hospital back into	8	
9		someone's home, people needed to know whether there's	9	
10 11		somebody coming back into their home had Covid or not to	10	
		know, you know, they had also sometimes other, more	11	
12		vulnerable people in the home.	12	
13 14		So I don't always feel that those issues were taken	13	
14 15		forward.	14 15	
16		I do want to say, though, that the adult social care taskforce that was chaired by David Pearson, he did make	15	
17		-	10	
		sure that carers were a priority and we did have an		
18 19		equal voice, and asked me to set up a specific subgroup on unpaid carers, and that was given proper and due	18 19	
20 21	0	consideration, and it was very positive.	20 21	
21 22	Q.	Thank you. That's the carers advisory group that you co-chaired. And you made a number of recommendations in	21 22	
22 23		that report. To what extent were those recommendations	22	Q.
23 24		implemented?	23 24	પ.
24 25	Α.	So some of them took quite a long time to implement, and	24 25	
		67	20	

- later.
- A. Thank you.
- **Q.** Thank you. So we've discussed the fact that the
- guidance that was specific for unpaid carers came later than for other settings.
- 6 **A.** Mm.

6	Α.	Mm.
7	Q.	Do you consider that unpaid carers were not prioritised
8		in decision making and in the production of guidance?
9	Α.	Yes. So there was very, very good knowledge at sort of
10		a policy level and very good working across NHS England
11		policy leads on carers, and the Department of Health and
12		Social Care policy leads, Department for Work and
13		Pensions, but there were delays in getting that guidance
14		out, so things were drafted fairly quickly but it
15		took a little while for it to be signed off, and so, you
16		know, that then impacts on the ability our ability to
17		support people through their journey of caring in the
18		pandemic.
19	Q.	You say in your statement that you were party to some of
20		the working groups that the government set up, and that
21		included the adult social care taskforce. But you also
22		say that, understandably, these groups were primarily
23		focused on care homes and hospital discharges in
24		particular. Do you feel that you had an equal voice in
25		those sorts of forums to help decision makers understand
		66
1		our recommendation here would be, now we know what we
2		know about the pandemic, do that far earlier. Some were
3		implemented quite quickly. If I look at the ones that
4 5		weren't, our recommendation was that carers should be in
		a priority group for the vaccination, for example, and they were left out on the list on 2 December, and it
6 7		took a lot of work to get them included and recognised
7 8		by 31 December.
8 9		And the reason for you know, the reason why
9 10		that's so important is the first is because of risk
11		of infection, and the second is because if the carer is
12		unable to care, that puts far more pressure on health
13 14		and social care services. And the fact that we recognise this for flu but it wasn't with the
14		vaccinations and that sort of lack of recognition
16		came each time.
17		
18		We also made a recommendation about care bubbles, for example, which came a lot later, and there were some
19		which didn't really get implemented in terms of day
20 21		services returning in the way that they did, breaks, and GP you know, systematic identification of carers
21 22		, , ,
22 23	0	by GPs. Thank you. That brings us on to the topic of
23 24	Q.	identification and data infrastructure. I will turn to
24 25		those recommendations, but could I start by asking you,
20		68

1		please, pre-pandemic, what systems were in place to	1	Q.	Thank you, you've answered the question I was going to
2		collect data on unpaid carers at a local level?	2	ω.	ask next. So nationally, it was just it's just that,
3	Δ	So the data sources are all really disparate. At	3		there is nothing else.
4	7.0	a local level we have GP identification of carers where	4		And what gaps do you say there were in data, then,
5		they have specific codes, and at the time I think there	5		at the start of the pandemic that would have been useful
6		were over 100 different codes used. They've been	6		in informing the pandemic initial strategy and response?
7		condensed now into three or four, but	3 7	Α.	So I think one of the what we saw when we started to
8	Q.	What do you mean by codes?	8		look at pulling data lists together for vaccination,
9	<u>ц</u> . А.	They're on the GP patient system. So GPs could identify	9		that is where we started to see some fantastic practice,
10	Π.	carers, and it's usually used for flu vaccination and	10		and we should have seen that at the beginning of the
11		some public health measures, but that's not systematic.	11		pandemic.
12		And then local authorities, of course, keep records of	12		So some brilliant work done by the Health Foundation
13		carers where care assessments, joint assessments or	13		as part of their Networked Data Lab looked at overlap
14		carers' assessments have been undertaken, and sometimes	14		between the lists of local authorities and GP practices
15		they have other records. We have local carers'	15		in local areas. And they saw the overlap of being
16		organisations that keep records, whoever provides the	16		actually quite small. The GP lists tended to be
17		local carers' service. Within council tax, for	10		slightly more likely to identify people of working age,
18		example you can get a council tax discount if you're	18		and that might be linked to flu vaccination. But still
19		a carer. That's another record.	10		a significant number of older carers.
20		And then nationally, of course we have the	20		Had these datasets been linked earlier, it would
20		Department for Work and Pensions and claimants of	20		have been far easier to have identified a cohort of
22		Carer's Allowance, which is the main carers benefit.	21		people who you could get public health messages out to,
23		But locally they can't access that personalised data.	23		you could triage for support, but recognising, as well,
24		So we've got a range of different data sources, but	23		who isn't on those lists. So people from ethnic
25		none of them are linked.	25		minorities much more much less likely to identify
20		69	20		70
1		themselves as unpaid carers, and Gypsy, Traveller and	1		local authority records, and is it right that neither
2		Roma communities, for example, have issues about trying	2		set were seen to be comprehensive?
3		to access health services.	3	Α.	Yes, neither set is comprehensive, and what was
4		So there are some equality considerations, but that	4		surprising was the lack of overlap, actually, between
5		kind of linked data could be used earlier.	5		them. Some areas did better than others so this is
6		The other point I wanted to make as well was the	6		when we're looking at the building the future, this
7		role of the DWP, who was, as a national data holder of	7		is something that needs attention.
8		all of these carers getting Carer's Allowance and some	8	Q.	Thank you. And could I just go to one document, please.
9		linked benefits, they were they moved very	9		It's at tab 4 in your bundle, but it's INQ000239455,
10		positively, very fast to pull those pull those	10		page 2, please.
11		datasets in so that we had the best dataset we possibly	11		And this is your statement made jointly with the
12		could for vaccination.	12		Carers Trust on 11 March 2020.
13	Q.	Thank you.	13		And if we look at the third bullet point, you can
14	Α.	Now, that procedure, data protection was an issue	14		see there you were recommending that:
15		some you know, people between sharing of lists	15		"Data and intelligence pooling could be a real asset
16		sometimes with local carers organisations, so that needs	16		to ensure that we get the best picture possible of those
17		to happen earlier	17		most in need. Carer identification needs to be a core
18	Q.	Thank you.	18		part of this.
19	Α.	and those data linkages need to be made.	19		"Information systems, like 111 should start
20	Q.	The study that you alluded to, the Health Foundation	20		collecting data on whether someone is a carer and ask
21		study, was that one that's been conducted recently,	21		this question to anyone who either reports symptoms or
22		I think, in 2024; is that right?	22		has to self-isolate, ie if they provide an important
23	Α.	That's right, yes.	23		level of care to someone who might be vulnerable in the
24	Q.	And that looked at what data was available in the	24		community. This should then lead to an appropriate
25		GP records as against what data was available in the	25		response from the authorities."
		71			72

71

(18) Pages 69 - 72

1		So were you suggesting there that, as well as the	1	
2		data being collected by GPs and local authorities, that	2	
3		the government should ask services like the 111 to also	3	
4		start collecting data, and do you know whether that was	4	
5		done?	5	
6	Α.	It wasn't. And it was it's the kind of thing where,	6	
7		with those critical services, we, having a data flag	7	Ģ
8		means that, first of all, you can target appropriate	8	A
9		responses and secondly, you can pull the data later for	9	
10		learning, and that's what we need to do with systems, is	10	G
11	~	constantly learn.	11	
12	Q.	And had this been done and had all the data sources been	12	
13		linked together, what impact do you think that would	13	
14		have had on the pandemic response? Do you think that	14	Α
15 16		would have allowed for more targeted policies, for	15 16	
10	۸	example?	10	
17	Α.	Definitely. We would have seen far more targeted first of all, carers would have felt recognised and	17	
10		especially with communication, you can push	18	
20		communication messages out. You could have treated PPE	20	C
20		differently, with getting food parcels to people who	20	
22		were isolated and had challenges, that would have been	21	
23		easy. You would have seen in evidence that that was	22	
24		very difficult to identify who people were in need of	20	
25		support. So it would have and the health response,	25	
20		73	20	
1		carers early on?	1	
2	Α.	Yes.	2	
3	Q.	And are there any other recommendations you would make	3	Ģ
4		in terms of improving data infrastructure or data	4	
5		collection for the next pandemic, and who do you say, if	5	
6				
7		so, should have oversight of that?	6	
	Α.	So the first thing on data collection is that we still	7

That is a very important source. Local authorities sources, it's a basic question when you're collecting demographic statistics, you can ask somebody whether they are an unpaid carer. And if we are able to look at that, we're far more likely to get a comprehensive picture of who is an unpaid carer, where we see equalities issues come up, you're then able to respond to them appropriately. But we don't have the structures still in place, and	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Α.	So the first thing on data collection is that we still don't have systematic identification of carers on their patient record. And this is we have misinterpretation from GP practices, sometimes blocking access, and it's critically important carers are able to do that. There's the potential for the NHS App in the future for, you know, if you had a function built in, you could get carers to identify themselves, but not everybody is digitally connected. That is a very important source. Local authorities sources, it's a basic question when you're collecting demographic statistics, you can ask somebody whether they are an unpaid carer. And if we are able to look at that, we're far more likely to get a comprehensive picture of who is an unpaid carer, where we see equalities issues come up, you're then able to respond to them appropriately.	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	F

1		as well, we could see that in later research, we found
2		that carers were less likely to get through to places
3		like 111, and they were more likely to have their own
4		health treatment cancelled.
5		So this builds up a data picture of risk, as well.
6		So
7	Q.	Thank you.
8	Α.	it's, you know, seeing that we called for that in
9		March 2020.
10	Q.	Thank you. I think you also recommend that a list be
11		drawn up of who in the local community is particularly
12		vulnerable, and at risk. Is that something that you saw
13		implemented?
14	Α.	When it comes to carers, that didn't really happen until
15		later. So some local authorities were trying to
16		interrogate their data around disabled and older people
17		and people with conditions. But that, you know, that
18		happened in different places, but carers weren't always
19		part of those lists.
20	Q.	The Inquiry has heard that when early decisions were
21		being made about PPE, it was a consideration that unpaid
22		carers were vast, were vast numbers. If that list had
23		been drawn up earlier on, would that have allowed
24		policies to have, for example, targeted initially the
25		most vulnerable people, so a smaller sector of unpaid
		74
1		opportunity as a result of the pandemic when we used
2	~	those data so well that that has now been lost.
3	Q.	Thank you.
4		And finally, can I ask you about funding during the
5		pandemic, please. Is it right that in some of the
6		devolved nations there was a one-off emergency fund
7		issued for unpaid carers? Such a fund wasn't issued in
8		England, but is that something that you would recommend
9		for any future pandemic?
10	Α.	Yes. So just to explain, in Scotland they have an
11		additional payment called the Carer Support Payment, and
12		they very quickly doubled it. And because of the
13		slightly different legislation in Scotland, which
14		basically denotes that if they spend from their own
15		coffers, their it doesn't affect their means-tested
16		benefits. So they reacted very quickly, and that made
17		carers in Scotland thousands of pounds better off.
18		Wales did £500 for carers, but because of
19		means-tested benefits, it was a problem, so it was only
20		people who didn't get that.
21		Northern Ireland wanted to do it but it wasn't
22		within their powers.
23		So England was the only place that didn't give or
24		want to give carers an additional payment.
25		Now, people who were on Universal Credit, they got 76

	you who I ask questions on behalf of. I represent John's Campaign, Care Rights UK and The Patients
	Association.
	At paragraph 13 of your witness statement you
	explain that unpaid carers often know the person they
	care for better than health and care professionals and
	that over time they become real condition experts.
	Do you agree that their expertise should have been
	better recognised, and that they should have been
	integrated into care teams to ensure that high-quality
	and person-centred care could continue to be provided?
A.	Quite briefly, yes. And that's what they want to be.
	They not only know the person and their characteristics
	but they very often know the different their
	different needs.
	It's absolutely vital on two ways: knowing the
	person incredibly well, and the second reason is because
	they are the people who have most contact with that
	person or are able to have an insight if we're
	talking about care homes, for example, have a different
	78
	was not the same as carers.
	So that is something that we really need to ensure

Α.	So that is something that we really need to ensure with the next pandemic: that those exceptions to travel rules to provide essential care, or perhaps families to come together, several people, when that might not look like it's within the rules, to be really clearly defined. Thank you, yes. You do cover in your witness statement that, although the lockdown rules did permit essential care to continue They did, yes. to be provided, unpaid carers themselves didn't understand that, but also other people like neighbours and the police didn't understand it, which led to instances of unpaid carers being wrongly reported to the police and even fined for continuing to provide care. But, of course, also it caused some carers to adopt a self-denying approach, where they didn't provide the care that was necessary even though in fact that would have been lawful to do and the person for whom they

Right, I think it's Ms Jones, who should be across

Ms Holzhausen, at para -- I'm sorry, I should tell

- So you've spoken about the negative impact that the lack of clarity obviously had on people there. But how,
- in your view, could public communications have been

1	undertaken better, so that people understood more	1		im
2	clearly precisely what was permitted within the confines	2	Q.	Jus
3	of the law?	3		atti
	. I think a clear permissive definitions and examples,	4		diff
5	that was communicated. I think in public	5		fac
6	communications, as well I've said about how families	6		abo
7	felt invisible to recognise what they had done, as	7		sec
8	well, or were doing to protect people and keep people	8		gui
9	safe within their community and providing all of that	9		de
0	care. That if those definitions had been provided,	10		the
1	then organisations like ours would have been able to,	11		car
2	because advise people correctly and give them	12		Wł
3	confidence that you could travel tens of miles to care	13		tim
4	for your mum with cancer and share that care with your	14	Α.	l th
5	sister, you know, you on, you off, and then her provide	15		a c
6	that.	16		nov
7	I think one of the things that is very clear is that	17		hoj
8	there's perhaps little understanding of how much people	18		
9	travel to see relatives to provide care. How much	19		we
20	families take turns to provide care. How daughters come	20		get
1	in to support Mum, who is principally the carer caring	21		a d
2	for Dad. You know, all of that could have been done	22		clo
3	much earlier like these care bubbles that we're talking	23		as
4	about, could have been put in place much earlier, and	24		He
5	a clearer definition would have supported us and it was 81	25		up
1	very hard to pin down who was responsible for that. But	1		the
2 3	it's something we definitely need in a more concrete way	2		doi
5 4	in the future, should this you know, we hope that we	3		tha
	won't be in another pandemic, but or a situation like this, but if we were, that needs to be there in place	4 5		po to
5 6				to
	quickly.	6		thi
3 3	Finally on that topic, can I ask, what do you think the role that organisations like yours and those I represent	7		thi
)	can play and how receptive did you find government to	8 9		we
9 0	involving you in those - in providing those kinds of	9 10		we
1	definitions that were needed?	10		org
	. So our organisations, we're critical providers of	11		coı tim
3	information and advice out to people, so we often	12		
4	translate government guidance and that's where we need	13		me cle
4 5	to be assured that the definition or our interpretation	14		the
6	is in fact in line with what the government is	15	Q.	Th
7	suggesting, and that people aren't going to be caught	10	હ.	
8	out by it or and it's putting things in terms that	17		rep
10 19	in, sort of, everyday language, as well.	10		
9	Some of those, some of those things didn't work	19 20		pa be
	quite as well, I would say, at the beginning. When we	20 21		be the
1	look at vaccination guidance, for example, who should be	21		
	-	22		an <u>y</u> wh
22	vaccinated that's when they listened very well to how	20		***1
21 22 23 24	vaccinated, that's when they listened very well to how to think about carers because, of course, it was defined			inv
22	to think about carers because, of course, it was defined as the primary carer, but as I've explained, quite often	24 25		inv are

1		impossible to get that, really.
2	Q.	Just arising from that, can I ask, to what do you
3		attribute the failure to provide that? We've heard
4		different pieces of evidence to the Inquiry about the
5		fact that guidance was being produced at speed, but also
6		about governmental lack of knowledge about the care
7		sector. Was it the urgency with which responses and
8		guidance were being produced? Was it the fact that
9		decision makers simply didn't understand the shape of
10		the adult social care system and the reliance on unpaid
11		carers and the kind of patterns of care they provided?
12		What do you think meant that that wasn't done at the
13		time?
14	Α.	I think all of those things, actually, it's
15		a combination of things. And now we know what we know
16		now, we would not operate in that way again, I would
17		hope, and that we would get clearer direction.
18		Furlough is another example, again, where if you
19		were caring you were able to be on furlough. Again,
20		getting that definition, it was not clear. We got
21		a definition through our colleagues that we worked
22		closely with in the Department for Business and Trade,
23		as it is now, and they got a definition from
24		Her Majesty's Treasury but you didn't find that expanded
25		upon, you didn't find it in communications, and it was
		82
1		there are numerous people who care for one person. They
2		don't all live together. So it's a commonsense approach
3		that I think we as organisations understand our
4		populations and people and take a commonsense approach
5		to this.
6		So to come back to your original question, I don't
7		think there was the engagement or the understanding that
8		we needed. We did get to a part of that better as we
9		went along. I would say that the voices of some
10		organisations were not listened to in relation to
11		contact in hospitals and care homes for quite a long
12		time, and I think people have expressed their views,
13		members of the public have expressed their views very
14		clearly about the impact that that has had on them and
15		their families.
16	Q.	Thank you.
17		Then you explain in your witness statement that the
18		reports that your organisation produced during the
19		pandemic were entitled "Caring Behind Closed Doors"
20		because that's what carers feel: that their work and
21		their care is invisible. In your view, is there
21 22		their care is invisible. In your view, is there anything that can be done to improve visibility of those
		•
22		anything that can be done to improve visibility of those

25 are properly taken account of?

A.	So, first and foremost, it needs leaders to talk about	1
	families and unpaid care. That is critically important.	2
	And then we need to see them not at the bottom of the	3
	list, but further up in the list. We need to have all	4
	of those things that they feel are important	5
	identification, the messages, the information and	6
	advice, clarity about that so that they feel more	7
	confident about caring, and to have the mechanisms in	8
	place like PPE for care workers coming into the home and	9
	health staff coming into the home, as well as families	10
	who really need it.	11
	So those things. You know, it's not just words,	12

1		through but thank you for your comments.	1		although I'm sure it was slightly calmer by then.
2		Can I just jump back, then, to you joining the	2	Q.	Thank you. Well, it brings me on to one of the things
3		department in September, and do you think, from your	3		I was going to ask you about, because, as I understand
4		perspective, it was still rather chaotic in the	4		it, the Director General of Adult Social Care was a new
5		department at that time?	5		post, it having previously, I think, been joined with
6	Α.	I mean, shall I comment about April?	6		director general for adult social care and primary care,
7	Q.	Yes.	7		and then they split the two director generals.
8	Α.	Because I have talked to others about what their	8		Do you know why there hadn't been a specific adult
9		experience was then. I mean, it was the case that the	9		social care director general post prior to its
10		department had to massively scale up, including, and	10		inception?
11		maybe in particular, in adult social care. So there	11	Α.	I suppose it was just it was felt that there hadn't
12		were a lot of people joining from volunteers coming	12		been a particular need to have a separate post. I mean,
13		in from other departments to help. It was also the case	13		it's important to remember there was still, you know,
14		that people had to change jobs overnight. I mean, it	14		there was a Director of Adult Social Care, there was
15		was the same in the Department for Education, where	15		still focus on it, but during the course of the
16		I was at that time. We had to create new functions on	16		pandemic, particularly in those early months, it became
17		PPE, on testing, et cetera. So there was a lot of	17		clear that, you know, we needed a bigger function for
18		movement, and so we didn't have time to do things that	18		adult social care.
19		you would normally do, like organograms and induction,	19	Q.	I think you say in your statement that pre-pandemic,
20		et cetera, we had to set up new decision-making	20		there are around 90 staff in the care and transformation
21		structures.	21		directorate where adult social care sat, but that grew
22		So it was a very, very fast-moving environment where	22		to 319-odd personnel, and hence that might feed into,
23		people were working all hours. But from what I've	23		perhaps, some of the more fast moving and perhaps less
24		heard, I wouldn't describe it as chaotic. Rather, very	24		structured response at the beginning.
25		fast moving. And it wasn't so dissimilar in September, 89	25		Can you help now with the size of the ASC team as we 90
1		are today in 2005?	1		I think Ms Keegan, who was in the department, said that
2	Α.	I think it's 310.	2		there was no robust system for identifying unpaid carers
3	Q.	Right. And is there any capacity or plan in place, if	3		and she thought that if there was a better system for
4		there needed to be an expansion of those numbers?	4		identifying them then they could have been better
5	Α.	Not explicitly, but there's lots of capacity within any	5		supported.
6		government department to flex. So I think from a decent	6		Just your reflections, please, Ms Dyson, and
7	_	size of 300, you know, that's a good starting point.	7		obviously it's difficult because who is an unpaid carer
8	Q.	Perhaps to help you as we go through your evidence,	8		might depend on whether you provide one hour, the
9		I just want to summarise some of the numbers involved in	9		circumstances, whether you're doing it, effectively, as
10		the adult social care as at March, and I think you say	10		a full-time job, but is there any work being done to try
11		in your statement there were 15,525 care homes in	11		and define unpaid carers to help in the event of
12		England, the majority of which were not nursing homes;	12		a future pandemic?
13		there were 450,000-odd beds, not all occupied, but	13	Α.	I felt we did some very good work on this around the
14		estimated occupancy was just under 85%; there was just	14		vaccines issue, because unpaid carers were prioritised,
15		under 10,000 homecare agencies; 1.2 million posts for	15		I believe they were in group 6 for vaccines, and so we
16		workforce with about 112,000 vacancies, we	16		needed to identify them at that point, and the work that
17		understand it; and depending on which definition you	17		we did was about looking at the GP record because GPs
18		use, certainly in the 2021 census, approximately	18		have records of unpaid carers, and the DWP record from
19		4.7 million unpaid carers.	19		Carer's Allowance, I think there are about 900,000
		I just thought that context might help as we go	20		people or so on Carer's Allowance, and local authority
20 21		through.	21 22		records on carers. And then we worked with Carers UK to see if we could sort of develop that list further so
21		NOW Can I LIST ask Voll about Unbaid carere because			
21 22		Now, can I just ask you about unpaid carers, because			
21 22 23		Mr Hancock gave evidence last week and told us there	23		that we were sure that we were not missing people.
21 22					

1		with Carers UK to try and get to that list.
2	Q.	And so is there now a list of unpaid carers? I'm not
3		suggesting it's going to be perfect by any stretch of
4		the imagination, but if we wanted to in July 2025 look
5		at how many the department thought were unpaid carers,
6		would we be able to find that number easily?
7	Α.	I mean, not to my knowledge. We rest on the ONS data
8		that you mentioned, the 2021 data.
9	Q.	Right. I'd like to start with a few questions, please,
10		about pre-pandemic preparedness. And there are a number
11		of groups set up to address this, but can I have your
12		assistance, please, about what is called the
13		Cross-government Pandemic Flu Response from April 2017.
14		And could I have on screen, please, INQ000022748.
15		Ms Dyson, I'm conscious that obviously you weren't
16		in the department in 2017, but I think you have had
17		a look at this document in preparation for giving
18		evidence, and we can see the second box there deals with
19		the outline work plan, and then an objective was to
20		achieve an appropriate capability to provide adult
21		social care in England during a severe pandemic.
22		And as we go across the row, there is reference at
23		point 2 in the middle column to reviewing "existing
24		plans for providing community-based healthcare for
25		patients who would ordinarily receive inpatient care." 93

1		Can you just help me, what plans arose as a result
2		of this outlying work plan?
3	Α.	So I think it's, just by way of context, important to
4		remember that adult social care is a locally-run system.
5		So when you're talking about planning you're thinking
6		about yes, what the department is doing, but more so, at
7		least at this point in time, what is happening locally.
8		And it was always assumed that a pandemic would be run
9		by the local resilience fora with the department
10		supporting but the response would very much sit at local
11		level.
12		As I see these actions, they're very much focused
13		on: is there going to be enough capacity in adult social
14		care in the event of a pandemic? So will there be
15		enough care home beds? Will there be enough homecare
16		capacity: And will there be enough staff to support
17		them?
18		The things that happen that I'm aware of as a result
19		of these actions is, first of all, there's some really
20		quite detailed policy work that is done within the
21		department. I've seen the paper that was written in
22		2018, which looks at things like workforce shortages, it
23		looks at things like hospital discharge, it looks at how
24		you would prioritise local government services in the
25		event of a worst-case scenario.
		95

1		Can you help with who those plans were held by or
2		should have been held by?
3	Α.	So I believe this point should have been directed and
4		maybe was directed towards NHS England because this is
5		about community-based healthcare as opposed to adult
6		social care.
7	Q.	So this would be not necessarily we can see DH and
8		DCLG, presumably DH was the Department of Health, as
9		then called?
10	Α.	Yes.
11	Q.	And the former, I think it's it was Ministry of
12		Local Government now. So this could be, essentially, at
13		a number aimed at a number of different departments
14		or organisations to help bring together a cohesive plan
15		for adult social care.
16		Can we go over to the third column, because there's
17		what are set out to be said the deliverables, and there
18		needed to be an adequate means to measure and monitor
19		adult social care capacity, which is clearly something
20		that was partly the response of the responsibility of
21		the Department of Health; a capability requirement;
22		a range of policy and practical options; an overarching
23		plan; and then again, potentially, policy and practical
24		options for the patients who would ordinarily be treated
25		as inpatients in the community. 94
1		The other thing that's going on in the department at
2		this time, maybe not so related to this, although

2		this time, maybe not so related to this, although
3		indirectly it is, was the work on what became known as
4		the Coronavirus Act, because it's related to this
5		because of the care easements part of that.
6		So then that's what happened within the
7		department. Separately from that, the department
8		commissioned ADASS, that's the Association of Directors
9		of Adult Social Services, to do some work on all of
10		this. And again, I've seen what they did. They did
11		a big survey of local government, they produced a suite
12		of products that looked at how you would do statistics
13		at a local level in the event of a pandemic, how you
14		would do communications at a local level in the event of
15		a pandemic, how you would try and recruit volunteers,
16		and then they produced some guidance.
17	Q.	Can I ask you about the work being done with the local
18		authorities, though, given that in that answer you've
19		just said a lot of the planning lies essentially with
20		them, and I think you've said in your statement that
21		adult social care was fully incorporated into pandemic
22		planning, but you did say that there were some
23		challenges that were identified, and could you just help
24		us, what were the main challenges as the department saw
25		them with the pandemic planning? 96

1	Α.	I mean, I don't recall that paragraph precisely and	1	Α.	So I mean, first of all, I think we should just get it
2		exactly what it was getting at, but there is an	2		in context. I mean, there was a funding issue, and that
3		underlying issue in adult social care at this point in	3		had been particularly between sort of 2010 up to 2015.
4		time, which is was being flagged, which is the	4		Actually, quite a lot of money had gone into the adult
5		fragility of the system, that there were workforce	5		social care system from 2015 onwards. The vacancy rate,
6		you've already mentioned there were, sort of,	6		I think it was 8% at the time.
7		significant vacancies in the workforce. There was real	7	Q.	Yes.
8		concern about whether the funding going into the	8	Α.	I mean, you can have care homes that are growing so they
9		publicly funded part of adult social care was	9		would then be flagging vacancies, you know, it's not
10		sufficient. The department was doing a lot of work on	10		necessarily a problem. We now measure, actually, the
11		looking at the potential for major provider failure,	11		size of the workforce. So alongside the vacancy rate
12		that is that a big care home provider could fail, and	12		which is measured by Skills for Care, we internally
13		there was contingency planning going on around that.	13		we measure the size of the workforce to see how much
14	Q.	Can I ask you something about that answer you just said	14		it's growing or otherwise. I don't underestimate
15		there. You spoke about the fragility of the system and	15		there is an overarching problem but I just don't want to
16		you're not the first witness, Ms Dyson, I dare say you	16		get it you know, we had very significant workforce
17		won't be the last. Underfunding and a workforce that	17		problems during the pandemic. They weren't so
18		is there is vacancies, and indeed a retention	18		significant at this point in time.
19		problem, as we understand it.	19		In answer to what are we doing about the fragility,
20		A number of witnesses have spoken about that but no	20		I mean, the government has appointed Baroness Louise
21		one has, as yet, sort of, said what the department has	21		Casey to do an independent review into adult social care
22		done or across-government has done to try to address	22		and that will, no doubt, look at these issues.
23		those issues. It's sort of an acknowledged problem but	23	Q.	You mentioned there the 120,000 vacancies as we were
24		where's the solution, or who was trying to solve it as	24		going in. I think there were higher vacancies in London
25		at the time of January 2020?	25		and the south east in particular. And there were
		97			98

UK Covid-19 In

1		neither of them have the assurance skills.	
2		"[Local authorities] are accountable to	
3		members/population and the assurance role sits with	
4		members. They can help, perhaps work on a checklist	
5		with [questions] to ask when checking the plans are fit	
6		for purpose so [local resilience forum] can be	
7		confident."	
8		And that was agreed by another member of the	
9		committee.	
10		"Are there plans for all [local] have they	1
11		been refreshed?	1
12		"Could we share best practice if we know of a good	1
13		quality plan?"	1
14		And I think you're aware, Ms Dyson, that, in due	1
15		course, Minister Helen Whately asked for a number of	1
16		local authority plans and received two, which in her	
17 18		view were inadequate. Can you help with what was done between	
10		February 2020, when there were clearly attempts to look	
20		at the plans and see if they were robust enough, and	
20		then what happened to the reviewing the local	2
21		authority plans thereafter.	2
23	Α.		2
24	А.	the local government department, to help with assurance	2
25		of plans. I think that may have I think that was	2
		101	
1	Α.	I think that will be picked up in our pandemic	
2		preparedness strategy that the department is going to	
3		publish.	
4	Q.	And do you know when that is going to be published, or	
5		roughly?	
6	Α.	I'm not sure exactly but I know we're planning to	
7		publish that, and then alongside it there will be five	
8		plans for each of the five different routes of	
9	_	transmission, starting with a respiratory plan.	
10	Q.		1
11		Now, sitting under the local authority plans,	1
12		though, is it right that providers themselves were	1
13		supposed to have plans?	1
14	Α.		1
15		sitting under the local authority plan, lots of	
16 17		providers don't actually have a relationship with the local authority if they just take privately funded	
18		individuals. So they have to have plans. That's part	
10		of the sort of CQC requirement.	
20	Q.	· · · · · · · · · · ·	2
20	પ્ય.	phraseology, but not the local authority plans, but	2
22		plans at provider level.	
23		Can we have up on screen, please, INQ000595342_0002.	2
24		This is from a coronavirus steering group meeting,	2
25		the following week, on 19 February. So on the 12th,	2
		102	-

103

nquiry	'	16 July 2025
1		discussed at the Helen Whately meeting in early March.
2		In the event, that got overtaken by events. You
3		know, we were quite swiftly you know, plans were left
4		behind and we were very much into a full-blown pandemic.
5	Q.	So you're quite right, there was a meeting on 5 March
6		where the minister set out her concerns about the two
7		plans she'd seen, and indeed reference to trying to find
8		a good one that we could then perhaps copy and replicate
9		across the local authorities.
10		When you say "events overtook us", does that mean
11		that essentially work wasn't done on checking whether
12		local authority plans were robust enough?
13	Α.	So I wasn't there at the time, so I've been asking
14		questions, and the answer that I have had on this is
15		that the intention was to use MHCLG for this but my
16		sense is it didn't actually happen because, you know,
17		that would have been quite a big deal, I guess, to set
18		up a whole infrastructure to do this. And then the
19		pandemic, you know, was developing very, very fast at
20		this point in time.
21	Q.	That explains the position back then. What about now?
22		What, if any, efforts have been done from the
23		department's perspective to ensure that local authority
24		plans are robust enough, adequate enough? Pick
25		whichever word you choose. 102
1		they've looked at the local authority plans and whether
2		there's assurance or robustness. Here in the middle,
3		looking at contingency plans, we can see we're talking
4		about 19 providers have confirmed their pan flu
5		preparedness plan was up-to-date. Of those, 16 had
6		plans that covered how the organisation could manage if
7		20% of the staff were absent, and three providers had
8		plans to cover staff absences, but this did not extend
9 10		as far as 20%.
10 11		Now, can I just ask, in ordinary times, do provider-level plans, are they something that is not
12		ordinarily looked at by the Department of Health?
13	Α.	No.
14	Q.	And you mentioned there the CQC. We can see there two
15	α.	of those three providers express an interest in further
16		guidance from the CQC on how to prepare for the event
17		that only 80% of the staff were present, and it looks
18		like was is there was there going to be a CQC
19		review, or you were going to ask the CQC to sorry,
20		had they done one or were you going to ask them to
21		do one?
22	Α.	I don't know the answer to that. I mean, I would just
23		say this looks like a sort of small dip sample, you
24		know, you've got 18,000 registered providers, this looks
25		like a small dip sample, and I can't see how we could
		104

(26) Pages 101 - 104

		UK Covid-1
1		possibly have asked the CQC to get into reviewing plans
2		at scale at that point. I mean, obviously, what we did
3		do was we put out guidance on 25 February about pandemic
4		preparedness, not particularly on this issue, but just
5		more generally.
6	Q.	The national steering group minutes that we've just
7		looked at, for a couple of weeks' worth of minutes, was
8		replaced by the national adult social care Covid group
9		on 6 March. And could you help, Ms Dyson, with why was
10		the NSG stood down and the social care Covid group
11		stood up?
12	Α.	So the NSG was a standing group to deal with big issues
13		of this kind. So it had looked at Brexit, it was
14		looking at the major provider failure issue that I
15		mentioned before, and then it was looking at Covid in
16		the early days. But it became clear that you needed a
17		very focused group, and hence why the new group was set
18		up, which was jointly chaired by Ros Roughton, who was
19		my predecessor, and by James Bullion from the
20		Association of Directors of Adult Social Services.
21	Q.	Now, that social care Covid group, in due course, lasted
22		until the taskforce was set up, and again, why was there
23		the change three months later to set up the taskforce?
24	Α.	So I think the taskforce was really quite different in
25		kind.
		105
1		is very much also about these issues.
2	Q.	Yes. Now, a lot of those policies, though, effectively
3		were driven by PHE and the advice about who should
4		isolate and the testing and what PPE was needed.
5		Obviously, the department co-produced or co-published
6		them, but is there anything in particular that you can
7		point to the department did to help implement them,
8		aside from issuing the various iterations of guidance

- 9 that we're aware of?
- A. I mean, Capacity Tracker, sort of, almost came into 10
- 11 being at this point in time. So this is the tool that
- 12 50%, I think, of the sector already used as a way of --
- 13 so this is of the care of providers, they already used 14 this as a way of flagging what vacancies they had in
- 15 care homes to support hospital discharge, but at this
- 16 point, from the end of March, beginning of April
- 17 onwards, we said -- essentially, we said: this is
- 18 obligatory, please fill in Capacity Tracker as a way of 19 supporting all of this.
- Now, we might look at the Capacity Tracker in other 20 Q.
- 21 respects but as I understand it, the tracker, it's not
- 22 mandatory to fill it in; is that correct? We've heard
- 23 that perhaps some funding was dependent upon the
- 24 provider filling in the tracker but do you know, is
- 25 there sensibly any way that the department could make 107

- Q. Right.
- 1 2 Α. So that was about bringing in an outside expert, David 3 Pearson, you know, from the sector, to lead a really 4 sort of significant piece of work to implement what had 5 already been put out in terms of action plans, but also 6 to prepare us for winter because everyone knew that 7 winter was going to be difficult. 8 Q. Can I turn, please, to some more questions about the 9 March 2020 hospital discharge policy. 10 And you say, in fact, in part E of your statement, 11 don't need to turn it up, that the discharge policy was a key priority for NHS England, and that throughout the 12 13 pandemic, the department worked collaboratively with 14 NHSE and, indeed, Public Health England to create and 15 implement the policy. 16 I just want to ask, can you help, I know you weren't 17 there, but what did actually the department do to help 18 implement the policy? 19 Α. So obviously there's the discharge guidance that goes 20 out on 19 March. The department would then have been 21 communicating with local government because when you 22 discharge people from hospital, there's sort of the NHS 23 side of it but obviously there's the local government 24 and provider side of it. So the department would have 25 been -- I mean, you then have the 2 April guidance which 106 1 data returns to the Capacity Tracker mandatory? 2 Δ So we have done so now, and that stems from a direction 3 that was given in 2022. When we first started using 4 Capacity Tracker for these purposes at the beginning of 5 April, it wasn't mandatory, exactly as you say. We then 6 tied it to the Infection Control Fund which went out in
- 7 May -- on May 15 2020. We said: here's £600 million,
- 8 which 75% of it must be passported on to care providers 9
- on a per-beds basis, but only if those care providers 10 are filling in Capacity Checker. And I believe that by
- June we were up to about 98% compliance with Capacity 11 12 Tracker
- 13 Q. Absent, though, the, kind of, financial incentive to
- 14 fill in the Capacity Tracker, is there now any work
- 15 being done to ensure that the Capacity Tracker is filled
- 16 in and kept up to date? Does DHSC monitor that?
- A. Oh, absolutely. As I say, it is a requirement now. 17
- It's a legislative requirement. You have to fill it in 18
- once a month and we publish some of the data from it, 19
- 20 I think on a guarterly basis.
- Q. On a quarterly, did you say? 21
- 22 Α. Quarterly, I think.
- 23 Thank you. Thank you. I misheard you. Q.
- 24 In your statement you refer to a Social Care
- 25 Institute for Excellence report on some of the 108

(27) Pages 105 - 108

1		challenges and solutions about commissioning for social	1	
2		care. And if it helps you, Ms Dyson, I'm at	2	Q.
3		paragraph 203, but that report highlighted perhaps some	3	
4		of the limited options for care facilities, making it	4	
5		challenging to avoid placing patients in care homes that	5	
6		had been rated as inadequate.	6	
7		Does the department know how many people were	7	
8		discharged from hospitals to care homes rating as	8	
9		inadequate?	9	
10	Α.	No, we don't. I mean, it's worth saying, though, that	10	Α.
11		the next paragraph of my statement there does talk about	11	
12		CQC support for care homes that needed improvement or	12	
13		were inadequate.	13	
14		And the other thing to remember in all of this is	14	
15		that the local authority has an important role. They	15	
16		really well, they are obviously experts in adult	16	Q.
17		social care, but they also have a statutory duty to	17	
18		monitor to manage their care market, which means that	18	
19		they really know their care providers. And there might	19	
20		be issues that they would be aware of that hadn't been	20	
21		flagged by CQC. So, for example, it might be that the	21	
22		improvements that were needed, that CQC had flagged,	22	
23		they might have taken place, but CQC might not have gone	23	
24		back or the local authority might have done its own	24	
25		assurance to make sure that it was a suitable place for	25	
		109		
1		And I think at the time, in January 2021, when the	1	
2		policy came in, about 37% there was a 37% vacancy	2	
3		rate.	3	
4		Does the department know how many people were	4	
5		discharged to designated settings or is that something	5	
6		again for the local authorities or the CQC?	6	Α.
7	Α.	I think we do know how many people were discharged into	7	
8		designated settings. I mean, it's worth noting that it	8	
9		was always possible also to discharge someone into	9	
10		a normal care home if that care home felt that they	10	
11		could take the person, and that might well be a better	11	
12		solution. You know, if you could be discharged back to	12	
13		your own care home, that would be better than going into	13	
14		a designated setting.	14	~
15		So the designated settings were I don't want to	15	Q.
16		say last resort, but just a fallback. So if there were	16	
17		vacancies there, that was okay, as long as people could	17	
18	~	be discharged safely.	18	
19 20	Q.	I think in due course the dashboard had data about	19	
20		designated settings and the number of beds that were	20	
21 22		being utilised, there certainly did become that data	21	
		available.	22	
23 24		Generally though, in relation to the designated	23 24	
24 25		settings policy, I think you say the department	24 25	
25		considered it to be a success and a policy that would be 111	25	

inquir	y	16 July 2025
1	_	that for that person.
2	Q.	I understand all of those additional that additional
3		context, but do you think the department should know
4		that if it has to discharge people to care homes rated
5		as inadequate for whatever reason, whether that's
6		fundamentally care issues or perhaps some kind of
7		governance issue, do you not think the department should
8		know that there may be potentially discharges to care
9		homes that are have a lower rating?
10	Α.	So I think fundamentally this is a local authority
11		issue, but we've now introduced what is effectively CQC
12		inspection of local authority Care Act duties, and it
13		may be that that is where this should be looked at,
14		rather than sort of collating data at a central
15		government level.
16	Q.	Later on in the pandemic we know that there was the
17		designated settings policy, and indeed I think the plan
18		was that there was to be a 14-day isolation in specific
19		care homes that had been approved by the CQC as having
20		the requisite isolation facilities, and every local
21		authority was to have at least a setting where the
22		designated accommodation could be utilised. And you say
23		in your statement at paragraph 249 that during the
24		second wave there were 159 approved designated settings,
25		providing 2,169 beds.
		110
1		considered in the event of a future pandemic, subject to
2		clinical advice.
3		Can you help, Ms Dyson, with why the department
4		takes the view that that policy was a success and why it
5		might be considered again?
6	Α.	I think it was important to be able to discharge people
7		safely. As I say, it was better if they could be
8		discharged back to their own care home, but if that was
9		not possible, if that care home didn't feel that they
10		could safely care for that person, then it was
11		impossible to get them out of hospital, because we know
12		that being in hospital is not a good place for people
13		who don't need to be there to be. And so this was
14		this was a way of achieving that.

we're sending patients to a designated setting with the 112

designated settings policy on infection rates or morbidity and mortality. Do you know, does any organisation or department hold that data? Because if

You said, however, there were concerns about designated

You say the department doesn't hold data on the

settings which are recognised by the department, not only a limited number available, but the placement may be less tailored to the specific needs of the person being discharged, and indeed, it may be geographically

nowhere near their friends or family.

(28) Pages 109 - 112

1		idea that they are isolated and safe, doesn't one need
2		to know that there isn't an infection in that home and
3		we're not bringing in an infection into that home?
4	Α.	I mean, I would have thought that we could get that
5		data, because we were able to see by every care home
6		what was you know, we could see what was going on in
7		terms of the infection rates in every care home across
8		England, and that would apply equally to care homes that
9		were designated settings.
10	Q.	Do you know whether there is any work being done to
11		ensure that designated settings remain available if
12		needed? Because it took, clearly, a number of months to
13		set up the designated settings policy. But in the event
14		of a future pandemic, is there a plan in place to be
15		able to quickly roll out a designated settings policy?
16	Α.	So I'm sure we could do it again. The things that you
17		needed to make it work were we needed the funding. That
18		came from the discharge funding that NHS England had.
19		You needed each local authority to identify a place.
20		You needed to get the infection prevention and control
21		right in that place. You needed CQC then to assure it
22		and sign it off. So I'm sure we could do all of that
23	_	again.
24	Q.	I'd like to ask you some questions, please, about
25		restricting movement of staff between care homes. And 113
		110
1		department and, indeed, the Secretary of State, but that
2		the consultation that was announced was overwhelmingly
3		against bringing in any regulations to restrict staff
4		movement.
5		In your statement you say there was a proposed
6 7		compensation scheme to try and ameliorate some of the
7 8		financial difficulties that staff may face if they were restricted in the number of homes they could work at,
9		but that was rejected by HMT at the time. And we know,
9 10		in due course, legislation didn't come in, but there was
11		the Infection Control Fund and a number of tranches of
12		that funding.
13		I suppose it's a rather big question to answer, but
14		in the event of a future pandemic, what's the
15		department's thoughts on how best to restrict staff
16		movement if that becomes necessary in a future pandemic?
17	Α.	Just to make one overarching point before I get into
18		that, which is, I know there's been an awful lot of
19		focus on staff movement, but actually, just staff moving
20		from the community into care homes was a really big
20		issue and that's why, when you look at this list, the
22		final point on the list about would there be staff who
23		would actually be prepared to move into a care home,
24		that would really help.
25		So even if we could have eradicated staff movement,
		115

1	if it helps you, I'm at paragraph 461 in your part C
2	statement, Ms Dyson. But as the Inquiry understands it,
3	the Infection Control Fund, which you've already
4	mentioned, was designed in part to be used to prevent
5	transmission by paying the wages of staff who were
6	isolating and trying to ensure, insofar as possible,
7	that members of staff only worked in one care home.
8	That's a fairly broad summary, but not an inaccurate
9	one, I hope.
10	Can we just have look, please, at the
11	INQ000325286_0032.
12	This is an annex from admissions guidance from
13	August 2020. And if we can see the bullet points there,
14	they set out a number of ways of trying to spread the
15	prevent the spread of the virus. There you've got:
16	ensuring that members of staff only work in one care
17	home wherever possible; extending those restrictions to
18	agency staff; limiting or cohorting the staff; and if
19	additional staff are needed to restrict movement between
20	or within care homes, to actively increase recruitment
21	of staff.
22	And then there are various other steps set out
23	there.
24	The Inquiry is aware that there was possible
25	legislative restrictions being considered by the
	114
1	you would have still had the issue, the obvious issue
2	that staff would be moving from their communities into
2 3	that staff would be moving from their communities into care homes and, you know, what we saw throughout the

2 3 4 5	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through
2 3 4 5 6	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes.
2 3 4 5 6 7	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the
2 3 4 5 6 7 8	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and
2 3 4 5 6 7 8 9	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think,
2 3 4 5 6 7 8	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well,
2 3 4 5 6 7 8 9	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the
2 3 4 5 6 7 8 9 10	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things
2 3 4 5 6 7 8 9 10 11	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out
2 3 4 5 6 7 8 9 10 11 12	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things
2 3 4 5 6 7 8 9 10 11 12 13	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out
2 3 4 5 6 7 8 9 10 11 12 13 14	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff
2 3 4 5 6 7 8 9 10 11 12 13 14 15	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July, 92% were saying they were restricting staff movement.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July, 92% were saying they were restrict you know,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July, 92% were saying they were restricting staff movement. So we went a long way to restrict you know, people understood the importance of restricting staff
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July, 92% were saying they were restrict you know, people understood the importance of restricting staff movement. We gave them guidance on that. We gave them
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	that staff would be moving from their communities into care homes and, you know, what we saw throughout the pandemic is as soon as there was transmission in the community then it would follow, it would come in through the care homes. In terms of should we restrict staff movement in the future, what we did do, as you can see here, and actually, this list is from August but it was, I think, the identical list was it was there earlier, as well, and this list also, as you've said, went alongside the Infection Control Fund as these are the sorts of things you should be spending money on, and then we put out a lot of guidance saying: please, please don't do staff movement. I think we went a long way to reducing staff movement even without legislation. So for example, I've taken this from the taskforce report, on 29 May, 78% of care homes were saying that they were restricting staff movement. That was in Capacity Tracker. By 20 July, 92% were saying they were restrict you know, people understood the importance of restricting staff movement. We gave them guidance on that. We gave them the money to do it. We could see in Capacity Tracker

(29) Pages 113 - 116

1		staff movement we could use the regional assurance team	1
2		that we built up in the autumn to make phone calls to	2
3		care homes to say, you know, if they still seemed to be	3
4		doing staff movement, you know, can you think about	4
5		maybe restricting it?	5
6		So I mean, I understand why we thought that	6
7		legislation would be a good thing but I think we went	7
8		a long way to, sort of, reducing I can't say	8
9		eradicating, but massively reducing the practice. Of	9
10 11		course, the thing that went against us was staff	10
12	0	shortages. Yes.	11 /
12	Q.		12 13
13	Α.	And that, it was it was that issue plus the	13
14		compensation issue was why we didn't go ahead with the legislation. We 68% of people who responded to the	14
16		consultation said that they would have to make an	15 16
17		exception every week to allow for staff movement,	10
18		because otherwise they wouldn't have safe staffing	17
10		levels.	10
20		So I think we went a long way without legislation,	19 20
20		and our focus became on the: what can we do to address	20 21
21		the workforce shortages? And we put out a Workforce	21
22		Capacity Fund in January 2021 of 120 million to support	22
23 24		those staff shortages.	23 24
24	Q.	But doesn't that come back to, if you enter the pandemic	24 25 (
20	ч.	117	20 0
1		heard from a witness this morning who represented unpaid	1
2		carers, who spoke about the need for the unpaid carers	2
3		workforce to be recognised.	3
4		Can you give us any more details about what work is	4
5		being done to recognise the contribution, not just of	5
6		unpaid carers but of the adult social care sector	6
7		workforce?	7
8	Α.	I think this will be a Baroness Louise Casey issue.	8
9		I very much recognise it.	9
10	Q.	Back to restricting staff movement, can I just take you	10 C
11		back, then, to the question that I asked before we dealt	11
12		with some of the other matters, but what are the	12
13		department's thoughts on how best to restrict staff	13
14		movement in the event of a future pandemic? Does it	14
15		rely on having a fund available to allow them to take	15
16		taxis, allow self-isolation on more pay? If it can't be	16
17		legislation, what's the solution?	17
18	Α.	I mean, I think it could be legislation, but I would	18 /
19		almost start from further back. I mean, we're assuming	19
20		that staff movement is the issue. As I said, I think in	20
21		this pandemic, staff movement was a part of the issue	21
22		but there was a bigger issue about how to prevent	22
23		community the virus coming in from the community into	23
24		care homes, through staff.	24
25		And it might just be there might be different 119	25
		113	

1		with staff shortages, and a fragile workforce, it's
2		going to be exacerbated by this? And however you want
3		to try and do it, if you can't legislate, there's still
4		going to be that tension between restricting staff
5		movement to prevent the infection spread but equally,
6		not having care homes not being able to run because they
7		don't have enough staff in them.
8		What I suppose it comes back to is, how, now, are we
9		going to increase the resilience in the workforce
10		sector? Can you help with that?
11	Α.	So we're passing some important legislation at the
12		moment on the Fair Pay Agreement, that is paying care
13		workers above minimum you know, creating a new wage
14		for care workers and clearly, I mean, and particularly
15		in towards the back end of 2021 when we'd lost a lot
16		of care workers to the retail and hospitality sectors,
17		that was because of pay. So I think that will help.
18		I mean, there's a big move to professionalise the
19		care workforce and to recognise their amazing
20		professionalism, because what they do is incredible, but
20		to recognise it in terms of the qualifications,
22		et cetera. So I think all of that will help, and again,
23		I would expect that Louise Casey will want to look at
23 24		this.
24 25	^	
25	Q.	Can I ask you about recognition, because her Ladyship 118
1		issues in a future pandemic, but I wouldn't rule out, if

One of the matters that we have considered is whether it's possible at all to restrict staff movement in the domiciliary care setting when workers clearly maybe visiting a number of different houses and different people that have care needs every single day. Do you, on behalf of the department, think that there does need to be work done to try to address the risks posed by staff movement in the homecare setting? I mean, the proposals we had on the table did cover the situation where someone moved from a homecare setting
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20		the issue is staff movement, in a future pandemic, I certainly wouldn't rule out legislation. I think we came very close to legislating, but the two reasons why we didn't, was one was the staff shortages at that point in time, in particular, and also the fact that the Treasury wouldn't didn't agree to a, sort of, ring-fenced fund to support care workers who would lose one of their jobs. One of the matters that we have considered is whether it's possible at all to restrict staff movement in the domiciliary care setting when workers clearly maybe visiting a number of different houses and different people that have care needs every single day. 	there and you didn't have this issue about the virus			Can you help with what, if any, part of the ICF, Infection Control Fund, was meant to be spent on home
4 5 0	sort of transmitting so easily within the setting. Did the department take any steps to try and address	4 5		care?
5 Q .			•	
6 7	staff movement by domiciliary care workers from not	6	Α.	, , , , , , , , , , , , , , , , , , ,
7	care home to home, not care home into a home care or	7		75% of it was had to be part and this was the
8	home care into a care home?	8		innovation, that you were giving money to local
9 A .		9		authorities which had to be passported through to care
10	domiciliary care workers which would have helped	10		providers. 75% of it was passported through to care
11 10 0	on this.	11 12		homes on a per-beds basis and then the remaining 25%
12 Q .				for the local authorities to use, including for home
13	Can I ask you about that. It was, I think £600 million	13	~	
14	you said, ring-fenced, to tackle the spread of Covid-19,	14	Q.	Right.
15	and clearly the providers had to complete the Capacity	15	Α.	In the next version of the Infection Control Fund, which
16	Tracker to be eligible for the ICF funding which	16		was in the autumn, which I think might have been
17	Mr Hancock described as a lever of sorts over the	17		586 million, that was the percentage that had to be
18	sector.	18		passported through was increased to 80%, and that we
19	And I think you said in your statement that the	19		on both a per heads sorry, a per-bed and a per-user
20	department asked all local authority chief executives to	20		basis. So it had to be passported through, as
21	provide a return which outlined the allocation of funds	21		I understand it, to both care homes and to homecare
22	to care homes as well as what it was spent on. And you	22		providers, so they should have got more money from th
23	say in your statement that local authorities had taken	23		point onwards.
24 25	different approaches as to how they used the money, but the National Care Forum are concerned that, roughly, 121	24 25	Q.	Do you know why, in the initial round of funding, it was deliberately decided that 75% of it was to go to care 122
1 2 A .		1 2	Q.	Clearly, one of the ways of preventing the spread of the infection would be by use of PPE. So can I ask you
3	we were saying that needed to happen with it, if you	3		about that, please.
4	look at the list we were looking at before, it was	4		The Inquiry is familiar with the supply shortages
5	some of the things would apply only to care homes, for	5		that were extant at February 2020, and we know that the
6	example cohorting to floors or wings, ensuring that	6		stockpile, the pandemic influenza preparedness
7	members of staff only worked in one care home, providing	7		stockpile, did not contain gowns, for example, and there
8	accommodation to staff who chose to move into a care	8		was a worldwide shortage. So please take that as
9	home. So a number of those things were only for care	9		a given.
10	homes, but I accept that some of them were for both care	10		Clearly, by 13 March 2020 there was a huge demai
11	homes and for home care.	11		for PPE within the NHS, and as far as care homes were
12 Q	May I ask you this, Ms Dyson, there's a perception at	12		concerned, PPE was to be worn by care workers if the
13	least that always home care was a lower priority than	13		resident had symptoms but no PPE needed to be worn
14	care homes. Sometimes it's been said to be an	14		the resident or the worker were not symptomatic. And
15	afterthought. That might be pejorative to some but you	15		then there were various iterations thereafter of the

17	Was there a sense in the department that there was	17		be worn.
18	less priority given to home care?	18		But can I ask you, please, to have a look at, on
19 A .	The risks were greater in care homes than they were	19		screen, INQ000587737_0023.
20	in for people living in their own homes, so hence why	20		It's from your actual statement, but it's some of
21	regular asymptomatic testing was rolled out for care	21		the steps that the department took to try to meet the
22	homes from July onwards, but only for NHS staff and	22		needs of the care sector in terms of PPE.
23	homecare staff from November. I think it was and the	23		There was a one-off direct supply to CQC-registere
24	same with the vaccine. It was just consistent with the	24		care homes using the stock from the stockpile.
25	scientific consensus on where the greatest risks lay. 123	25		Can I ask, was this in part the issuing of a number 124

1		of face masks to the care homes that happened in	1	Q
2	_	mid-March of 2020, do you know?	2	
3	Α.	Yeah, this was what happened on 13 March, when every	3	
4	-	CQC-registered provider got at least 300 face masks.	4	
5	Q.	Right. That is what we're talking about here?	5	
6	A.	Yeah.	6	
7	Q.	All right. And can I ask you about that, please.	7	
8 9		Clearly, one doesn't want to sniff at it, but NACAS in	8	
9 10		particular, or a member of NACAS, has commented that 300 masks don't go very far if you've got 50 staff	9 10	A Q
10		members.	10	Q
12		Do you know why 300 was alighted upon? Was it	12	
13		simply that was all the stock there was to supply at the	12	
14		time?	14	
15	Α.	I imagine that was the answer. I mean, it's worth	15	
16		saying that the emergency response (b) on the list	16	
17		here that was stood up on 16 March, so these other	17	A
18		steps happened really quite quickly after that.	18	
19	Q.	All right. We'll look at some of those.	19	
20		That one-off supply of the masks though, as it sets	20	
21		out there, was only to care homes. Do you know whether	21	
22		there was any thought given as to whether there ought to	22	Q
23		be a one-off supply to people working in domiciliary	23	A
24		care?	24	
25	Α.	l don't know.	25	
		125		
1		items of PPE were dispatched.	1	
2	Q.	But it was meant to be an emergency response there for	2	
3	.	that hotline. So just standing back from the emergency,	3	
4		where you're down to your last three days' worth, can	4	
5		you help, please, with the point (e) there, developing	5	
6		a new, direct, small volume distribution channel for

1	Q.	Right. There was the paragraph (b) an emergency
2		response of PPE when a provider had less than
3		three days' worth of PPE remaining. And I think in your
4		statement you say that on 16 March the National Supply
5		Disruption Response hotline, NSDR, was set up. And
6		providers could obtain emergency supply. And in fact
7		there was such demand that it had to become
8		a 24/7 hotline; is that correct?
9	Α.	Yes.
10	Q.	You say in your statement that the department is not
11		aware that that hotline could not meet requests, but
12		data available for the week commencing 6 April showed
13		that there was daily over 1,084 daily contacts to that
14		hotline, and by far the largest number of requests came
15		in March to October 2020 from the adult social care
16		sector; is that right?
17	Α.	I mean, that sounds right. I know that the biggest
18		adult social care providers on the whole managed
19		continued to be able to buy their own PPE, and it tended
20		to be the small providers, which would be the large
21		numbers
22	Q.	Of course.
23	Α.	who were calling.
24		I mean, it's worth saying is that in the first full
25		week of operation of this hotline, over half a million
		106

25 I think you're aware of those reports, Ms Dyson. Is it

1		correct that there was no policy from either government	1		time.
2		or, indeed, the NHS that such supplies should be	2	Q.	And do you know what the department did to try and
3	_	diverted?	3		correct the misapprehension that there'd been
4	Α.	Yes, that's absolutely correct.	4		a directive in this regard?
5	Q.	Can I have a look on screen, please, at INQ000608140,	5	Α.	Like I said, we were very clear that it was absolutely
6		page 4. This is an email from the National Care Forum,	6		not the policy. I noted that in the 2 April admissions
7		and it's just give me one moment. 9 March 2020.	7		guidance there's a statement in there to that effect.
8		And the Nadra Ahmed of the National Care Association,	8		I suspect there may have been other statements that I
9		forgive me, has emailed the Department of Health. Can	9		haven't seen, but, because it very much was the case
10		we have thank you page perhaps my paging has	10		that we wanted to put matters right on this.
11		gone slightly awry, but there is a reference in the	11	Q.	
12		email to the Department of Health where there is the	12		and understand where the misapprehension had come from,
13		National Care Association are aware that "suppliers are	13		or was it something that suppliers were doing, taking
14		only supplying handfoam and handgel to the NHS,	14		the decision themselves? Do you know where this had
15		a government directive, apparently", says the email,	15		sprung from?
16		although clearly that's not correct.	16	Α.	I mean, I have heard speculation that it might have been
17		[As read] "If that's true it is outrageous and	17		wholesalers who reached that but I really don't know.
18		they're bringing it to the attention of the department."	18	Q.	Right. And in relation to PPE and unpaid carers, we
19		You've dealt with the fact that there was no	19		know that the initial advice to unpaid carers in
20		directive, certainly as far as the Department of Health	20		April 2020 was that face masks were not recommended
21		is concerned. But can you give us an idea of the scale	21		unless advised by a healthcare professional, and I think
22		of concerns that were brought to the department's	22		you said in your statement at paragraph 142 that the
23		attention about supplies going to the NHS over	23		Deputy Chief Medical Officer and, indeed, Public Health
24		preference to adult social care?	24		England's advice was that unpaid carers should not use
25	Α.	There was a lot of anecdotal evidence of this at the	25		PPE while providing care. They were concerned that
		129			130
1		unpaid carers would not use the PPE properly and without	1		Group, to roll out free PPE for unpaid carers, and
2		direct training and supervision it could create	2		I think in January 2021 it was then rolled out
3		additional risk or a false sense of protection.	3		nationally. Just to help you.
4		Do you know why there wasn't training rolled out to	4		Can we have a look, please, at the results from the
5		unpaid carers at that stage as there was later on in the	5		pilot at INQ000110355.
6		year by various online resources?	6		So this is the pilot that started in the autumn
7	Α.	It wasn't felt to be necessary at that point in time,	7		of 2020, and the outcomes of the pilot show that:
8		and then when we looked at it again in July, by that	8		" demand [had] been low, with under 50 carers
9		point, the rates of Covid were very low and so it really	9		accessing PPE in each pilot location. [Local
10		wasn't felt to be necessary then. So SAGE was	10		authorities] have not required a substantial amount of
11		commissioned to look at the issue for the purposes of	11		additional PPE to enable them to provide this group"
12	_	the winter and then it was taken forwards in the autumn.	12		Then if we just go down, you can see some of the
13	Q.	I think the either the DCMO and/or Public Health	13		figures there:
14		England were also worried about supply issues. From the	14		"The highest figure we are aware of for distribution
15		department's perspective, was the supply issue the	15		to extra-resident unpaid carers [ie those that don't
16		dominant reason for this advice, or was it concerned	16		live with the person they are caring for] is 256 in
17		about false reassurance and improper inappropriate or	17		Birmingham in the month of July. [It] did rise
18	_	lack of training in PPE usage?	18		sharply to [1,300-odd] carers in November when they
19	Α.	I mean, it never came to a head in May. It came to a	19		extended [it]"
20		head in July, by which time the conclusion was we don't	20		On any view, these are small numbers of PPE being
21		need to do this at a time when rates of Covid are so	21		rolled out to 700,000-odd no, sorry, more,
22	-	low.	22		5 million-odd unpaid carers potentially.
23	Q.	Thank you.	23		Do you know whether there was the low demand was
24		In September of 2020 there was a pilot, I think	24		because there was difficulty in identifying unpaid
25		following advice from the SAGE Social Care Working 131	25		carers and therefore letting them know that there was 132

1		free PPE?	1		earlier Selcept (overspeaking)
2	Α.		2	Q.	earlier. So I can't (overspeaking) That was my final question on this topic. Do you know
3	7.1	did this through local authorities, who would I mean,	3	۹.	why it was that England didn't roll this out earlier
4		even if they couldn't reach all unpaid carers in their	4		than some of the devolved nations did?
5		area, they would have had reach to, you know, a higher	5	Α.	
6		level higher numbers than this level of demand would	6		concluded that it wasn't necessary because rates were s
7		suggest. So I don't know why the level of demand was	7		low. Then it came back in the autumn. We did a pilot.
8		low.	8		It was important to pilot this to see what the level of
9		I note, though, that it was low in other nations as	9		demand was actually going to be, whether we would in
10		well, in Scotland, et cetera, but we never really got to	10		fact have the stock that we would that was needed,
11		the bottom of why it was so low.	11		and then it was rolled out in January 2021.
12	Q.	Do you think it might come back to the problems with	12		I think if you you can see as you look through
13		defining who they are, therefore identifying them, and	13		the papers how this sort of unfolded.
14		therefore notifying them and then getting PPE out to	14	Q.	
15		them if the unpaid carer needs it?	15		unpaid carers in the event of a future pandemic where
16	Α.	I think it could do but I I'm I think that local	16		they need PPE? Is there any kind of plan that's ready
17		authorities would know more than, say, 50 carers in	17		or being formulated?
18		any given local authority would know more than 50 carers	18	Α.	I mean, we're looking at PPE as a whole in terms of
19		in their area, so I think it's more than that that's	19		pandemic preparedness. I don't know explicitly on
20		going on here.	20		unpaid carers.
21	Q.	Was there an issue with the amount of publicity that the	21	Q.	Right.
22		rollout of free PPE to unpaid carers garnered?	22		My Lady, may I just deal with a couple of topics,
23	Α.	I mean, possibly. I think we did some work on that, but	23		perhaps, before our mid-afternoon break?
24		possibly. As I say, it's interesting that the same	24		One of the matters that you have already referred u
25		issues arose in other nations who actually did this 133	25		to, Ms Dyson, was the problems with capacity within the 134
1		workforce. And I think you mentioned there was	1	Α.	(overspeaking)
2		a Workforce Capacity Fund that was set up it's not	2	Q.	It was your attempt to draw the strands together in an
3		the only thing that the department did, but I'm not	3		intelligible way for us.
4		going to ask you about all of the steps the department	4	Α.	Exactly.
5		took.	5	Q.	Understood. Thank you very much.
6		Could you go, though, please, to your paragraph 391	6		And bearing that in mind, clearly attempts to
7		in your statement because you say there that the	7		increase workforce capacity included a rapid induction
8		department had four objectives to address workforce	8		training scheme and fast track recruitment. I'm not
9		challenges: ensuring the sector had enough workers,	9		going to ask you about those. But the Workforce
10		supporting the workforce, protecting the workforce, and	10		Capacity Fund was announced on 16 January 2021. An
11		then, indeed, protecting the recipients that the	11		was £120 million ring-fenced, designed to increase the
12		workforce looked after.	12		use of the existing workforce, increase the size. And
13		I'd just like to look at a few of those with you.	13		there was a review, as I understand it, of that fund and
14	Α.		14		in total I think you say that 39,000-odd staff were
15	Q.	-	15		recruited.
16	Α.		16		Can we have up on screen, please, INQ000279947_
17		statement, this was me creating those four categories	17		And the section there, the "What do stakeholders think?
18	~	for the purposes of the statement to try and sort of	18		In the review:
19		To bring them together.	19		"Stakeholders welcomed [the fund] being provided t
20	А.	To make it logical because there was so much activity on	20		mitigate the workforce capacity issues, [but said] it
21		workforce I felt it needed to be broken down.	21 22		came late; the guidance and grant conditions being
22		I wouldn't want the Inquiry to get the impression that	22		announced on 29 January and the first tranche of
23 24		this was the these categories were how we approached	23 24		funding not being paid until February 2021.
24 25	Q.	things. No, thank you	24 25		Stakeholders believe that if funding had been provided as part of the winter plan in September, it would have
20	હ.	125	20		

1	reduced the risk of a small number of cases of	1	I think these funds were most useful in terms of
2	[Covid-positive] staff continuing to work in care	2	retaining staff or, for example, paying for childcare so
3	homes."	3	that someone could work for further an existing
4	Do you know whether any work has been done or is	4	member of staff could work or more hours.
5	being done to speed up the time taken to get money on	5	It's difficult to recruit lots of people when you've
6	the ground to those that need it? I mean, on any view,	6	only got money for a short space of time.
7	29 January into February is not the most inordinate	7 Q.	I think perhaps just finally before the break, one of
8	delay, if I can put it like that, but clearly, the	8	the things you said very early on in your evidence was
9	feedback coming back to you was that there were still	9	actually there was real problems with workforce capacity
10	nonetheless this was all a bit too late to help with the	10	later on into 2021, and I'd just like to look at that
11	pressures over that winter.	11	with you.
12	Can you help with that at all, Ms Dyson?	12	Could I have up on screen, please, INQ000111776,
13 A	So the issue that they are complaining about, I think	13	because you say in your statement the pressures were
14	with justification, is that this was money that would	14	acute in 2021 into 2022.
15	run out at the end of March 2021. So they'd got very,	15	This is an email from 8 September. It's from
16	very little time to spend it. And they were asking for	16	Vic Rayner of the National Care Forum, coming in to
17	it to come much earlier. And the reason why we didn't	17	various people in DHSC.
18	put it out earlier we didn't get agreement from the	18	And in the body of the email, Ms Rayner says:
19	Treasury to do it until this point, so that when we did	19	" I would like to arrange as urgently as possible
20	the, I think it was called the workforce recruitment and	20	a meeting with one of our members, who would be willing
21	retention fund, a similar fund in the following winter,	21	to talk through the immediate crisis that they are
22	that went out in October, so that was better, but I know	22	experiencing. They are seeing a very significant
23	that local authorities would like to have long-term	23	deterioration in workforce over recent weeks with large
24	funding, not these, sort of, short-term injections of	24	scale absences and departures of staff. This is
25	funding. Because it's difficult to recruit staff, and	25	very different to where they were a few months

1	paid for care.	
2	MS CAREY: We, perhaps after the break, will turn to trying	
3	to support the workforce and deal with burnout and	
4	exhaustion.	
5	Would that be a convenient moment, my Lady?	
6	LADY HALLETT: Certainly.	
7	Ms Dyson, as you've probably been told, we take	
8	breaks for the benefit of everyone but particularly the	
9	stenographer. So I shall return at 3.05. Thank you.	
10	(2.49 pm)	
11 12	(A short break)	
12		
13	LADY HALLETT: Ms Carey.	
14	MS CAREY: Thank you, my Lady. Ms Dyson, can I ask you, please, about your	
16	paragraph 477 in your part C statement, and it's on the	
17	topic of Covid-19 positive working.	
18	I think you set out there that in January 2021 the	
19	Regional Assurance team became aware of some staff not	
20	self-isolating after testing positive. Is that correct?	
20	A. Yes.	
22	Q. And it was happening in areas where there were acute	
23	staff shortages and limited alternatives to safely staff	
24	care homes, and the decision was made to work when	
25	positive rather than not, to try to mitigate those staff	
	141	
1	the minister to consider the option of police	
2	involvement.	
3	Can you help, Ms Dyson, with what, if anything,	
4	happened in relation to police involvement in this area?	
5	A. Our main response here was through CQC, and I remember	
6	speaking extensively to Kate Terroni, who was then the	
7	chief inspector of adult social care, and she was going	
8	to convene all her CQC inspectors to make sure we could	
9	get the message out as clearly as possible.	
10	Ministers were also interested I mean, down the	
11	line, the main thing was to get the message out as	
12	quickly as possible in January and also do what we could	
13	to assuage the issues on staff shortages.	
14	Ministers were interested also in exploring the	
15	police involvement. We looked into that. I think what	
16	happened was CQC said it was not for them to refer	
17	things to the police, that was not within their	
18	statutory powers, but what they did do was they said	
19	they would involve local authority safeguarding teams if	
20	they thought that that was necessary.	:
21	Q. I think also the police in due course said that they	:
22	would not have the resources to be able to investigate	:
23	this number of staff taking this action.	:
24	But can I come back to sort of the fundamental	
25	tension here between what was the department's position 143	:
	טדו	

•	-	
1		shortages; is that it, in a nutshell?
2	Α.	Yes. I mean, it was only in a very few number of cases,
3		so it wasn't widespread, but it was certainly seemed
4		to be becoming more of a systemic issue than when we
5		first found out about it, we thought there was a one
6		rogue case, but it was clear there were a number of
7	_	them.
8	Q.	Yes, in due course, you wrote an email, I think, that
9		was going to go to the minister, that you asked
10		Chris Wormald to approve or cast his eye over, and in
11		that you said there were six cases that were brought to
12		the department's attention where a Covid-positive staff
13		member had nonetheless gone on to work.
14		Do you know whether the scale was wider than that?
15		Was it just limited to those six cases? Can you help at
16		all with how widespread this problem was?
17	Α.	I believe that CQC found some more cases. The number 25
18		comes to mind but it may not be exactly that, but in
19 20	0	that sort of order.
20 21	Q.	And I think in January, on the 27th, there was a joint statement issued by the CQC, the Association of
21		Directors of Public Health and Public Health England, to
23		say that that should not happen, but you go on in your
23		statement to say that the department was considering how
25		best to address this issue, and advice was provided to
20		142
1		between providing potentially unsafe care by
2		a Covid-positive member of staff or not providing care
3		at all? Did the department have any position on which
4		of the lesser of the two evils should be adopted?
5	Α.	The department's clear position was that Covid-positive
6		staff should not be coming to work, and we were doing
7		everything we could to help with the staff shortages.
8		And indeed, I think the message that that went out was,
9		you know, if you've got staff shortages you need to be
10		
-		flagging that locally and relying on mutual aid.
11		flagging that locally and relying on mutual aid. I mean, we were putting in the Workforce Capacity Fund,

1		so high. This is against the law, you mustn't do it.	
2	Q.	Just before we broke, you explained how you had	
3		categorised into four, sort of, neat areas objectives	
4		that the department had to try to deal with workforce	
5		challenges, and one of those was supporting the adult	
6		social care workforce. I think you say in your	
7		statement that the Adult Social Care Taskforce	
8		recommended a review of wellbeing services in one of the	
9		reports that they had done, I think, in the summer of	
10		2020. Do you know whether there was such a review	
11		conducted?	
12	Α.	So what happened with the taskforce report was it sort	
13		of morphed into the winter plan and the two things were	
14		published alongside each other. And the winter plan	
15		talks a lot about all the sort of resources that they	
16		are	
17	Q.	I'm going to show it on screen in a moment.	
18	Α.	Okay.	
19	Q.	So, with that in mind, shall we call up, please,	
20		INQ000058216_0037 and 0038, and I've just pulled out the	
21		support part of the winter plan, and we can see there	
22		"National support" and, indeed, "Actions for local	
23		authorities", but I suppose, really, the question is,	
24		this is a plan that came out in, I think, September 2020	
25		in preparation for the winter of 2020 to 2021. Was	2
		145	
1		of their staff.	
2	Q.	You alight on, there, perhaps a distinction between the	
3		NHS workforce and the adult social care workforce, but	
4		clearly the NHS England, for example, launched	
5		a dedicated mental health hotline for NHS staff. Is	
6		that something that the department could have chosen to	
7		do for the adult social care workforce, notwithstanding	
8		that it's for providers to help, but give the	
9		overarching banner of support to adult social care?	
10	Α.	I suppose it could have chosen to do that. There was	
11		always an issue about how you reach all the adult social	
12		care workforce. There is no register of the workforce.	

- care workforce. There is no register of the workforce
 So there are all sorts of things you can provide, but
- 14 will they be taken up by -- as you said at the outset,
- there's 1.2 million people who are employed by18,000 providers.
- 17 Q. We are aware that Northern Ireland, Scotland and Wales
- 18 have a mandatory registration for both, I think,
- 19 residential and domiciliary care workers. Not the
- 20 position in England, as we understand it.
- 21 Do you think a register of the care workers would
- assist in the event of a future pandemic? And if so, inwhat ways?
- 24 A. It would definitely assist in the event of a future
- 25 pandemic, because there were times when we thought 147

- there any support put in place for the workforce prior to the publication of the winter plan?
- 3 A. So I think quite a lot of these things had already been
- 4 put in place and I think some of them are referred to,
- 5 but I couldn't tell you off the top of my head which
- 6 they are, in the April plan published on 15 April. And
- 7 then the one in May, the Care Home Support Package
- 8 published in -- (overspeaking) --
- 9 Q. Perhaps I can help you, Ms Dyson, because certainly if
 10 we look at some of the bullet points, there is an offer
- 11 to the workforce is brought together in the Care
- 12 Workforce App, that is something that was launched in
- 13 May of 2020, according to your statement, and there was
- certainly some guidance issued on health and wellbeingin May, as well.
- So -- but do you know, for example, what specific
 work the department did to try to support the wellbeing
- 18 and workforce, aside from the winter plan?
- 19 A. I think this was principally it. I mean, if you -- the
- 20 next page of this talks about the responsibilities of
- 21 providers, and clearly the adult social care workforce
- is employed by, you know, sort of 18,000 providers. So
- 23 it's very different from a public sector sort of
- 24 national workforce like the NHS. And first and
- 25 foremost, it's for providers to look after the wellbeing 146
- 1 about: how can we get to the workforce? And we had no 2 route to get to the workforce other than through 3 providers, which is obviously an indirect route to the 4 workforce. 5 **Q.** Given the size of the workforce in England, which is, on 6 any view, much larger than in the devolved nations, how 7 feasible is it for there to be a mandatory registration requirement? 8 9 **A.** I mean, it's feasible but there are plenty of people who think it's not a good idea. So there are mixed views on 10 11 this, but it is feasible. On behalf of the department, do you have any views as to 12 Q. 13 who should keep such a register and maintain a register? 14 A. I mean, if we were to have such a register -- and this 15 goes to the question of -- I mean, you could have, sort 16 of, Skills for Care. They have the adult social care 17 workforce data. But I suppose if you were moving into 18 a world of workforce professionalisation along these 19 lines, I mean, maybe it's not the right thing to do to 20 have it sort of held at such arm's length from the 21 department. Skills for Care is an independent charity, 22 and you could set it up within the department. All
 - these things would be feasible.
- 24 But as I say, there are very mixed views on whether
- 25 this is a good idea.

23

	And what about the views	1		adult social care risk reduction framework, to be used
	ADY HALLETT: I'm sorry, Ms Carey, can I just interrupt?	2		in all social care settings or social care
	IS CAREY: Yes.	3		interventions. It was to provide guidance for employers
	ADY HALLETT: What are the opposing views to a register,	4		on how they should support workers who were more
5	Ms Dyson? I don't know if Ms Carey is going to cover	5		vulnerable to infection or adverse outcomes, including
6	it. I may have stopped her in her tracks.	6		the risks by ethnicity. And that framework came out on
	IS CAREY: Not at all.	7		19 June 2020.
	A. I honestly I can't remember the detail of this.	8		Can we have a look, please, at INQ000109673.
9	I remember Matt Hancock was very keen to do this, and	9		And this is an extract from a report done by the
0	also I think we consulted on it in late 2021 as part of	10		adult social care support taskforce, BAME Communities
11	some reform work. But I think there are some	11		Advisory Group. It was an advisory group that worked
2	stakeholders who think this is not a good idea, they	12		between 31 July and 14 August 2020, so just a two-week
3	think it might put people off. But I think you yeah,	13		period, and they received 142 responses from the social
14	I'm afraid I can't remember the detail of why they're	14		care workforce.
5	against it.	15		And we can see there that confidence in support, the
6 L	ADY HALLETT: Thank you.	16		quantitative section of the group's work showed risk
7 N	IS CAREY: One aspect of the pandemic was undoubtedly	17		assessments were often a successful measure for BAME
8	emerging evidence that showed that there was	18		staff to feel more secure, higher level of confidence
9	a disproportionate impact of Covid on black and minority	19		coming around sorry, around support coming from
20	ethnic members of staff, and can I ask you a little bit	20		employers than the government or official guidance, and
21	about that, please, because I think at your	21		the majority of respondents had been risk assessed
22	paragraph 449 you make reference to, there, the risk	22		regarding ethnicity.
23	reduction framework. I'll just let you turn it up,	23		And you can see there, perhaps if we just zoom out
24	Ms Dyson, as I do as well.	24		again, "Have you had a risk assessment based around you
25	But the department developed what was called the 149	25		ethnicity?" Actually, 90 of the 142 respondents had. 150
1 2	And 52 hadn't. But if we just look to the bottom of that page,	1 2		things you should talk about, and then this is how you can mitigate.
3	clearly over that two-week period, the respondees were	3		If those conversations were happening without

11		statement you make reference to the changes brought	11		what
12		about by Regulation 9A, which came into being I think in	12		
13		2024, which aims to make sure that people staying in	13		was
14		a care home, or indeed a hospital, receive visits from	14		it wo
15		people they want to see.	15	~	that
16		And can you help us, please, with what was the	16	Q.	That
17		rationale behind amending the regulations to bring in or	17		is th
18		codify, effectively, a right to receive visitors in care	18		circu
19	•	homes and hospitals?	19		falls
20	Α.	It was the experience of the pandemic.	20		exce
21		So at every point in the pandemic we were wrestling	21	•	posi
22		with the trying to square the circle as to balance	22	Α.	l me
23 24		things. I mean, it is to note that when Omicron came,	23		prov
24 25		and I don't know if the Inquiry has heard evidence on	24 25		reall
25		this, but at the beginning, when we first got notified 159	20		doin

1		visitors. Further work through the commissioning of new
2		studies was needed.
3		Was or is any work being done by Department of
4		Health to try to work out the extent to which visitors
5		bring in infections into care homes?
6	Α.	I think the point here was that there wasn't the
7		evidence that we would have ideally had. But on the
8		other hand, it was very clear that all footfall, if you
9		like, into a care home brought risk with it. So anyone
10		coming into a care home, for whatever purpose, that was
11		a risk.
12		So in answer to your question, I'm not aware that
13	•	we're doing any extra work in this space.
14	Q.	It's just that a number of the Bereaved Group members in
15		particular say: well, if the evidence emerges that we're
16		not a vector of transmission or a significant vector of
17		transmission, it makes the argument for imposing visiting restrictions less.
18 19		5
20		I suspect you can see that point, but hence why they are keen to know whether there is an evidential basis
20		for the restrictions in terms of the data showing that
22		they bring in X proportion of infection.
23	Α.	I mean, I think this is a question principally for
24	7.0	Public Health England, but we every time we made
25		changes to the visiting restrictions we worked hand in
		158

reference, can you see, at point 2 there, commenting on

you -- 11 April, thank you very much -- there is

a piece of evidence. But in the middle of that

receive, you know, sort of comprehensive sort of

fact that this was raised as an issue with the

misunderstanding about what the department knew or had

1		you know, it is possible that you get another pandemic	
2		where, in order to keep people safe, you do have to	
3		close visiting down again. I mean, I hope I hope	
4		very much hope we don't end up in that place.	
5	Q.	I think you said in your statement the CQC have a role	
6		to play in ensuring that visitors are being are	
7		allowed. And I think there's a correction to make, is	
8		there not, to your paragraph 52 in your statement A,	
9		where it should be a reference to 2023 amendment	
10		regulations not to the Health and Social Care Act of	
11		2022?	
12	Α.	Yeah.	
13	Q.	All right, well, we'll deal with the formalities but	
14		thank you for that.	
15		Can I ask you, please, about do not attempt	
16		cardiopulmonary resuscitation notices, please. It's	
17		your paragraph 615, Ms Dyson, if it helps you, onwards.	
18		One of the things you say there, I think at	
19		paragraph 613, is you say that:	
20		"The Department did not receive evidence of"	:
21		Forgive me, let me just turn the paragraph up	:
22		itself:	:
23		" evidence of inappropriate and blanket use of	:
24		DNACPRs.	:
25		What do you mean when you say the department didn't 161	:
1		taking this approach but many are, and the press are not	
2		helping. This is similar to the 'blanket DNAR' to which	
3		you reference elsewhere. We do not have any volume of	
4		statistics yet but some people in care homes showing	
5		symptoms do survive and I think we should be	
6		acknowledging this fact."	
7		And they talk about:	
8		"The [standard operating procedure] I mention below,	
9		also has a role in dispelling this or statements that	
10		those requiring NHS hospital treatment will continue	
11		to receive it. Anything you are able to say in this	
12		area will go some way towards services not feeling	
13		totally isolated and cut off, and minimising the fear	
14		that everybody in a care home will die".	
15		Now, a number of issues in that section there	
16		please, but is this an example, perhaps, of some of the	
17		anecdotal evidence to which you just referred a moment	
18		ago	
19	A.	Yes.	
20	Q.	with emails being sent into the department, and the	
21		like? Right.	
22		From the department's perspective, was there ever	•
23 24		a policy that promoted or enabled there to be a blanket DNACPR policy?	•
	۸	Absolutely not.	•
25	Α.	Abountery not.	

163

Care Planning ... published in March 2022 ... as to And we can see there six high-level principles.

(41) Pages 161 - 164

	Thank you:	1		as far as the adult social care sector is concerned?
2	"The person is central to developing and agreeing	2	Α.	So I've been trying to get to the bottom of this. There
3	their Advance Care Plan	3		is a digital care record for care providers.
4	" personalised conversations	4		I understand any DNACPRs are not kept there, because
5	"The person agrees the outcomes of their Advance	5		they have to be signed off by the GP. So they will be
6	Care Planning conversation"	6		held somewhere within a GP record, but I'm not sure
7	And so on.	7		what, in terms of the sort of central repository, I'm
8	And without wishing to disparage the work of the	8		not sure what that would be, but we can continue to try
9	universal principles, is there any other work being	9		and find out, and let the Inquiry know when we have.
0	done, though, to provide more ground-level guidance to	10	Q.	Right. One of the concerns of the bereaved groups is
1	ensure that there isn't blanket or inappropriate DNACPR	11		that the CQC report that was commissioned was perhaps
2	policies being written or being imposed on people in	12		commissioned too late in the pandemic and there have
3	care homes in the care sector? What is sort of at the	13		been these concerns that had been growing from a much
4	level under this, if I can put it like that?	14		earlier stage in the autumn of 2020. Can you help at
5 A .	This, then, became part of the single assessment	15		all about why the decision was taken in the autumn to
6	framework which the Care Quality Commission uses and	16		commission the CQC report?
7	that, if you like, is the best way of getting to all the	17	Α.	I don't know why it was in the autumn, but I think the
8	care providers, that's the basis on which they are	18		really important point is how much action happened
9	inspected.	19		during basically during April, you know, we could not
20 Q .	Can you help us now with where DNACPR records are kept	20		have done more, I think, to communicate out through
21	for the adult social care sector, because we've often	21		every channel that we have across the health and care
22	heard about perhaps there being a GP record, maybe	22		sector to say that this was inappropriate. And in fact,
23	a hospital record, maybe a care home record, and not	23		that was noted in the CQC review that said there was
24	necessarily the three records aligning. Do you know now	24		evidence of unacceptable DNACPRs being used at the sta
25	if there is one central repository for DNACPR records,	25		of the pandemic but there was a quick response from
	165			166
1	multiple agencies to highlight the issue, and deal	1		residents data, and reporting via the Capacity Tracker.
2	with it.	2		Perhaps my packaging up, or yours, but I'd like to look
3 Q .	Given that there was no departmental directive saying	3		at those three areas with you, please.
4	this was acceptable or permissible, did the department	4		Data from test and trace, you say was useful to show
5	do work to try and understand why, given this problem	5		prevalence and outbreaks. Can you help with, and it's
6	was still happening even though no one told GPs to do it	6		at your paragraphs 16 and 17 in part D, when did the
7	or care homes to do it, to try and understand what	7		test and trace data become available to the department?
8	generated?	8		Because we know test and trace was launched on 28 May
9 A .	I think that was the CQC review. That was the mechanism	9		and we know it was reported in sitrep data from
0	to try and understand that.	10		16 October but it doesn't mean the data wasn't available
1 Q .	Okay. Can I come on to deal with the issue of data,	11		to the department before then; can you help?
2	please. And this is mainly covered in your part D	12	Α.	So the the test and trace data I mean, it became
3	statement, Ms Dyson.	13		most meaningful once you had regular testing. So that
4	You say at the outset of that statement that the	14		rolled out from July but probably didn't become get
5	Department of Health was not operationally responsible	15		into its full rhythm, I would guess, until about
6	for adult social care data collections, but you did	16		September. We then had the dashboard that was built,
7	receive annual returns from NHS Digital, we know the CQC	17		the Palantir dashboard that came on stream about that
8	included data in their annual report. But is this the	18		point of time, so end of September, beginning of
9	position, that going into the pandemic, there was no	19		October, and that was where the test and trace data was
20	realtime data available to the department?	20		reported and reported daily.
21 A.	Yes.	21	Q.	That brings us on to the dashboard. I think you said in
	Right. Now, there were some changes made during the	22		your statement it was rolled out from 1 October 2020.
2 Q .				
2 Q . 3	pandemic, and I'd like to ask you about some of those,	23		It was interactive and local authorities had access to
	pandemic, and I'd like to ask you about some of those, please. And in particular, you say there was changes	23 24		It was interactive and local authorities had access to the dashboard and, indeed, ministers used it at meetings

1		was the dashboard in any way developed in secret or
2		without the DHSC's knowledge?
3	Α.	No. There were many emails. You can see all the
4		different people who were involved, including analysts,
5		from my team, across with Palantir, and NH I think
6		the NHS held the contract maybe at that point with
7		Palantir. Many people were involved in developing the
8		dashboard.
9	Q.	Was there ever any orders that you're aware of not to
10		share the dashboard with either ministers or any other
11		group that wanted to see the dashboard data?
12	Α.	No, absolutely not.
13	Q.	Can we have a look, please, at the actual data itself.
14		Thank you very much. It's INQ000512951. And
15		I wonder if we can go to page 23, which I think may be
16		a couple of slides on. Thank you.
17		This is an extract from 5 January 2021, and it shows
18		here the regions across England, and a summary of the
19		positive cases, both a staff and residents is this in
20		care homes, Ms Dyson?
21	Α.	Yes, yes.
22	Q.	And we can see there that, as at January 2021, there is
23		significant increases in London, the east, and the
24		south east, compared with the previous seven days. And
25		so it's a useful tool to show you increase in infection
		169
1	Α.	Yes.

•		
1		rates or decrease, depending on the position.
2		Obviously that regional overview was helpful but
3		help us with the dashboard. How, from there, did one go
4		to working out perhaps which local authority had
5		a problem or which care home in particular had
6		a problem? How had it sort of trickled down?
7	Α.	So this is the dashboard that many, many of us looked at
8		every day, and it was vital. It gave us this rolling
9		seven-day data. So, as you say, you could absolutely
10		compare see what was going on at national level, then
11		at regional level. Then you could click through and you
12		could get to all the 150 I think it was then 152
13		local authorities. And from there, you could click down
14		into the all the care homes that were in that local
15		authority, and then you could see what was going on in
16		that care home and you could see that care home's
17		Capacity Tracker data.
18		So, for example, in a care home where there was an
19		outbreak, you could have a look and see: well, what are
20		they doing on staff movement? What are they doing on
21		paying sick pay?
22	Q.	So you could actually go down to, sort of, care home
23		level and know what their outbreaks were, how many staff
24		absences there were. I think did it cover PPE and
25		whether they had
		170
1	Α.	I'm sure we could do that, yes.
2	Q.	Now the tracker, I think that was already that was
3		something that was adapted for use during the pandemic.
4		It was voluntary, as I think you said earlier. But
5		clearly, one of the things during the pandemic to try to
6		encourage provision of data was to make access to funds,
7		not just the Infection Control Fund, linked to whether
8		returns were made by the Capacity Tracker?
9		Help us with the position with the tracker today.
10		Would it be useful still if there were a future pandemic
11		now? Because clearly you might want to look at bed
12		capacity outside of pandemic times, but what does the

- department say is its benefit in the event that we
- 14 had a pandemic later this year?

- A. I mean, we still use it for all sorts of purposes: bed
 occupancy, we look at staff absences. So there are all
 - sorts of purposes it's currently used for. It's very
- 18 easy for us to add extra fields if we need to. I mean,
- 19 there is obviously a process to be gone through, because
- 20 we're conscious of imposing burdens on providers, and
- 21 it's important we do -- there's proper governance around
- 22 it, but it would, in principle, be easy to add in extra
- 23 data collections into the Capacity Tracker.
- 24 **Q.** And I think it may be something you said earlier,
- 25 forgive me if I'm repeating myself, but is it now 172

1		mandatory too?	1		lots of emails. So from the emails that I've seen to
2	Α.	Yes.	2		date, I've seen a lot of emails going on in May with
3	Q.	All right. A couple of different topics, please,	3		people trying to get a budget for Vivaldi involving
4		perhaps before we wrap up.	4		finance people, involving commercial people, this was
5		In your part E, which is your lessons learned part	5		a sort of a procurement issue. I haven't seen where
6		of the statement, you make reference to the Chief	6		that actually got to, but definitely people were doing
7		Medical Officer's technical report, which refers to	7		everything that I would expect them to be doing to get
8		research and any investigation to increase care home	8		a budget for Vivaldi.
9		resilience.	9	Q.	Was there or do you know whether was there anyone
10		Are you able to help with any work that is being	10		in the Department of Health at that time that didn't
11		undertaken by the department now to conduct research, or	11		want the Vivaldi project to get up and running and
12		have the capability of standing up research in the event	12		report on its findings?
13		of a future pandemic?	13	Α.	I mean, there's nothing I've seen in all these emails
14	Α.	So there may well be things going on in UKHSA, but the	14		that would suggest that that's the case.
15		thing that I'm aware of is that the Vivaldi Study is	15	Q.	Were you aware from your research whether the department
16		still going, albeit it's no longer looking at Covid, but	16		refused to share data with the Vivaldi project?
17		it is looking at care homes from, sort of, other	17	Α.	Again, nothing I've seen in these emails.
18		perspectives. So I think that is very useful research	18	Q.	Do you know whether Minister Whately was briefed in
19		for the future.	19		private about Vivaldi?
20	Q.	In relation to Vivaldi, can I just ask you a few	20	Α.	Not that I'm aware of.
21		questions, please.	21	Q.	The Inquiry has seen some evidence to suggest that in
22		I think was there a budget set for the project as	22		summer of 2020 there were meetings in the Department of
23		far as the department is aware?	23		Health where people were making comments like "Come the
24	Α.	So we've been trying to get to the bottom of exactly	24		Inquiry, we'd better cover our backs", to put it
25		what happened with Vivaldi. We've been digging round in	25		ineloquently. Have you seen any paperwork that suggests
		173			174
1		that comments like that were being made?	1		modification to the assessments that were carried out.
2	Α.	-	2		I think the department is aware of concern from user
3	Q.		3		groups and carer groups about potentially unmet needs
4		comments like that being made about the need to cover	4		being prevalent or lower wellbeing, changes being made
5		themselves?	5		at the last minute to assessments and the like.
6	Δ	I can't recall anyone making that sort of comment.	6		You have set out in your statement that by
7	Q.		7		18 May 2020 there were six local authorities all in the
8	ч.	department did not want to uncover perhaps the scale of	8		Midlands that were using easements and two other local
9		infections in care homes?	9		authorities that had used them but had stopped using
10	Α.	Not at all. And it is worth adding another point about	10		them.
11	Π.	Vivaldi. Vivaldi was a really important study, but what	10		On any view, potentially quite a low number of local
12		Vivaldi uncovered, we already knew, albeit this was	12		authorities in the scheme of things, and certainly no
13		a more robust study. So, for example, Vivaldi talks	12		easements have been used since June 2020.
14		about staff preventing staff movement. We already	10		There is a concern that perhaps they were being used
15		knew that. We had already taken action in May to stop	15		but that local authorities were not notifying the
16		staff movement. Vivaldi the importance of testing,	16		Department of Health that they were being used. Did you
17		we already knew about that.	10		in the department get any sense of whether that was or
		So Vivaldi is important but it's not the only study	17		might have been happening?
10		that matters, and in fact most of the action that in	10	Α.	I don't think that was the case. I think the issue is
18 19				<i>.</i>	
19		fact all the action that was needed, that Vivaldi points	20		Whether because what was happening was beoble were
19 20		fact all the action that was needed, that Vivaldi points	20 21		whether because what was happening was people were using Care Act flexibilities, and in fact when Omicron
19 20 21		to, was already underway, albeit Vivaldi was sort of	21		using Care Act flexibilities, and in fact when Omicron
19 20 21 22	0	to, was already underway, albeit Vivaldi was sort of massively and very robust study.	21 22		using Care Act flexibilities, and in fact when Omicron came and we considered whether to turn Care Act
19 20 21 22 23	Q.	to, was already underway, albeit Vivaldi was sort of massively and very robust study. Another topic, please, is that of Care Act easements.	21 22 23		using Care Act flexibilities, and in fact when Omicron came and we considered whether to turn Care Act easements back on, the conclusion you know, what
19 20 21 22	Q.	to, was already underway, albeit Vivaldi was sort of massively and very robust study.	21 22		using Care Act flexibilities, and in fact when Omicron came and we considered whether to turn Care Act

176

	So I think the point there's an important study	1		lower wellbeing and unmet need'."
2	by a Manchester University study, I think.	2		And it goes on, I think, to set out the point you
	Yes.	3		were just referring to, Ms Dyson, that:
	And the concern there is: well, actually, is there too	4		"Although the experiences were similar across the
5	much flexibility in the Care Act? Which	5		local authority areas in this study, easements were
6 Q .	Can we have a look at that	6		differentially implemented, soon revoked, and not in
7 A .		7		force for any local authority beyond July 2020. There
8 Q .	because it might help those following.	8		appears to have been little consequence whether
9 A .	Yeah.	9		political, legal or regulatory for local authorities
10 Q .	Can we have up on screen, please, perhaps, your	10		that did not invoke easements. However, for the local
11	statement ending 737, at page 159. It might just take	11		authorities that did, there was considerable pressure
12	a moment to bring it up because we're flitting between	12		from lawyers, NGOs, lobby groups and adverse media
13	statements.	13		attention."
14	It's INQ000587737, page 159, and at the top of the	14		Was the department aware that local authorities that
15	page there a reference to the University of Manchester	15		did invoke easements were coming under some criticism
16	study in November 2020:	16		and
17	"The project investigated the impacts of Care Act	17	A.	
18	easements on older carers of people living with dementia	18	Q.	And what was the department's view about it from that
19 20	at home to make recommendations about the operation of this legislation"	19 20	•	angle, in the first instance? The chief social workers went out to those local
	And there's the report or one of the main	20	Α.	authorities and conducted extensive interviews to
21 22	findings:	21		understand how they were using the Care Act easements to
23	" that carers and the family members they were	22		make sure that it was all in accordance with the
24	supporting 'experienced significant changes from their	23		guidance, which they concluded that it was. So I mean,
25	usual care and support, which in many cases resulted in	25		I sort of understand the point that says it feels a bit
	177	20		178
4		4		40 March it was always your immediate that all
1 2	unfair that some of these local authorities that use the Care Act easements in exactly the right way were coming	1 2		19 March, it was always very important that all decisions of this kind, whether under Care Act easements
2 3	under pressure, but other people, other local	2		or not, were taken being cognisant of that ethical
4	authorities who did similar things, but without going	4		framework.
5	through that process, didn't come under I mean, so	5		But the broader points that are being made here,
6	I understand the point.	6		which is about how do you have oversight of what's going
7 Q.	To go back from the other angle, though, and perhaps the	7		on in local authorities in terms of the flexibilities
8 .	significant changes being reported by carers and their	8		that there are under the Care Act, we've now legislated
9	family members, which resulted in lower wellbeing and	9		so that CQC has inspects local authorities the way in
10	unmet need, can you help with what safeguards, if any,	10		which they exercise the Care Act, so they will be
11	were written into this to try and prevent such dramatic	10		looking at these types of issues, you know, either
12	changes to people's care needs?	12		within a pandemic, let's hope not, or in normal times as
	I do think some of that is will be about lockdown more	13		well.
13 A .			Q.	Perhaps moving in to my final point, and levers, or the
	denerally So, for example, I know it was really	14		
14	generally. So, for example, I know it was really difficult. and I should sav this: the University of	14 15		
14 15	difficult, and I should say this: the University of	14 15 16		lack thereof. We've looked at the financial incentives
14 15 16	difficult, and I should say this: the University of Manchester report makes very, very difficult reading.	15 16		lack thereof. We've looked at the financial incentives that perhaps can be levied to try and ensure data
14 15 16 17	difficult, and I should say this: the University of Manchester report makes very, very difficult reading. But some of the problems that it's alluding to were	15 16 17		lack thereof.  A. 14 15 16 17 18 19 20 21 22 23 24 25 	difficult, and I should say this: the University of Manchester report makes very, very difficult reading. But some of the problems that it's alluding to were caused by lockdown so, for example, day centres closing, and indeed some, I understand, some families decided that they didn't want care because they didn't want a home carer coming into their home because they were concerned about the risk of Covid. I mean, what we did generally was there was an	15 16 17 18 19 20 21 22 23	A.	lack thereof. We've looked at the financial incentives that perhaps can be levied to try and ensure data returns are being met. You've spoken there of, I think, changes to ensure that the CQC inspects to ensure that Care Act responsibilities are being applied, but from the department's perspective, is there any recommendation that the department has got as to how to ensure it has the levers it needs, aside from those discrete areas that we've spoken about already this

(45) Pages 177 - 180

1		there are big questions here about whether adult social	1		
2	_	care is set up in the right way.	2		_
3	Q.	I understand that, but that review may be many months,	3	MS	N
4		if not years, away. If we had a pandemic more	4		
5		immediately than that, do you have any recommendations	5		
6		or suggestions for how the government could gain the	6		t
7		levers it might need to be able to support the care	7		5
8		sector and, indeed, impose things on the care sector?	8		ł
9	Α.	I think we're in a much, much better place than we were	9		•
10		in 2020 through the legislation we've already talked	10		t
11		about, through data, through CQC inspections, through	11		
12		the visiting regulations, and then there's one we	12		t
13		haven't talked about, which is the power the government	13		ł
14		now has but hasn't yet used to be able to give money	14		
15		direct to providers. So all the money that went to	15		r :
16		providers during the Covid pandemic had to go through	16		1
17		local authorities instructing them to pass it on. We	17		1
18	MO	now have the power to fund providers directly.	18		1
19	IVI S	CAREY: Ms Dyson, thank you very much.	19		t
20 21		My Lady, that's all the questions I ask but there	20 21		
21 22		are some Core Participant questions.	21		t
22 23	LAI	DY HALLETT: There are. Thank you, Ms Carey.	22		1
23 24		Ms Dyson, just few more questions for you but	23 24	Α.	
24 25		I promise you you are going to finish by the time we finish this evening.	24 25	А.	
20		181	20		
1		say, if there were 94, then I don't know where all of	1		F
2		those were.	2	Q.	-
3	Q.	In your draft note back in January to the Minister you	3		
4		say that it appears that in some cases the action has	4		t
5		been signed off at a local level on the grounds that	5		r
6		there is a risk to safe staffing levels without	6		á
7		Covid-positive staff continuing to work. So I wanted to	7		t
8		ask you, do you agree that the prevalence of	8		t
9		Covid-positive staff continuing to work during the	9	Α.	-
10		pandemic was illustrative of the failure of the	10		t
11		UK Government to grip the workforce issues and shortages	11		t
12		that had been known before the onset of the pandemic?	12		١
13	Α.	I mean, we are talking about 94 staff out of	13		١
14		1.2 million, so I do think we need to think about it in	14		á
15		the get some sort of perspective on that. I mean, as	15	Q.	I
16		we have discovered, there were problems in the	16		I
17		workforce. There were problems particularly at this	17		F
18		time, but equally, there were times during the pandemic	18		
19		when things, as regards the workforce, were relatively	19		
20		stable. We saw an email on that, making that point just	20		Ş
21		before the break.	21		۱
		So I think this was a particular issue.	22		ę
22		I should just add that that draft note became an	23		ł
22		actual note about two hours later, and went to the	24		(

1		Ms Morris should be just to your right.
2 3	ме	Questions from MS MORRIS KC MORRIS: Thank vou.
3 4	WI3	MORRIS: Thank you. Good afternoon, Ms Dyson. I ask questions on behalf
4 5		of the Covid Bereaved Families for Justice UK. My first
6		topic is returning back to the issue of Covid-positive
7		staff within care homes. Now, Ms Carey King's Counsel
7 8		has touched on that with you already. I wanted to
8 9		expand a little bit in terms of the detail, please, and
9 10		
10		the scale and some of the underlying issues.
12		We've already mentioned your note or draft note to
12		the Minister from January in 2021 in which you
13		highlighted six cases the department was aware about and I think following this that draft note, the number of
14		reports that the Inquiry has evidence of increased by 50
16		in February and 94 in April. You said you thought it
17		was about 25. I just wanted to draw your attention to
18		that. So by 13 April 2021 there were 94 reports, within
19		the department's knowledge.
20		I wanted to ask you if you could help with whether
20		there were cases of staff continuing to work in both
21		residential and in community settings. Was it in both
22		or just in one?
23	A.	I don't recall but I mean, all the cases that were
24		brought to my attention were in care homes, but as you
25		182

Ros Roughton, the then Director of Adult Social Care, emailed NHSE with her concerns that DHSC was lacking the ability to tell local authorities what she referred to as "the scary narrative" on what the

1		After the hospital discharge requirements had been
2		issued on 19 March, PHE officials noted that NHSE had
3		"major concerns" with the guidance for infection
4		prevention and control in care homes and would lead the
5		sector to being "too risk averse" describing what they
6		described as being blocks in the system.
7		I wanted your help, please, with, first of all, why
8		weren't DHSC officials able to tell local authorities
9		this scary narrative on what pressure was anticipated to
10		be like just days from this meeting?
11	Α.	I haven't seen that email, I don't know about that, but
12		I I mean, it's clearly part of the narrative around
13		the hospital discharge. It was being made and
14		remember, I think you said that that the Ros Roughton
15		email, was that, did you say, 13 March?
16	Q.	11 March.
17	Α.	11 March.
18	Q.	After 11 March.
19	Α.	Yes, so things changed a lot between 11 March and
20		19 March, so I'm sure that by the time of the hospital
21		discharge guidance on 19 March, I'm sure that there were
22		conversations happening about the need for it, you know,
23		we needed local authorities to be helping with the
24		hospital discharge policy.
25	Q.	Yes. As you say, is it fair to say that the DHSC and 185
		100
1		Covid-19-positive cases that didn't require treatment in
2		Covid-19-positive cases that didn't require treatment in hospital.
2 3		hospital. What consideration, if any, was given to that as an

1		NHSE needed care homes to be willing to accept untested
2		patients from hospital if that policy was in fact going
3		to be effective?
4	Α.	Yes.
5	Q.	So if there's an unwillingness to, or lacking the
6		ability to deliver the scary narrative, was the ASC
7		sector deliberately kept in the dark so that when the
8		time came, care home managers would not be too risk
9		averse in accepting urgent hospital discharges?
10	Α.	I think we're missing the between 11 March and, sort
11		of, 19 March. I just don't know I wasn't there at
12		the time, I don't know what happened in that period, but
13		clearly we were getting closer and closer. Lockdown was
14		on 23 March. You know, things changed very rapidly in
15		that period. I'm sure we were communicating with the
16		sector about what was going on. I mean, there was more
17		guidance issued on 13 March, you know, things were
18		moving extremely rapidly, so I don't think we should
19		read into an email on 11 March to say that there was no
20	_	communication with the sector after that.
21	Q.	You've recognised in your evidence already this
22		afternoon that there was later the development of
23		designated settings. On 20 April 2020, PHE suggested
24 25		that consideration be given to the question of what they
25		call "hot" care homes as a place to cohort and manage 186

1		Questions from MS BEATTIE
2	MS	BEATTIE: Thank you, my Lady.
3		Ms Dyson, I ask questions on behalf of Disabled
4		People's Organisations and the questions concern
5		Care Act easements which you have covered in your
6		statements and which continued to be in force after you
7		came into post.
8		The Minister for Social Care, Helen Whately, was
9		provided with a submission on 19 May 2020 on the impact
10		of Care Act easements, and that submission said that
11		chief social workers had spoken to or corresponded with
12		principal social workers from the seven local
13		authorities then operating easements. It might have
14		been six at that point but there had been a total of
15		seven. And that was out of a total of 153 local
16		authorities in England; is that right?
17	Α.	Yes.
18	Q.	The chief social workers had not contacted or reviewed
19		what was happening in the other 146 local authorities,
20		but only the seven that had formally notified their use
21		of easements. That's correct, isn't it?
22	Α.	Yes.
23	Q.	The submission, the same submission of 19 May, had said
24		in terms and for the record, this at page 3,
25		paragraph 6 of that submission: 190
		190

No, I mean, that's right. But as I say, I think we're at risk of sort of almost cutting out the expertise of local authorities

3 in this space?, no, we didn't have that information. 3 to have their care packages reduced because they were index to point of view of central government, 4 Q. Right, so from the point of view of central government, 4 wore using the easements were operating and whether local authorities 6 easements were operating and whether local authorities 6 But look. if Age Ut Naw 20 tevidence of that, the you know. Lacoept that. 8 A. So there was effective monitoring of hose who were 8 Q. So, similarly, if there is evidence, as there is, of daily care provision of somene who is, for example, the wash any effective monitoring of those who were or using assements. 9 usage there is all on the point of view of central 11 reduced down to once a day, so that, for example, the voltage, there is aday, and that be a wample, the value of the some of the	1	your question is "Was the department sort of all knowing	1	Α.	I mean, what I've heard from just anecdotally from
4 C. Right, so from the point of view of central government, there wasn't any effective monitoring of how the easements were operating and whether local authorities were using the easements or the flexibilities? worried about people, say, who hadn't been vacchad going into their homes. 7 Were using the easements or the flexibilities? So, there wasn't any effective monitoring of how the using easements, but we didn't know what was going on for those who were out used for controling and the being about the point of view of central government, there wasn't any effective monitoring of user's needed during the pandemic, for example by user's needed during the pandemic, for example by user's needed authorities were failing to meet care their care provision is observed and busine were failing to meet care their care provision distributes hat has were the molitory of flexibilities that were beeing used were things like delaying financial assessments, that sort of thing. But fm not alk howing, so its possible. But it mems of flexibilities that were being used were things like delaying financial assessments, that sort of thing. But fm ont sure flow were (olowing the Inquiry this call authorities had reduced care packages, sort how the evidence that has come to me. the evidence that has a come to me. the evidence that has a come to me. the evidence that evidence that thas asont to mean provision to	2	as to what was going on across the 153 local authorities	2		directors of adult social services is that people asked
5 bere want any effective monitoring of how the 5 going into their homes. 6 assements were oparating and whether local authorities 6 But look, if Age UK have get evidence of that, the you know, laces pt hat. 7 8 A So there was effective monitoring of those who were 8 C. So, similarly, if there is evidence, as there is, of a using essements, but we don't know what was going on 10 6 rot those who were not using essements. 9 diality care provision of someone who is, it or example, the use of the monitoring of these who were failing to meet care 10 diality care provision of someone who is, it or example, the duad the dawn to ence a day, so that, for example, the duad the dawn to ence a day, so that, for example, the duad the dawn the meast dawn of the manifing, to reace and any so that, for example, the duad the dawn to ence a day, so that, for example, the duad the dawn the meast dawn of the meast any effective monitoring of the was the care packages, was there? 17 A Yes. 16 A long ani, how of the was there of the assement is not of the evidence that has come to mo. 17 A Yes. 20 Nm not alk nowing, so it's possible. But in terms of the evidence that has come to mo. 19 A A A 21 Nm of stare if you were failing the inguity this the evidence that has come to mo. 22 A Yes. 22 Nm of stare if you were failing the package of poppia 10 A A and again, would that be asto	3	in this space?", no, we didn't have that information.	3		to have their care packages reduced because they were
6 easements were operating and whether local authorities 6 Dut look, if Age UK have got evidence of that, th 7 were using the easements or the field/life? 7 8 0 Cheve was difted the monitoring of those who were 8 0 </td <td>4 Q.</td> <td>Right, so from the point of view of central government,</td> <td>4</td> <td></td> <td>worried about people, say, who hadn't been vaccinated</td>	4 Q .	Right, so from the point of view of central government,	4		worried about people, say, who hadn't been vaccinated
7 were using the easements or the flexibilities? 7 you know, I accopt that. 8 A. So there was effective monitoring of those who were using easements, but we drift hrow what was going on for those who were not using easements. 0 So. Jamies a day and that be a figure are provision of someone who is, for example, the value of a consoling of a prolonged period of time, whather local authorities ware failing to meet care the value of a consoling on a provide and that be a matter of increase day, so that, for each going or people of the own voltant deciding services? 10 And equily, from the point of view of central that was the first care packages, was there? 10 So does don't the parametic, for example, the value of the analytic to meet day. So that, for each going or people of the own voltant deciding services? 11 there is evidence that is account of the sort of a first care. 10 And equin, would that be a matter of increase to the department, having brough and the value of the analytic to mean day. 11 the evidence that has come to me. 11 11 Feduced day the vidence that has and the interest to the department, having brough and day envices day. 12 Ca. Image, interest, but dot of thing. But in terms of the appring the origon are the evidence that has come to me. 12 And again, would that be a matter of increase to the country? 12 Ca. Image, but he inquiry hard from Age UK loday that to all knowing, so it's possible. But in terms of the apparing, that ony arey small num of local authorithis had r	5	there wasn't any effective monitoring of how the	5		going into their homes.
 A. So there was effective monitoring of those who were using essements, but we dian't know what was going on for those who were not using essements. Sut we dian't know what was going on gave who were not using essements. A. And equally, form the point of view of central gave entrement, there was and any of the the evidence that they were failing to meet care there times add and the their eligible needs, would that be a matter of a prolonged period of time, but we dian't know they. Site their eligible needs, would that be a matter of a prolonged period of time, but we dian't know they. Site they were things like the evidence that has come to me. L. mean, have not seen any evidence that that was the evidence that has come to me. L. mean, have not seen any evidence that that was the evidence that has come to thing. But the evidence that has come to me. L. mean, have not seen any evidence that that was the evidence that has come to me. L. mean, have not seen any evidence that that was the evidence that has come to me. L. mean, have not seen any evidence that has come to me. L. mean, have not seen any evidence that has come to me. L. more if you were following the lengity this morting, but the ingity heread from Age UK today that the evidence that has come to me. Local authorities had reduced care packages for people in the evidence that has being into question thang and yet there was such a small to the department on an ongoing basis in relation to a matter of interest to the department, having that also bring into question to may is no table you avare of that? Local authorities had reduceds and you have were any and that be easement in performably invoked the easement in the way that the guidance that this was bapening actors at you avare of that? Local authorities had reduced are you was and that was appening actors at you any even the period a trab. The adjust and that was happening actors at adjust and th	6	easements were operating and whether local authorities	6		But look, if Age UK have got evidence of that, then,
9 using easements, but we dich't know what was going on 0 diff and a second on the second on t	7	were using the easements or the flexibilities?	7		you know, I accept that.
10 for those who were not using easements. 10 used to receiving care three times a day and that beind to be add add by so that, for example, the add by a that beind to be add by so that, for example, the add by the the coll authorities were failing to meet care 11 1	8 A .	So there was effective monitoring of those who were	8	Q.	So, similarly, if there is evidence, as there is, of
11 Q. And equally, from the point of view of central government, there wasn't any effective monitoring of government, there wasn't any effective monitoring of whether local authorities were failing to meet care users' meeds during the pandemic, for example by cutting 11 reduced down to once a day, so that, for example, the during the meet care would that be something above and beyond the example, the increase packages, was there? 12 users' meeds during the pandemic, for example by cutting 14 would that be something above and beyond the example, the increase packages, was there? 13 A. I mean, I have not seem any evidence that that was the for coase. The evidence that has come to the sort of factoring services closing or paople of the own woild that be something above and beyond the example. It is deleving financial assessments, that sort of thing. But 18 Q. And again, would that be a matter of concern and a matter of interest to the department, having brouging in the inquiry these following the Inquiry this 22 A. Yes. 20 I'm not sure if you were following the Inquiry this 23 Q. And if that was happening, but only a very small num of local authorities had formally invoked the easement in the used that the guidance tase of the incell authorities and formally invoked the easement in the dupatrement on anoging basis in the was such a small 1 Local, Act Personal partnership that had been engage whether the guidance tase work in the legislation had 194 13 told them to, might that also bring into pay is – is the the case having a package of care takene stave of apapening and yet there was such a small <td>9</td> <td>using easements, but we didn't know what was going on</td> <td>9</td> <td></td> <td>daily care provision of someone who is, for example,</td>	9	using easements, but we didn't know what was going on	9		daily care provision of someone who is, for example,
12 goverment, there wasn't any effective monitoring of 12 didn't get dressed for a prolonged period of time, whether local authorities were failing to meet care 13 whether local authorities were failing to meet care 13 because of the inability to meet their eligible needs, would that be something above and beyond the exar 15 their care packages, was there? 15 you've given of day services closing or people of the own volition declining services? 16 A. I mean, I have not seen any evidence that that was the low own volition declining services? Yes. 16 the evidence that have some things like 18 A. And again, would that be a matter of concern and matter of laws envices that be an anter of laws envices that avaing brough in the easement provisions, to know whether that was a the or interest to the department, having brough in the easement provisions, to know whether that was mappening, but only a very small num or local authorities had reduced care packages for people 24 A ves. 25 living in their own homes. 23 And 1 that was happening, but only a very small num or local authorities had formally invoked the easement in provisions. 1 Local. Act Personal parthership that had been engage whether the guidance stelf was being properly 2 the department on an ongoing basis in relation to an meet or ports provise whether engages or active with the descreted to other local authorities and whether care. 10 toid them ton might that also bring in	10	for those who were not using easements.	10		used to receiving care three times a day and that being
 whether local authorities were failing to meet care users' needs during the pandemic, for example by cutting their care packages, was there? Case. The evidence that live seen of the sort of f. A. I mean, I have not seen any evidence that that was the case. The evidence that live seen of the sort of f. M. If mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if mot all knowing, so it's possible. But in terms of if whether the guidance itself was being properly if the disatter in the all was there and if the disatter in the all was there and if the disatter in the all was there and if the disatter in the all was there and in the all was there and if the disatter in the all was there and if the disatter in t	11 Q .	And equally, from the point of view of central	11		reduced down to once a day, so that, for example, they
14 users' needs during the pandemic, for example by cutting 14 would that be something above and beyond the example by cutting 15 their care packages, was there? 15 you've given of day services closing or people of the orn vollidin declining services? 16 A. Irean, I have not seem any evidence that that was the orn vollidin declining services? 16 0. And again, would that be a matter of concern and delaying financial assessments, that a sort of thing. But 18 0. And again, would that be a matter of concern and a matter of interest to the department, having brough in the evidence that has come to me. 20 11 n the exidence that has come to me. 21 happening across the country? 20 0. Irn not all knowing, so it's possible. But in terms of increast of or conserver of that? 22 A. Yes. 21 0. Irn not all working brough in the quidance tag packages for people 24 of local authorities had reduced care packages for people 25 In the way that the guidance and the legislation had 193 22 whether the guidance tag in the quidance tag in the quidance tag in the guidance tag in the guidance tag in the again in relation to a ongoing basis in relation to a understood, or perhaps not complied with, because these 3 eesement in plementhal 0 33 understood, or perhaps not compled with, because these 3 eesesement maly anoxide a review which described a	12	government, there wasn't any effective monitoring of	12		didn't get dressed for a prolonged period of time,
 their care packages, was there? I. Imean, I have not seen any evidence that that was the case. I. Imean, I have not seen any evidence that that was the case. I. Imean, I have not seen any evidence that that was the case. I. Imean, I have not seen any evidence that that was the case. I. Imean, I kawing as that or of thing. But the evidence that has come to me. I. Imean, I kawing as being properly I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them to, might that also bring into question I. It dot them the guidance itself was being properly I. It dot them the guidance itself was being properly I. It dot them the guidance itself was being properly I. It dot the quest on things into play is is the I. It dot the quest on things into play is is the I. It dot the quest on things into play is is the I. It dot this the quest on things into play is is the I. It dot this that this brings up a package of care taken I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I. It dot this that this brings up a question about I	13	whether local authorities were failing to meet care	13		because of the inability to meet their eligible needs,
 A. I mean, I have not seen any evidence that that was the case. The evidence that to seen of the sort of frexibilities that were being used were things like If motial knowing, so it's possible. But in terms of the easement individes the department, having brough in the easement provisions, to know whether that was the easement provisions, to know whether that was the easement individes that easement individes the easement in the easement provisions, to know whether that was happening across the country? If motial knowing, so it's possible. But in terms of the easement provisions, to know whether that was happening across the country? If motial knowing, so it's possible. But in terms of the easement in the loquity head from Age UK today that to the induced care packages for people living in their own homes. Were you aware of that? It old them to, might that also bring into question 11 Local, Act Personal partnership that had been engage the department on an ongoing basis in relation to 193 understood, or perhaps not complied with, because these 3 easements had provided a review which described a timps were happening and yet there was such a small number of reports? A. I think the question it brings into play is – is the 10 care act flexibilities. And whether - if it really was 1 the case that someone was having a package of care taken 3 around. So, you know, I think you can't judge too much 1 around. So, you know, I think you can't judge too much 1 without really understanding all the circumstances of 15 with ut really understanding all the circumstances of 15 with ut really was that this brings up a question about 14 the fexibilities within the Care Act. You know, is the 18 the fexibilities within the Care Act. You know, is the 18 the fexibilities within the Care Act. You know, is the 18 the fexibilities within the Care Act. You know, is the 1	14	users' needs during the pandemic, for example by cutting	14		would that be something above and beyond the examples
17 case. The evidence that I/ve seen of the sort of financial assessments, that sort of thing. But 17 A. Yes. 18 flexibilities that were being used were things like 18 Q. And again, would that be a matter of concern and a matter of interest to the department, having brough in the evidence that has come to me. 10 A. Ad again, would that be a matter of concern and a matter of interest to the department, having brough in the evidence that has come to me. 20 I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. 21 A. I'm and across the country? 21 the evidence that has come to me. 21 A. I'm and across the country? 22 D. I'm not sure if you were following the Inquiry this 22 A. Yes. 23 morning, but the Inquiry heard from Age UK today that 23 C. And if that was happening, but only a very small number of local authorities had formally invoked the easement inter of noading basis in relation to a matter of across the country? 25 whether the guidance itself was being properly 2 the department on an ongoing basis in relation to a sub-across to covid-19. 1 toid them to, might that also bring into play is is the 1 Local, Act Personal partnership that had been engage or the case that someone was having a package of care taken 3 5 numbers of reports? 5 <	15	their care packages, was there?	15		you've given of day services closing or people of their
 18 flexibilities that were being used were things like delaying financial assessments, that sort of thing. But delaying financial assessments, that sort of thing. But in terms of the evidence that has come to me. 20 I'm not sure if you were following the Inquiry this morring, but the Inquiry head from Age UK today that local authorities had reduced care packages for people 21 told them to, might that also bring into question 1 22 understood, or perhaps not compiled with, because these 3 23 understood, or perhaps not compiled with, because these 3 24 the evidence that hang and yet there was such a small of the today that things were happening and yet there was such a small 4 25 understood, or perhaps not compiled with, because these 3 26 A. I think the question it brings into plays is – is the 4 27 things were happening and yet there was such a small 4 28 down from three times a day to one, you know, once 4 29 down from three times a day to one, you know, once 4 20 down from three times a day to one, you know, once 4 21 things I've heard from directors of adult social 1 22 A. Yes. 23 the case. 24 the department, having but and wether if it really was 4 25 things I've heard from directors of adult social 1 26 the case. 27 thing I've heard from directors of adult social 1 28 that there were - family members were more 13 national guidance was unclear, open to interpretation 14 around. So, you know, I think you can't judge too much 14 the discibilities. Did that this brings up a question about 17 the discibilities within the Care Act. You know, is the 19 the discibilities within the Care Act. You know, I think you can't judge too much 14 the fuely understanding all the circumstances of 15 authorities. Did that they were not on again, as I said, for the purpose 19 of Omicron, the universal view was that they were nor needd. 29 t	16 A .	I mean, I have not seen any evidence that that was the	16		own volition declining services?
 delaying financial assessments, that sort of thing. But delaying financial assessments, that sort of thing. But I'm not all knowing, soi it's possible. But in terms of the evidence that has come to me. not sure if you were following the lnquiry this morning, but the lnquiry heard from Age UK today that local authorities had reduced care packages for people living in their own homes. Were you aware of that? told them to, might that also bring into question told them to, might that also bring into question understood, or perhaps not compiled with, because these whether the guidance itself was being properly understood, or perhaps not compiled with, because these understood, or perhaps not compiled with, because these things were happening and yet there was sub a small number of reports? the tages that some was having a package of care taken the ages that some was having a package of care taken down from three times a day to one, you know, once down from three times a day to one, you know, once down from three times a day to one, you know, once down from three times a day to one, you know, once down from three times a day to one, you know, once down from three times a day to one, you know, think you carit judge too much the case. But 1 do think that this brings up a question about the case. But 1 do think that this brings up a question about the fascibilities. And when we consult the the case. But 1 do think that this brings up a question about the fascibilities with the Care Act. You know, is the width of the discretion there – is it too wide? And the tase, and two, uvoid a apar, is that, and the thy by the CQC when think we need to look at that. And again, I would expect, one, that would be loo	17	case. The evidence that I've seen of the sort of	17	Α.	Yes.
 I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing, so it's possible. But in terms of the evidence that has come to me. I'm not all knowing the evidence that has come to me. I'm of all that also bring into question in the evidence that has been engage the department on an ongoing basis in relation to the relation to the relation in the evidence these that someone was having a package of care taken in the evidence that has a ponses to Covid-19. I the case that someone was having a package of care taken in the evidence the point I've just made which the degree of flexibility within the Care Act. I things I've heard from directors of adult social is evices is that there were - family members were more in around. So, you know, Ithink you can't judge too much it within the Care Act. I things I've heard form directors of adult social is evices in the the bis brings up a question about it the flexibilities within the Care Act. You know, i	18	flexibilities that were being used were things like	18	Q.	And again, would that be a matter of concern and
21 the evidence that has come to me. 21 happening across the country? 22 Q. I'm not sure if you were following the Inquiry this 22 A. 23 morning, but the Inquiry heard from Age UK today that 10 of local authorities had tormally invoked the easemet 25 living in their own homes. Were you aware of that? 23 Q. And if that was happening, but only a very small num 26 living in their own homes. Were you aware of that? 25 In the way that the guidance and the legislation had 27 whether the guidance itself was being properly 2 the department on an ongoing basis in relation to 3 understood, or perhaps not complied with, because these 3 easements had provided a review which described a 4 thinks the question it brings into play is – is the 6 That raised precisely this problem, didn't it, of 7 Care Act flexibilities. And whether – if it really was 7 whether – of which was happening, and whether car 8 the case that someone was having a package of care taken 8 needs were being appropriately met? 9 down from three times day to one, you know, once 9 A. Well, it comes back to the point the just made which <	19	delaying financial assessments, that sort of thing. But	19		a matter of interest to the department, having brought
 22 Q. I'm not sure if you were following the Inquiry this morning, but the Inquiry heard from Age UK today that local authorities had reduced care packages for people living in their own homes. Were you aware of that? 23 Itol the inquiry heard from Age UK today that 193 24 Iold them to, might that also bring into question 193 25 Itol them to, might that also bring into question 193 26 A. It this was happening, but only a very small num of local authorities had formally invoked the easement in the way that the guidance and the legislation had 194 25 Itol them to, might that also bring into question 193 26 A. It this was happening and yet there was such a small 194 27 Local, Act Personal partnership that had been engage grey line between Care Act easement implementatio of the opartreports? 28 A. It this the question it brings into play is is the 6 29 A. Yes. 20 A. It this the question it brings into play is is the 6 30 Care Act flexibilities. And whether if it really was 7 31 the case that someone was having a package of care taken 8 32 the case that someone was having a package of care taken 9 31 down from three times a day to one, you know, once 9 32 things I've heard from directors of adult social 10 33 services is that there were family members were more 11 34 things I've heard from directors of adult social 11 34 the discretion ther is it too wide? And 10 34 the discretion ther is it too wide? And 10 34 the discretion ther is it too wide? And 10 34 the discretion ther is it too wide? And 10 34 the wene do lock at that. And again, I would 20 34 the discretion ther is it too wide? And 10 34 the discretion ther is it too wide? And 10 35 the case. 36 And after you came into post in October 2020, the Think 36 And after you came into pos	20	I'm not all knowing, so it's possible. But in terms of	20		in the easement provisions, to know whether that was
 morning, but the Inquiry heard from Age UK today that local authorities had reduced care packages for people living in their own homes. Were you aware of that? told them to, might that also bring into question 193 told them to, might that also bring into question 193 understood, or perhaps not complied with, because these understood, or perhaps not complied with, because these at things were happening and yet there was such a small qrey line between Care Act easement is had provided a review which described a grey line between Care Act easement implemtatio other local authority responses to Covid-19. A I think the question it brings into play is is the Care Act flexibilities. And whether if it really was the case that someone was having a package of care taken 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 9 down from three times a day to one, you know, once 10 a day. I mean, it would be interesting to know what 10 the degree of flexibility within the Care Act. 11 Q. And a further submission to the minister in 12 things I've heard from directors of adult social 12 November 2020 suggested and referred to ADASS to the guidance while you were in post? But I do think that this brings up a question about 14 the flexibilities within the Care Act. You know, is the 18 turning them back on again, as I said, for the purpos of 0 micr	21	the evidence that has come to me.	21		happening across the country?
24local authorities had reduced care packages for people24of local authorities had formally invoked the easement25living in their own homes. Were you aware of that? 1931Local, Act Personal partnership that had been engage the department on an ongoing basis in relation to easements had provided a review which described a grey line between Care Act easement implementatio on the local authorities had formally invoked the easement in the way that the guidance itself was being properly1Local, Act Personal partnership that had been engage the department on an ongoing basis in relation to easements had provided a review which described a grey line between Care Act easement implementatio onthe local authority responses to Covid-19.6A.I think the question it brings into play is is the the case that someone was having a package of care taken 96That raised precisely this problem, didn't it, of whether of which was happening, and whether care needs were being appropriately met?9down from three times a day to one, you know, once 99A. UK Covid-19 Inquiry

1	MS BEATTIE: Thank you, my Lady.
2	LADY HALLETT: Thank you very much, Ms Beattie.
3	That completes the questions we have for you,
4	Ms Dyson. You mentioned the burden on providers. I am
5	acutely conscious of the burden the Inquiry places on
6	material providers and on our witnesses. You may want
7	to take the I'm sure glad news back to the department
8	that the burden that the Inquiry has placed on the
9	department for which you currently work is coming to
10	an end. We haven't finished with the department yet but
11	it is coming to an end. But also, I'm sure it was
12	a great burden on you to have to catch up on what had
13	happened in such fast-moving times when you weren't in
14	post. So thank you very much indeed for all that you
15	did to get yourself up to speed, and for helping the
16	Inquiry to the extent that you have.
17	THE WITNESS: Thank you.
18	LADY HALLETT: Thank you.
19	Very well, I shall return at 10.00 tomorrow.
20	MS CAREY: Thank you, my Lady.
21	(4.20 pm)
22	(The hearing adjourned until 10.00 am the following day)
