

ADDENDUM TO CABINET BRIEFING - 7 May 2020

Additional note for the PM on Covid item

At the end of the Cabinet discussion on the next steps in easing the lockdown: Quad members will contribute although they are not expected to set out any detail of the package they have seen in draft, which has obviously not yet been finalised.

Scientific pre-brief - Background

Prior to Cabinet a scientific briefing was facilitated by the Cabinet Secretary. It was structured as a q&a session with to CMO and CSA and was attended by most Ministers.

We advised Ministers to submit their questions prior to the session and received the following response:

1. **SoS Wales** asked about the 'R' value for Wales and the existence of Regional measurements.
2. **SoS Defence** asked for information on how the UK compared with Germany, and which lockdown measures had been judged to be the most successful.
