

dose²³. The first vaccines were administered on Tuesday 8 December and 4,148,734 people had received their first dose by 16 September 2021²⁴. By age group, almost 100% of individuals aged 55+, 96% of those aged 50-54, 91% of those aged 40-49, 83% of those aged 30-39, 76% of those aged 18-29, and 66% of those aged 16-17 have received their first vaccination (Figure 10). Almost 100% of individuals aged 60+, 97% of those aged 55-59, 93% of those aged 50-54, 86% of those aged 40-49, 74% of those aged 30-39, 61% of those aged 18-29, and 9% of those aged 16-17 have received their second dose. Overall, 3,795,897 people (83% of those aged 16 and over) had received their second dose by 16 September²⁵. There remains a low level of deaths amongst the vaccinated individuals (Figure 4).

Figure 10: Estimated percentage of adults vaccinated by 16 September 2021

The proportion of people surveyed who said they have been vaccinated for Covid-19 is high. 90% of all respondents have already received at least their first vaccine dose. Of those not vaccinated (and small base must be noted), 5% report they are likely to be vaccinated when a vaccine becomes available to them²⁶.
